FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche format and magnetic tape. The annual subscription price for the **Federal Register** paper edition is $375, or $415 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $353; and magnetic tape is $37,500. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $4.50 for each issue, or $4.50 for each group of pages as actually bound; or $1.50 for each issue in microfiche form; or $175.00 per magnetic tape. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 58 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC
WHEN: May 12 and June 15 at 9:00 am
WHERE: Office of the Federal Register, 7th Floor Conference Room, 800 North Capitol Street NW, Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

PHILADELPHIA, PA
WHEN: May 25, at 1:00 pm
WHERE: William J. Green, Jr. Federal Building, Conference Room 6306–10, 600 Arch St. Philadelphia, PA
RESERVATIONS: Federal Information Center 1–800–347–1997

Title 3—

The President

Presidential Determination No. 93–19 of April 15, 1993

Determination Under Section 2(b)(2)(D) of the Export-Import Bank Act of 1945, as Amended: People's Republic of China

Memorandum for the Secretary of State

Pursuant to section 2(b)(2)(D) of the Export-Import Bank Act of 1945, as amended (12 U.S.C. 635(b)(2)(D)), I determine that it is in the national interest for the Export-Import Bank of the United States to extend a loan in the amount of $78,232,982 to the People's Republic of China in connection with the purchase of U.S. equipment and services for Qidashan Iron Ore Mine and Benefication Plant in Liaoning Province.

You are authorized and directed to report this determination to the Congress and publish it in the **Federal Register.**

Rules and Regulations

Federal Register
Vol. 58, No. 78
Monday, April 26, 1993

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Part 1944

RIN 0575–AA18

Housing Preservation Grant Program

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) hereby amends its Housing Preservation Grant Regulations. This action is taken in order to provide repair and rehabilitation assistance to owner(s) of single-or multi-unit rental properties and cooperative housing projects. Further, this action brings the regulation into conformance with existing requirements of the authorizing legislation for the Housing Preservation Grant program, section 533 of the Housing Act of 1949.

EFFECTIVE DATE: May 26, 1993.

FOR FURTHER INFORMATION CONTACT: John Pentecost, Branch Chief, Special Authorities Branch, Multiple Housing Processing Division, FmHA, USDA, Washington, DC 20250, Telephone (202) 720–1606 (This is not a toll-free number).

SUPPLEMENTARY INFORMATION:

Classification

This final review has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined "non-major." It will not result in an annual effect on the economy of $100 million or more, or a major increase in costs or prices for consumers, individual industries, Federal, State or local Government Agencies, or geographic regions. Furthermore, there are no significant adverse effects on competition, employment investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR part 1940, subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the national Environmental Policy Act of 1969, Public Law 91–190, an environmental impact statement is not required.

Intergovernmental Review

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.433, Housing Preservation Grant, and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials (7 CFR part 3015, subpart V, 48 FR 29112, June 24, 1983).

General Information

This final rule incorporates the provisions of section 533 of the Housing Act of 1949, 42 U.S.C. 1490(m), allowing for Housing Preservation Grant assistance to repair and rehabilitate single- and multi-unit rental properties and cooperative housing units, in addition to existing single family housing units.

Discussion of Proposed Rule

A proposed rule was published in the January 15, 1992, issue of the **Federal Register** (57 FR 1678), providing for repair and rehabilitation assistance to owner(s) of single- or multi-unit rental properties and cooperative housing projects. Comments on the proposed rule were invited from the public until March 16, 1992.

Discussion of General Comments

Fifteen comments were received from the public which have been carefully considered. Six comments were received from FmHA employees, three from housing authorities, and six from non-profit entities or others.

1. Five respondents were specific in their opposition to providing repair and rehabilitation assistance to rental properties and co-ops. Such comments received were: "* * * eliminate [assistance] by whatever legal means necessary * * *"; "* * * strong objection to * * * include rental property * * *"; and "* * * Opening up [this program] to rental owners is opening FmHA up to a greater increased potential for fraud, waste, and abuse. * * *" Five respondents were specifically in favor of the proposed change to include rental properties and co-ops with such comments as: "* * * has been long awaited * * *"; "* * * exciting and good news * * *"; and "* * * a long, overdue one. * * *" The Agency considers it has little option but to proceed and attempt to protect the program from potential abuse by quality of applications and intensive monitoring. Therefore, it is proceeding with regulations to include single- or multi-unit rental properties and cooperative housing projects.

2. Two respondents noted the discrepancy in the numbering of sections. Section 1944.662 (Accountability) was added January 27, 1992. This section has been redesignated as § 1944.655. The proposed § 1944.663 (Eligibility of HPG assistance on rental properties or co-ops) has been redesignated as § 1944.662. And the proposed § 1944.669 (Ownership agreement between HPG grantee and rental property owner or co-op) has been redesignated as § 1944.663. These changes are being done to make the content of §§ 1944.662 and 1944.663 in succession since there is a correlation between the sections.

Discussion of Specific Comments

1. Section 1944.651(c). Two respondents questioned the line: "Any combination proposal will not be accepted." FmHA discussed this with previous grantees and felt it was needed to avoid confusion and to make the tracking of data easier. FmHA will not allow a preapplication where assistance is proposed both for homeowners and rental properties/co-ops. However, FmHA will allow an entity to submit two, separate preapplications for different proposals (one being for homeowner assistance and the other to assist rental properties/co-ops). However, FmHA must abide by the law limiting any entity to no more than 50% of the funds. After discussing this fact

VOL 58 ISS 78 AP 26 1993 UMI

with the respondents, both were in favor of this approach.

2. Section 1944.652. One respondent asked if this program would apply to condominium owners. The program is not available to condominium owners. The same respondent suggested we revise our use of the term "individual housing" in that in conflicts with § 1944.661. § 1944.652 refers to the type of property involved, e.g., individual housing, rental properties, or co-ops, whereas § 1944.651 refers to the individual homeowners. Individual housing is that which is not used for rental purposes. However, a typical single-family home may be a rental property.

3. Section 1944.655. One respondent recommended we include the requirements of FmHA Instruction 1940–Q on lobbying in this regulation. This has been added as § 1944.657, "Restrictions on lobbying".

4. Section 1944.656. On respondent suggested the definition of rental properties and the definition of cooperative (co-op) be revised to conform to that for homeowners and meet the income requirements of § 1944.661. FmHA believes the definitions in the same section of very low-income and low-income along with the inclusion in § 1944.661 (a) for income (individual homeowners) and § 1944.662 (b)(1) (tenant eligibility) is sufficient. FmHA intends the public to differentiate between assistance to single family homeowners vs. assistance on rental properties and co-ops where the secondary beneficiary is the tenant (rental properties) or the owner of a co-op unit who is in the very low- or low-income categories.

5. Section 1944.656. Another respondent suggested we use the total number of habital rooms compared to the number of people inhabiting the unit in defining overcrowding. FmHA believes the latter is more appropriate. An example would be a 2 bedroom house with 4 other habital rooms. Their suggestion would allow 6 people under a "habital room" theory compared to 4 people using the "number of people" theory. In the former example with 6 people and only two bedrooms, this would average 3 people per bedroom or 2 in one bedroom and 4 in the second bedroom (or 3 and 3) compared to a maximum of 2 per bedroom. FmHA believes the latter is more appropriate in preventing overcrowding.

6. Section 1944.658 (e). FmHA had included in the proposed rule, subparagraph (1) and one commentator noted that this subparagraph would virtually eliminate applicants ineligible by virtue of an identity of interest. FmHA has removed this subparagraph. We did, however, leave in the subparagraph stating that an applicant for a grant would be ineligible if their proposal was based *solely* on an identity of interest.

7. Section 1944.660. Two FmHA employees commented that this section and related exhibits removed the State Office as the possible contact point and administrator of the HPG program. Due to recent changes within the Agency, we have revised this section and related areas, so that the State Director may designate which office(s) (State and/or District) is the initial point of contact and administrator of the HPG program for processing and servicing purposes. At the present time, the majority of the States utilize the District Offices for servicing the HPG grantees.

8. Section 1944.661. One FmHA employee suggested that FmHA should be stronger on the requirements of tenant certification of income to be sure that the people assisted are truly income qualified. FmHA has not noted this to be a problem over the past years with the HPG program. The grantee is already required to certify the incomes. FmHA is required to monitor the recipient files of the grantee to comply with the grantees' certification of income requirements. FmHA does not believe the use of an FmHA approved form would be consistent with the intent of the program which is basically to let the grantee use or establish its own procedures and forms to address requirements.

9. Section 1944.662. FmHA received one comment on this section. Basically, the regulation states that the rental property or co-op must be owned at the time of receiving assistance from the HPG grantee vs. the existing requirement where a homeowner must have owned and resided in the home for 1 year in order to receive assistance. The respondent believed this section to be ill-conceived and that the regulation would feed into an abuse of the program intent. FmHA believes that there is no need to change the existing regulation concerning the 1 year ownership requirement for homeowners. However, a 1 year ownership requirement for rental properties and co-ops would be a hindrance to existing tenants or future tenants in providing them a habital area to reside. Requiring the owner of a rental property to have owned the property for 1 year prior to receiving assistance would have a negative effect on tenants. Therefore, FmHA is not imposing this restriction on rental property owners or co-ops.

10. Section 1944.663. Numerous comments were received concerning the ownership agreement between the HPG grantee and rental property owners or co-ops from all parties. Each comment is referenced by subparagraph below.

(a) One respondent was not clear when the 5 year period started that is referenced in the first paragraph of this section. It was suggested that the 5 year period start at the date the rehabilitation work is complete. FmHA believes this would cause undue monitoring hardship on the grantee in that rehabilitation on units may be completed at different times. "Available for occupancy" indicated *when* a unit is available and the tenant may be occupying the unit while it is being rehabilitated and/or repaired. The rental property owner will need to notify the grantee of any new tenant during the minimum 5 year restrictive period. The specific requirements in this section are primarily for the benefit of the tenants. After reviewing the above comment, we have revised this paragraph to note that "* * * the following conditions are met by the rental property owner(s) or by the co-op during a minimum 5 year restrictive period beginning on the date agreed upon in the agreement between the grantee and the rental property owner(s) or co-op. * * *" FmHA feels that this will be easier for all to monitor and that there would be no question as to the date.

(b) One respondent commented that monitoring the lease conditions, tenant income verification, and occupancy availability would be difficult for the grantee to service when the grantee would have no rent approval authority. The grantee may require that the rental property owner submit a copy of the lease to be utilized for units that are or will be repaired or rehabilitated. The grantee may also spot-check the files of the rental property owner and/or visit with the tenants. As to occupancy availability, the grantee could require that the rental property owner notify the grantee when a unit where HPG assistance was provided is available for occupancy. FmHA does not believe that rent approval authority should be required to obtain these goals. As to rental approval authority for income verification of tenants, FmHA would need to establish a relationship with FmHA Instruction 1930–C (available in any FmHA Office). FmHA feels this would be overly burdensome to grantees and to FmHA. Therefore, FmHA is not considering rental approval authority by grantees as this time.

(c) Subparagraph (a)(1). One respondent's concern was that FmHA should require in the Ownership Agreement that the lease should not allow for increased rent due to

preservation work having been completed. This subparagraph has been revised to incorporate this comment. Another person was concerned that the monitoring of the pass-through savings to the tenants would be difficult and that the program could become "* * * a source of subsidy for slum landlords. * * *" FmHA agrees that the monitoring of the pass-through savings will be difficult. However, since use of HPG funds to repay existing debt on property assisted is not authorized, any other pass-through savings will have to be specifically identified and then it can be properly monitored.

(d) Subparagraph (a)(6). One respondent stated that this subparagraph on owner default sounded good in theory, but that it was not very realistic. They further questioned who would be responsible for monitoring to assure that the owner would comply with this condition. The grantee will be the primary one responsible for monitoring and FmHA will need to monitor the grantee for compliance with all areas of the regulations. This specific area was mandated by Congress and FmHA feels its regulation is sufficient at the present time. In the event the owner(s) fails to carry out the stated requirements, the Office of General Counsel will need to become involved.

(e) Subparagraph (b)(2). One respondent noted a discrepancy in paragraph references. This subparagraph has been revised to reference § 1944.662(b) and not § 1944.662(b)(2).

(f) Subparagraph (b)(3). This subparagraph along with § 1944.662(b)(3) (as noted in the proposed rule) prohibited owner(s) of rental properties or members of their immediate families who reside in the building to be repaired/rehabilitated to have their unit repaired or rehabilitated. One respondent noted that the intent of the law was obvious, but not supportable nor well served by the prohibition. Another respondent commented that allowing rehabilitation on a rental dwelling that houses an owner/family member opens the program up to potential abuse and that no properties where this exists be eligible for assistance. It was FmHA's intent to eliminate assistance on units (not properties) occupied by an owner/family member. An example would be a four-plex where three of four units were owned/occupied by an owner/family member. However, FmHA has revised these sections and will now allow units occupied by an owner or members of their immediate family units to be repaired, providing they meet other requirements, including the very low- or low-income categories. Grantees and FmHA will need to monitor closely to prevent abuse.

(11) Section 1944.667(a). No comments were received. However, the National Office noted that "permanent relocation" should be added to the term temporary relocation.

(12) Section 1944.672(a)(1). One respondent questioned whether the 25 unit threshold applied to total units in multi-unit dwellings or refers to a total of units in a complex (more than one building) or only within one building. The regulation will follow FmHA Instruction 1940–G (available in any FmHA office) and this section refers to a total of units (one or more buildings) within the same complex, project, etc., owned by the same entity or a co-op where there is one or more buildings.

(13) Section 1944.679 received numerous comments from all parties concerning the project selection criteria and each comment is referenced by the subparagraph.

(a) One respondent suggested that the awarding of points for leveraging be limited to non-federal sources of funds and that it would encourage some innovative funding opportunities involving state, public, and private participation in the HPG program. FmHA realizes that there have been applicants who have received other sources of funding (federal) whereas other applicants are not eligible for the same source of finding. An example would be Indian tribes who receive funds from the Bureau of Indian Affairs. FmHA does not believe that it would be in the best interest of the majority of the applicants to eliminate points for leveraged funds to federal sources.

(b) Subparagraph (b)(2). One FmHA employee suggested that the selection criteria would be more useful if they were tied to objective points that are either unchangeable or that could be controlled directly by the grantee and that subparagraphs (1), (3), (4), (5), and (6) would meet that test, but that subparagraph (2) would not meet the objectivity test. He recommended that § 1944.679(c) be then based only on subparagraph (b)(2). The intent of subparagraph (c) is to virtually eliminate FmHA's previous policy of using a "lottery system" to rank preapplications who had the same score. By introducing more elements to rank the preapplications and by § 1944.679(e), we believe the goal will be accomplished.

(c) Subparagraph (b)(3). One respondent felt that including the HPG experience factor with other related experience was good and that it would take away the preference given to the previous grantees.

(d) Subparagraph (b)(5). One respondent felt that the sliding scale of points for use of administrative funds was an improvement. However, it was recommended that subparagraph (b)(5)(i) should be reworded from "twenty-one percent or more" to "more than twenty percent". This would eliminate the question of "where does 20.6% fall?" This subparagraph has been changed to reflect the suggestion.

(e) Subparagraph (b)(6). One respondent felt the definition of overcrowding would be helpful, but questioned the wording "component for alleviating". FmHA is not expanding the regulation to explain the terminology "component for alleviating," as it would limit an applicant's approach. However, the applicant must explain in the preapplication (Statement of Activities) how they are going to ease or reduce the overcrowding.

(f) Subparagraph (b)(7). FmHA received a number of comments on this subparagraph (as noted in the proposed rule). All of them urged FmHA to remove this subparagraph. FmHA intended on awarding additional points for rental property or co-op proposals based on an owner extending the time period for occupancy availability to very low- and low-income tenants past the 5 year period, e.g., five points for 6–8 years, ten points for 9–10 years, and 15 points for 11 or more years. The intent was to extend the availability of such units past that which was required for rental properties and co-ops. However, due to the number of responses which were all opposed, FmHA has eliminated this subparagraph, but revised subparagraph (c) to comply with the law.

14. Section 1944.679(c). This paragraph revises FmHA's previous procedure noted in Administrative Notices over the years and virtually eliminates FmHA "lottery" in ranking applicants as a last resort. In addition, this subparagraph has been revised due to the elimination of subparagraph (b)(7) (published in the proposed rule). Basically, the revision now notes that when two (or more) applicants applying for a grant where the assistance is for rental properties or co-ops tie, part of the ranking will be based on the number of years the units are available for occupancy under the program. Ranking will be based from most to least number of years.

15. Section 1944.682. One respondent recommended that Exhibit G to this FmHA Instruction (which was not published in the proposed rule, but is available in any FmHA office) include a column indicating the estimated number of units. FmHA has done so.

§ 1944.656 Definitions.

VOL 58 ISS 78 AP 26 1993 UMI

16. Section 1944.682(a). One FmHA employee questioned when the grant agreement could be signed by the applicant (grantee) and FmHA representative, i.e., based on approval date and/or obligation date. The grant agreement can be signed on or after the date of obligation. However, FmHA must notify the applicant (grantee) of the obligation date. FmHA can sign the grant agreement on the same day or after it is signed by the grantee. If the mail is used, obviously the above is not feasible for signing on the same date. The first line of the grant agreement includes the date of signature by the FmHA representative.

17. Section 1944.683(c). One respondent questioned if FmHA must meet with the grantee after submission of the quarterly report. The National Office recommends such meetings, if at all possible. However, FmHA *must* either contact or meet with the grantee in person when there are questions or problems noted in the quarterly report, depending on the severity. This subsection only states that the grantee should be prepared to meet with FmHA and has been unchanged.

List of Subjects for 7 CFR Part 1944

Grant programs—Housing and community development, Home improvement, Loan programs—Housing and community development, Nonprofit organization, Rural housing.

Therefore, part 1944 of chapter XVIII, title 7, Code of Federal Regulations, is amended as follows:

PART 1944—HOUSING

1. The authority citation for part 1944 continues to read as follows:

Authority: 7 U.S.C. 1989; 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

2. Sections 1944.651 through 1944.700 of subpart N of part 1944 are revised to read as follows:

Subpart N—Housing Preservation Grants

§ 1944.651 General.

(a) This subpart sets forth the policies and procedures for making grants under section 533 of the Housing Act of 1949, 42 U.S.C. 1490(m), to provide funds to eligible applicants (hereafter also referred to as grantee(s)) to conduct housing preservation programs benefiting very low- and low-income rural residents. Program funds cover part or all of the grantee's cost of providing loans, grants, interest reduction payments or other assistance to eligible homeowners, owners of single or multiple unit rental properties or for the benefit of owners (as occupants) of consumer cooperative housing projects (hereafter also referred to as co-ops). Such assistance will be used to reduce the cost of repair and rehabilitation, to remove or correct health or safety hazards, to comply with applicable development standards or codes, or to make needed repairs to improve the general living conditions of the resident(s), including improved accessibility by handicapped persons.

(b) The Farmers Home Administration (FmHA) will provide Housing Preservation Grant (HPG) assistance to grantees who are responsible for providing assistance to eligible persons without discrimination because of race, color, religion, sex, national origin, age, familial status, or handicap if such person has capacity to contract.

(c) The preapplication must only address a proposal to finance repairs and rehabilitation activities to individual housing or rental properties or co-ops. Any combination proposal will not be accepted.

(d) Any processing or servicing activity conducted pursuant to this subpart involving authorized assistance to FmHA employees, members of their families, known close relatives, or business or close personal associates, is subject to the provisions of subpart D of part 1900 of this chapter. Applicants for this assistance are required to identify any known relationship or association with an FmHA employee.

§ 1944.652 Policy.

(a) The policy of FmHA is to provide HPG's to grantees to operate a program which finances repair and rehabilitation activities to individual housing, rental properties, or co-ops for very low- and low-income persons. Grantees are expected to:

(1) Coordinate and leverage funding for repair and rehabilitation activities with housing and community development organizations and/or activities operating in the same geographic area; and

(2) Focus the program to rural areas and smaller communities so that it serves very low- and low-income persons.

(b) FmHA intends to permit grantees considerable latitude in program design and administration. The forms or types of assistance must provide the greatest long term benefit to the greatest number of persons residing in individual housing, rental properties, or co-ops needing repair and rehabilitation.

(c) Repairs and rehabilitation activities affecting properties on or eligible for listing on the National Register of Historic Places will be accomplished in a manner that supports national historic preservation objectives as specified in § 1944.673 of this subpart.

§ 1944.653 Objective.

The objective of the HPG program is to repair or rehabilitate individual housing, rental properties, or co-ops owned and/or occupied by very low- and low-income rural persons. Grantees will provide eligible homeowners, owners of rental properties, and owners of co-ops with financial assistance through loans, grants, interest reduction payments or other comparable financial assistance for necessary repairs and rehabilitation.

§ 1944.654 Debarment and suspension—drug-free workplace.

(a) For purposes of this subpart, Exhibit A of FmHA Instruction 1940–M (available in any FmHA office) requires all FmHA applicants for an HPG to sign and submit with their preapplication, Form AD–1047, "Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions," which basically states that the applicant has not been debarred or suspended from Government assistance. Further, all grantees after receiving a HPG must obtain a signed certification (Form AD–1048, "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions") from all persons or entities (excluding homeowner recipients) that the grantee does business with as a result of the HPG. Grantees are responsible for informing these persons or entities of the provisions of Exhibit A of FmHA Instruction 1940–M (available in any FmHA Office) and of maintaining Form AD–1048 in the grantee's office.

(b) Grantees must also be made aware of the Drug-free Workplace Act of 1988 requirements found in Exhibit A of FmHA Instruction 1940–M (available in any FmHA office). For this subpart, a grantee is defined as any organization who applies for or receives a direct grant from FmHA. All preapplications must include a signed Form AD–1049, "Certification Regarding Drug-free Workplace Requirements (Grants) Alternative I—Grants Other Than Individuals."

§ 1944.655 Accountability.

Applicants should be made aware of the accountability requirements of persons paid to influence the making of an FmHA grant as described in subpart S of part 1940 of this chapter.

§ 1944.656 Definitions.

References in this subpart to District, State, National and Finance Offices, and to District Director, State Director, and Administrator refer to FmHA offices and officials and should be read as prefaced by FmHA. Terms used in this subpart have the following meanings:

Adjusted annual income. As defined in § 1944.6 of subpart A of part 1944 of this chapter.

Applicant or grantee. Any eligible organization which applies for or receives HPG funds under a grant agreement.

Cooperative (co-op). For the purposes of the HPG program, a cooperative (co-op) is one which:

(1) Is a corporation organized as a consumer cooperative;

(2) Will operate the housing on a nonprofit basis solely for the benefit of the occupants; and

(3) Is legally precluded from distributing, for a minimum period of 5 years from the date of HPG assistance from the grantee, any gains or profits from operation of the co-op. For this purpose, any patronage refunds to occupants of the co-op would not be considered gains or profits. A co-op may accept non-members as well as members for occupancy in the project.

Grant agreement. The contract between FmHA and the grantee which sets forth the terms and conditions under which HPG funds will be made available. (See Exhibit A of this subpart which is available in any FmHA office.)

Homeowner. For the purposes of the HPG program, a homeowner is one who can meet the conditions of income and ownership under § 1944.661 of this subpart.

Household. For the purposes of the HPG program, a household is defined as all persons living all or part of the next 12 months in a unit or dwelling assisted with HPG funds.

Housing preservation. The repair and rehabilitation activities that contribute to the health, safety, and well-being of the occupant, and contribute to the structural integrity or long-term preservation of the unit. As a result of these activities, the overall condition of the unit or dwelling must be raised to meet FmHA Thermal Standards for existing structures and applicable development standards for existing housing recognized by FmHA in subpart A of part 1924 of this chapter or standards contained in any of the voluntary national model codes acceptable upon review by FmHA. Properties included on or eligible for inclusion on the National Register of Historic Places are subject to the standards and conditions of § 1944.673 of this subpart.

Low income. An adjusted annual income that does not exceed the "lower" income limit according to size of household as established by the United States Department of Housing and Urban Development (HUD) for the county or Metropolitan Statistical Area (MSA) where the property is located. Maximum low-income limits are set forth in exhibit C of subpart A of this part (available in any FmHA office).

Organization. An organization is defined as one of the following:

(1) A State, commonwealth, trust territory, other political subdivision, or public nonprofit corporation authorized to receive and administer HPG funds;

(2) An American Indian tribe, band, group, nation, including Alaskan Indians, Aleuts, Eskimos and any Alaskan Native Village, of the United States which is considered an eligible recipient under the Indian Self-Determination and Education Assistance Act (Public Law (Pub. L.) 93–638) or under the State and Local Fiscal Assistance Act of 1972 (Pub. L. 92–512);

(3) A private nonprofit corporation that is owned and controlled by private persons or interests for purposes other than making gains or profits for the corporation, is legally precluded from distributing any gains or profits to its members, and is authorized to undertake housing development activities; or

(4) A consortium of units of government and/or private nonprofit organizations which is otherwise eligible to receive and administer HPG funds and which meets the following conditions:

(i) Be comprised of units of government and/or private nonprofit corporations that are close together, located in the same state, and serve areas eligible for FmHA housing assistance; and

(ii) Have executed an agreement among its members designating one participating unit of government or private nonprofit corporation as the applicant or designating a legal entity (such as a Council of Governments) to be the applicant.

Overcrowding. Overcrowding is defined as having more than the ideal number of persons residing in a unit, as indicated in the following table:

No. of bedrooms	Ideal No. of persons
0	2
1	2
2	4
3	6
4	8
5	10

Rental properties. Rental properties are defined as single-unit or multi-unit dwellings used for occupancy by tenants, owners, or members of an owner's immediate family.

Rural area. The definition in § 1944.10 of subpart A of part 1944 of this chapter applies.

Tenant. Any person who resides in a single- or multi-unit rental property.

Very low-income. An adjusted annual income that does not exceed the very low-income limit according to size of household as established by HUD for the county of MSA where the property is located. Maximum very low-income limits are set forth in exhibit C of subpart A of this part (available in any FmHA office).

§ 1944.657 Restrictions on lobbying.

All applicants must comply with FmHA Instruction 1940–Q (available in any FmHA office) which prohibits applicants of Federal grants from using appropriated funds for lobbying the Federal Government in connection with a specific grant.

§ 1944.658 Applicant eligibility.

(a) To be eligible to receive a grant, the applicant must:

(1) Be an organization as defined in § 1944.656 of this subpart;

(2) Have the necessary background and experience on the part of its staff or governing body with proven ability to perform responsibility in the field of low-income rural housing development, repair and rehabilitation, or have other business management or administrative experience which indicates an ability to operate a program providing repair and rehabilitation financial assistance;

(3) Legally obligate itself to administer HPG funds, provide an adequate accounting of the expenditure of such funds in compliance with the terms of this regulation, the grant agreement, and 7 CFR parts 3015 or 3016 (available in any FmHA office), as appropriate, and comply with the grant agreement and FmHA regulations; and

(4) If the applicant is engaged in or plans to become engaged in any other activities, provide sufficient evidence and documentation that they have adequate resources, including financial resources, to carry on any other programs or activities to which they are committed without jeopardizing the success and effectiveness of the HPG project.

VOL
58
ISS
78
AP
26
1993
UMI

(b) An applicant will *not* be considered eligible if it is a nonprofit entity *and* its proposal is based *solely* on an identity of interest, as defined in § 1924.4(i) of subpart A of part 1924 of this chapter, between the applicant and the owner(s) of the proposed dwelling or co-op to be rehabilitated or repaired.

§ 1944.659 [Reserved]

§ 1944.660 Authorized representative of the HPG applicant and FmHA point of contact.

(a) FmHA will deal only with authorized representatives designated by the HPG applicant.

(b) The State Director will designate either the State Office and/or the District Office as the processing office and/or the servicing office for the HPG program. The State Director's selection may be based on staffing, total program size, number of preapplications anticipated, type of applicants, or similar criteria. The State Director must publish this designation each year at the time the **Federal Register** is published informing the public of the open period for acceptance of preapplications as outlined in § 1944.678 of this subpart.

§ 1944.661 Individual homeowners—eligibility for HPG assistance.

The individual homeowners assisted must have income that meets the very low- or low-income definitions, be the owner of an individual dwelling at least 1 year prior to the time of assistance, and be the intended occupant of the dwelling subsequent to the time of assistance. The dwelling must be located in a rural area and be in need of housing preservation assistance. Each homeowner is required to submit evidence of income and ownership for retention in the grantee's files.

(a) *Income.* Determination of income will be made in accordance with § 1944.8 of subpart A of this part. All members of the household, as defined in § 1944.656 of this subpart, must be included when determining income. Grantees must use certifications, may require additional information from the homeowner, and should seek advice from their attorney.

(b) *Ownership.* Evidence of ownership may be a photostatic copy of the instrument evidencing ownership. Methods for assuring the intention of the homeowner to continue to occupy the unit after assistance will be established by the grantee. Any of the following will satisfy or fulfill this requirement of ownership:

(1) Full marketable title.

(2) An undivided or divided interest in the property to be repaired or rehabilitated when not all of the owners are occupying the property. HPG assistance may be made in such cases when:

(i) The occupant has been living in the house for at least 1 year prior to the date of requesting assistance;

(ii) The grantee has no reason to believe the occupant's position of owner/occupant will be jeopardized as a result of the improvements to be made with HPG funds; and

(iii) In the case of a loan, and to the extent possible, the co-owner(s) should also sign the security instrument.

(3) A leasehold interest in the property to be repaired or rehabilitated. When the potential HPG recipient's "ownership" interest in the property is based on a leasehold interest, the lease must be in writing and a copy must be included in the grantee's file. The unexpired portion of the lease must not be less than 5 years and must permit the recipient to make modifications to the structure without increasing the recipient's lease cost.

(4) A life estate, with the right of present possession, control, and beneficial use of the property.

(5) Land assignments may be accepted as evidence of ownership only for American Indians living on a reservation, when historically the permits have been used by the tribe and have had the comparable effect of a life estate.

(c) *Other evidence of ownership.* The following items may be accepted as evidence of ownership if a recorded deed cannot be provided:

(1) Any legal instrument, whether or not recorded, which is commonly considered evidence of ownership.

(2) Evidence that the person(s) receiving assistance from the HPG grantee is listed as the owner of the property by the local taxing authority and is responsible for any real estate taxes.

(3) Affidavits by others in the community that the person(s) receiving assistance from the HPG grantee has occupied the property as the apparent owner for a period of not less than 10 years, and is generally believed to be the owner.

§ 1944.662 Eligibility of HPG assistance on rental properties or co-ops.

(a) *Ownership.* The owner(s) of rental properties or co-ops must own the dwelling at the time of receiving assistance from the HPG grantee. The dwelling must be located in a rural area and be in need of housing preservation assistance. Evidence of ownership may be a photostatic copy of the instrument evidencing ownership. Owners of rental properties and co-ops are required to submit evidence of ownership for retention in the grantee's files. Any of the following will satisfy or fulfill this requirement of ownership:

(1) Full marketable title.

(2) An undivided or divided interest in the property to be repaired or rehabilitated.

(3) A leasehold interest in the property to be repaired or rehabilitated. Ownership interest in the property is based on a leasehold interest. The lease must be in writing and a copy must be included in the grantee's file. The unexpired portion of the lease must not be less than 5 years and must permit the recipient to make modifications to the structure without increasing the recipient's lease cost.

(4) Land assignments may be accepted as evidence of ownership only for American Indians living on a reservation, when historically the permits have been used by the tribe and have had the comparable effect of a life estate.

(b) *Tenant eligibility.* The following requirements must be met in order for a unit within a rental property or co-op to be assisted with HPG funds:

(1) The tenant must have income that meets the very low- or low-income definition.

(2) The tenant must be the intended occupant of the unit, but is not required to have resided previously in the dwelling.

(3) Any owner(s) who receives assistance from an HPG grantee or a member of the immediate family of the owner(s), who also resides in the unit within the dwelling to be repaired or rehabilitated is eligible to have their unit repaired or rehabilitated, if they are income eligible and meet all other requirements.

(c) *Identity of interest.* When an identity of interest, as defined in § 1924.4(i) of subpart A of part 1924 of this chapter, exists between a nonprofit entity and the owner(s) of a dwelling, the property is not eligible for assistance.

§ 1944.663 Ownership agreement between HPG grantee and rental property owner or co-op.

HPG assistance may be provided by a grantee with respect to rental properties or co-ops only if the following conditions are met by the rental property owner(s) or by the co-op during a minimum 5 year restrictive period beginning on the date agreed upon in the agreement between the grantee and the rental property owner (or co-op). The HPG grantee is responsible for preparing, executing, and monitoring for compliance, the ownership agreement with the owner(s) of the rental property or the co-op. The rental property owner(s) or the co-ops are required to enter into an ownership agreement with the grantee to assure compliance with the requirements of this section.

(a) *Ownership agreement.* At a minimum, the ownership agreement must include the following clauses:

(1) The owner(s) agrees to make the units repaired or rehabilitated available for occupancy to very low- or low-income persons for a period of not less than 5 years, such restrictive period beginning on the date agreed upon in the agreement between the grantee and the rental property owner(s) or co-op.

(2) The owner(s) agrees to pass on to the tenants any reduction in the debt service payments resulting from the HPG assistance provided by the HPG grantee to the owner(s).

(3) The owner(s) of rental properties agrees not to convert the units to condominium ownership. In the case of co-ops, the owner(s) agrees not to convert the dwelling(s) to condominium ownership or any form of cooperative ownership not eligible under this section. This paragraph (a)(3) is subject to the restrictive period noted in paragraph (a)(1) of this section.

(4) The owner(s) agrees not to refuse to rent a unit to any person solely because the person is receiving or is eligible to receive assistance under any Federal, State, or local housing assistance program.

(5) The owner(s) agrees that the units repaired or rehabilitated will be occupied or available for occupancy by persons of very low- or low-income.

(6) The owner(s) agrees to enter into and abide by written leases with the tenants and that such leases shall provide that the tenants may be evicted only for good cause.

(7) The owner(s) agrees that, in the event the owner(s) or the owner's successors in interest fail to carry out the requirements of this section during the applicable period, they shall make a payment to FmHA in an amount that equals the total amount of assistance provided by the grantee plus interest thereon (without compounding) for each year and any fraction thereof that the assistance was outstanding. The interest rate shall be that as determined by FmHA at the time of infraction taking into account the average yield on outstanding marketable long-term obligations of the United States during the month preceding the date on which the assistance was initially made available.

(8) The owner(s) agrees that, notwithstanding any other provisions of law, the HPG assistance provided to the owner(s) shall constitute a debt which is payable in the case of any failure of this section and shall be secured by a security instrument provided by the owner(s) or co-op to the grantee, that provides for FmHA to take such action upon incapacity or dissolution of the grantee.

(9) The owner(s) agrees and certifies that the assistance is being made available in conformity with Public Law 88–352, the "Civil Rights Act of 1964," and Public Law 90–284, the "Civil Rights Act of 1968."

(b) *Responsibilities of the grantee.* The grantee is responsible for insuring through verification and monitoring that the areas listed below are in compliance:

(1) That HPG funds used for loans, grants, or interest reduction payments providing repair or rehabilitation assistance to owners of rental properties or co-ops are not in excess of 75 percent of the total cost of all repairs and rehabilitation activities eligible for HPG assistance.

(2) That the owner(s) is not repairing and/or rehabilitating any unit unless it meets the requirements of § 1944.662 (b)(3) of this subpart.

(3) That rental property units being repaired and/or rehabilitated and occupied by owners or members of the owner's immediate family meet all other requirements of this subpart.

(4) That, for multi-units not considered eligible as a result of paragraph (b)(2) or (b)(3) of this section, the grantee and owner(s) shall agree on a method, if any is needed, of determining the prorata share of repairs and rehabilitation activities to the dwelling, based on a percentage of the ineligible units to the total dwelling.

§ 1944.664 Housing preservation assistance.

(a) Grantees are responsible for providing loans, grants, or other comparable assistance to homeowners, owners of rental properties, or co-ops for housing preservation as described in § 1944.656 of this subpart.

(b) HPG funds used for loans, grants, or interest reduction payments to provide rental repair and/or rehabilitation assistance to owners of rental properties or co-ops shall not exceed the requirement noted in § 1944.663(b)(1) of this subpart.

(c) Authorized housing preservation assistance includes, but is not limited to, cost of labor and materials for:

(1) Installation and/or repair of sanitary water and waste disposal systems, together with related plumbing and fixtures, which will meet local health department requirements;

(2) Energy conservation measures such as:

(i) Insulation; and

(ii) Combination screen-storm windows and doors;

(3) Repair or replacement of the heating system including the installation of alternative systems such as woodburning stoves or space heaters, when appropriate and if local codes permit;

(4) Electrical wiring;

(5) Repair of, or provision for, structural supports and foundations;

(6) Repair or replacement of the roof;

(7) Replacement of severely deteriorated siding, porches or stoops;

(8) Alterations of the unit's interior or exterior to provide greater accessibility for any handicapped person;

(9) For properties listed on or eligible for the National Register of Historic Places, activities associated with conforming repair and rehabilitation activities to the standards and/or design comments resulting from the consultation process contained in § 1944.673 of this subpart;

(10) Necessary repairs to manufactured housing provided:

(i) For homeowners only, the recipient owns the home and the site on which the home is situated and the homeowner has occupied that home on that site for at least 1 year prior to receiving HPG assistance; and

(ii) For homeowners, owners of single- or multiple-unit rental properties, and co-ops, the manufactured housing is on a permanent foundation or will be put on a permanent foundation with HPG funds. Advice on the requirements for a permanent foundation is available from FmHA. Guidance may be found in § 1944.223(e) of subpart E of this part and in exhibit J of subpart A of part 1924 of this chapter;

(11) Additions to any dwelling (conventional or manufactured) only when it is clearly necessary to alleviate overcrowding or to remove health hazards to the occupants; or

(12) Relocation costs either permanent or temporary for assistance to rental properties or co-ops, as noted in § 1944.667 of this subpart.

(d) HPG funds may be used for payment of incidental expenses directly related to accomplishing authorized activities such as fees for connection of utilities (water, sewer, gas, electric), credit reports, surveys, title clearance, loan closing, inspections, and architectural or other technical services. All fees will be in accordance with local prevailing rates and so documented.

VOL 58 ISS 78 AP 26 1993 UMI

(e) HPG funds may be used to make improvements that do not contribute to the health, safety and well being of the occupant or do not materially contribute to the structural integrity or long-term preservation of the unit. The percentage of the funds to be used for such purposes must not exceed 20 percent of the total funding for the unit(s) and/or dwelling, and such work must be combined with improvements listed as eligible under paragraph (c) of this section. These improvements may include, but are not limited to the following:

(1) Painting;

(2) Paneling;

(3) Floor covering, including carpeting;

(4) Improving clothes closets or shelving;

(5) Improving kitchen cabinets;

(6) Air conditioning; or

(7) Landscape plantings.

(f) Under the following conditions, HPG funds may be used to reimburse the grantee for authorized housing preservation activities performed by employees of the grantee where the grantee acts as a construction contractor and furnishes construction services:

(1) The grantee must demonstrate that such work performed by the grantee results in cost savings in terms of time and labor over cost for such work prevailing in the area;

(2) The grantee has established a process for third party review of all performance by a local government, building inspector or other independent party;

(3) The grantee has established or makes available a process that provides for consumer protection to the individual homeowner, owner of a rental property, or co-op assisted; and

(4) The grantee's accounting system provides a clear delineation between administrative costs and construction contractor (non-administrative) costs.

(g) HPG funds may *not* be used to:

(1) Assist in the construction or completion of an addition (excluding § 1944.664(c)(11)) or a new dwelling.

(2) Refinance any debt or obligation of the grantee, the individual homeowner, owners of a rental property, or co-ops' other than obligations incurred for eligible items covered by this section entered into after the date of agreement with the HPG grantee.

(3) Repair or rehabilitate any property located in the Coastal Barrier Resources System.

§ 1944.665 Supervision and inspection of rehabilitation and repair work.

Grantees are responsible for supervising all rehabilitation and repair work financed with HPG assistance. After all HPG work has been completed, a final inspection must be done by a disinterested third party, such as local building and code enforcement officials. If there are no such officials serving the area where HPG activities will be undertaken, or if the grantee would also normally make such inspections, the grantee must use qualified contract or fee inspectors.

§ 1944.666 Administrative activities and policies.

Grant funds are to be used primarily for housing repair and rehabilitation activities. Use of grant funds for direct and indirect administrative costs is a secondary purpose and must not exceed 20 percent of the HPG funds awarded to the grantee.

(a) Administrative expenses may include:

(1) payment of reasonable salaries or contracts for professional, technical, and clerical staff actively assisting in the delivery of the HPG project.

(2) Payment of necessary and reasonable office expenses such as office rental, supplies, utilities, telephone services, and equipment. (Any item of nonexpendable personal property having a unit value of $1,000 or more, acquired with HPG funds, will be specifically identified to FmHA in writing.)

(3) Payment of necessary and reasonable administrative costs such as workers' compensation, liability insurance, and the employer's share of Social Security and health benefits. Payments to private retirement funds are permitted if the grantee already has such a fund established and ongoing.

(4) Payment of reasonable fees for necessary training of grantee personnel.

(5) Payment of necessary and reasonable costs for an audit upon expiration of the grant agreement.

(6) Other reasonable travel and miscellaneous expenses necessary to accomplish the objectives of the specific HPG grant which were anticipated in the individual HPG grant proposal and which have been approved as eligible expenses at the time of grant approval.

(b) HPG administrative funds may *not* be used for:

(1) Preparing housing development plans and strategies except as necessary to accomplish the specific objectives of the HPG project.

(2) Substitution of any financial support previously provided or currently available from any other source.

(3) Reimbursing personnel to perform construction related to housing preservation assistance. (Non-administrative funds may be used if construction is for housing preservation assistance under the provisions of § 1944.64(f) of this subpart.

(4) Buying property of any kind from persons receiving assistance from the grantee under the terms of the HPG agreement.

(5) Paying for or reimbursing the grantee for any expense or debts incurred before FmHA executes the grant agreement.

(6) Paying any debts, expenses, or costs which should be the responsibility of the individual homeowner, owner, tenant or household member of a rental property, or owner (member) or non-member of a co-op receiving HPG assistance outside the costs of repair and rehabilitation.

(7) Any type of political activities prohibited by the Office of Management and Budget (OMB) Circular A–122.

(8) Other costs including contributions and donations, entertainment, fines and penalties, interest and other financial costs unrelated to the HPG assistance to be provided, legislative expenses, and any excess of cost from other grant agreements.

(9) Paying added salaries for employees paid by other sources, i.e., public agencies who pay employees to handle grants.

(c) Advice concerning ineligible costs may be obtained from FmHA as part of the HPG preapplication review or when a proposed cost appears ineligible.

(d) The grantee may not charge fees or accept any compensation or gratuities from HPG recipients for the grantee's technical or administrative services under this program. Where the grantee performs as a construction contractor, the grantee may be paid such compensation directly related to construction services provided and limited to authorized housing preservation activities.

(e) The policies, guidelines and requirements of 7 CFR parts 3015 and 3016 apply to the acceptance and use of HPG funds.

§ 1944.667 Relocation and displacement.

(a) *Relocation.* Public bodies and agencies must comply with the requirements of the Uniform Relocation Assistance and Real Property Acquisition Act of 1970. The grantee must provide assistance for permanent or temporary relocation of displaced persons for units repaired or rehabilitated with HPG assistance. HPG funds may be used to cover costs incurred in the relocation of displaced persons. The applicant shall include in its statement of activities, a statement concerning the temporary relocation of homeowners and/or tenants during the period of repairs and/or rehabilitation to the units or dwellings. Any contract or agreement between the homeowner and the grantee, as well as between the grantee and the owner(s) of rental properties and co-ops shall include a statement covering at a minimum;

(1) The period of relocation (if any);

(2) The name(s) of the party (or parties) who shall bear the cost of temporarily relocating; and

(3) The name(s) of the party (or parties) who shall bear the cost of permanent relocation; and

(4) If paragraphs (a) (2) or (3) of this section is the grantee, the maximum amount of temporary or permanent relocation costs proposed to be allowed.

(b) *Displacement.* The applicant shall include in its statement of activities, a statement as to how its proposed HPG financial assistance program shall keep to a minimum the displacement of homeowners and/or tenants.

§ 1944.668 Term of grant.

HPG projects may be funded under the terms of a grant agreement for a period of up to 2 years commencing on the date of execution of the grant agreement by the FmHA approval official. Term of the project will be based upon HPG resources available for the proposed project and the accomplishability of the applicant's proposal within 1 or 2 years. Applicants requesting a 2 year term may be asked to develop a feasible 1 year program if sufficient funds are not available for a 2 year program.

§ 1944.669 [Reserved]

§ 1944.670 Project income.

(a) Project income during the grant period from loans made to homeowners, owners of rental properties, and co-ops is governed by 7 CFR parts 3015 and 3016. All income during the grant period, including amounts recovered by the grantee due to breach of agreements between the grantee and the HPG recipient, must be used under (and in accordance with) the requirements of the HPG program.

(b) Grantees are encouraged to establish a program which reuses income from loans after the grant period for continuing repair and rehabilitation activities.

§ 1944.671 Equal opportunity requirements and outreach efforts.

The policies and regulations contained in subpart E of part 1901 of this chapter apply to grantees under this subpart.

(a) *Fair housing.* The Fair Housing Act prohibits any person or entity whose business includes engaging in residential real estate-related transactions to discriminate against any person in making loans, grants, or other financial assistance for a unit or dwelling, or which will be secured by a unit or dwelling, because of race, color, religion, sex, national origin, age, familial status, or handicap. Prohibited practices under this section include:

(1) Failing to provide any person in connection with a residential real estate-related transaction, information regarding the availability of loans, grants, or other financial assistance, or providing information that is inaccurate or different from that provided others; and

(2) The term "residential real estate-related transaction" includes the making or purchasing of loans, grants, or other financial assistance for purchasing, constructing, improving, repairing, or rehabilitating a unit or dwelling.

(b) *Outreach.* In addition, the HPG grantee is required to address an outreach effort in their program. The amount of outreach should sufficiently reach the entire service area. As a measure of compliance, the percentages of the individuals served by the HPG grantee should be in proportion to the percentages of the population of the service area by race/national origin. If the percentages are not proportional, then adequate justification is to be made. Exhibit E–1 of this subpart (available in any FmHA office) will be used to monitor these requirements. (Further explanation and guidance of Exhibit E–1 can be found in Exhibit E–2 of this subpart which is available in any FmHA office). A separate file will be maintained by the grantee that will include the following outreach activities:

(1) Community contacts to community organizations, community leaders, including minority leaders, by name, race, and date contacted;

(2) Copies of all advertising in local newspapers, and through other media. Any advertising must reach the entire service area. FmHA encourages the use of minority-owned radio stations and other types of media, if available, in the service area. The grantee's file shall also include the name of the media used, and the percentage of its patronage by race/national origin; and

(3) Copies of any other advertising or other printed material, including the application form used. The application form shall include the nondiscrimination slogan: "This is an equal opportunity program. Discrimination is prohibited by Federal Law."

(c) *Additional requirements.* In order to meet the Fair Housing requirements and the nondiscrimination requirements of Title VI of the Civil rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, the HPG grantee will need to adhere to the recommendations of exhibit H of this subpart (available in any FmHA office).

§ 1944.672 Environmental requirements.

Subpart G of part 1940 of this chapter will be followed regarding environmental requirements. The following is additional information on how to approach HPG projects under those requirements:

(a) The approval of an HPG grant for the repair or rehabilitation of dwellings shall be a Class I action. As part of their preapplication materials, applicants shall submit Form FmHA 1940–20, "Request for Environmental Information," for the geographical area(s) proposed to be served by the program. The applicant shall refer to Exhibit F–1 of this subpart (available in any FmHA office), when completing Form FmHA 1940–20. Further guidance on completing this form is available from the FmHA office servicing the program.

(b) The use of HPG funds by the grantee to repair or rehabilitate specific dwellings is generally exempt from an FmHA environmental review. However, if such dwellings are located in a floodplain, wetland, or the proposed work is not concurred in by the Advisory Council on Historic Preservation under the requirements of § 1944.673 of this subpart, an FmHA environmental review is required. Dwellings within the Coastal Barrier Resources System are not eligible for HPG assistance. Applicants must include in their preapplication a process for identifying dwellings that may receive housing preservation assistance that will require an environmental assessment. This may be accomplished by adoption of Exhibit F–2 of this subpart (available in any FmHA office) or another process supplying similar information acceptable to FmHA.

(c) If a specific dwelling is not located in a floodplain, wetland, or the proposed work is concurred in by the Advisory Council on Historic Preservation under the requirements of § 1944.673 of this subpart, no environmental review is required by FmHA. The grantee only needs to indicate its review and compliance with this subpart, indicating such in each

VOL 58 ISS 78 APR 26 1993 UMI

recipient's file in accordance with paragraph (e) of this section.

(d) When a dwelling requiring an environmental assessment is proposed for HPG assistance, the grantee will immediately contact the FmHA office designated to service the HPG grant. Prior to approval/obligation of HPG assistance to the recipient by the grantee, FmHA will prepare the environmental assessment in accordance with subpart G of part 1940 of this chapter with the assistance of the grantee, as necessary. Paragraph VII of exhibit C of this subpart (available in any FmHA office) provides further guidance in this area.

(e) If FmHA is required to make an environmental assessment, the grantee will be provided with a copy of the assessment which will be made part of the recipient's file. The grantee must also include in each recipient's file:

(1) Documentation on how the process for historic preservation review under § 1944.673 of this subpart has been complied with, including all relevant reviews and correspondence; and

(2) Determination as to whether the unit is located in a 100-year floodplain or a wetland.

(3) *Documentation of this review.* Suggested language is: "We have considered this dwelling under FmHA's environmental and historic preservation requirements for a HPG (§§ 1944.672 and 1944.673 of this subpart) and an environmental assessment is not required. The review was completed in accordance with the process to identify properties requiring an FmHA environmental assessment approved with our statement of activities."

(f) Proposed use of funds by an applicant to use monies for additions under § 1944.664 (c)(11) of this subpart must be addressed in the statement of activities.

(g) Grantees must contact FmHA prior to actual usage of funds by the grantees under § 1944.664 (c)(11) of this subpart. FmHA must complete the appropriate level of environmental review in accordance with subpart G of part 1940 of this chapter.

§ 1944.673 Historic preservation requirements and procedures.

(a) FmHA has entered into a Programmatic Memorandum of Agreement (PMOA) with the National Conference of State Historic Preservation Officers (SHPO) and the Advisory Council on Historic Preservation in order to implement the specific requirements regarding historic preservation contained in section 533 of the Housing Act of 1949, 42 U.S.C. 1490(m) of the enabling legislation. The PMOA, with attachments, can be found in FmHA Instruction 2000–FF (available in any FmHA office). A copy of the PMOA will be provided to each applicant for a HPG as part of the preapplication package specified in paragraph II of exhibit C of this subpart (available in any FmHA office).

(b) Accordingly, each applicant for a HPG grant will provide, as part of its preapplication documentation submitted to FmHA, a description of its proposed process for assisting very low- and low-income persons owning historic properties needing rehabilitation or repair. "Historic properties" are defined as properties that are listed or eligible for listing on the National Register of Historic Places. Each HPG proposal shall comply with the provisions of Stipulation I, A–G of the PMOA (FmHA Instruction 2000–FF available in any FmHA office). Should FmHA be required to assume responsibility for compliance with 36 CFR part 800 in accordance with Stipulation III of the PMOA, the grantee will assist FmHA in preparing an environmental assessment. FmHA will work with the grantee to develop alternative actions and/or mitigation measures, as appropriate.

(c) Such assumption of responsibility by FmHA on a particular property shall not preclude the grantee from carrying out the requirements of 36 CFR part 800 on other properties as though it were a Federal agency, but no work may be commenced on any unit or dwelling in controversy until and unless so advised by FmHA.

§ 1944.674 Public participation and intergovernmental review.

(a) In preparing its statement of activities, the applicant is responsible for consulting with leaders from the county, parish and/or township governments of the area where HPG activities will take place for the purpose of assuring that the proposed HPO program is beneficial and does not duplicate current activities. American Indian nonprofit organization applicants should obtain the written concurrence of the tribal governing body in lieu of consulting with the county governments when the program is operated only on tribal land.

(b) The applicant must also make its statement of activities available to the public for comment. The applicant must announce the availability of its statement of activities for review in a newspaper of general circulation in the project area and allow at least 15 days for public comment. The start of this 15-day period must occur no later than 16 days prior to the last day for acceptance of preapplications by FmHA.

(c) The HPG program is subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. Under FmHA Instruction 1940–J (available in any FmHA office) prospective applicants for HPG grants must submit its statement of activities to the State single point of contact prior to submitting their preapplication to FmHA. Evidence of submittal of the statement of activities to the State single point of contact is to be submitted with a preapplication. Comments and recommendations made through the intergovernmental review process are for the purpose of assuring consideration of State and local government views. The name of the State single point of contact is available from any FmHA office. This section does not apply to American Indian tribes, bands, groups, etc., as noted in § 1944.656 of this subpart.

§ 1944.675 Allocation of HPG funds to States and unused HPG funds.

The allocation and distribution of HPG funds is found in § 1940.578 of subpart L of part 1940 of this chapter.

§ 1944.676 Preapplication procedures.

(a) All applicants will file an original and two copies of Standard Form (SF) 424.1, "Application For Federal Assistance (For Nonconstruction)," and supporting information with the appropriate FmHA office. A preapplication package, including SF–424.1, is available in any FmHA Office.

(b) All preapplications shall be accompanied by the following information which FmHA will use to determine the applicant's eligibility to undertake the HPG program and to evaluate the preapplication under the project selection criteria of § 1944.679 of this subpart.

(1) A statement of activities proposed by the applicant for its HPG program as appropriate to the type of assistance the applicant is proposing, including:

(i) A complete discussion of the type of and conditions for financial assistance for housing preservation, including whether the request for assistance is for a homeowner assistance program, a rental property assistance program, or a co-op assistance program;

(ii) The process for selecting recipients for HPG assistance, determining housing preservation needs of the dwelling, performing the necessary work, and monitoring/inspecting work performed;

(iii) A description of the process for identifying potential environmental impacts in accordance with § 1944.672 of this subpart, and the provisions for compliance with Stipulation I, A–G of the PMOA (FmHA Instruction 2000–FF available in any FmHA office) in accordance with § 1944.673 (b) of this subpart. With the exception of Stipulation I, D of the PMOA, this may be accomplished by adoption of Exhibit F–2 of this subpart (available in any FmHA office), or another process supplying similar information acceptable to FmHA;

(iv) The development standard(s) the applicant will use for the housing preservation work; and, if not the FmHA development standards for existing dwellings, the evidence of its acceptance by the jurisdiction where the grant will be implemented;

(v) The time schedule for completing the program;

(vi) The staffing required to complete the program;

(vii) The estimated number of very low- and low-income minority and nonminority persons the grantee will assist with HPG funds; and, if a rental property or co-op assistance program, the number of units and the term of restrictive covenants on their use for very low- and low-income;

(viii) The geographical area(s) to be served by the HPG program;

(ix) The annual estimated budget for the program period based on the financial needs to accomplish the objectives outlined in the proposal. The budget should include proposed direct and indirect administrative costs, such as personnel, fringe benefits, travel, equipment, supplies, contracts, and other cost categories, detailing those costs for which the grantee proposes to use the HPG grant separately from non-HPG resources, if any. The applicant budget should also include a schedule (with amounts) of how the applicant proposes to draw HPG grant funds, i.e., monthly, quarterly, lump sum for program activities, etc.;

(x) A copy of an indirect cost proposal as required in 7 CFR parts 3015 and 3016, when the applicant has another source of federal funding in addition to the FmHA HPG program;

(xi) A brief description of the accounting system to be used;

(xii) The method of evaluation to be used by the applicant to determine the effectiveness of its program which encompasses the requirements for quarterly reports to FmHA in accordance with § 1944.683(b) of this subpart and the monitoring plan for rental properties and co-ops (when applicable) according to § 1944.689 of this subpart;

(xiii) The source and estimated amount of other financial resources to be obtained and used by the applicant for both HPG activities and housing development and/or supporting activities;

(xiv) The use of program income, if any, and the tracking system used for monitoring same;

(xv) The applicant's plan for disposition of any security instruments held by them as a result of its HPG activities in the event of its loss of legal status;

(xvi) Any other information necessary to explain the proposed HPG program; and

(xvii) The outreach efforts outlined in § 1944.671(b) of this subpart.

(2) Complete information about the applicant's experience and capacity to carry out the objectives of the proposed HPG program.

(3) Evidence of the applicant's legal existence, including, in the case of a private nonprofit organization, a copy of, or an accurate reference to, the specific provisions of State law under which the applicant is organized; a certified copy of the applicant's Articles of Incorporation and Bylaws or other evidence of corporate existence; certificate of incorporation for other than public bodies; evidence of good standing from the State when the corporation has been in existence 1 year or more; and, the names and addresses of the applicant's members, directors and officers. If other organizations are members of the applicant-organization, or the applicant is a consortium, preapplications should be accompanied by the names, addresses, and principal purpose of the other organizations. If the applicant is a consortium, documentation showing compliance with § 1944.656 of this subpart will also be included.

(4) For a private nonprofit entity, the most recent audited statement and a current financial statement dated and signed by an authorized officer of the entity showing the amounts and specific nature of assets and liabilities together with information on the repayment schedule and status of any debt(s) owed by the applicant. If the applicant is an organization being assisted by another private nonprofit organization, the same type of financial statement should also be provided by that organization.

(5) A brief narrative statement which includes information about the area to be served and the need for improved housing (including both percentage and actual number of both low-income and low-income minority households and substandard housing), the need for the type of housing preservation assistance being proposed, the anticipated use of HPG resources for historic properties, the method of evaluation to be used by the applicant in determining the effectiveness of its efforts (according to paragraph (b)(1)(xii) of this section).

(6) A statement containing the component for alleviating overcrowding as defined by § 1944.656 of this subpart.

(7) A list of other activities the applicant is engaged in and expects to continue, a statement as to any other funding, and whether it will have sufficient funds to assure continued operation of the other activities for at least the period of the HPG grant agreement.

(8) Any other information necessary that specifically addresses the selection criteria in § 1944.679 of this subpart.

(c) The applicant must submit an original and one copy of Form FmHA 1940–20 prepared in accordance with Exhibit F–1 of this subpart (available in any FmHA office).

(d) The applicant must submit a description of its process for:

(1) Identifying and rehabilitating properties that are listed on or eligible for listing on the National Register of Historic Places.

(2) Identifying properties that are located in a floodplain or wetland.

(3) Identifying properties located within the Coastal Barrier Resources System.

(4) Coordinating with other public and private organizations and programs that provide assistance in the rehabilitation of historic properties (Stipulation I, D, of the PMOA, FmHA Instruction 2000–FF, available in any FmHA office).

(5) Paragraphs (d) (1), (2), and (3) of this section may be accomplished by adoption of Exhibit F–2 of this subpart (available in any FmHA office), or another process supplying similar information acceptable to FmHA.

(e) The applicant must submit evidence of SHPO concurrence in the proposal, or in the event of nonconcurrence, a copy of SHPO's comments together with evidence that the applicant has sought the Advisory Council on Historic Preservation's advice as to how the disagreement might be resolved, and a copy of any advice provided by the Council.

(f) The applicant must submit written statements and related correspondence reflecting compliance with § 1944.674 (a) and (c) of this subpart regarding consultation with local government leaders in the preparation of its program and the consultation with local and state government pursuant to the provisions of Executive Order 12372.

(2) Points are awarded based on the

as defined in § 1944.656 of this subpart;

will document its fin

VOL 58 ISS 78 APR 26 1993 UMI

(g) The applicant is to make its statement of activities available to the public for comment prior to submission to FmHA pursuant to § 1944.674(b) of this subpart. The application must contain a description of how the comments (if any were received) were addressed.

(h) The applicant must submit an original and one copy of Form FmHA 400–1, "Equal Opportunity Agreement," and Form FmHA 400–4, "Assurance Agreement," in accordance with § 1944.674(c) of this subpart.

§ 1944.677 [Reserved]

§ 1944.678 Preapplication submission deadline.

Dates governing the invitation and review of HPG preapplications will be published annually in the Federal Register and may be obtained from FmHA offices processing HPG preapplications. Preapplications received after the date specified in the **Federal Register** will not be considered for funding in that fiscal year and will be returned.

§ 1944.679 Project selection criteria.

(a) Applicants must meet all of the following threshold criteria:

(1) Provide a financially feasible program of housing preservation assistance. "Financially feasible" is defined as proposed assistance which will be affordable to the intended recipient or result in affordable housing for very low- and low-income persons;

(2) Serve eligible rural areas with a concentration of substandard housing for households with very low- and low-income;

(3) Be an eligible applicant entity as defined in § 1944.658 of this subpart;

(4) Meet the requirements of consultation and public comment in accordance with § 1944.674 of this subpart; and

(5) Submit a complete preapplication as outlined in § 1944.676 of this subpart.

(b) For applicants meeting all of the requirements listed in paragraph (a) of this section, FmHA will use the weighted criteria in this paragraph (b) in the selection of grant recipients. Each preapplication and its accompanying statement of activities will be evaluated and, based solely on the information contained in the preapplication, the applicant's proposal will be numerically rated on each criteria within the range provided. The highest ranking applicant(s) will be selected based on allocation of funds available to the State. Exhibit D of this subpart (available in any FmHA office) will be used to document the rating.

(1) Points are awarded based on the percentage of very low-income persons that the applicant proposes to assist, using the following scale:

(i) More than 80%: 20 points.
(ii) 61% to 80%: 15 points.
(iii) 41% to 60%: 10 points.
(iv) 20% to 40%: 5 points.
(v) Less than 20%: 0 points.

(2) The applicant's proposal may be expected to result in the following percentage of HPG fund use (excluding administrative costs) to total cost of unit preservation. This percentage reflects maximum repair or rehabilitation with the least possible HPG funds due to leveraging, innovative financial assistance, owner's contribution or other specified approaches. Points are awarded based on the following percentage of HPG funds (excluding administrative costs) to total funds:

(i) 50% or less: 20 points.
(ii) 51% to 65%: 15 points.
(iii) 66% to 80%: 10 points.
(iv) 81% to 95%: 5 points.
(v) 96% to 100%: 0 points.

(3) The applicant has demonstrated its administrative capacity in assisting very low- and low-income persons to obtain adequate housing based on the following:

(i) The organization or a member of its staff has 2 or more years experience successfully managing and operating a rehabilitation or weatherization type program, including FmHA's HPG program: 10 points.

(ii) The organization or a member of its staff has 2 or more years experience successfully managing and operating a program assisting very low- and low-income persons obtain housing assistance: 10 points.

(iii) If the organization has administered grant programs, there are no outstanding or unresolved audit or investigative findings which might impair carrying out the proposal: 10 points.

(4) The proposed program will be undertaken entirely in rural areas outside MSAs identified by FmHA as having populations below 10,000 *or* in remote parts of other rural areas (i.e., rural areas contained in MSAs with less than 5,000 population) as defined in § 1944.656 of this subpart: 10 points.

(5) The program will use less than 20 percent of HPG funds for administration purposes:

(i) More than 20%: Not Eligible.
(ii) 20%: 0 points.
(iii) 19%: 1 point.
(iv) 18%: 2 points.
(v) 17%: 3 points.
(vi) 16% 4 points.
(vii) 15% or less: 5 points.

(6) The proposed program contains a component for alleviating overcrowding as defined in § 1944.656 of this subpart: 5 points.

(c) In the event more than one preapplication receives the same amount of points, those preapplications will then be ranked based on the actual percentage figure used for determining the points under paragraph (b)(1) of this section. Further, in the event that preapplications are still tied, then those preapplications still tied will be ranked based on the percentage figures used (low to high) in paragraph (b)(2) of this section. Further, for applications where assistance to rental properties or co-ops is proposed, those still tied will be further ranked based on the number of years the units are available for occupancy under the program (a minimum of 5 years is required). For this part, ranking will be based from most to least number of years. Finally, if there is still a tie, then a "lottery" System will be used.

§ 1944.680 Limitation on grantee selection.

After all preapplications have been reviewed under the selection criteria and if more than one preapplication has met the criteria of § 1944.679(a) of this subpart, the State Director or approval official may not approve more than 50 percent of the State's allocation to a single entity.

§ 1944.681 Application submission.

Applicants selected by FmHA will be advised to submit a full application in an original and two copies of SF 424.1, and are to include any condition or amendments that must be incorporated into the statement of activities prior to submitting a full application. Instructions on submission and timing will be provided by FmHA.

§ 1944.682 Preapplication/application review, grant approval, and requesting HPG funds.

The FmHA offices processing HPG preapplications/applications will review the preapplications and applications submitted. Further review and actions will be taken by FmHA personnel in accordance with exhibit C of this subpart (available in any FmHA office). Exhibit G of this subpart (available in any FmHA office) will be used by the State Office to notify the National Office of preapplications received, eligibility, ranking, number of proposed units, amount requested by applicants, and amount recommended by State Office. Preapplications determined not eligible and/or not meeting the selection criteria will be notified in the manner prescribed in exhibit C of this subpart (available in any FmHA office). In addition, FmHA will document its findings and advise the applicant of its review rights or appeal rights (if applicable) under subpart B of part 1900 of this chapter. Applications determined not eligible will be handled in the same manner. The preapplications or applications determined incomplete will be notified in the manner prescribed in exhibit C of this subpart (available in any FmHA office) and will not be given appeal rights. The State Director is authorized to approve an HPG in accordance with this subpart and subpart A of part 1901 of this chapter. The State Director may delegate this authority in writing to designated State Office personnel and District Directors. Further:

(a) Grant approval is the process by which FmHA determines that all applicable administrative and legal conditions for making a grant have been met, the grant agreement is signed, and funds have been obligated for the HPG project. If acceptable, the approval official will inform the applicant of approval, having the applicant sign Form FmHA 1940–1, "Request for Obligation of Funds," and exhibit A of this subpart (available in any FmHA office). The applicant will be sent a copy of the executed grant agreement and Form FmHA 1940–1. Should any conditions be attached to the grant agreement that must be satisfied prior to the applicant receiving any HPG funds, the grant agreement and the conditions will be returned to the applicant for acceptance and acknowledgement on the grant agreement prior to execution by the approval official.

(b) The application may be disapproved before execution of the grant agreement if the applicant is no longer eligible, the proposal is no longer feasible, or the applicant requests cancellation of its project. Except when the applicant requests cancellation, FmHA will document its findings and advise the applicant of its appeal rights under subpart B of part 1900 of this chapter.

(c) With the executed grant agreement and Form FmHA 1940–1, FmHA will send the approved applicant (now the "grantee") copies of SF–270, "Request for Advance or Reimbursement". The grantee must submit an original and two copies of SF–270 to the FmHA office servicing the project. In addition, the grantee must submit SF–272, "Federal Cash Transactions Report," each time an advance of funds is made. This report shall be used by FmHA to monitor cash advances made to the grantee. Advances or reimbursements must be in accordance with the grantee's budget and statement of activities, including any amendments, prior approved by FmHA. Requests for reimbursement or advances must be at least 30 calendar days apart.

(d) If the grantee fails to submit required reports pursuant to § 1944.683 of this subpart or is in violation of the grant agreement, FmHA may suspend HPG reimbursements and advances or terminate the grant in accordance with § 1944.688 of this subpart and the grant agreement.

§ 1944.683 Reporting requirements.

(a) SF–269, "Financial Status Report," is required of all grantees on a quarterly basis. Grantees shall submit an original and two copies of the report to the designated FmHA servicing office. When preparing the Financial Status Report, the total program outlays (Item 10, g, of SF–269) should be less any rebates, refunds, or other discounts. Reports must be submitted no later than 15 days after the end of each calendar quarter.

(b) Quarterly performance reports shall be submitted by grantees with SF–269, in an original and two copies (see Exhibit E–1 or this subpart which is available in any FmHA office.) The quarterly report should relate the activities during the report period to the project's objectives and analyze the effectiveness of the program. As part of the grantee's preapplication submission, as required by § 1944.676(b) of this subpart, the grantee establishes its objectives for the HPG program, including its method of evaluation to determine its effectiveness. Accordingly, the report must include, but need not be limited to, the following:

(1) Use of HPG funds for administration and housing preservation activities.

(2) The following specific information for each unit or dwelling assisted:

(i) Name(s), address, and income(s) of each homeowner assisted or the name and address of the owner(s) or co-op for each rental property (single or multi-unit) or co-op assisted;

(ii) Total cost of repair/rehabilitation, a list of major repairs made, amount financed by HPG, and amount financed from which other sources;

(iii) Type of assistance provided (interest subsidy, loan, grant, etc.); and

(iv) Results of implementing the environmental process contained in § 1944.672 of this subpart and the historic preservation process contained in § 1944.673 of this subpart.

(3) A comparison of actual accomplishments to the objectives set for that period, including:

(i) The number of very low- and low-income, minority and nonminority persons assisted in obtaining adequate housing by the HPG program through repair and rehabilitation; and

(ii) The average cost of assistance provided to each household.

(4) Reasons why, if established objectives are not met.

(5) Problems, delays, or adverse conditions which will materially affect attainment of the HPG grant objectives, prevent the meeting of time schedules or objectives, or preclude the attainment of program work elements during established time periods. This disclosure shall be accompanied by a statement of the action taken or contemplated and any Federal or other assistance needed to relieve the situation.

(6) Objectives established for the next reporting period, sufficiently detailed to identify the type of assistance to be provided, the number and type of households to be assisted, etc.

(7) A certification that the final building inspection reports for each rehabilitation or repair work financed with HPG funds for that quarter is on file.

(c) The grantee should be prepared to meet with the FmHA office servicing the project to discuss its quarterly report shortly after submission.

(d) If the reports are not submitted in a timely manner or if the reports indicate that the grantee has made unsatisfactory progress or the grantee is not meeting its established objectives, the FmHA official servicing the grant will recommend to the State Director appropriate action to resolve the indicated problem(s). If appropriate corrective action is not taken by the grantee, the State Director has the discretion to not authorize further advances by suspending the project in accordance with § 1944.688 of this subpart and the grant agreement.

§ 1944.684 Extending grant agreement and modifying the statement of activities.

(a) All requests extending the original grant agreement or modifying the HPG program's statement of activities must be in writing. Such requests will be processed through the designated FmHA office servicing the project. The approval official will respond to the applicant within 30 days of receipt of the request.

(b) A grantee may request an extension of the grant agreement prior to the end of the project term specified in the grant agreement if the grantee anticipates that there will be grant funds remaining and the grantee has demonstrated its ability to conduct its program in a manner satisfactory to

VOL 58 ISS 78 AP 26 1993 UMI

FmHA. The approval official may approve an extension when:

(1) The grantee is likely to complete or exceed the goals outlined in the approved statement of activities; and

(2) The FmHA office responsible for servicing the grant recommends continuation of the grant until the grantee has expended all of the remaining grant funds.

(c) Modifications to the statement of activities, such as revising the processes the grantee follows in operating the HPG program, may be approved by the approval official when the modifications are for eligible purposes in accordance with §§ 1944.664 and 1944.666 of this subpart, meet any applicable review and process requirements of this subpart, and the program will continue to serve the geographic area originally approved. The grantee will submit its proposed revisions together with the necessary supporting information to FmHA prior to modifying its operation from the approved statement of activities.

(d) Exhibit B of this subpart (available in any FmHA office) will be used for all extensions on and modifications to the grant agreement.

§ 1944.685 [Reserved]

§ 1944.686 Additional grants.

An additional HPG grant may be made when the grantee has achieved or nearly achieved the goals established for the previous or existing grant. The grantee must file a preapplication for the current fiscal year which will be processed and compared under the project selection criteria to others submitted at that time.

§ 1944.687 [Reserved]

§ 1944.688 Grant evaluation, closeout, suspension and termination.

(a) Grant evaluation will be an on-going activity performed by both the grantee and FmHA. The grantee will perform self-evaluations by preparing quarterly performance reports in accordance with § 1944.683 of this subpart. FmHA will also review all reports prepared and submitted by the grantee in accordance with the grant agreement and this subpart.

(b) The grant can be suspended or terminated before the grant ending date for the causes specified in the grant agreement. No further grant funds will be advanced when grant suspension or termination procedures have been initiated in accordance with the grant agreement. Grantees may be reimbursed for eligible costs incurred prior to the effective date of the suspension or termination. Grantees are prohibited from incurring additional obligations of funds after notification, pending corrective action by the grantee. FmHA may allow necessary and proper costs that the grantee could not reasonably avoid during the period of suspension provided they are for eligible HPG purposes. In the event of termination, FmHA may allow necessary and reasonable costs for an audit.

(c) Grantees will have the opportunity to appeal a suspension or termination under FmHA's appeal procedures under subpart B of part 1900 of this chapter.

(d) The grantee will complete the closeout procedures as specified in the grant agreement.

(e) The grantee will have an audit performed upon termination or completion of the project in accordance with 7 CFR parts 3015 and 3016, as applicable. As part of its final report, the grantee will address and resolve all audit findings.

§ 1944.689 Long-term monitoring by grantee.

(a) The grantee is required to perform long-term monitoring on any housing preservation program involving rental properties and co-ops. This monitoring shall be at least on an annual basis and shall consist of, at a minimum, the following:

(1) All requirements noted in § 1944.663 of this subpart;

(2) All requirements of the "ownership agreement" executed between the grantee and the rental property owner or co-op; and

(3) All requirements noted in 7 CFR parts 3015 and 3016 during the effective period of the grant agreement.

(b) The grantee is required to make available to FmHA any such information as requested by FmHA concerning the above. The grantee shall submit to the FmHA servicing office an annual report every year while the ownership agreement is in effect. This report shall be submitted within 15 days after the anniversary date or end of the grant agreement. At a minimum, the report will consist of a statement that the grantee is in compliance with this subpart.

(c) All files pertaining to such rental property owner or co-op shall be kept separate and shall be maintained for a period of 3 years after the termination date of the ownership agreement.

§ 1944.690 Exception authority.

The Administrator of FmHA may, in individual cases, make an exception to any requirements of this subpart not required by the authorizing statute if the Administrator finds that application of such requirement would adversely affect the interest of the Government, or adversely affect the accomplishment of the purposes of the HPG program, or result in undue hardship by applying the requirement. The Administrator or the Assistant Administrator for Housing may exercise this exception authority at the request of the State Director. The request must be supported by information demonstrating the adverse impact, citing the particular requirement involved, recommending proper alternative course(s) of action, and outlining how the adverse impact could be mitigated. Exception to any requirement may also be initiated by the Assistant Administrator for Housing.

§§ 1944.691–1944.699 [Reserved]

§ 1944.700 OMB Control Number.

The reporting and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) and have been assigned OMB control number 0575–0115. Public reporting burden for this collection of information is estimated to vary from 10 minutes to 8 hours per response, with an average of 0.96 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Department of Agriculture, Clearance Officer, OIRM, Room 404–W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project (OMB #0575–0115), Washington, DC 20503.

Dated: April 15, 1993.

Robert Peters,

Acting Under Secretary, Small Community and Rural Development.

[FR Doc. 93–9658 Filed 4–23–93; 8:45 am]

BILLING CODE 3410–07–M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 52

RIN 3150—AD60

Training and Qualification of Nuclear Power Plant Personnel

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is amending its

regulations to require each applicant for and each holder of a license to operate a nuclear power plant to establish, implement, and maintain a training program for nuclear power plant personnel based on a systems approach to training (SAT). The training program will provide qualified personnel to operate and maintain the nuclear power plant in a safe manner in all modes of operation. This action is being taken to meet the directives of section 306 of the Nuclear Waste Policy Act of 1982.

EFFECTIVE DATE: May 26, 1993.

ADDRESSES: Copies of all referenced NRC documents are available for public inspection and copying for a fee at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555. Copies of NUREG documents may be purchased from the Superintendent of Documents, U.S. Government Printing Office by calling (202) 275–2060, or by writing to the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

FOR FURTHER INFORMATION CONTACT: Dr. Rajender Auluck, P.E., Office of Nuclear Regulatory Research, telephone: (301) 492–3794 or Mary Ann Biamonte, Office of Nuclear Reactor Regulation, telephone: (301) 504–1073, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

SUPPLEMENTARY INFORMATION:

Background

Nuclear Waste Policy Act of 1982

In section 306 of the Nuclear Waste Policy Act of 1982 (NWPA), Public Law 97–425, the NRC was "directed to promulgate regulations, or other appropriate Commission regulatory guidance for the training and qualifications of civilian nuclear power plant operators, supervisors, technicians and other operating personnel. Such regulations or guidance shall establish * * * instructional requirements for civilian nuclear power plant licensee personnel training programs." In order to meet this directive, on March 20, 1985, the Commission published a Policy Statement on Training and Qualification of Nuclear Power Plant Personnel (50 FR 11147). The policy statement endorsed a training accreditation program managed by the Institute of Nuclear Power Operations (INPO). It encompassed the elements of effective performance-based training and provided the basis to ensure that personnel have qualifications commensurate with the performance requirements of their jobs.

In addition to endorsing the INPO-managed training accreditation program, the 1985 Policy Statement also recognized the INPO-managed accreditation of utility training programs for the following categories of nuclear power plant personnel:

(1) Non-licensed operator.
(2) Control room operator.
(3) Senior control room operator/shift supervisor.
(4) Shift technical advisor.
(5) Instrument and control technician.
(6) Electrical maintenance personnel.
(7) Mechanical maintenance personnel.
(8) Radiological protection technician.
(9) Chemistry technician.
(10) On-site technical staff and managers.

While issuing the policy statement, the Commission decided to defer rulemaking in this area for a minimum of 2 years in order to allow the industry to continue its initiatives to upgrade training programs through the INPO-managed training accreditation program. Following issuance of the policy statement, the NRC evaluated the INPO-managed training accreditation program over a 2-year period and concluded that it was an effective program. On November 18, 1988 (53 FR 466073), the NRC published an amended policy statement in order to:

(1) Provide additional information regarding the NRC's experience with industry accreditation,

(2) Change the policy regarding enforcement to eliminate discretion in inspection and enforcement in the areas covered by the 1985 Policy Statement, and

(3) Reflect current Commission and industry guidance.

The NRC continues to perform inspections at different utilities to ensure that these training programs remain effective.

U.S. Court of Appeals Decision

On April 17, 1990, the U.S. Court of Appeals for the District of Columbia Circuit concluded that the Commission's Policy Statement did not meet the intent of the Congressional directive to create mandatory requirements for personnel training programs at civilian nuclear power plants. The Court remanded the issue back to the NRC for action consistent with the Court's findings. See, *Public Citizen* v. *NRC*, 901 F.2d 147 (DC Cir. 1990). The Commission requested a rehearing of the decision by the full court, which was denied on June 19, 1990. On November 26, 1990, the Supreme Court denied certiorari on petition by the Nuclear Utility Management and Resource Council. See, *Nuclear Management and Resources Council, Inc.* v. *Public Citizen* 111 S. Ct. 536 (1990).

Actions Taken in Response to the Court Decision

In response to the court decision, the NRC developed the proposed rule that would amend 10 CFR parts 50 and 52, entitled "Training and Qualification of Nuclear Plant Personnel." The proposed rule was published in the **Federal Register** on January 7, 1992 (57 FR 537). The amendments would require that each applicant for and each holder of a license to operate a nuclear power plant establish, implement, and maintain a training program for nuclear power plant personnel that provides qualified personnel to operate and maintain the facility in a safe manner in all modes of operation. The proposed rule met the directives contained in section 306 of the Nuclear Waste Policy Act of 1982 (NWPA), Public Law 97–425, as interpreted by the U.S. Court of Appeals for the District of Columbia Circuit, that mandatory requirements be established for the training and qualification of personnel at civilian nuclear power plants.

The proposed rule would require training programs that are derived from a systematic analysis of job performance requirements that can include both site-specific and industry-wide experiences. Current industry training programs have been developed consistent with this approach. Based on monitoring industry training programs since the 1985 Policy Statement went into effect, the NRC has concluded that these programs have been generally effective in ensuring that personnel have qualifications commensurate with the performance requirements of their jobs.

Summary and Analysis of Public Comments

The comment period for the proposed rule expired March 9, 1992. Public comment letters received on the proposed rule are available for public inspection and copying for a fee at the Commission's Public Document Room. Comments were received from 30 individuals and corporate entities, virtually all of whom are directly involved in the nuclear power industry. Many of the letters contained similar comments and have been grouped together and addressed as a single issue. All comments have been grouped into eight broad issues. For each broad issue,

VOL 58 ISS 78 AP 26 1993 UMI

the NRC has included a summary of the comments received and an analysis and response to those comments.

1. Responsibility for Training and Acceptability of Third-Party Training-Accreditation Programs

Comment. Several commenters indicated that the NRC should clarify who under the proposed requirements will have responsibility for training contractor personnel. Given the proposed rule's requirement that training programs be based on a systems approach to training, they indicated that the NRC should clarify its intention regarding the acceptability of licensees relying on third-party training programs other than INPO-managed training accreditation-certification programs in evaluating the training needs and qualifications of personnel. The Radiation Protection Association's program of registration-certification of Health Physics Technicians was cited as an example of an other than INPO-managed training accreditation-certification program that the Commission should explicitly endorse. Commenters also indicated that the NRC should clarify that if the evaluation of personnel does not indicate that additional training is needed (i.e., they are already qualified), then additional training is not required. Finally, commenters questioned whether the NRC has developed acceptance criteria for licensees to use in determining the acceptability of vendor-developed and other third-party training programs, and if the NRC anticipated deriving such criteria from NUREG–1220.

Response. The intent of the rule is to ensure that nuclear power plant personnel have the necessary knowledge, skills, and abilities to perform their assigned jobs competently; i.e., they are qualified to independently perform specific activities. Therefore, it is the responsibility of each licensee and applicant to ensure that personnel specified by the rule, regardless of whether they are employees or contractors, are qualified.

The requirement that each licensee or applicant develop, implement, and maintain a SAT-based training program is applicable only to licensee personnel, not contractors, and establishes a process that provides a high degree of assurance that personnel will be qualified to perform their assigned duties. This assurance arises from the five major elements of the SAT process: (1) Analysis of job performance requirements and training needs; (2) derivation of learning objectives; (3) design and implementation of the training programs; (4) trainee evaluation; and (5) program evaluation and revision. Training is only required when a comparison of job performance requirements for tasks being assigned and the skills and knowledge of a specific person indicate a training need. Third-party (including vendor-developed) training programs, although not specifically endorsed by the NRC, are acceptable provided that the licensee has evaluated the programs to ensure that they will result in proper qualification. Because the acceptability of vendor-developed programs will vary based on individual facility needs, the NRC is not providing specific acceptance criteria. Licensees should evaluate vendor-developed training programs against the facility's job and task analysis results to ensure that the vendor programs will meet the licensee's specific qualification requirements.

2. Appropriateness of SAT-Based Training

Comment. Numerous commenters questioned the appropriateness of requiring SAT-based training. At the most basic level was a concern that the NRC has not placed sufficient emphasis on the fact that the required SAT-based training is not intended to be a simple "cookbook" approach and that personnel should be encouraged to acquire additional knowledge, training, and academic instruction to give them a deeper understanding of the technical principles underlying their training. A more widely held concern was that the proposed rule could be construed as requiring additional rigorous job and task analysis, particularly since NRC Inspection Procedure 41500 is more restrictive in this area than the current requirements for INPO-managed training accreditation. These commenters noted that the job and task analysis is not necessarily appropriate or sufficient for all of the types of personnel covered by the rule. They requested that the NRC explicitly acknowledge that varying degrees of rigor in the performance of job and task analysis are appropriate for differing types of positions, as are analyses completed through cooperative generic industry efforts. Specifically, it was recommended that training programs affecting the Shift Supervisor, Shift Technical Advisor, and Technical Staff and Managers be allowed and encouraged to rely on additional bases for determining training needs and that Inspection Procedure 41500 and NUREG–1220, "Training Review Criteria and Procedures," be revised to make them fully consistent with current INPO guidance. Finally, one commenter noted that SAT-based training is inconsistent with the requirements in 10 CFR part 55 for licensed operators and requested that the NRC explain why it has determined that only SAT-based training is acceptable.

Response. The Commission shares the concern that SAT-based training not be treated in a "cookbook" manner. It is not the intent of the NRC that the industry simply approach the SAT-based program in a "cookbook" manner, since the NRC does not intend to discourage licensees from imposing additional requirements above those developed from the SAT-based training program. The decision to require SAT-based training programs reflects both the industry's success with this approach and the fact that the process has the advantage of incorporating ongoing review and revision of the program to reflect changing needs.

Additional rigorous job and task analysis will not be required for any of the positions listed in this rule. The NRC has monitored and evaluated the development and implementation of the current industry programs. The NRC believes that the job, task, and needs analyses underlying the currently accredited programs are adequate, as are the criteria that are used in determining the acceptability of programs for future accreditation. In order to clarify its position that additional job and task analyses are not being required, the NRC has revised Inspection Procedure 41500 and NUREG–1220 to make them consistent with this regulation.

The NRC recognizes that 10 CFR part 55, which only applies to licensed operators, allows non-SAT based approaches to training. This provision was necessary to accommodate existing industry programs for training licensed operators at the time part 55 was promulgated, because industry-wide implementation of SAT-based training was not complete. At this time, SAT-based training has been broadly implemented by the industry for both licensed operators and other plant personnel. Virtually all of the initial and requalification programs for licensed operators are SAT-based. The NRC believes that, based on SAT's success and its wide use by industry, that it is appropriate to incorporate SAT-based training as a requirement in this rule.

3. Definition of Personnel To Be Trained

Comment. A number of both general and specific comments were received that addressed the issue of the definition of the personnel that would be covered by the proposed rule. Some held the view that the specification of the personnel covered by the proposed rule was too narrow while others believed it was too broad. Some commenters recommended that the proposed rule cover all personnel who perform or oversee design, operation, or maintenance activities regardless of whether they are physically located on-site or off-site. At the same time, the commenters indicated that the proposed rule should explicitly exclude all personnel who, regardless of location, only perform support services. In addition, the commenters indicated that personnel working under direct supervision, such as short-term contractor personnel, should be excluded from these training requirements. More concretely, numerous commenters requested that the proposed rule be clarified in terms of personnel to be trained. For example:

Is a "Radwaste Operator" to be considered a "Non-Licensed Operator"? Does "Shift Supervisors" include "Assistant Shift Supervisors"? While the job title "I&C Technicians" is precise, "electrical personnel" and "mechanical personnel" appear to be broader than "electricians" and "mechanics." Which functions or personnel are included in on-site technical staff?

Finally, a number of commenters noted that to be consistent with INPO's current accreditation program, managers should not be included in the rule. This could be accomplished by amending § 50.120(b) so that the personnel designated as (9) "Technical Steff and Managers" be designated "Engineering Support Personnel." Almost all the commenters seeking clarification of the personnel to be trained recommended that the regulation explicitly state that it applies only to the training programs currently included in the INPO accreditation program.

Response. The scope of the list of personnel is consistent with and incorporates those positions that are currently covered by accreditation and existing industry practice. The NRC believes that the existing training programs for the personnel listed are satisfactory. For these reasons, the NRC does not believe it is appropriate to revise the scope of the regulation. The shift supervisor position is the only supervisory function included within the scope of the rule and does not include the assistent shift supervisor. However, the regulation has been revised to reflect a change from the title of the "on-site technical staff and managers" category to "engineering support personnel," which is now consistent with the name for the corresponding INPO eccredited training program. The scope of the personnel covered by that program to be trained in accordance with this regulation, however, is unchanged.

The NRC does not believe that a change to the rule is needed in order to clarify the applicability of this rule to short-term contractor personnel. Contractor personnel are not covered by this rule unless they occupy regular positions working independently within the licensee's organization. However, if short-term contractor personnel are assigned to work independently, they must be qualified to perform the assigned tasks. Finally, the issue of including off-site personnel in the final rule has been considered. The NRC has concluded that the requirements apply to job functions in the identified categories of personnel relating to on-site activities regardless of the location of the personnel.

4. Relationship Between Training and Qualification

Comment. One commenter expressed concern that the relationship between training and qualification has been blurred. The commenter indicated that while the proposed rule is entitled "Training and Qualification of Nuclear Power Plant Personnel," the requirements appear to relate to training only. It was recommended that the term qualification be eliminated, or, alternatively, that necessary qualifications be explicitly listed. The commenter also indicated that the NRC should clarify that successful completion of a training program is not in and of itself sufficient, in lieu of any specific qualifications imposed by other regulations, for a particular position.

Response. The NRC disagrees that the distinction between training and qualification has been blurred by the rule. As stated in the preamble for the proposed rule, qualification in the context of this rule means job task qualification. The proposed rule contained the requirement that licensees and applicants develop, implement, and maintain a SAT-based training program to ensure that nuclear power personnel are qualified to perform the tasks of their jobs. Because licensees and applicants must comply with all applicable regulations, there should be no ambiguity concerning the fact that successful completion of a training program does not obviate the need to comply with any other training or qualification requirements imposed by other regulations or license conditions. This means that nuclear power plant personnel must also meet the licensees' initial job qualification requirements imposed as part of initial employment. Therefore, no changes were made to the rule in response to this comment.

5. Applicability of the Rule

Comment. Several commenters expressed the opinion that the applicability of the rule was too broad with respect to licensees who are undergoing decommissioning or are part 52 applicants. Specifically, they recommended that the rule apply only to applicants for or licensees with an operating license. The commenters suggested that facilities engaged in decommissioning where all fuel has been permanently removed from the reactor vessel or those with a possession only license (POL) should not be subject to this rule. Additionally, they questioned why part 52 needed to be amended to include the requirements of § 50.120(b), since the provisions of part 52 already automatically incorporate all of the standards in part 50 that are technically relevant.

Response. The NRC believes that making the provisions of the rule applicable to all part 50 licensees and applicants is appropriate. The SAT-process ensures that as plant conditions change, training programs will be revised to reflect these changes. These revisions could include the development of new programs or the elimination of obsolete programs. However, the process also ensures that the modification of the program to reflect the changed environment is performed in an orderly fashion. If permanent changes in the condition of the plant (i.e., decommissioning or POL) make some or all existing training programs unnecessary, the licensee would obtain relief from these requirements by applying for an exemption eliminating or modifying the affected programs. Also, the reason that 10 CFR part 52 needs to be amended is to ensure that part 52 applicants have considered the requirements of 10 CFR 50.120(b) in their applications.

6. Implementation of the Rule

Both general and specific concerns were raised regarding implementation of the rule, the time periods allowed for implementation, and the means to be used by licensees to demonstrate compliance of a training program that is not accredited by the INPO-managed training accreditation program.

(a) General Concerns

Comment. Numerous commenters expressed concerns regarding the manner in which the NRC will monitor implementation of the rule to ensure that it is consistent with the Commission's intentions and that the

VOL 58 ISS 78 AP 26 1993 UMI

guidance provided by the NRC and INPO is consistent. Specifically, it was recommended that the Commission carefully monitor the implementation of the final rule to ensure a consistent understanding of the regulatory goals as was identified in SECY–91–172, "Regulatory Impact Survey—Final." In addition it was suggested that the principles in the Staff Requirements Memorandum dated December 20, 1991, regarding the Systematic Assessment of Licensee Performance (SALP) program should be applied to this training rule. Commission monitoring of the training rule would ensure that there is intra- and inter-regional consistency in the requirements, evaluation criteria, and results, and would preclude the imposition of additional requirements based on rising expectations. Commenters indicated that the NRC should clarify the process that INPO and the NRC will use to avoid giving licensees conflicting guidance. Commenters indicated that the NRC should explicitly state that maintenance of an accredited training program will be construed as complete compliance with these training requirements. Other commenters indicated that NRC should consider delaying the effective date of the rule until it has completely reviewed implementing guidance (e.g., Reg. Guide 1.8, Rev. 2) and made it consistent with the final rule.

Response. The NRC believes that the requirements and implementation of this rule will be consistent with the accredited programs already developed and implemented by the industry. Therefore, the policy the Commission expects to follow in implementing the rule is that continued accreditation along with effective implementation of the accredited program is considered to be an acceptable means of demonstrating compliance. This conclusion is based on staff inspections which have found the accredited programs to be generally acceptable, and the NRC review of documents that provide the industry program objectives and criteria. An applicant or licensee could also comply with the requirements of this rule without being accredited. Inspection Procedure 41500 and NUREG–1220 have been revised to make them consistent with this regulation. This guidance will be used by the NRC staff when monitoring implementation of this rule or inspecting training programs and is intended to ensure consistent interpretation of training criteria by all NRC regions. The NRC, therefore, does not intend to revise Reg. Guide 1.8.

(b) Implementation Period

Comment. With regard to the specific time frames allowed for implementation, several commenters expressed the opinion that if the rule is truly consistent with established programs, that an implementation period of 180 days was reasonable. However, other commenters stated that additional time should be granted to accommodate the industry's implementation date of December 31, 1993, for the new "Engineering Support Personnel" accredited program and for the review and documentation activities that are believed by the commenters to be necessary to demonstrate compliance with the rule. Similarly, many believed that the requirement in § 50.120(b) that applicants must have established and implemented the required training program 18 months prior to fuel load is not reasonable, given that the accreditation process for training programs provides for verification and revision of training programs based on experience gained from operations. It was recommended by several commenters that applicants simply be required to have training programs established and ready for accreditation prior to initial fuel load. Finally, several commenters noted that linking the required program review and revision cycle to the industry's current 4-year schedule is unnecessarily prescriptive.

Response. The NRC has considered the issues raised by the commenters regarding the appropriate implementation time periods for both licensees and applicants. For licensees, the Commission believes that the 180-day implementation period is sufficient, because all licensees have developed, implemented, and are maintaining accredited programs. Implementation of the new "Engineering Support Personnel" program, which replaces the current "Technical Staff and Managers" program or other future accredited program changes, does not negate the fact that SAT-based training is continuing for the personnel covered by the rule, therefore, compliance with the regulation would be maintained.

The requirement that applicants establish and implement the training program 18 months prior to fuel load is also considered appropriate. The NRC realizes that an applicant would not have a training program accredited 18 months prior to fuel load, and this rule does not require accreditation. The rule only requires that a training program be established for those portions of the plant programs necessary to support ongoing activities covered under the rule. In addition, the NRC believes that having the SAT-based training program in place prior to fuel load allows significant benefits in terms of program review and revisions based upon experience gained prior to fuel loading.

The NRC concurs that linking the program review-revision cycle to existing practice (i.e., a 4-year accreditation-renewal cycle) is unnecessarily prescriptive, therefore reference to specific 4-year review cycle has been deleted from the supplementary information section of the final rulemaking notice.

(c) Review and Recordkeeping Requirements

Comment. Several commenters requested that the NRC clarify the requirements for recordkeeping and for program reviews and revisions. Specifically, the NRC was requested to clarify (1) what records need to be maintained in order to meet the requirements of § 50.120, (2) whether any special retention periods apply to these records, and (3) what "associated programs" must be readily auditable, or that this language be dropped from the discussion. They also requested that NRC clarify the rule so that it is clear that the periodic reviews of training programs are to be conducted by appropriate functional managers, not just training managers.

Response. The records the licensees will need to maintain to meet the requirements of § 50.120 are the same records currently being maintained by licensees for their existing training programs. The proposed rule does not impose any special retention periods for these records. The words "associated programs" will be deleted from the discussion related to being readily auditable. The final rule does not require clarification since the proposed rule notes "licensee management," which NRC takes to include functional line managers.

(d) Demonstration of Compliance

Comment. The NRC should clarify how compliance with the rule is to be demonstrated by facilities without an accredited program.

Response. An accredited program is considered to be an acceptable means of demonstrating compliance with the rule. Facilities that do not have an accredited program would demonstrate compliance with the final rule through the development of training programs using the systems approach to training as defined in 10 CFR 55.4. The NRC will conduct inspections of non-accredited facility programs to ensure that the requirements of the final rule are met.

7. Recommend That the Commission Try One More Time To Reverse the Court Decision

Comment. Most commenters expressed their strong opinion that the rule is unnecessary given the industry's initiatives in developing and implementing effective training programs, but accept the rule as necessary given the Court's decisions. However, one commenter requested that, given the President's January 28, 1992, directive that agencies are to "identify and accelerate action on initiatives which will eliminate any unnecessary regulatory burden," the Commission seek, through the Executive Branch, if necessary, a judicial review of the Court's ruling.

Response. The Commission believes that the President's directive does not supersede the Court's ruling and the NRC has exhausted all reasonable avenues of judicial review.

8. Reconsideration of Other Training Requirements in Light of This Rule

Comment. One commenter requested that the NRC review part 55 in its entirety to ensure that it is consistent with this rule, stating that it is possible that many of the prescriptive requirements in existing part 55 could be eliminated if it were amended to reflect existing industry practice for identifying the need for and developing training programs.

Response. Part 55 currently states that a SAT-based training program and a certified simulator is an acceptable alternative to the prescriptive requirements of part 55 and would meet the existing requirements for licensed operator training. In fact, most of the initial and requalification programs for licensed operators are based on SAT. Thus, part 55 is consistent with this rule. Furthermore, some programs retain elements of the prescriptive portion of 10 CFR part 55 and to eliminate these elements would create an unnecessary perturbation to these programs.

Discussion

The safety of nuclear power plant operations and the assurance of general public health and safety depend on personnel performing at adequate performance levels. The systematic determination of qualifications and the provision of effective initial training and periodic retraining will enhance confidence that workers can perform at adequate performance levels. Qualification in the context of this rule means that nuclear power plant personnel have completed the training program, or parts thereof, as evidenced by meeting the job performance requirements, and are permitted to independently perform specific activities. The Commission has taken an approach in this rule that would specify the process to be implemented by applicants and licensees through which job performance criteria and associated personnel training would be derived. This approach provides for flexibility and site-specific adaptations in the training programs. No additional cost is anticipated with this approach for licensees with accredited programs because the rule is believed to be consistent with existing industry practice for personnel training.

Summary of Final Rule

Each applicant for and each holder of an operating license for a nuclear power plant shall:

(1) Establish a training program for certain nuclear power plant personnel who perform operating, maintenance, and technical support activities;

(2) Use a systems approach to training;

(3) Incorporate instructional requirements to provide trained and qualified personnel who can safely operate the facility in all modes of operation;

(4) Periodically review, evaluate, and revise the training program; and

(5) Maintain sufficient records, available for NRC inspection, to verify the adequacy of the training program.

Although no written response is required, licensees are expected to review their license conditions and other commitments for consistency with this rule.

The Commission has also developed conforming amendments to 10 CFR parts 50 and 52 to accompany this rule. Part of these amendments to parts 50 and 52 are considered minor. The other change to part 52 is more substantive and has been developed to ensure that applicants for a combined license (construction and operation) will establish, implement, and maintain a training program in accordance with the requirements in 10 CFR 50.120. This rule is not intended to preclude vendor training programs developed in conjunction with standardization of design.

Discussion of Final Rule

A new § 50.120, has been added to 10 CFR part 50, entitled "Training and qualification of nuclear power plant personnel."

This section establishes the requirements for and the essential elements of the process to be used by applicants and licensees to:

(1) Determine training and qualification requirements for all appropriate personnel;

(2) Develop training programs to ensure that each licensee has trained and qualified personnel to operate and maintain the facility in a safe manner; and

(3) Implement and maintain these programs effectively on a continuing basis.

Paragraph (a), "Applicability," indicates that the rule applies to each applicant for and each holder of an operating license for a nuclear power plant.

Paragraph (b), "Requirements," requires that each applicant or licensee establish, implement, and maintain a program for training nuclear power plant personnel which addresses all modes of operation and is derived from a systems approach to training (SAT). The SAT process was selected because it has the following characteristics:

(1) Training design and content are derived from job performance requirements;

(2) Training is evaluated and revised in terms of job performance requirements and observed results on the job;

(3) Success in training can predict satisfactory on-the-job performance; and

(4) A training program can be audited because it involves clearly delineated process steps and documentation.

The SAT process contains five major elements and is intended to require a training system that will ensure successful performance on the job by trained individuals. The elements are:

(1) Analysis of job performance requirements and training needs;

(2) Derivation of learning objectives;

(3) Design and implementation of the training programs;

(4) Trainee evaluation;

(5) Program evaluation and revision.

The SAT process also provides a sequential method of generating the type of documentation needed for training review. Use of SAT will obviate the need for additional documentation for NRC review.

The SAT process is a generic process, and its application is not limited to a certain subject matter or to specific licensee personnel. Training programs based on job performance requirements have been successfully used by the military for over 20 years and by the nuclear industry for much of the past decade. Furthermore, the Commission has recognized the appropriateness of using this approach to training in its requirements for operator licensing prescribed in § 55.31(a)(4), and for operator requalification prescribed in § 55.59(c).

This rule would provide for the

VOL
58
ISS
78
AP
26
1993
UMI

This rule would provide for the training and qualification of the following nuclear power plant personnel:

(1) Non-licensed operator.
(2) Shift supervisor.
(3) Shift technical advisor.
(4) Instrument and control technician.
(5) Electrical maintenance personnel.
(6) Mechanical maintenance personnel.
(7) Radiological protection technician.
(8) Chemistry technician.
(9) Engineering support personnel.

Licensed operators, such as control room operators and senior control room operators, are not covered by this rule. They will continue to be covered by 10 CFR part 55 for both initial and requalification training. Because some senior control room operators may also be shift supervisors, only those aspects of training related to their shift supervisor function would be covered by this rule.

This rule would require that training programs be periodically evaluated and revised as appropriate, and also be periodically reviewed by management for effectiveness. Current industry objectives in this regard involve the evaluation by management of individual training programs on a continuing or periodic basis to identify program strengths, weaknesses, and effectiveness. These evaluations are normally completed within a 3- to 6-month period following completion of training within the programs. The sum of these evaluations results in a comprehensive review. Periodic evaluations of the overall training programs are being performed by the industry as part of accreditation renewal. The Commission expects this practice to continue.

Determination of job performance requirements and training needs is part of the analysis in the SAT process and is reflected in qualification requirements. The facility applicant or licensee will be responsible for ensuring that all personnel within the scope of this rule have the training and resulting qualifications commensurate with job performance requirements for their assigned tasks. Initial and continuing training, as appropriate, is expected to be provided to job incumbents in positions covered by this rule.

Each applicant and licensee is required to maintain and keep available for NRC inspection the materials used to establish and implement required training programs for the affected personnel. Current industry practice in this regard involves retention of those records necessary to support management information needs and to provide required historical data. In general, these include records of program development, evaluation, and revision related to the existing training program. The NRC has found through inspections of training programs that sufficient records are being retained for periods that are adequate for regulatory purposes. The Commission believes that no additional guidance for recordkeeping is necessary.

No written response is required by this rule. However, applicants and licensees would be expected to compare their current training commitments and licensing bases with the requirements of this rule. Licensees should use the results of this comparison to evaluate and revise, as appropriate, existing technical specifications or previous commitments. This approach will ensure a common understanding between applicants, licensees, and the NRC staff of training commitments when future inspections are conducted.

Impact of This Rule on Existing Industry Training Programs

This rule would supersede the Policy Statement on Training and Qualification of Nuclear Power Plant Personnel. The Commission believes that this rule would not result in any change to accredited training programs. The NRC has found through inspections that the programs are generally acceptable. The Commission expects that training programs accredited and implemented consistent with the industry program objectives would be in compliance with the requirements of this regulation.

An existing Memorandum of Agreement between INPO and the Commission assures that the NRC will be made aware of any modifications or updates to the industry's program objectives and criteria. Having seen such modifications, the NRC will review to determine if they warrant any modification in the Commission's position expressed above. The NRC will continue to monitor the industry accreditation process by:

(a) Nominating individuals who are not on the NRC staff to serve as members of the National Nuclear Accrediting Board with full voting privileges;

(b) Having an NRC staff member attend and observe selected National Nuclear Accrediting Board meetings with the INPO staff or the utility representatives;

(c) Having NRC staff observe selected INPO accreditation team site visits;

(d) Reviewing any subsequent revisions to the program objectives and criteria as currently described in the National Academy for Nuclear Training document "The Objectives and Criteria for Accreditation of Training in the Nuclear Power Industry" (ACAD 91–015);[1] and

(e) Verifying licensee programs through the NRC inspection process.

As noted above, the NRC has the ability to verify compliance with this regulation through the inspection program and will do so as appropriate. In its inspections, the NRC staff will use Inspection Procedure 41500, "Training and Qualification Effectiveness," which references the guidance in NUREG–1220, Revision 1,[2] "Training Review Criteria and Procedures." Based on NRC inspections conducted to date, the Commission believes that the objectives developed by the industry provides sufficiently clear guidance to allow applicants and licensees to implement effective training programs in compliance with this rule. Therefore, the Commission does not believe it is necessary to issue a regulatory guide to provide additional guidance for complying with this rule.

Vendor-Developed Programs for Standardized Plants

In 10 CFR part 52, the Commission articulated the goal of safety through standardization of design. The Commission believes that the benefits of standardization could involve the standardization of some types of training associated with the 10 CFR part 52 design certification. Therefore, nothing in this rule is intended to preclude standard training programs being developed or implemented by a vendor. For example, the initial training for instrument and control technicians related to a particular standard design may be conducted by a vendor. As a result, there could be a pool of technicians trained by the vendor on the certified design available for hire at a nuclear power plant site. These personnel, however, would need to complete site-specific training related to the administrative and operating philosophy of the site as well as any other specific requirements of the licensee.

Thus, the requirements for personnel training programs prescribed by

[1] A copy of ACAD 91–015 is available for public inspection or copying at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

[2] Copies of NUREG–1220, Rev. 1 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20013–7082. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. A copy is also available for public inspection or copying at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC.

§ 50.120 do not prevent a vendor from training personnel or from developing a training process. However, it is important to note that vendor training programs are not governed by this rule and that the licensee is ultimately responsible for ensuring that personnel are qualified.

Applicants for a Combined License

Part 52 is being amended to require that applicants for combined licenses establish, implement, and maintain training programs in accordance with the requirements in 10 CFR 50.120.

Criminal Penalties

As a result of the addition of § 52.78 by this rulemaking, the criminal penalty provision, § 52.113, is being modified to add § 52.78 to the list of sections in subsection (b), since the new section is not identified as substantive, as that criterion is expressed in the **Federal Register** Notice: Clarification of Statutory Authority for Purposes of Criminal Enforcement, 57 FR 55062 (November 24, 1992). In addition, § 52.101 is deleted and § 52.103 is added to the list, to reflect changes made to part 52 in a previous rulemaking, 57 FR 60978 (December 23, 1992).

Finding of No Significant Environmental Impact: Availability

The Commission has determined under the National Environmental Policy Act of 1969, as amended, and the Commission's regulations in subpart A of 10 CFR part 51, that this rule is not a major Federal action significantly affecting the quality of the human environment and, therefore, an environmental impact statement is not required. Numerous studies have shown that in complex man-machine systems, human error has often been the overriding contributor to actual or potential system failures that may be precursors to accidents. With this rulemaking, the NRC is emphasizing the need to ensure that industry personnel training programs are based upon job performance requirements. Personnel who are subjected to training based on job performance requirements should be able to perform their jobs more effectively, and with fewer errors. Therefore, the environmental effect of implementing this rule would, if anything, be positive because of the reduction in human error. The environmental assessment and finding of no significant impact on which this determination is based are available for inspection at the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555. Single copies of the environmental assessment and finding of no significant impact are available from Rajender Auluck, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: (301) 492–3794.

Paperwork Reduction Act Statement

This final rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These requirements were approved by the Office of Management and Budget approval numbers 3150–0011 and 3150–0151.

Public burden for update and maintenance of information is estimated to average 780 hours per utility per year, including the time for reviewing the present program, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Information and Records Management Branch (MNBB–7714), U.S. Nuclear Regulatory Commission, Washington, DC 20555; and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB–3019, (3150–0011), Office of Management and Budget, Washington, DC 20503.

Regulatory Analysis

A regulatory analysis has been prepared for this final regulation. The analysis examines the values (benefits) and impacts (costs) of implementing the regulation for personnel training and qualification. This analysis is available for inspection in the NRC Public Document Room, 2120 L Street, NW., (Lower Level), Washington, DC 20555. Single copies of the analysis may be obtained from Rajender Auluck (see **ADDRESSES** heading).

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1989, 5 U.S.C. 605(b), the Commission certifies that this rule will not have a significant economic impact on a substantial number of small entities. This final rule primarily affects the companies that own and operate light-water nuclear power reactors and the vendors of those reactors. The companies that own and operate these reactors do not fall within the scope of the definition of "small entity" set forth in the Regulatory Flexibility Act or the Small Business Size Standards set out in regulations issued by the Small Business Administration in 13 CFR part 121.

Backfit Analysis

The Commission has determined that the backfit rule, 10 CFR 50.109, does not apply to this final rule because these amendments are mandated by section 306 of the Nuclear Waste Policy Act of 1982, 42 U.S.C. 10226. Therefore, a backfit analysis is not required for this rule.

List of Subjects

10 CFR Part 50

Antitrust, Classified information, Criminal penalty, Fire protection, Incorporation by reference, Intergovernmental relations, Nuclear power plants and reactors, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

10 CFR Part 52

Administrative practice and procedure, Antitrust, Backfitting, Combined license, Early site permit, Emergency planning, Fees, Inspection, Limited work authorization, Nuclear power plants and reactors, Probabilistic risk assessment, Prototype, Reactor siting criteria, Redress of site, Reporting and recordkeeping requirements, Standard design, Standard design certification.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, the Nuclear Waste Policy Act of 1982, and 5 U.S.C. 552 and 553, the NRC is adopting the following amendments to 10 CFR parts 50 and 52 as follows:

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

1. The authority citation for 10 CFR part 50 is revised to read as follows:

Authority: Secs. 102, 103, 104, 105, 161, 182, 183, 186, 189, 68 Stat, 936, 937, 938, 948, 953, 954, 955, 956, as amended; sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, as amended, 202, 206, 88 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

Section 50.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Section 50.10 also issued under secs. 101, 185, 68 Stat. 936, 955, as amended (42 U.S.C. 2131, 2235); sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332). Sections 50.13, 50.54(dd), and 50.103 also issued under sec. 108, 68 Stat. 939, as amended (42 U.S.C. 2138). Sections 50.23, 50.35, 50.55, and 50.56 also issued under sec. 185, 68 Stat. 955 (42

VOL 58 ISS 78 APR 26 1993 UMI

U.S.C. 2235). Sections 50.33a, 50.55a, and appendix Q also issued under sec. 102, Pub. L. 91–190, 83 Stat. 853 (42 U.S.C. 4332). Sections 50.34 and 50.54 also issued under sec. 204, 88 Stat. 1245 (42 U.S.C. 5844). Sections 50.58, 50.91, and 50.92 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Section 50.120 is also issued under section 306 of the NWPA of 1982, 42 U.S.C. 10226. Appendix F also issued under sec. 187, 68 Stat. 955 (42 U.S.C. 2237).

2. In § 50.8, paragraph (b) is revised to read as follows:

§ 50.8 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 50.30, 50.33, 50.33a, 50.34, 50.34a, 50.35, 50.36, 50.36a, 50.48, 50.49, 50.54, 50.55, 50.55a, 50.59, 50.60, 50.61, 50.63, 50.64, 50.71, 50.72, 50.80, 50.82, 50.90, 50.91, 50.120, and appendixes A, B, E, G, H, I, J, K, M, N, O, Q, and R.

* * * * *

3. Section 50.120 is added to read as follows:

§ 50.120 Training and qualification of nuclear power plant personnel.

(a) *Applicability.* The requirements of this section apply to each applicant for (applicant) and each holder of an operating license (licensee) for a nuclear power plant of the type specified in § 50.21(b) or § 50.22.

(b) *Requirements.* (1) Each nuclear power plant applicant, by [October 25, 1993, publication] or 18 months prior to fuel load, whichever is later, and each nuclear power plant licensee, by [October 25, 1993, publication] shall establish, implement, and maintain a training program derived from a systems approach to training as defined in 10 CFR 55.4. The training program must provide for the training and qualification of the following categories of nuclear power plant personnel:

(i) Non-licensed operator.

(ii) Shift supervisor.

(iii) Shift technical advisor.

(iv) Instrument and control technician.

(v) Electrical maintenance personnel.

(vi) Mechanical maintenance personnel.

(vii) Radiological protection technician.

(viii) Chemistry technician.

(ix) Engineering support personnel.

(2) The training program must incorporate the instructional requirements necessary to provide qualified personnel to operate and maintain the facility in a safe manner in all modes of operation. The training program must be developed so as to be in compliance with the facility license, including all technical specifications and applicable regulations. The training program must be periodically evaluated and revised as appropriate to reflect industry experience as well as changes to the facility, procedures, regulations, and quality assurance requirements. The training program must be periodically reviewed by licensee management for effectiveness. Sufficient records must be maintained by the licensee to maintain program integrity and kept available for NRC inspection to verify the adequacy of the program.

PART 52—EARLY SITE PERMITS; STANDARD DESIGN CERTIFICATIONS; AND COMBINED LICENSES FOR NUCLEAR POWER PLANTS

4. The authority citation for 10 CFR part 52 continues to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 186, 189, 68 Stat. 936, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1244, 1246, as amended (42 U.S.C. 5841, 5842, 5846).

5. In § 52.8, paragraph (b) is revised to read as follows:

§ 52.8 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 52.15, 52.17, 52.29, 52.45, 52.47, 52.57, 52.75, 52.77, 52.78, and 52.79.

6. Section 52.78 is added to read as follows:

§ 52.78 Contents of applications; training and qualification of nuclear power plant personnel.

(a) *Applicability.* The requirements of this section apply only to the personnel associated with the operating phase of the combined licenses.

(b) The application must demonstrate compliance with the requirements for training programs established in § 50.120 of this chapter.

7. In § 52.113, paragraph (b) is revised to read as follows:

§ 52.113 Criminal penalties.

* * * * *

(b) The regulations in part 52 that are not issued under sections 161b, 161i, or 161o for the purposes of section 223 are as follows: §§ 52.1, 52.3, 52.5, 52.8, 52.11, 52.13, 52.15, 52.17, 52.18, 52.19, 52.21, 52.23, 52.24, 52.27, 52.29, 52.31, 52.33, 52.37, 52.39, 52.41, 52.43, 52.45, 52.47, 52.48, 52.49, 52.51, 52.53, 52.54, 52.55, 52.57, 52.59, 52.61, 52.71, 52.73, 52.75, 52.77, 52.78, 52.79, 52.81, 52.83, 52.85, 52.87, 52.89, 52.93, 52.97, 52.103, 52.111, and 52.113.

Dated at Rockville, MD, this 20th day of April 1993.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 93–9651 Filed 4–23–93; 8:45 am]

BILLING CODE 7590–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 93–NM–37–AD; Amendment 39–8553; AD 93–08–06]

Airworthiness Directives; Pacific Scientific Company, HTL/Kin-Tech Division, Fire Extinguishers, as Installed on, but not Limited to, Airbus Industrie Model A300, A310, and A320 Series Airplanes; Boeing Model 757–200 Series Airplanes Equipped With Rolls Royce Engines; and McDonnell Douglas Model DC–9–80 (MD–80) and MD–11 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Pacific Scientific fire extinguishers. This action requires testing the low pressure indication circuits to monitor actuation of the pressure switch on certain Pacific Scientific fire extinguishers and replacement with a serviceable extinguisher, if necessary. This amendment is prompted by reports that the low pressure switch failed to indicate low pressure when the fire extinguisher container was discharged. The actions specified in this AD are intended to prevent failure of a fire extinguisher to discharge extinguishant in the event of a fire.

DATES: Effective May 11, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 11, 1993.

Comments for inclusion in the Rules Docket must be received on or before June 25, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 93–NM–37–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The service information referenced in this AD may be obtained from Pacific Scientific Company, HTL/Kin-Tech Division, Attention: Product Support Department, 1800 Highland Avenue, Duarte, California 91010. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806–2425; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Raymond Vakili, Aerospace Engineer, Propulsion Branch, ANM–141L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806–2425; telephone (310) 988–5262; fax (310) 988–5210.

SUPPLEMENTARY INFORMATION: Recently, two operators have reported three incidents in which the low pressure switch on Pacific Scientific fire extinguishers for the auxiliary power unit (APU) compartment failed to indicate low pressure. Subsequent testing of 900 additional Pacific Scientific fire extinguishers revealed four additional failures of the low pressure switch, wherein the cockpit indication light failed to illuminate to indicate low pressure in the fire extinguisher. These fire extinguishers for the APU and engine compartments are known to be installed in Airbus Industrie Model A300, A310, and A320 series airplanes; Boeing Model B757–200 series airplanes, equipped with Rolls Royce engines; and McDonnell Douglas Model DC–9–80 (MD–80) and MD–11 series airplanes. This condition, if not corrected, could result in failure of a fire extinguisher to discharge extinguishant in the event of a fire.

The FAA has reviewed and approved Pacific Scientific Alert Service Bulletin 26A1106, dated March 10, 1993, that describes procedures for testing the low pressure indication circuit to monitor actuation of the pressure switch on the fire extinguisher and replacement with a serviceable fire extinguisher, if necessary.

Since an unsafe condition has been identified that is likely to exist or develop on other Pacific Scientific fire extinguishers, this AD is being issued to prevent failure of a fire extinguisher to discharge extinguishant in the event of a fire. This AD requires testing of the low pressure indication circuit to monitor actuation of the pressure switch on Pacific Scientific fire extinguishers and replacement with a serviceable fire extinguisher, if necessary. The actions are required to be accomplished in accordance with the service bulletin described previously. This AD also requires that findings of the test be submitted to the FAA.

This is considered to be interim action until final action is identified, at which time the FAA may consider further rulemaking.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93–NM–37–AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93–08–06 Pacific Scientific Company, HTL/Kin-Tech Division: Amendment 39–8553. Docket 93–NM–37–AD.

Applicability: Fire extinguishers, as listed in Pacific Scientific Alert Service Bulletin 26A1106, dated March 10, 1993; as installed on, but not limited to, Airbus Industrie

VOL 58 ISS 78 APR 26 1993 UMI

Model A300, A310, and A320 series airplanes, Boeing Model 757–200 series airplanes equipped with Rolls Royce engines, and McDonnell Douglas Model DC–9–80 (MD–80) and MD–11 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of a fire extinguisher to discharge extinguishant in the event of a fire, accomplish the following:

(a) Prior to the accumulation of 500 hours time-in-service or within 60 days after the effective date of this AD, whichever occurs first, unless accomplished within the last 8 months prior to the effective date of this AD, perform a test of the low pressure indicating circuit to monitor actuation of the pressure switch on the fire extinguisher in accordance with the Accomplishment Instructions in Pacific Scientific Alert Service Bulletin 26A1106, dated March 10, 1993.

(1) If the switch passes the test, no further action is required by this AD.

(2) If the switch fails this test, prior to further flight, replace the fire extinguisher with a serviceable extinguisher. This replacement extinguisher must have been inspected previously in accordance with paragraph 3 of the Accomplishment Instructions in the service bulletin.

(b) As of the effective date of this AD, no person shall install, on any airplane, a Pacific Scientific fire extinguisher having a part number listed in Pacific Scientific Alert Service Bulletin 26A1106, dated March 10, 1993, that has not been inspected previously in accordance with paragraph 3 of the Accomplishment Instructions in Pacific Scientific Alert Service Bulletin 26A1106, dated March 10, 1993.

(c) For switches that fail to pass the test required by this AD: Within 30 days after the effective date of this AD, submit a report of the results of the test required by this AD to the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806–2425; or fax to (310) 988–5210. The report must include the following information:

(1) When was the inspection performed?

(2) What is the part number of the fire extinguisher?

(3) What is the airplane model and series from which the extinguisher was removed.

(4) Where was the extinguisher installed [e.g., Position/Location: left engine; right engine, auxiliary power unit (APU) compartment, etc.]?

(5) When was the last hydrostatic check performed on that extinguisher?

(6) Who performed the last hydrostatic check on that extinguisher?

(7) When was the last hex key check (low pressure indicating circuit test) performed on that extinguisher?

(8) Was the extinguisher guard tack welded, completely welded, or not welded to the switch housing?

The information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120–0056.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) The testing and replacement shall be done in accordance with Pacific Scientific Alert Service Bulletin 26A1106, dated March 10, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Pacific Scientific Company, HTL/Kin-Tech Division, Attention: Product Support Department, 1800 Highland Avenue, Duarte, California 91010. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806–2425; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(g) This amendment becomes effective on May 11, 1993.

Issued in Renton, Washington, on April 16, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93–9612 Filed 4–23–93; 8:45 am]

BILLING CODE 4910–13–P

14 CFR Part 39

[Docket No. 92–NM–128–AD; Amendment 39–8540; AD 93–07–08]

Airworthiness Directives; Aerospatiale Model ATR42–300 and –320 and Model ATR72–100 and –200 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Aerospatiale Model ATR42–300 and –320 series airplanes and Model ATR72–100 and –200 series airplanes. This amendment requires removal of the cotter pins on the left and right elevator tab hinges; a recheck of the torque of the nuts; and installation of correct size cotter pins. This amendment is prompted by reports of missing cotter pins on the left elevator tab hinges and incorrect dimension of cotter pins on the right elevator tab hinges. The actions specified by this AD are intended to prevent reduced controllability of the airplane.

DATES: Effective on May 26, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 26, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Gary Lium, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–1112; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Aerospatiale Model ATR42–300 and –320 series airplanes and Model ATR72–100 and –200 series airplanes was published in the **Federal Register** on August 31, 1992 (57 FR 39371). That action proposed to require removal of the cotter pins on the left and right elevator tab hinges; a recheck of the torque of the nuts; and installation of correct size cotter pins.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the proposed rule.

Aerospatiale requests that the original issue and Revision 1 of Aerospatiale Service Bulletins ATR42–55–0005 and ATR72–55–1001 be listed as additional service bulletin references in proposed paragraph (a). The manufacturer states that the alterations found in Revision 2 of both service bulletins are minor in nature. The FAA concurs. Revision 2 of both service bulletins contains essentially the same material as was in the original issue and Revision 1. Therefore, the FAA has revised paragraph (a) of the final rule to cite the original issue and Revision 1 of both service bulletins as additional sources of information.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 76 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. The cost of parts is expected to be negligible. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $4,180, or $55 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93–07–08 Aerospatiale: Amendment 39–8540. Docket 92–NM–128–AD.

Applicability: Model ATR42–300 and –320 series airplanes and Model ATR72–100 and –200 series airplanes, as listed in Aerospatiale Service Bulletins ATR42–55–0005, Revision 2, dated October 28, 1991, and ATR72–55–1001, Revision 2, dated October 28, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent reduced controllability of the airplane, accomplish the following:

(a) Within 30 days after the effective date of this AD, remove the cotter pins on the left and right elevator tab hinges; recheck the torque of the nuts; and install correct size cotter pins, in accordance with Aerospatiale Service Bulletin ATR42–55–0005, dated November 9, 1990, or Revision 1, dated May 28, 1991, or Revision 2, dated October 28, 1991 (for Model ATR42–300 and –320 series airplanes); or Aerospatiale Service Bulletin ATR72–55–1001, dated November 9, 1990, or Revision 1, dated April 10, 1991, or Revision 2, dated October 28, 1991 (for Model ATR72–100 and –200 series airplanes); as applicable.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM–113. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM–113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The removal and installation shall be done in accordance with the following Aerospatiale service bulletins, as applicable, which contain the specified effective pages:

Service bulletin referenced and date	Page No.	Revision level shown on page	Date shown on page
ATR42–55–0005 Nov. 9, 1990	1–7	Original	Nov. 9, 1990.
ATR42–55–0005	1–3, 5, 7	1	May 28, 1991.
Revision 1, May 28, 1991	4, 6	Original	Nov. 9, 1990.
ATR42–55–0005	1–3,	2	Oct. 28, 1991.
Revision 2, Oct. 28, 1991	4, 6	Original	Nov. 9, 1990.
	5, 7	1	May 28, 1991.
ATR72–55–1001, Nov. 9, 1990	1–7	Original	Nov. 9, 1990.
ATR72–55–1001	1–2, 5, 7	1	Apr. 10, 1991.
Revision 1, Apr. 10, 1991	3–4, 6	Original	Nov. 9, 1990.
ATR7–55–1001	1–2	2	Oct. 28, 1991.
Revision 2, Oct. 28, 1991	3–4, 6	Original	Nov. 9, 1990.
	5, 7	1	Apr. 10, 1991.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on May 26, 1993.

Issued in Renton, Washington, on April 12, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[Docket No. 93-NM-25-AD; Amendment 39-8554; AD 93-08-07]

Airworthiness Directives; McDonnell Douglas Model MD-11 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model MD-11 series airplanes. This action requires a one-time visual inspection to detect chafing or preload in the electrical power system control (EPSC) wire assemblies located in the center accessory compartment (CAC), and to verify the proper installation of clamps and spacers in the assemblies; and modification of discrepant wire assemblies. This amendment is prompted by a report of chafing and burning that occurred in an EPSC wiring assembly located in the CAC. The actions specified in this AD are intended to prevent chafing of the EPSC wire assemblies located in the CAC, which potentially could result in a fire.

DATES: Effective May 11, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 11, 1993.

Comments for inclusion in the Rules Docket must be received on or before June 25, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 93-NM-25-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office (ACO), 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Brett E. Portwood, Aerospace Engineer, Systems and Equipment Branch, ANM-132L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5347; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION: The FAA recently received a report of chafing and burning that occurred in an electrical power system control (EPSC) wiring assembly located in the forward cargo, aft bulkhead area of the center accessory compartment (CAC) of a McDonnell Douglas Model MD-11 series airplane.

During the reported incident, the subject airplane landed and, when thrust reversers were deployed, an electrical alert appeared on the engine and alert display. The synoptic display for the electrical system was partial, with no visible symbols. Airplane electrical power buses remained powered. The pilot taxied the airplane to the ramp and passengers departed normally from the airplane.

Subsequent investigation revealed that 27 charred wires were found in the CAC at the forward inboard side of the electrical equipment rack. Upon examining the affected airplane and other Model MD-11 series airplanes in production, a determination was made that the wiring installed is susceptible to chafing against a clip nut.

Further investigation by the manufacturer has revealed that the cause of the chafing and burning has been traced to wire assemblies that were preloaded against the structure on the electrical equipment rack. Also during investigation, other wire assemblies were found with chafing conditions. This condition, if not corrected, could result in chafing of the EPSC wire assemblies located in the CAC, which potentially could result in a fire that could spread quickly from one wire assembly to another.

The FAA has reviewed and approved McDonnell Douglas MD-11 Alert Service Bulletin A24-64, dated March 29, 1993, that describes procedures for a one-time visual inspection to detect chafing or preload in the EPSC wire assemblies located in the forward cargo, aft bulkhead area of the CAC, and to verify the proper installation of certain clamps and spacers in the assembly. The service bulletin also describes procedures for modification of discrepant wire assemblies. Modification entails rerouting wire assemblies to obtain additional clearance between wires, structure and/or attachments; repair of wire assemblies, if necessary; and/or installation of a clamp and spacer, if necessary. This one-time visual inspection and modification will prevent the possibility of chafing of the EPSC wire assemblies located in the CAC. This modification was installed during production on airplanes having manufacturer's fuselage number 533, 534, 536, and subsequent.

Since an unsafe condition has been identified that is likely to exist or develop on other McDonnell Douglas Model MD-11 series airplanes of the same type design, this AD is being issued to prevent chafing of the EPSC wire assemblies located in the CAC, which potentially could result in a fire. This AD requires a one-time visual inspection to detect chafing or preload in the EPSC wire assemblies located in the forward cargo, aft bulkhead area of the CAC, and to verify the proper installation of clamps and spacers in these assemblies. This AD also requires modification of discrepant wire assemblies. The actions are required to be accomplished in accordance with the service bulletin described previously. Additionally, operators would be required to submit a report to the FAA of the results of the one-time visual inspection of the EPSC wire assemblies.

The applicability of the AD excludes those airplanes on which the modification has been incorporated in production. Airplanes so modified are not subject to the unsafe condition addressed by this AD.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption ADDRESSES. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93-NM-25-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption ADDRESSES.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-08-07 McDonnell Douglas: Amendment 39-8554. Docket 93-NM-25-AD.

Applicability: Model MD-11 series airplanes, manufacturer's fuselage numbers up to and including 532, and 535; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent chafing of the electrical power system control (EPSC) wire assemblies located in the center accessory compartment (CAC), which potentially could result in a fire, accomplish the following:

(a) Within 60 days after the effective date of this AD, perform a one-time visual inspection to detect chafing or preload in the EPSC wire assemblies located in the forward cargo, aft bulkhead area of the CAC, and to determine if clamps and spacers are properly installed, in accordance with McDonnell Douglas Alert Service Bulletin A24-64, dated March 29, 1993.

(1) If no chafing or preload is detected, and a clamp and spacer are installed, no further action is required by this AD.

(2) If no chafing or preload is detected, but the clamp and/or spacer are missing, prior to further flight, modify the wire assembly in accordance with "Condition I" of the Accomplishment Instructions of the service bulletin.

(3) If chafing or preload is detected, and the clamp and spacer are installed, prior to further flight, modify the wire assembly in accordance with "Condition II" of the Accomplishment Instructions of the service bulletin.

(4) If chafing or preload is detected, and the clamp and/or spacer are missing, prior to further flight, modify the wire assembly in accordance with "Condition III" of the Accomplishment Instructions of the service bulletin.

(b) Within 30 days after accomplishing the one-time visual inspection required by paragraph (a) of this AD, submit a report of the results, both positive and negative, to the Manager, Los Angeles Aircraft Certification Office (ACO), ANM-100L, FAA, Transport Airplane Directorate, 3229 East Spring Street, Long Beach, California 90806-2425, or fax (310) 988-5210. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120-0056.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles ACO, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The inspection and modification shall be done in accordance with McDonnell Douglas Alert Service Bulletin A24-64, dated March 29, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from McDonnell Douglas Corporation, P.O. Box 1771, Long Beach, California 90846-1771, Attention: Business Unit Manager, Technical Publications—Technical Administrative Support, C1-L5B. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on May 11, 1993.

Issued in Renton, Washington, on April 16, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-9614 Filed 4-23-93; 8:45 am]

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 92-NM-174-AD; Amendment 39-8545; AD 93-07-13]

Airworthiness Directives; Garrett Model GTCP85 Series Auxiliary Power Units

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Garrett Model GTCP85 series auxiliary power units (APU), that requires removing the existing turbine wheel shroud and installing one constructed of Hastelloy "S" material. This amendment is prompted by an incident in which the one-piece cast turbine wheel separated and subsequently impacted the turbine wheel shroud, fragmenting the shroud. The actions specified by this AD are

VOL 58 ISS 78 AP 26 1993 UMI

intended to prevent turbine shroud fragments from exiting the APU and puncturing the APU compartment, which could lead to reduced fire protection capability of the APU compartment.

DATES: Effective May 26, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 26, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from Garrett Airlines Services Division, Technical Publications, Department 65–70, P.O. Box 52170, Phoenix, Arizona 85072–2170. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Baitoo, Aerospace Engineer, Los Angeles Aircraft Certification Office, Propulsion Branch, ANM–140L, FAA, Transport Airplane Directorate, 3229 East Spring Street, Long Beach, California 90806–2425; telephone (310) 988–5245; fax (310) 988–5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Garrett Model GTCP85 series auxiliary power units (APU) was published in the **Federal Register** on November 6, 1992 (57 FR 53044). That action proposed to require removing the existing turbine wheel shroud and installing one constructed of Hastelloy "S" material.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Several commenters support the rule as proposed.

One commenter requests that the applicability of the proposal be revised to delete the reference indicating that the subject auxiliary power units (APU's) may be installed on Lockheed Model L–1011 and Lockheed Model L–100 series airplanes. This commenter states that it has verified through Garrett Auxiliary Power Division that no Garrett Model APU's are installed on Model L–1011 series airplanes. The FAA concurs. The applicability statement of the final rule has been revised to delete reference to Lockheed Model L–1011 and Lockheed Model L–100 series airplanes.

One commenter requests that the compliance time for removing the turbine wheel shroud on ground-only operable APU's be revised from the proposed 36 months to 4,000 hours of operation or at the next shop visit that requires maintenance to the affected area. The commenter cites the following reasons as justification for this request:

1. The commenter states that turbine wheels constructed of Mar-M material have a higher probability of failure than turbine wheels constructed of Inconel material. The Mar-M turbine wheel experiences low cycle fatigue in the saddle area of the wheel, which can lead to turbine wheel separation. Further, this commenter notes that its fleet of APU's have turbine wheels constructed of Inconel material with the exception of one, which has incorporated the procedures described in Garrett Service Bulletin GTCP85–49–5700.

2. The commenter claims that turbine wheel shrouds constructed of Inconel 718 material experience a reduction in ultimate strength with long-time exposure to higher temperatures in the operating range of the engine. The commenter's primary use of the APU's is electrical and pneumatics for engine starts. The commenter contends that such use does not expose the APU to high temperatures for long periods of time, and that pneumatics for pack operation is the culprit for high long term temperature operation of the APU. This commenter's operation in this mode is small as compared to operations in which passengers are carried, which requires pneumatics for pack operation/cabin cooling.

3. The commenter states that failure of the turbine wheel was caused by an inclusion found in the Mar-M material of the wheel. The commenter considers it unlikely that the same failure would occur in a turbine wheel constructed of Inconel material, since the problem lies in the processes used in manufacturing the Mar-M material.

4. The commenter states that the Garrett Model GTCP85 APU's installed on its fleet are limited to on-ground use only. The commenter contends that there is no danger to the crew or airplane during inflight conditions. In addition, this commenter notes that the APU's installed on its fleet have the containment augmentation ring installed as specified in Garrett Service Bulletin GTCP85–49–5689, dated July 27, 1987;

The FAA does not concur with the commenter's request to extend the compliance time. In developing an appropriate compliance time for this action, the FAA considered not only the degree of urgency associated with addressing the subject unsafe condition, but the availability of required parts and the practical aspect of installing the required modification within a maximum interval of time allowable for all affected airplanes to continue to operate without compromising safety.

As for Item 1, the FAA considers that the addressed unsafe condition exists regardless of the type of material used in construction of the turbine wheel. It is the type of material used in construction of the turbine wheel shroud that influences the addressed unsafe condition. The FAA has determined that turbine wheel shrouds constructed of Inconel 718 material will not prevent turbine wheel fragments from exiting the APU, and that installation of a turbine wheel shroud constructed of Hastelloy "S" material will prevent occurrence of the addressed unsafe condition.

As for Item 2, the FAA has determined that turbine wheel shrouds constructed of Inconel 718 material may experience a reduction in ultimate strength as a result of either long-time or short-time exposure to higher temperatures in the operating range of the engine.

As for Item 3, the FAA does not concur that the problem lies only in the processes used in manufacture of the Mar-M material. Data support the fact that turbine wheels may fail due to causes other than an inclusion in the material.

As for Item 4, the FAA has determined that the addressed unsafe condition exists on all airplanes equipped with on-ground-only operable Garrett Model GTCP85 series APU's, regardless of airplane configuration. The FAA acknowledges that Garrett Service Bulletin GTCP85–49–5689, dated July 27, 1987, as specified in AD 87–24–11, Amendment 39–5781, (52 FR 45163, November 25, 1987), describes procedures for installation of the containment augmentation ring. However, since issuance of AD 87–24–11, there has been an incident in which the one-piece cast turbine wheel on a Garrett Model GTCP85 series APU separated and subsequently impacted the turbine wheel shroud, fragmenting the shroud into four segments. In this instance, the shroud was constructed of Inconel 718 material, and a containment augmentation ring had been installed in accordance with Garrett Service Bulletin GTCP85–49–5689, as specified in AD 87–24–11.

One commenter requests that the proposal be revised to include, as an alternative method of compliance, installation of a new, improved containment augmentation ring, instead of installation of a shroud constructed of Hastelloy "S" material. The commenter notes that Garrett Auxiliary Power Division has developed and successfully tested a new containment augmentation ring, and the commenter contends that this new ring will provide a level of safety comparable to the required shroud. Further, the containment augmentation ring is much simpler to install. The FAA concurs with the commenter's request. Since issuance of the proposal, the FAA has reviewed and approved Garrett Alert Service Bulletin GTCP85–49–A6706, dated December 7, 1992, which describes procedures for installing an improved containment augmentation ring that has been designed to provide additional containment capability to ensure containment in the event of a turbine wheel separation. Paragraphs (a) and (b) of the final rule have been revised to include an option to install this containment augmentation ring.

One commenter requests that operators of cargo airplanes, which are equipped with on-ground-only operable Garrett Model GTCP85 series APU's, be excluded from the requirements of the proposal. The commenter considers that there is a reduced risk of personal injury hazards in cargo airplanes because few, if any, passengers are carried aboard.

The FAA does not concur. The unsafe condition addressed in this AD is not necessarily only related to injury to passengers onboard an airplane. Should the containment capability of the turbine shroud fail on an airplane equipped with an on-ground-only operable APU, shroud fragments could puncture the APU compartment, thus reducing the fire protection capability of the APU compartment. Should a fire begin and spread while the airplane is on the ground, it could pose a hazard not only to the flight crew on board, but to maintenance personnel or fire fighters on the ground, as well. The FAA has determined that the addressed unsafe condition exists on all airplanes equipped with on-ground-only operable Garrett Model GTCP85 series APU's regardless of airplane operations (cargo or passenger configuration).

One commenter requests that installation of a containment augmentation ring in accordance with Garrett Service Bulletin GTCP85–49–5689, dated July 24, 1987, continue to be considered as an acceptable option to installation of the required shroud constructed of Hastelloy "S" material. As justification of this request, the commenter points out that Garrett Service Bulletin GTCP85–49–5700, which is referenced in the proposal, specifically states that installation of the Hastelloy "S" turbine wheel shroud is an option to installation of the containment augmentation ring. The FAA does not concur with the commenter's request. As discussed previously, since the issuance of AD 87–24–11, which references Garrett Service Bulletin GTCP85–49–5689, there has been an incident in which the turbine wheel separated on a Garrett Model GTCP85 series APU. Subsequently, fragments impacted the turbine wheel shroud and shroud fragments exited the APU. Investigation of this incident revealed that the shroud was constructed of Inconel 718 material, and that a containment augmentation ring had been installed in accordance with Garrett Service Bulletin GTCP85–49–5689. The circumstances of this incident indicate, therefore, that installation of those two components (the turbine wheel shroud made of Inconel 718, and the containment augmentation ring specified in Service Bulletin GTCP85–49–5689) does not positively address the subject unsafe condition. However, as discussed previously, the manufacturer has developed an improved containment augmentation ring (described in Garrett Alert Service Bulletin GTCP85–49–A6706.) This containment augmentation ring and the turbine wheel shroud constructed of Hastelloy "S" material have been designed to provide additional containment capability to ensure containment in the event of turbine wheel separation. The FAA has determined that installation of one or both of these components will positively address the subject unsafe condition. Paragraphs (a) and (b) of the final rule have been revised to provide for the installation of either of these components.

One commenter implies that the AD should be delayed until the FAA can ensure that turbine wheel shrouds constructed of Hastelloy "S" material meet or exceed their intended function. This commenter notes that it has installed numerous Hastelloy "S" shrouds on its APU fleet in accordance with Garrett Service Bulletin GTCP85–49–5700. The commenter further notes that one of its APU's, on which a Hastelloy "S" turbine wheel shroud was installed, sustained an uncontained failure that resulted in impact to and rupture of the aircraft auxiliary hydraulic tubes in the adjacent tail compartment area. Because of this incident, the commenter contends that the Hastelloy "S" turbine wheel shroud may not perform as specified. The FAA does not concur with the commenter's request to delay this AD. The failure mode and effect of the APU in the incident cited by the commenter are different from those that prompted this AD action, and did not result in the unsafe condition addressed by the requirements of this AD. In that incident, the turbine wheel exited the APU axially via the APU exhaust; however, no fragments exited the APU radially. In the incident that prompted this AD action, however, the turbine wheel separated and, subsequently, turbine wheel fragments impacted the turbine wheel shroud; shroud fragments then exited the APU radially and punctured the APU compartment firewall. The FAA has determined that installation of a shroud constructed of Hastelloy "S" material will positively address the unsafe condition that is presented by shroud fragments puncturing the APU compartment. However, the FAA may consider further rulemaking to address the conditions relevant to the incident referenced by the commenter.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the change previously described. The FAA has determined that this change will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 1,050 Garrett Model GTCP85 series APU's of the affected design in the worldwide fleet. The FAA estimates that 350 Garrett Model GTCP85 series APU's of the affected design are installed on airplanes of U.S. registry and will be affected by this AD, that it will take approximately 105 workhours per APU to accomplish the required actions, and that the average labor rate is $55 per workhour. Required parts will cost approximately $5,240 per APU. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $3,855,250, or $11,015 per APU. (Generally, there is one APU installed on each airplane.) This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does

VOL 58 ISS 78 AP 26 1993 UMI

not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-07-13 Garrett Auxiliary Power Division: Amendment 39-8545. Docket 92-NM-174-AD.

Applicability: Garrett Model GTCP85 series auxiliary power units (APU), equipped with one-piece cast turbine wheels, part numbers 968095-X, 3604604-X, 3606982-1, or 3842072-1,-2,-3; as installed in, but not limited to, British Aerospace Model BAC 1-11 series airplanes, Boeing Model 707 series airplanes, Boeing Model 727 series airplanes, Boeing Model 737 series airplanes, Lockheed Model L382 series airplanes, McDonnell Douglas Model DC-8-70 series airplanes, McDonnell Douglas Model DC-9 series airplanes, and McDonnell Douglas Model MD-88 airplanes; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent turbine shroud fragments from exiting the APU and puncturing the APU compartment, which could lead to reduced fire protection capability of the APU compartment, accomplish the following:

(a) For in-flight operable Garrett Model GTCP85 series Auxiliary Power Units (APU): Within 24 months after the effective date of this AD, accomplish the requirements of either paragraph (a)(1) or (a)(2) of this AD.

(1) Remove the turbine wheel shrouds constructed of Inconel 718 material and install a shroud constructed of Hastelloy "S" material, part number 3611904-1, in accordance with Garrett Service Bulletin GTCP85-49-5700, dated July 20, 1987; Revision 1, dated October 6, 1988; or Revision 2, dated August 31, 1989.

(2) Install turbine shroud containment augmentation ring, part number 3616426-1, in accordance with Garrett Alert Service Bulletin GTCP85-49-A6706, dated December 7, 1992.

(b) For on-ground-only operable Garrett Model GTCP85 series APU's: Within 36 months after the effective date of this AD, accomplish the requirements of either paragraph (b)(1) or (b)(2) of this AD.

(1) Remove the turbine wheel shroud constructed of Inconel 718 meterial and install a shroud constructed of Hastelloy "S" material, part number 3611904-1, in accordance with Garrett Service Bulletin GTCP85-49-5700, dated July 20, 1987; Revision 1, dated October 6, 1988; or Revision 2, dated August 31, 1989.

(2) Install turbine shroud containment augmentation ring, part number 3616426-1, in accordance with Garrett Alert Service Bulletin GTCP85-49-A6706, dated December 7, 1992.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The removal and installations shall be done in accordance with the following Garrett service bulletins, which contain the specified effective pages:

Service bulletin reference and date	Page No.	Revision level shown on page	Date shown on page
GTCP85-49-5700 Original July 20, 1987	1-10	Original*	July 20, 1987.
GTCP85-49-5700	1-4, 7-10	1	Oct. 6, 1988.
Revision 1, Oct. 6, 1988	5-6	Original	July 20, 1987.
GTCP85-5700	1, 5-10	2	Aug. 31, 1989.
Revision 2, Aug. 31, 1989	2-4	1	Oct. 6, 1988.
GTCP85-49-A6706, Original, Dec. 7, 1992	1-10	Original	Dec. 7, 1992.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Garrett Airlines Services Division, Technical Publications, Department 65-70, P.O. Box 52170, Phoenix, Arizona 85072-2170. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on May 26, 1993.

Issued in Renton, Washington, on April 13, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 93-CE-29-AD; Amendment 39-8557; AD 93-08-10]

Airworthiness Directives; British Aerospace, Regional Aircraft Limited, Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that applies to certain British Aerospace (BAe), Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. This action requires incorporating certain procedures in the form of operational bulletins from the manufacturer into the airplane flight manual (AFM). These bulletins specify instructions for certain preflight main cabin door checks, and correction of any problem found. Several instances of main cabin door failures, including two in-flight door separations, prompted this action. The actions specified by this AD are intended to prevent main cabin door failure and separation of the door in flight, which could result in occupant decompression injuries, ejection of the occupant from the airplane, or loss of control of the airplane.

DATES: Effective May 14, 1993.

Comments for inclusion in the Rules Docket must be received on or before July 9, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket 93-CE-29-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

The bulletins referenced in this AD may be obtained from Jetstream Aircraft, Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44-292) 79888; Facsimile (44-292) 79703; or Jetstream Aircraft, Inc., Librarian, P.O. Box 16029, Dulles International Airport, Washington, DC 20041-6029; Telephone (703) 406-1161; Facsimile (703) 406-1469. This information may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket 93-CE-29-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond A. Stoer, Program Officer, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium; Telephone (322) 513.38.30 ext. 2710; Facsimile (322) 230.68.99; or Mr. John P. Dow, Sr., Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106; Telephone (816) 426-6932; Facsimile (816) 426-2169.

SUPPLEMENTARY INFORMATION: The FAA has received reports of several instances of main cabin door failures on certain BAe, Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. This includes (1) two in-flight separations of the main cabin door; (2) one instance where the main cabin door opened during takeoff; and (3) several service difficulty reports describing main cabin door or door warning system malfunctions. If a main cabin door that is not properly closed and locked or is susceptible to failure is not identified and the problem corrected, the door could separate from the airplane in flight, resulting in occupant decompression injuries, ejection of the occupant from the airplane, or loss of control of the airplane.

Jetstream Aircraft Limited has issued advance amendment bulletins (AAB) that specify procedures for certain preflight main cabin door checks, and correction of any problem found. These bulletins include the following:

Model	AFM	AAB
Jetstream 3101	HP.4.10	8
Jetstream 3201	HP.4.16	5

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. The FAA has examined the circumstances and reviewed all available information related to the incidents described above, and has determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop in other BAe, Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes of the same type design, this AD requires incorporating the applicable AAB described above into the appropriate sections of the AFM. These AAB's specify procedures for certain preflight main cabin door checks, and correction of any problem found.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for public prior comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting immediate flight safety and, thus, was not preceded by notice and opportunity to comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 93-CE-29-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket (otherwise, an evaluation is not

VOL 58 ISS 78 AP 26 1993 UMI

required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-08-10—British Aerospace, Regional Aircraft Limited: Amendment 39-8557; Docket No. 93-CE-29-AD.

Applicability: Jetstream Models 3101 and 3201 airplanes (all serial numbers), certificated in any category.

Compliance: Required within the next 25 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent main cabin door failure and separation of the door in flight, which could result in occupant decompression injuries, ejection of the occupant from the airplane, or loss of control of the airplane, accomplish the following:

(a) Incorporate whichever of the following Jetstream Aircraft Limited advance amendment bulletins (AAB) that applies into the appropriate sections of the applicable airplane flight manual (AFM):

Model	AFM	AAB
Jetstream 3101	HP.4.10	8
Jetstream 3201	HP.4.16	5

These AAB's specify procedures for certain preflight main cabin door checks, and correction of any problem found.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Brussels Aircraft Certification Office.

(d) The documents referenced in this AD may be obtained from Jetstream Aircraft Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; or Jetstream Aircraft Inc., Librarian, P.O. Box 16029, Dulles International Airport, Washington, DC 20041-6029. This information may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment (39-8557) becomes effective on May 14, 1993.

Issued in Kansas City, Missouri, on April 19, 1993.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-9615 Filed 4-23-93; 8:45 am]

BILLING CODE 4910-13-U

14 CFR Part 39

[Docket No. 93-CE-28-AD; Amendment 39-8556; AD 93-08-09]

Airworthiness Directives; Fairchild Aircraft SA227 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that applies to certain SA227 series airplanes where the nose wheel steering system is modified in accordance with certain service information or where this modification was incorporated during production. This final rule action specifies certain limitations on utilizing the nose wheel steering system on the affected airplanes. Reports of nose wheel steering malfunctions on the airplanes that have the referenced nose wheel steering system modification prompted this action. The actions specified by this AD are intended to prevent loss of directional control of the airplane during takeoff or landing caused by nose wheel steering system malfunctions.

DATES: Effective May 14, 1993.

Comments for inclusion in the Rules Docket must be received on or before July 9, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket 93-CE-28-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

The document referenced in this AD may be obtained from Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279-0490; Telephone (512) 824-9421. Information that relates to this AD may be examined at the FAA, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Werner Koch, Aerospace Engineer, FAA, Airplane Certification Office, 4400 Blue Mound Road, Fort Worth, Texas 76193-0150; Telephone (817) 624-5163; Facsimile (817) 624-5029.

SUPPLEMENTARY INFORMATION: The FAA has received several reports of nose wheel steering system malfunctions on certain Fairchild Aircraft SA227 series airplanes where the nose wheel steering system is modified in accordance with Fairchild Service Bulletin (SB) 227-32-030, Issued: February 22, 1991, Revised: October 5, 1991. In addition, Fairchild Aircraft Model SA227-DC airplanes have this modification incorporated at production. If nose wheel steering system utilization is not limited, the condition referenced above could lead to loss of directional control of the airplane during takeoff or landing.

Fairchild Aircraft has issued a nose wheel steering revision for the Limitations Section of the Model SA227-DC airplane flight manual (AFM). Similar procedures are specified in this AD for the remaining affected model airplanes.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that AD action should be taken in order to prevent this condition because of nose wheel steering system malfunction.

Since an unsafe condition has been identified that is likely to exist or develop in other Fairchild Aircraft SA227 series airplanes of the same type design that (1) have complied with Fairchild SB 227-32-030, Issued: February 22, 1991, Revised: October 5, 1991; or (2) have this nose wheel steering system modification incorporated during production (Model SA227-DC), this action requires nose wheel steering limitations. For the Model SA227-DC airplanes, this action is accomplished by incorporating FAA-Approved Model SA227-DC AFM Revision 8, dated April 2, 1993, into the Limitations Section of the AFM. This AFM revision specifies nose wheel steering limitations. For the other affected airplane models, this action is accomplished by placing a copy of the

AD into the Limitations Section of the applicable AFM.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for public prior comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting immediate flight safety and, thus, was not preceded by notice and opportunity to comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 93-CE-28-AD." The postcard will be date stamped and returned to the commenter.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket (otherwise, an evaluation is not required). A copy of it, if filed, may be obtained from the Rules Docket.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-08-09 Fairchild Aircraft: Amendment 39-8556; Docket No. 93-CE-28-AD.

Applicability: Models SA227-TT, SA227-AT, SA227-AC, and SA227-BC, airplanes (all serial numbers), certificated in any category that have the nose wheel steering system modified in accordance with Fairchild Service Bulletin (SB) 227-32-030, Issued: February 22, 1991, Revised: October 5, 1991; and Model SA227-DC airplanes (serial numbers 784 and 790 through 825), certificated in any category.

Compliance: Required within the next 25 hours time-in-service, unless already accomplished.

To prevent loss of directional control of the airplane during takeoff or landing caused by nose wheel steering malfunctions, accomplish the following:

(a) For the Models SA227-TT, SA227-AT, SA227-AC, and SA227-BC airplanes, place a copy of this AD into the Limitations Section of the Airplane Flight Manual (AFM) in order to incorporate the following nose wheel steering system limitations:

(1) Check the nose wheel steering prior to each takeoff using the procedures in the Normal Procedures section of the airplane flight manual.

(2) The use of nose wheel steering for takeoff and landing is prohibited. Prior to each takeoff, turn the nose wheel arm switch to "OFF", and do not turn to "ON" until after landing and the airplane has slowed to taxi speed.

(b) For the Model SA227-DC airplanes, incorporate FAA-Approved Model SA227-DC AFM Revision 8, dated April 2, 1993, into the Limitations Section of the AFM. This AFM revision specifies nose wheel steering limitations.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Airplane Certification Office, FAA, Fort Worth, Texas 76193-0150. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth Airplane Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Fort Worth Airplane Certification Office.

(e) All persons affected by this directive may obtain a copy of the document referenced from Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279-0490; or may examine information related to this AD at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(f) This amendment (39-8556) becomes effective on May 14, 1993.

Issued in Kansas City, Missouri, on April 19, 1993.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-9643 Filed 4-23-93; 8:45 am]

BILLING CODE 4910-13-U

14 CFR Part 39

[Docket No. 92-NM-144-AD; Amendment 39-8555; AD 93-08-08]

Airworthiness Directives; de Havilland, Inc., Model DHC-8 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain de Havilland Model DHC-8 series airplanes equipped with microwave landing system (MLS) provisions, that requires a general visual inspection to determine whether the

VOL 58 ISS 78 AP 26 1993 UMI

vertical deviation wiring has been properly installed and/or connected to link the MLS with the ground proximity warning system (GPWS), and, if necessary, correction of the wiring and performance of a functional test. This amendment is prompted by reports that wiring in some airplanes has not been corrected to provide GPWS Mode 5 "Below Glideslope" warning when operating with the MLS. The actions specified by this AD are intended to prevent the airplane from landing short of the runway.

DATES: Effective May 26, 1993.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 26, 1993.

ADDRESSES: The service information referenced in this AD may be obtained from de Havilland, Inc., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Engine and Propeller Directorate, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Cuneo, Electrical Engineer, Systems and Equipment Branch, ANE-173, New York Aircraft Certification Office, FAA, Engine and Propeller Directorate, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; telephone (516)791-6427; fax (516) 791-9024.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain de Havilland Model DHC-8 series airplanes equipped with microwave landing system (MLS) provisions was published in the **Federal Register** on August 26, 1992 (57 FR 38626). That action proposed to require a visual inspection to determine whether the vertical deviation wiring has been properly installed and/or connected to link the MLS with the ground proximity warning system (GPWS), and, if necessary, correction of the wiring and performance of a functional test.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter requests that the compliance time specified in paragraph (a) of the proposal be revised from the proposed 45 days to "prior to the next use of the MLS," in order to be consistent with the compliance time specified in the corresponding Canadian AD and to exclude airplanes that are not actually equipped with an MLS from being subject to the requirements of the proposal. The commenter notes that the proposed AD is applicable to Model DHC-8 series airplanes equipped with MLS provisions as listed in the referenced service bulletin; however, not all of the airplanes listed in that service bulletin are actually equipped with an MLS. Therefore, if the compliance time specified in paragraph (a) of the proposed rule is not revised, those airplanes that are listed in the service bulletin, but not actually equipped with an MLS, would be required to be inspected within 45 days after the effective date of the AD.

The FAA concurs partially with the commenter's request to revise the proposed compliance time. The FAA did not intend to require that the inspection proposed in paragraph (a) of this AD be accomplished on airplanes that are not actually equipped with an MLS. However, once an MLS has been installed, it would be impossible for the FAA to determine whether or when the MLS had been used. Therefore, use of the MLS is not an appropriate basis for establishing compliance time. Accordingly, the FAA has revised paragraph (a) of the final rule to require that this inspection be accomplished "prior to installation of an MLS, or within 45 days after the effective date of this AD, whichever occurs later."

A second commenter supports the proposed rule, but asks that the FAA disapprove any request for an extension of the proposed compliance time that may be submitted in accordance with the alternative methods of compliance provisions of paragraph (b) of the proposal unless affected airplanes are limited to "day visual meteorological condition (VMC)" operations. The commenter contends that if the addressed warning system were to fail during conditions other than "day VMC" operations, the consequences of that failure would be serious and an acceptable margin of safety for the flying public would not be maintained.

The FAA does not concur with the commenter's request to categorically limit the provisions for granting alternative methods of compliance with this AD. The FAA acknowledges that limitations other than that presented by the commenter may exist that would provide an acceptable level of safety. Therefore, under the provisions of paragraph (b) of the final rule, the FAA will evaluate each request for an adjustment of the compliance time on a case-by-case basis, and may approve such a request if data is submitted that substantiates that such an adjustment would provide an acceptable level of safety.

The FAA has revised paragraph (a) of the final rule to clarify that the level of visual inspection required is a "general" visual inspection.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 8 airplanes of U.S. registry will be affected by this AD, that it will take approximately 3 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $1,320, or $165 per airplane. This total cost figure assumes that no operator has yet accomplished the requirements of this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

93-08-08 de Havilland, Inc.: Amendment 39-8555. Docket 92-NM-144-AD.

Applicability: Model DHC-8 series airplanes equipped with microwave landing system (MLS) provisions, as listed in de Havilland Service Bulletin S.B. 8-34-60, Revision 'C,' dated November 1, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent the airplane from landing short of the runway, accomplish the following:

(a) Prior to installation of an MLS, or within 45 days after the effective date of this AD, whichever occurs later, perform a general visual inspection to determine whether the vertical deviation wiring has been properly installed and/or connected to link the MLS with the ground proximity warning system (GPWS), in accordance with de Havilland Service Bulletin S.B. 8-34-60, Revision 'C,' dated November 1, 1991.

(1) If any vertical deviation wiring has been found that has not been properly installed and/or connected to link the MLS with the GPWS, prior to further flight, correct the wiring and perform a functional test of the system in accordance with the service bulletin.

(2) If vertical deviation wiring has been found that has been properly installed and/or connected to link the MLS with the GPWS, no further action is necessary.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, New York Aircraft Certification Office (ACO), FAA, Engine and Propeller Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, New York ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the New York ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) The inspection, wiring correction, and functional test shall be done in accordance with de Havilland Service Bulletin S.B. 8-34-60, Revision 'C,' dated November 1, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies may be obtained from de Havilland, Inc., Garratt Boulevard, Downsview, Ontario M3K 1Y5, Canada. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Engine and Propeller Directorate, New York Aircraft Certification Office, 181 South Franklin Avenue, room 202, Valley Stream, New York 11581; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on May 26, 1993.

Issued in Renton, Washington, on April 16, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 93-9613 Filed 4-23-93; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

Bureau of Export Administration

15 CFR Part 799

[Docket No. 920818-3006]

Revisions to the Commerce Control List: Equipment Related to the Production of Biological Weapons

AGENCY: Bureau of Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Export Administration maintains the Commerce Control List (CCL), which appears in the Export Administration Regulations (EAR). This rule amends the CCL by revising Export Control Classification Number (ECCN) 1B71E. This ECCN controls dual-use equipment that can be used in the production of biological weapons (BW). In addition, this rule removes ECCN 1C65E for complex media. These changes conform the list of U.S. controlled BW items to the Australia Group list.

DATES: This rule is effective April 26, 1993.

FOR FURTHER INFORMATION CONTACT: For questions on chemical and biological weapon foreign policy controls, call Toni Jackson, Office of Technology and Policy Analysis, Bureau of Export Administration, Telephone: (202) 482-5286.

For questions of a technical nature on equipment that can be used to produce chemical and biological weapons agents, call James Seevaratnam, Office of Technology and Policy Analysis, Bureau of Export Administration, Telephone: (202) 482-5696.

SUPPLEMENTARY INFORMATION:

Background

At the June, 1992, meeting of the Australia Group, the United States sought the agreement of all Australia Group governments to adopt comparable controls on dual-use biological equipment. The twenty-four member Australia Group, in which the United States participates, seeks to prevent the proliferation of chemical and biological weapons. The delegates agreed, subject to approval by their governments, to establish a common control list for exports of dual-use biological equipment.

On September 14, 1992, BXA published in the **Federal Register** (57 FR 41894) a proposed rule that described certain changes to the U.S. list that would conform the U.S. controls on biological equipment to the list being considered for adoption by the Australia Group.

Concurrent with the consideration of the Australia Group's proposed equipment list by member governments, the U.S. requested comments on the changes to conform the U.S. list to the proposed Australia Group list. Commerce was particularly interested in seeking specific comments related to:

(1) The threshold of 300 liters established as the control parameter for fermenters; and

(2) The scope of the control established for freeze-drying equipment in terms of its impact on civilian applications.

BXA received one comment on the September 14, 1992, proposed rule. While the commenter supported the adoption of a biological equipment list by the Australia Group, they suggested the following modifications to the equipment described in the proposed rule:

(1) Centrifuges: recommended the development of suitable parameters specific to the biotechnology area;

(2) Containment equipment: recommended that paragraph (g) be removed because it repeats controls described in paragraph (b)(2);

(3) Detection systems: recommended that BXA control only those detection systems that are "specifically designed"; and

(4) Freeze-drying equipment: recommended that BXA only control freeze-drying equipment in paragraph (f) that would be capable of in-situ steam sterilization in a closed state.

VOL 58 ISS 78 AP 26 1993 UMI

Based upon discussions held at the December 1992 meeting of Australia Group countries, this final rule revises the Commerce Control List (CCL) by adopting the Australia Group's list of biological equipment, as follows:

a. Biohazard containment equipment as follows:

1. Complete containment facilities at P3 or P4 containment level; and

2. Equipment that incorporates or is contained in a P3 or P4 containment housing.

b. Fermenters capable of cultivation of pathogenic micro-organisms, viruses or for toxin production, without the propagation of aerosols, and having *all* the following characteristics:

1. A capacity equal to or greater than 300 liters;

2. Double or multiple sealing joints within the stream containment area;

3. Capable of in-situ sterilization in a closed state.

Note: Sub-groups of fermenters include bioreactors, chemostats, and continuous-flow systems.

c. Centrifugal separators capable of the continuous separation of pathogenic micro-organisms, without the propagation of aerosols, and having *all* of the following characteristics:

1. A flow rate greater than 100 liters per hour;

2. Components of polished stainless steel or titanium;

3. Double or multiple sealing joints within the stream containment area;

4. Capable of in-situ stream sterilization in a closed state.

Note: Centrifugal separators include decanters.

d. Cross-flow filtration equipment designed for continuous separation of pathogenic microorganisms, viruses, toxins, and cell cultures without the propagation of aerosols, having *all* of the following characteristics:

1. Equal to or greater than 5 square meters;

2. Capable of in-situ sterilization.

e. Steam sterilizable freeze-drying equipment with condensor capacity greater than 50 kgs. but less than 1,000 kgs. of ice in 24 hours.

f. Equipment that incorporates or is contained in P3 or P4 containment housing, as follows:

1. Independently ventilated protective full or half suits; and

2. Class III biological safety cabinets or isolators with similar performance standards.

g. Chambers designed for aerosol challenge testing with pathogenic micro-organisms, viruses, or toxins and having a capacity of 1 cubic meter or greater.

Exports and reexports of equipment that can be used in the production of biological weapons controlled by ECCN 1B71E will continue to require an individual validated license to Country Groups S and Z and to the regions and countries listed in Supplement No. 5 to part 778 of the Export Administration Regulations (EAR). In addition, the Secretary of Commerce submitted a report to Congress on December 4, 1992, describing these revised controls.

Savings Clause

Shipments of items removed from general license authorizations as a result of this regulatory action that were on dock for loading, on lighter, laden abroad an exporting carrier, or en route aboard carrier to a port of export pursuant to actual orders for export before May 10, 1993, may be exported under the previous general license provisions up to and including May 24, 1993. Any such items not actually exported before midnight May 24, 1993, require a validated export license in accordance with this regulation.

Rulemaking Requirements

1. This rule is consistent with Executive Orders 12291 and 12861.

2. This rule involves collections of information subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These collections have been approved by the Office of Management and Budget under control numbers 0694–0005 and 0694–0010.

3. This rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612.

4. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under section 3(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

5. The provisions of the Administrative Procedure Act (5 U.S.C. 553), requiring notice of proposed rulemaking, the opportunity for public participation, and a delay in effective date, are inapplicable because this regulation involves a foreign and military affairs function of the United States. No other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule.

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are always welcome on a continuing basis. Comments should be submitted to Patricia Muldonian, Office of Technology and Policy Analysis, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects in 15 CFR Part 799

Exports, Reporting and recordkeeping requirements.

Accordingly, part 799 of the Export Administration Regulations (15 CFR parts 730–799) is amended as follows:

PART 799—[AMENDED]

1. The authority citation for 15 CFR part 799 is revised to read as follows:

Authority: Pub. L. 90–351, 82 Stat. 197 (18 U.S.C. 2510 *et seq.*), as amended; sec. 101, Pub. L. 93–153, 87 Stat. 576 (30 U.S.C. 185), as amended; sec. 103, Pub. L. 94–163, 89 Stat. 877 (42 U.S.C. 6212), as amended; secs. 201 and 201(11)(e), Pub. L. 94–258, 90 Stat. 309 (10 U.S.C. 7420 and 7430(e)), as amended; Pub. L. 95–223, 91 Stat. 1626 (50 U.S.C. 1701 *et seq.*); Pub. L. 95–242, 92 Stat. 120 (22 U.S.C. 3201 *et seq.* and 42 U.S.C. 2139a); sec. 208, Pub. L. 95–372, 92 Stat. 668 (43 U.S.C. 1354); Pub. L. 96–72, 93 Stat. 503 (50 U.S.C. App. 2401 *et seq.*), as amended; sec. 125, Pub. L. 99–64, 99 Stat. 156 (46 U.S.C. 466c); E.O. 11912 of April 13, 1976 (41 FR 15825, April 15, 1976); E.O. 12002 of July 7, 1977 (42 FR 35623, July 7, 1977), as amended; E.O. 12058 of May 11, 1978 (43 FR 20947, May 16, 1978; E.O. 12214 of May 2, 1980 (45 FR 29783, May 6, 1980); E.O. 12730 of September 30, 1990 (55 FR 40373, October 2, 1990), as continued by Notice of September 25, 1992 (57 FR 44649, September 28, 1992); and E.O. 12735 of November 16, 1990 (55 FR 48587, November 20, 1990), as continued by Notice of November 11, 1992 (57 FR 53979, November 13, 1992).

Supplement No. 1 to § 799.1 [Amended]

2. In Supplement No. 1 to § 799.1, Category 1, ECCN 1B71E is amended by revising the List of Items Controlled to read as follows:

1B71E Equipment that can be used in the production of biological weapons.

* * * * *

List of Items Controlled

a. Biohazard containment equipment as follows:

a.1. Complete containment facilities at P3 or P4 containment level; and

a.2. Equipment that incorporates or is contained in a P3 or P4 containment housing.

b. Fermenters capable of cultivation of pathogenic micro-organisms, viruses or for toxin production, without the propagation of aerosols, and having *all* the following characteristics:

b.1. A capacity equal to or greater than 300 liters;

b.2. Double or multiple sealing joints within the stream containment area;

b.3. Capable of in-situ sterilization in a closed state.

Note: Sub-groups of fermenters include bioreactors, chemostats, and continuous-flow systems.

c. Centrifugal separators capable of the continuous separation of pathogenic micro-organisms, without the propagation of aerosols, and having *all* of the following characteristics:

c.1. A flow rate greater than 100 liters per hour;

c.2. Components of polished stainless steel or titanium;

c.3. Double or multiple sealing joints within the stream containment area;

c.4. Capable of in-situ stream sterilization in e closed state.

Note: Centrifugal separators include decanters.

d. Cross-flow filtration equipment designed for continuous separation of pathogenic microorganisms, viruses, toxins, and cell cultures without the propagation of aerosols, having *all* of the following characteristics:

d.1. Equal to or greater than 5 square meters;

d.2. Capable of in-situ sterilization.

e. Steam sterilizable freeze-drying equipment with condensor capacity greater than 50 kgs. but less than 1,000 kgs. of ice in 24 hours.

f. Equipment that incorporates or is contained in P3 or P4 containment housing, as follows:

f.1. Independently ventilated protective full or half suits; and

f.2. Class III biological safety cabinets or isolators with similar performance standards.

g. Chambers designed for aerosol challenge testing with pathogenic micro-organisms, viruses, or toxins and having a capacity of 1 cubic meter or greater.

3. In Supplement No. 1 to § 799.1, Category 1, ECCN 1C65E is removed.

Dated: April 20, 1993.

[Release Nos. 33–6993; IC–19412; S7–1–90]

RIN 3235–AD81

Disclosure of Mutual Fund Performance and Portfolio Managers

AGENCY: Securities and Exchange Commission.

ACTION: Correction to final rules.

SUMMARY: This document contains a correction to the release adopting rule and form amendments under the Securities Act of 1933 and the Investment Company Act of 1940 that was published Monday, April 12, 1993 (58 FR 19050). As the Commission stated in that release, performance information contained in periodic reports to shareholders is exempt from the currentness requirements of rule 34b–1. The rule text setting forth this exemption was inadvertently omitted from the release.

EFFECTIVE DATE: July 1, 1993. This is the effective date for most but not all mutual funds. For the specific applicability of the effective date to individual funds, see Section I.E. of the release in which the rule and form amendments were adopted, published Monday, April 12, 1993 (58 FR 19050).

FOR FURTHER INFORMATION CONTACT: Martha H. Platt, Senior Attorney, or Robert E. Plaze, Assistant Director, (202) 272–2107, Office of Disclosure and Adviser Regulation, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: Accordingly, the publication on April 12, 1993 of the adopting release, which was the subject of FR Doc. 93–8454, is corrected as follows: On page 19056 in the first column, in the ninth line of § 270.34b–1(b)(2), remove the period following "the period covered by the report" and add the following before "Note * * *": "; nor shall the requirements of paragraphs (e)(3)(ii) and (f) of rule 482 [17 CFR 230.482(e)(3)(ii) and (f)] apply to any such periodic report containing any other performance date."

Dated: April 20, 1993.

Margaret H. McFarland,

Deputy Secretary.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[CC Docket No. 90-358; FCC 93-139]

Cellular Radio Service

AGENCY: Federal Communications Commission.

ACTION: Final rules.

SUMMARY: The Federal Communications Commission has revised certain rules governing the conduct of comparative renewal proceedings in the cellular radio service. The proposed revisions are necessary to define the standards that a renewal applicant must meet in order to obtain a renewal expectancy, which is the most significant preference awarded in a comparative renewal proceeding, and to streamline hearing procedures for such proceedings. The intent of these revisions is to promote efficiency in licensing of the cellular radio service and to provide excellent service to the public in an uncomplicated, timely, and courteous manner.

EFFECTIVE DATES: The rules are effective July 26, 1993, except that the effective date for the revision of § 22.942 of the Rules is stayed until the Memorandum Opinion and Order on Reconsideration is final and no longer subject to judicial review. The Commission will publish a document in the **Federal Register** announcing the effective date of the revision of § 22.942.

FOR FURTHER INFORMATION CONTACT: R. Barthen Gorman, Mobile Services Division, Common Carrier Bureau, (202) 632-6450.

SUPPLEMENTARY INFORMATION: The following is a summary of the Commission's *Memorandum Opinion and Order on Reconsideration*, adopted March 11, 1993, and released April 9, 1993. The full text of this Commission decision, which includes the Amended Final Regulatory Flexibility Analysis concerning that decision, is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC 20554. The complete text of this decision may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 202-857-3800, 2100 M Street, NW., suite 140, Washington, DC 20037.

Paperwork Reduction

The total public reporting burden for the collections of information required by the Commission's Rules adopted in this docket is estimated to average 65 hours for each applicant who is subject to all of those collections. This estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. Send comments regarding this burden estimate or any other aspect of these collections of information, including suggestions for reducing the burden, to the Federal Communications Commission, Records Management Division, room 234, Paperwork Reduction Project (3060-0457), Washington, DC 20554 and to the Office of Management and Budget, Paperwork Reduction Project (3060-0457), Washington, DC 20503.

Summary of the Memorandum Opinion and Order on Reconsideration

1. This Order amends certain rules governing the conduct of comparative renewal proceedings in the Domestic Public Cellular Radio Telecommunications Service. Such proceedings are initiated when a cellular licensee seeks renewal of its license at the end of the 10-year license period and challengers file competing applications. The Report and Order, 57 FR 3027 (January 27, 1992), which first established standards for conducting cellular radio comparative renewal proceedings also created standards for awarding a renewal expectancy, which is a major comparative preference awarded to a licensee for its performance during its license term. A renewal expectancy would be more significant than any other preference awarded in a comparative renewal proceeding.

2. This Order adopts a new two-step procedure for cellular license renewal hearings and also modifies the renewal expectancy standards. It concludes that the public interest is served by ensuring that cellular licensees are not subject to competing applications once they have demonstrated substantial performance and earned a renewal expectancy. The two-step procedure also helps in achieving the same three objectives for which a renewal expectancy is awarded in the first place. These objectives are: (1) To encourage investment in cellular facilities; (2) to avoid the risk of replacing an acceptable service provider with an inferior one, based on unproven promises made by the challenging applicant; and (3) to avoid disruption of cellular radio service.

3. Under the two-step procedure, if the Presiding Judge determines in a threshold hearing that the renewal applicant deserves a renewal expectancy, the renewal application would be granted. If the renewal applicant does not receive a renewal expectancy in the threshold hearing, the Presiding Judge would then conduct a full hearing comparing the applicants pursuant to the evaluation criteria described in the Rules. Further, a challenging applicant which proposes to provide service which far exceeds that presently being provided by the incumbent licensee may request a waiver of step one of the two-step procedure.

4. With respect to the renewal expectancy standards, the item strengthens the first criterion to make clear that a licensee must have provided substantial service during its license term to earn a renewal expectancy. "Substantial" service is defined as service which is sound, favorable, and substantially above a level of mediocre service which might just minimally warrant renewal. The second criterion, which requires substantial compliance with applicable Commission rules, policies, and the Communications Act, is retained. The third criterion, which provided that a licensee must not have otherwise engaged in substantial relevant non-FCC misconduct, has been eliminated. A licensee can still be disqualified for engaging in relevant non-FCC misconduct. Nevertheless, if such misconduct does not raise disqualifying issues, it will not be considered in determining whether a cellular licensee deserves a renewal expectancy. Elimination of the third criterion is consistent with applicable case law and policies.

Ordering Clauses

Accordingly, *It is ordered* that the rule changes made herein will become effective ninety (90) days after publication in the **Federal Register**, except that the effective date for new § 22.942 of the Rules is stayed until this Memorandum Opinion and Order on Reconsideration is final and no longer subject to judicial review.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

Rule Changes

Part 22 of Title 47 of the Code of Federal Regulations is amended as follows:

PART 22—PUBLIC MOBILE SERVICE

1. The authority citation for part 22 continues to read as follows:

Authority: 47 U.S.C. 154, 303, unless otherwise noted.

2. Section 22.941 is amended by removing "; and" at the end of paragraph (a)(2) and adding a period in its place, revising paragraphs (a)(1) and (d)(2), and removing paragraph (a)(3) to read as follows:

§ 22.941 Criteria for comparative cellular renewal proceedings.

(a) * * *

(1) Has provided "substantial" service during its past license term. "Substantial" service is defined as service which is sound, favorable, and substantially above a level of mediocre service which might just minimally warrant renewal; and

* * * * * *

(d) * * *

(2) To determine on a comparative basis each applicant's proposal for expanding its system capacity in a coordinated manner in order to meet anticipated increasing demand for both local and roamer service;

* * * * * *

3. Section 22.942 is revised to read as follows:

§ 22.942 Procedures for comparative renewal proceedings.

The following hearing procedures shall apply to comparative renewal proceedings in the Domestic Public Cellular Radio Telecommunications Service:

(a) Within thirty (30) days of the issuance of the Public Notice announcing the filing of a renewal application and applications competing with that renewal application, the renewal applicant must file its renewal expectancy showing. An original and four copies of the renewal expectancy showing must be filed with the Commission and a copy served on each other party to the proceeding.

(b) Interested parties have thirty (30) days from the date that the renewal applicant submits its renewal expectancy showing to file petitions to deny any of the mutually exclusive applications. Applicants have fifteen (15) days to file replies; no further pleadings will be accepted.

(c) In most instances, the renewal application and any competing application(s) will be designated for a two-step hearing procedure. An Administrative Law Judge will conduct a threshold hearing, in which both the licensee and the competing applicants will be parties, to determine whether the renewal applicant deserves a renewal expectancy. If the order designating the applications for hearing specifies any basic qualifying issues against the licensee, those issues will be tried in this threshold (step one) hearing. If the Presiding Judge determines that the renewal applicant is basically qualified and due a renewal expectancy, the competing applicants will be found ineligible for further consideration and their applications will be denied. If the Presiding Judge determines that the renewal applicant does not merit a renewal expectancy but is otherwise qualified, then all the applications filed for that market will be considered in a comparative hearing (step two) which follows the expedited procedures described in §§ 22.916(b)(5) through (b)(8).

(d) Any competing applicant which demonstrates that its proposal so far exceeds the service presently being provided, that there would be no purpose in making a threshold determination as to whether the renewal applicant deserved a renewal expectancy vis-a-vis such a competing applicant, may request a waiver of the threshold hearing (step one) of the two-step procedure. The Commission, or the staff acting under specific delegated authority for an application, will act upon such a waiver request prior to designating the relevant applications for hearing.

(e) If the Presiding Judge issues a ruling in the step one hearing which denies the licensee a renewal expectancy, all the applicants involved in the proceeding will be allowed 90 days after the release of the Judge's ruling in step one to file their direct cases. Rebuttal cases must be filed within 30 days after the filing of the direct cases.

(f) The expedited hearing procedures delineated in §§ 22.916(b)(5) through (b)(8) shall be utilized in comparative cellular radio renewal proceedings.

BILLING CODE 6712-01-M

47 CFR Part 76

[MM Docket No. 92-266; FCC 93-185]

Cable TV Act of 1992

AGENCY: Federal Communications Commission.

ACTION: Interpretation; denial of stay petitions.

SUMMARY: The Commission has adopted an Order rejecting a stay pending judicial review of an order of April 1, 1993, temporarily freezing the rates for cable services, other than premium and pay-per-view service offerings, provided by cable systems subject to regulation under the Cable Act of 1992. This Order also interprets and clarifies the applicability of the Commission's order of April 1, 1993, temporarily freezing rates. This action is in response to petitions for stay pending appeal filed by Daniels Cablevision, Inc. and Time Warner Entertainment Co.

EFFECTIVE DATE: April 26, 1993.

FOR FURTHER INFORMATION CONTACT: Jennifer A. Manner, (202) 632-7500.

SUPPLEMENTARY INFORMATION: This is the text of the Commission's Order in MM Docket No. 92-266; FCC 93-185, adopted on April 8, 1993 and released on April 9, 1993.

Order

1. Daniels Cablevision, Inc. and Time Warner Entertainment Co. have filed requests for a stay pending judicial review of our order of April 1, 1993, in this proceeding freezing the rates for cable services, other than premium and pay-per-view service offerings, provided by cable systems subject to regulation under the Cable Act of 1992.[1] Freeze Order, 58 FR 17530 (Apr. 5, 1993). The Freeze Order became effective on April 5, 1993, upon publication in the **Federal Register** and extends for 120 days. The order was adopted at the same time as, and designed to support implementation of, a Report and Order in this proceeding (FCC 93-177) establishing rules to implement rate regulation of cable service as required under sections 3, 9 and 14 of the Cable Act of 1992, 47 U.S.C. 543, 532 and 542(c). That Report and Order has not yet been released. The purpose of the freeze is to prohibit cable systems from increasing their aggregate rates during the period between adoption of the rate regulation rules and the time when we expect that they can be effectively implemented by the FCC and local authorities. See Freeze Order at ¶¶ 3-4.

2. Daniels' motion relies almost exclusively on claims that the Freeze Order unlawfully burdens its First Amendment speech rights. Specifically, Daniels alleges that the Freeze Order is a "content-based restraint on 'press' and 'speech' activity," which bars "cable operators' exercise of editorial discretion in the selection and arrangement" of communications over their cable systems. Daniels Motion at 1-2, 3. As such, Daniels claims, the Freeze Order, "on its face, constitutes an

[1] Cable Television Consumer Protection and Competition Act, Public Law No. 102-385, 106 Stat. 1460 (1992).

VOL 58 ISS 78 AP 26 1993 UMI

impermissible 'burden' and an unconstitutional prior restraint on communication and on communicative activity under the First Amendment." *Id.* at 2. Daniels asks the Commission to stay the Freeze Order "pending final administrative and judicial resolution of the substantial constitutional question raised by the agency's action." *Id.* at 4.

3. Like Daniels, Time Warner alleges that the freeze will impinge upon its First Amendment rights. See Time Warner Motion at 7–8. However, Time Warner also argues (Motion at 3) that the Freeze Order is arbitrary and capricious because it "will lead to anomalous results creating irreparable injury" in at least two particular situations—where an existing subscriber switches from a less expensive to a more expensive tier or regulated service and where the cable system "enhance[s] the value of existing regulated services by adding channels, either because of added channel capacity due to a rebuild or because of a new affiliation with a cable programming service."

4. We deny both motions for stay. Daniels' constitutional claim is based upon a mischaracterization of the nature of the Freeze Order and does not justify the extraordinary relief Daniels seeks. First, contrary to Daniels' misstatement, the Freeze Order, on its face, imposes no content-based restriction on speech or any burden on the exercise of editorial discretion. Rather, the order simply prohibits—for a short period of 120 days—aggregate increases above the rates that the cable companies, as previously unregulated entities, had voluntarily set for their services as of the date the freeze begins. This freeze applies without regard to the content of the cable services and, notably, does not preclude cable operators from repackaging the services they provide and restructuring their rate design as long as the "average monthly subscriber bill," calculated across all regulated services, does not increase. Freeze Order at ¶4 & n. 7.

5. In addition, the Commission committed to "consider lifting this freeze for a particular cable operator if it can show that the freeze would impose severe economic hardship." Freeze Order at n. 6. Neither Daniels nor Time Warner has made any attempt to invoke this procedure by making a particularized showing of economic hardship.[2] Given this waiver procedure, and the fact that the frozen rates were voluntarily established in a non-competitive environment, we find no basis for the claim that the freeze would have any impact on the exercise of First Amendment rights at all.

6. Finally, the purpose of the Freeze Order is unrelated to the suppression or promotion of a particular viewpoint. Rather the order simply helps to ensure, consistent with the Cable Act of 1992, that rates for cable services are reasonable. Freeze Order at ¶3 & n.10 (citing 47 U.S.C. 543(b)(1) & (h)). Thus, to the extent that the freeze implicates free speech concerns at all, it demonstrably is not content based,[3] but rather lawful content-neutral economic regulation of the type that consistently has been found to survive constitutional scrutiny.[4]

7. We do believe, however, that Time Warner's claim that the freeze will lead to anomalous results warrants clarification of the Freeze Order. Time Warner asserts that the cap on the "average monthly subscriber bill" set out in the Freeze Order will have the consequence of forcing cable operators to prohibit customers from upgrading from less expensive to more expensive services, or forcing the cable operators not to levy the increased charges that would otherwise be associated with such an upgrade. Time Warner Motion at 3. Otherwise, Time Warner asserts, the "average monthly subscriber bill" would increase, without any change in rate schedules, simply by virtue of the customers' voluntary decisions to purchase an existing, more expensive service package. *Id.* Time Warner also claims that the freeze will effectively prevent cable operators from offering additional channels beyond those available prior to the freeze, because even though the provision of those additional channels would increase the cable operators' costs, the cable operators would be prohibited from charging for those additional channels. Time Warner Motion at 3–4.

8. We did not intend in the Freeze Order to mandate these results. To the extent that it may be read in such a manner, we clarify the order as set forth below.[5] The purpose of the order was to "protect consumers" against rate increases while "permit[ting] cable operators to make reasonable changes in service offerings * * *." Freeze Order at ¶4. The average monthly bill limit was intended to permit changes in individual rate components while constraining increases in overall rate levels. Given that purpose, a cable operator that makes *no* changes in its rates or services after April 5, 1993 will not be found in violation of the freeze even if its "average monthly subscriber bill" increases as a result, for example, of Time Warner's hypothetical situation of voluntary subscriber upgrading. Thus, if the specific rates in question were "in effect"[6] on the effective date of the Freeze Order, changes in subscriber demand that alter the average bill will not be interpreted as conflicting with the Freeze Order. Further, as explicitly set forth in that order, we anticipate that there will be changes in rate structures during the freeze period. Indeed, one of the functions of the freeze is to permit rate structure changes to take place in an environment where rate increases are not also being implemented. In this respect, the freeze was designed so that, as the substantive rate regulation process commences, much of the restructuring process will have taken place and subscribers, local regulatory authorities, and the Commission may focus on regulating or rolling back rates to the correct rate level. We view these kinds of rate structure changes as not calculated or designed to increase the "average monthly subscriber bill," and they, accordingly, are not prohibited under the Freeze Order. Moreover, although overall increases in existing rate levels are precluded during the freeze period,

[2] Indeed, Daniels has not alleged that it would suffer any monetary loss as a result of the freeze. Even if Daniels has made such allegations, it is difficult to imagine that a showing could be made that any monetary loss occasioned by freezing for 120 days rates that previously had been unregulated would meet the standard for irreparable injury. Courts have held that mere monetary losses, unless they threaten the very existence of the movant's business, do not constitute irreparable injury for purpose of staying an agency order. See, e.g., *Wisconsin Gas Co.* v. *FERC*, 758 F.2d 669, 674 (D.C. Cir. 1985).

[3] *See Ward* v. *Rock Against Racism*, 491 U.S. 781, 791 (1989) ("Government regulation of expressive activity is content neutral" where, as here, "it is justified without reference to the content of the regulated speech"); *Home Box Office, Inc.* v. *FCC*, 567 F.2d 9, 47 (D.C. Cir.), *cert. denied*, 434 U.S. 829 (1977) ("the important inquiry here * * * turns on the purpose for which government regulates").

[4] *See Associated Press* v. *United States*, 326 U.S. 1 (1945); *FCC* v. *National Citizens Committee for Broadcasting*, 436 U.S. 689, 800–02 (1979); *Storer Cable Communications* v. *City of Montgomery*, 806 F. Supp. 1518, 1557–62 (M.D. Ala. 1992).

[5] Time Warner acknowledged that "if the Commission were to issue a clarification avoiding the anomalous results set forth in the text, this would moot TWE's appeal to the extent that it attacks these aspects of the Freeze Order." Time Warner Motion at 5 n.2.

[6] Rates "in effect" include rates for all services being offered by a system and actually being charged subscribers prior to the effective date of the Freeze Order. Included are rates that are in effect with respect to some subscribers, even if they are subject to a staggered billing process, regardless of whether all subscribers had received bills on the effective date of the order. It is not intended that the freeze result in different rates being charged system subscribers for the same services based on billing cycles. Similarly, if portions of a system have been upgraded and higher rates are in effect for expanded service offerings, that upgrading process may continue with the rates in effect for this service being charged to subscribers as they convert to new levels of service.

contrary to Time Warner's assertion, the addition of new services is not foreclosed. New services may be added even if they increase subscriber demand for a higher priced service tier as long as the rate constraint is observed. Alternatively, a new service may be provided and charged for as an entirely new, optional service, unrelated to any existing service tier or existing rate.[7]

9. We do not agree with Time Warner's suggestion that the freeze on the "average monthly subscriber bill" will have the undesirable effect of either delaying new services or forcing a cable operator to accept significantly increased costs associated with those new services. This is particularly true in light of the limited duration of the Freeze Order. In this regard, we note that Time Warner's claim of irreparable injury is based exclusively on hypothetical possibilities and is completely unsupported by specific factual data. As discussed above, we have expressly provided for lifting the freeze in individual cases where "severe economic harm" is shown.

10. In the Freeze Order, we found that the 120-day freeze served the public interest by preventing cable operators from unfairly raising rates during the interim period until the Act could be fully implemented through a detailed regulatory structure that we have adopted but which has not yet taken effect. Freeze Order at ¶3. Neither Daniels nor Time Warner has provided any reason to reassess that public interest finding.

11. Accordingly, *it is ordered*, Pursuant to sections 4(i) and 4(j) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), that the motions for stay filed by Daniels Cablevision, Inc. and Time Warner Entertainment Co. are denied.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

[FR Doc. 93–9642 Filed 4–23–93; 8:45 am]

BILLING CODE 6712–01–M

[7] The Freeze Order also does not impair the ability of cable operators to offer and charge for new "premium" services or other programming services offered on an *a la carte* basis.

50 CFR Parts 204, 611, and 678

[Docket No. 920409–3047]

RIN 0648–AD12

Fishery Conservation and Management; Foreign Fishing; Atlantic Sharks

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule and interim final rule with request for comments.

SUMMARY: NMFS issues this final rule and interim final rule to implement the Fishery Management Plan for Sharks of the Atlantic Ocean (FMP). These rules: (1) Divide the 39 shark species managed by the FMP into three groups for management and resource assessment purposes (2) require annual permits for commercial shark fishing vessels fishing in the U.S. exclusive economic zone (EEZ); (3) require data reports from owners/operators of permitted vessels and persons conducting shark fishing tournaments; (4) require permitted vessels to accommodate NMFS-approved observers upon request; (5) establish a fishing year of January 1 through December 31; (6) prohibit "finning," the practice of harvesting sharks for fins alone; (7) require sharks not retained by fishermen to be released in a manner ensuring maximum probability of survival; (8) establish recreational bag limits for sharks; (9) establish annual and semiannual quotas for commercial landings of the large coastal and pelagic species groups and provide for commercial fishery closures when the species group quotas are reached; (10) limit the sale of sharks harvested from the EEZ to those caught from permitted vessels; (11) authorize the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), to implement or adjust certain management measures in accordance with a specified framework regulatory adjustment procedure; and (12) reduce the total allowable level of foreign fishing in the EEZ for the managed shark species to zero.

The intended effects of these rules are to: (1) Prevent overfishing of shark resources; (2) encourage management of shark stocks throughout their ranges; (3) establish a shark resource data collection, research, and monitoring program; and (4) increase the benefits from shark resources to the Nation while preventing waste.

DATES: Effective May 26, 1993, except that §§ 678.1, 678.2, 678.3, 678.4(a)(2), (a)(4), (b) through (g), and (i) through (k), 678.7(a), (u) and (v), 678.8 678.9, 678.20, 678.23, 678.26, and 678.27 are effective April 26, 1993; §§ 678.4(a)(1), (a)(3), and (h), 678.5(a) and (b), 678.6, 678.7(b), (c), (e) through (j), and (n) through (s), 678.10, 678.22, 678.24, and 678.25(a) and (+b) are effective July 1, 1993; and §§ 678.7(w) and 678.28 are effective April 26, 1993, through June 30, 1993.

Comments: Written comments on the fishing year contained in § 678.20, on the bag limits contained in § 678.22, on the commercial quotas contained in § 678.23, on the permits condition in § 678.4 and potential changes involving the allocation of the large coastal species group between the commercial and recreational sectors, and mandatory dealer permitting and reporting must be received on or before June 25, 1993.

ADDRESSES: Comments should be sent to Richard H. Schaefer, Director, Office of Fisheries Conservation and Management, NMFS, 1335 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Richard B. Stone, 301–713–2347.

SUPPLEMENTARY INFORMATION: The proposed and final FMP were prepared by NMFS under authority of section 304(f)(3) of the Magnuson Fishery Conservation and Management Act (Magnuson Act). The development and current status of the recreational and commercial shark fisheries, the status of the shark stocks, the history of FMP preparation, the proposed management measures, and the anticipated impacts of the proposed management measures were discussed in the preamble to the proposed rule (57 FR 24222, June 8, 1992) and are not repeated here.

Based on public comments and on the latest available scientific information, changes were made to the proposed fishing year, bag limits, commercial quotas, finning prohibition, and permit conditions. (See Changes from the Proposed Rule) These measures are published by interim final rule with a request for public comment. After consideration of the comments received, they will be published in final. All other provisions in this rule are published in final.

Contents of the Final FMP and Implementing Rules

The final FMP and implementing final rule and interim final rule contain the following fishery management measures:

(1) A fishery management unit containing 39 frequently caught species

of Atlantic sharks. These species are

(7) Limitation on the sale of sharks

and (4) information on the numbers of

VOL 58 ISS 78 AP 26 1993 UMI

of Atlantic sharks. These species are separated into three groups for assessment and regulatory purposes: large coastal (22 species), small coastal (7 species), and pelagic species (10 species). Thirty-four additional species are included in the FMP for data collection purposes but are not part of the management unit—most of these species are small, deepwater sharks taken incidentally in directed swordfish and tuna longline fisheries. This group also includes dogfishes that are harvested in trawl fisheries in shallow water;

(2) A fishing year of January 1 through December 31;

(3) Annual commercial quotes based on a calendar year for the large coastal and pelagic species groups; each annual quota will be divided into equal semi-annual quotas that will apply to the fishing periods—January 1, through June 30 and July 1 through December 31. The 1993 annual quotas are 2,436 mt (dressed weight) for large coastal species group and 580 mt (dressed weight) for the pelagic species group;

(4) Closure of the commercial fishery for a species group for the remainder of the half year fishing period when the commercial semi-annual quota for that species group is reached or is projected to be reached. All sharks in the FMP management unit landed and sold in the U.S. by U.S. fishermen will be counted against any applicable commercial quota established by the FMP. After a fishery closure, permitted charter vessels and headboats will be allowed to fish for sharks under the permit conditions and under the bag limits, but landed sharks cannot be sold.

(5) Bag limits for the recreational fishery of four sharks per fishing vessel per trip for large coastal and pelagic species combined and five sharks per person per day for small coastal species;

(6) Requirement for annual permits for commercial fishing vessels catching sharks in the EEZ. A condition of the permit is that the recipient must agree to abide by Federal regulations for all sharks caught regardless of where the fishing occurs (state, Federal (EEZ), or international waters), unless the permitted vessel fishes only in state waters on a given fishing trip, in which case a state may apply its more restrictive requirements for that trip. To qualify for the commercial permit, the applicant must have derived, during any 1 of 3 preceding years, more than 50 percent of his or her earned income from commercial fishing (sale of catch) or from charter vessel or headboat operations, or have had at least $20,000 gross receipts from the sale of fish. Permits will be required by July 1, 1993;

(7) Limitation on the sale of sharks harvested in Federal waters to those sold by owners or operators of permitted vessels;

(8) Requirement that permitted vessels land fins in proportion to carcasses (a ratio of the weights of wet fins to dressed carcasses that does not exceed 5 percent);

(9) Requirement that sharks not retained and landed as part of the commercial quota or under the recreational bag limits be released in a manner ensuring maximum probability of survival;

(10) Requirement that all owners or operators of permitted vessels submit to NMFS copies of weighout slips (trip tickets or weighout slips); requirement for submission of logbook reports from selected owners, operators, and persons conducting shark fishing tournaments;

(11) Requirement that selected permitted vessels accommodate observers;

(12) Authorization for the Assistant Administrator to implement or adjust certain management measures in accordance with an established framework regulatory adjustment procedure;

(13) Reduction of the total allowable level of foreign fishing in U.S. waters for the managed species to zero; and

(14) Establishment of an FMP Operations Team (OT) composed of representatives from NMFS (management and scientific management personnel), the five Regional Fishery Management Councils (Councils) covering the east coast, Gulf of Mexico and Caribbean Sea (Council members, staff, and advisory panel or scientific committee members), and the ICCAT Advisory Committee. The OT will monitor the fishery and FMP and recommend regulatory adjustments for implementation by the Assistant Administrator.

Reevaluation of the Shark Resources and Fishery

During the public comment periods for the proposed FMP and the proposed rule, significant new fishery information was received from fishermen, dealers/processors, and several state fishery management agencies. This new information included: (1) Data showing higher fishery removals in recent years than those used as a basis for determining maximum sustainable yield (MSY) and stock conditions in NMFS 1990 stock assessment for Atlantic coast sharks (the assessment used as a basis for commercial quotas and recreational bag limits in the proposed FMP); (2) two additional years' landings data; (3) records on the sizes of landed sharks; and (4) information on the numbers of commercial fishing vessels targeting sharks. NMFS reviewed this new information and determined that it could result in significantly revised conclusions about the abundance, productivity, and condition of the managed shark species from those presented in the proposed FMP; the latter were based on the 1990 NMFS stock assessment of Atlantic coast sharks.

To ensure that all FMP management measures are based upon the best scientific information available, a revised assessment of the condition of the large coastal species group was completed by NMFS Southeast Fisheries Science Center, using the new or corrected information. The revised assessment was reviewed by a scientific peer committee consisting of both outside scientific experts and NMFS scientists (Review Committee). The Review Committee issued its final report on November 23, 1992 (Report of the Atlantic Coastal Shark Fishery Analysis Review, November 23, 1992).

The Review Committee reported evidence of overfishing for the large coastal species group during 1986 through 1992 (except for 1987 and 1990). The Review Committee recommended that the calendar year 1993 landings for the large coastal species group be reduced below the calendar year 1991 landings level of 4,319 mt dressed weight. The Committee Report identifies three options for the calendar year 1993 landings limit (recreational and commercial combined) for the large coastal species group. Each option provides a specific degree of conservation and economic benefits.

Under the Review Committee's first option for the level of 1993 calendar year total landings (3,520 mt dressed weight), the large coastal species group stock would remain overfished and the abundance would not rebuild to the MSY biomass level (estimated by NMFS to be 14,900 mt dressed weight). NMFS estimates MSY for the large coastal species group to be 3,800 mt dressed weight. To ensure that the large coastal species group stock is rebuilt to the MSY level, NMFS has selected the Review Committee's recommended second option (Option 2—see Table 4 of the Review Committee Report) that would establish 1993 total landings of 2,900 mt dressed weight (a 34 percent reduction from the 1991 landings; a 29 percent reduction from the 1986–91 annual average landings). Under this option, NMFS has determined that stock abundance will rebuild. NMFS's conclusions about stock rebuilding

differ from the Review Committee's rebuilding schedule, which shows that annual fishery yields would increase about 5 percent each year but would not equal MSY until 1999. Option 3 of the Review Committee Report requires a 1993 landings limit of 2,311 mt (a 50 percent reduction from the 1991 level; a 44-percent reduction from the 1986–91 annual average). This option achieves a 10 percent annual increase in stock abundance until the MSY level is reached. NMFS has determined that this option would cause unacceptable, short-term costs in lost fishery revenues, and is not necessary to achieve stock rebuilding within a reasonable time period.

While NMFS adopted the Review Committee's Option 2 for stock rebuilding and will implement the recommended calendar year total landings (and derived calendar year commercial quotas) from 1993 to 1995, NMFS believes that the large coastal species group will be rebuilt by 1995 (contrasted with the longer rebuilding schedule contained in the Review Committee Report). At that point, NMFS believes that the stock size should be sufficient to provide MSY on a continuing basis and, based on available information, that a modification of the Review Committee's rebuilding schedule is justified. Closure of the fishery for the large coastal species group immediately upon FMP implementation, as contemplated by the proposed FMP and proposed rule, will not be necessary if implementation occurs early in 1993.

The 1993 and 1994 calendar year commercial quotas for the large coastal species group were determined based on the historical commercial average annual share (percentage of average total annual landings) for the period 1986 through 1991; this average annual share is 84 percent. The same approach was used in the proposed FMP to determine commercial and recreational fishery shares. The recreational share of the total 1993 landings is also based on the historical average annual percentage share from 1986 through 1991; this value is 16 percent. Recreational fishery limits (a trip limit for the large coastal and pelagic species groups and a bag limit for the small coastal species group) have been charged to ensure that 1993 commercial and recreational landings are reduced by approximately the same percentage (29 percent) below their respective recent annual averages.

The commercial quota for the pelagic group is changed from the quota in the proposed FMP based on revised landings statistics and on several years' additional data; the 1993 calendar year commercial fishery quota is now established at 580 mt dressed weight. Combining this commercial quota with the estimated recreational fishery share (under the bag limits) of 980 mt dressed weight, the total 1993 landings for the pelagic group are established at 1,560 mt dressed weight. As in the proposed FMP, no quotas are established for the small coastal species group.

The estimates of MSY for the three species groups have been reevaluated. Based on the Review Committee Report, NMFS estimates that the MSY for the large coastal species group is 3,800 mt dressed weight. (The MSY stock biomass level is estimated to be about 14,900 mt dressed weight). Due to revised landings statistics, the MSY for the pelagic species group is changed from 2,800 mt whole weight (corrected to 3,000 mt whole weight or 2,158 mt dressed weight based on corrected data) in the proposed FMP to 1,560 mt dressed weight in the final FMP. This change was necessary since the pelagic species MSY is determined based on the average annual landings (recreational and commercial combined) during the period January 1, 1986, to January 1, 1992. These landings have been revised because significant landings of large coastal species were incorrectly included in the pelagic species group in the proposed FMP. The MSY estimate for the small coastal species group remains unchanged because NMFS did not have any new information.

Changes From the Proposed Rule

Based on public comments and new data and analyses concerning the condition of the shark resources and fishery, certain management measures in the final FMP were changed from those in the proposed FMP. These changes are reflected in this final rule and include the following:

1. Large coastal species group—optimum yield, total annual landings, commercial quota, MSY, and recreational fishery limits. See "Reevaluations of the Shark Resources and Fishery" for a description of these changes;

2. Pelagic species group—optimum yield, total annual landings, commercial quota, MSY, and recreational fishery limits. See "Reevaluations of the Shark Resources and Fishery" for a description of these changes;

3. The mako minimum size was reserved in the final FMP because of inadequate supporting biological information. There was no clear evidence that significant conservation benefits would accrue. NMFS's proposed application of the measure differently to the recreational and commercial fisheries raised many public objections that could not be overcome with demonstrable stock conservation benefits. NMFS will ask the OT to review this measure, as well as possible minimum sizes for other species, and provide NMFS with its recommendations regarding appropriate measures for implementation;

4. The proposed "fishing year" of July 1 through June 30 was changed to a calendar year (January 1 through December 31) for the large coastal and pelagic species groups. This was based on several considerations: adoption of the Review Committee's recommended rebuilding schedule which is based on calendar year; a revised NMFS stock assessment with all estimates of fishing mortality, stock abundance, and yield based on a calendar year; and a determination by NMFS that a calendar fishing year with semi-annual quotas will ensure equitable access to available harvests for all coastal areas while still being consistent with the Review Committee's stock rebuilding schedule. Also, NMFS believes that the retention of the proposed fishing year of July 1 through June 30 (with full fishing year commercial quotas) could (1) encourage rapid expansion of a new shark fishery in the previously unfished area off the northeastern states, and, as such, be potentially destructive to already overfished shark resources, and (2) damage the historic fishery off the southern states by allowing the new northern fishery to take an unfair share of the annual quota.

Each annual quota will be divided into two equal, semi-annual quotas that will apply to the two fishing periods—January 1 through June 30 and July 1 through December 31. A given semi-annual quota may be adjusted by the Assistant Administrator to reflect actual catches during the preceding semiannual period. Quota overruns or underages at the end of a semiannual period may be compensated for by adjustments in the quota for the following semiannual period. Such semiannual quota adjustments are intended to maintain actual annual commercial landings as close as possible to the applicable annual quota and to meet the conservation objectives of the FMP (e.g., stock rebuilding);

5. The provision intended to prohibit finning was changed from the proposed requirement to land no more than 5 fins per carcass to a final requirement that limits the ratio of the weights of wet fins to carcasses (dressed weight) to 5 percent or less. This measure was changed based on industry requests for a weight ratio as a more flexible and enforceable measure. A weight ratio was

VOL
58
ISS
78
AP
26
1993
UMI

also adopted since it would prevent mixing large fins from big sharks with small shark carcasses (a potential loophole that could allow finning). The weight ratio is based on information on weights of fins and carcasses under commercial fishery conditions; the information was obtained by NMFS through experimental fishing activities. The change in the FMP's finning prohibition measure, from a ratio of numbers (5 fins per carcass) to a ratio of weights (total wet fins to total dressed weight of carcasses), requires that the fins be weighed (in conjunction with carcasses) and sold (traded or bartered) at the point of first landing. Fins may not be stored aboard a vessel after associated carcasses are sold. The proposed rule allowed vessels to retain fins aboard a vessel for up to 31 days after the date of a fishery closure in order to allow drying of fins. The revised finning prohibition measure will not allow this practice and the regulatory text of sections 678.24(a) and (b) has been changed to prohibit retention of fins aboard a vessel after the effective date of a fishery closure. This change is necessary to require that fins must be landed and weighed in conjunction with the associated carcasses at point of first landing; this requirement is necessary to ensure enforcement of the finning prohibition measures;

6. A definition of "weighout slip" has been added to section 678.2 of the regulations to clarify what this document is and when and how it is provided to the owner or operator of a permitted vessel by the party weighing the landed carcasses and fins. This clarification is necessary to ensure that the weighout slips submitted to NMFS by the owner or operator of a permitted vessel record the weights of shark carcasses, fins, and other parts at the vessel's point of first landing;

7. The proposed regulations would have required the owner or operator of a vessel who applies for a Federal permit to agree, as a permit condition, that the vessel's shark fishing, catch, and gear are subject to the requirements of the Federal regulations regardless of whether the fishing occurs in the EEZ, landward of the EEZ, or outside the EEZ and regardless of where the shark catch or gear are possessed, taken, or landed. Comments received from the Florida Marine Fisheries Commission and the North Carolina Department of Environment, Health, and Natural Resources (Division of Marine Fisheries) alleged significant conflicts between State regulations and the Federal regulations as proposed. Particular concerns were expressed that the permit condition regarding the scope of application of the Federal regulations conflicts with, and could potentially undermine, certain State regulations regarding recreational and commercial bag limits, season opening and closing dates, and prohibitions on finning.

NMFS reviewed the provisions of the FMP and regulations, and has made a change in section 678.4(a)(4) regarding the permit condition wherein the recipient of a Federal permit is to agree that the vessel's fishing, catch, and gear will be subject to Federal shark fishing regulations regardless of where the fishing occurs (e.g., in state, Federal, or international waters). To ensure that the FMP's management measures can be effectively implemented and enforced, as well as to avoid diminishing any state's management authority within its waters, § 678.4(a)(4) has been revised to require that a Federal permit recipient must agree that the vessel's fishing, catch, and gear will be subject to the Federal shark fishing regulations regardless of where the fishing occurs, with the exception that if a permitted vessel fishes only in state waters on a given trip, the vessel's fishing, catch, or gear may be subject to the more restrictive state requirements for that trip. Any state regulations limiting the landing or possession of sharks by commercial fishermen fishing legally in the waters of another state, in the EEZ, or outside the EEZ in a more restrictive manner than Federal requirements would frustrate the intent of the FMP to allow a commercial fishery in the EEZ;

8. In the preamble to the proposed rule, alternative earned income criteria for commercial vessel permits were discussed and comments on them were specifically requested. The discussion of alternatives included: (1) Adding $20,000 in gross sales of fish as an alternative to the 50 percent earned income from fishing requirement to qualify for a vessel permit; and (2) increasing the time frame for having met the required level of earned income/gross sales. These changes would ensure that an owner/operator was not unfairly excluded from renewing a vessel permit based on a poor year. Since the proposed rule was published, an earned income criterion has been developed and applied to nearly all the vessel permit applications processed by the Director, Southeast Region, NMFS. The final criterion, a variation of one discussed in the preamble to the proposed rule, requires that the applicant must have derived during 1 of the 3 years preceding the permit application, at least 50 percent of earned income from commercial, charter, or headboat fishing, or that gross sales of fish must have exceeded $20,000. This criterion is more liberal than that contained in the proposed rule and is contained in the regulatory text of this final rule.

While there was general public support for the commercial fishing income requirement for qualifying applicants for the commercial permit, NMFS received numerous comments objecting to the proposed income criterion as well as to the alternatives discussed in the proposed rule preamble. These objections included: (1) The criterion will eliminate many legitimate, part-time fishermen who need to supplement their overall income; (2) recreational fishermen should be able to sell their shark catch to defray the costs of a fishing trip; and (3) some owners or operators of charter vessels or party boat do not want to be bound by the recreational bag limits for sharks landed even though they understand that they can sell shark catches if they have a Federal commercial permit. As a result of these public comments, and because of NMFS's intention to adopt standardized commercial permit criteria across several fisheries for purposes of administrative efficiency in issuing many Federal permits each year (e.g., same criterion applies in FMP as applies for Gulf of Mexico reef fish and South Atlantic snapper/grouper), NMFS modified the final income criterion. Under the final measure, a vessel owner or operator may qualify in any 1 of the 3 previous years. Although this provision is being issued in final, NMFS is requesting additional public comment on this measure during the comment period on the interim final rule, and is particularly interested in any data showing significant economic harm to commercial fisherman not meeting the income criterion; and

9. Based on the revised stock assessment and an additional 2 years of landings data, there were changes to optimum yield (OY), domestic annual harvest (DAH), and total allowable level of foreign fishing (TALFF). Under the final FMP, the DAH for each of the management groups is equal to the OY, resulting in a TALFF of zero. Accordingly, the OY, DAH, and TALFF for sharks in the Atlantic and Gulf fisheries, as published on February 3, 1987 (52 FR 3249), are revised to read, in metric tons, dressed weight, as follows:

	OY	DAH	TALFF
Large coastal species	3,800	3,800	0

	OY	DAH	TALFF
Small coastal species	2,590	2,590	0
Pelagic species	1,560	1,560	0

10. Under the proposed regulations, as well as under these final regulations, fishermen are given several months after the regulations are promulgated to apply for and receive Federal shark fishing permits. Under the proposed regulations, any fishery closure for the large coastal or pelagic species groups occurring during the permitting period would not apply equally to permitted and unpermitted fishermen. In order that such closures apply equally to all commercial fishermen fishing for management unit species in the EEZ (those with permits and those yet to be permitted), and to ensure that semi-annual commercial quotas may be enforced during this period, regulatory text has been added. A new prohibition at § 678.7(w) and a new section at § 678.28 have been added. These added regulations provide that if a fishery closure occurs prior to July 1, 1993, all vessels, whether permitted or unpermitted, are restricted to a trip limit for the species group fishery that is closed. These added regulations will not result in any unexpected or unassessed regulatory or environmental impacts.

Other Matters

Three sport fishing organizations objected to NMFS basing the allocation of catch of the large coastal and pelagic species groups between the commercial and recreational sectors on historical landings during the years 1986–1991. They argue that NMFS should have used the entire range of recreational and commercial date from 1979 to 1991, which would include landings before the exponential growth in the commercial fishery and before there was overfishing. If this approach was taken, then the allocation would have been about 87 percent recreational and 13 percent commercial for the large coastal species group. Instead, the final FMP uses shares of 84 percent commercial and 16 percent recreational for the large coastal (contrast with 77 percent and 23 percent in the proposed FMP). The allocation for the pelagic species group in the final FMP is 62 percent recreational and 38 percent commercial. Given the divergence of public views on this issue, and a strong division of opinion between the recreational and commercial sectors, NMFS invites further public comment on this issue. NMFS will direct the OT to review all comments received to date as well as additional comments and recommend any necessary or appropriate FMP and regulatory changes for 1994.

Based on NMFS's review of the data base for the Atlantic Ocean shark fisheries, and past experience in collecting fishery information from fishermen, NMFS is considering implementing a mandatory dealer reporting and permitting system for sharks under Federal management. Such a system was proposed in the draft FMP of October 20, 1989, but was not included in the proposed and final FMP because it was not clear that the information gained would justify such a program. Based on the public comments received, and reconsideration of this matter by NMFS' scientists with stock assessment responsibility and by managers now charged with enforcing semi-annual quotas and fishery closures, NMFS may add this measure to the regulations. NMFS is investigating whether mandatory dealer permitting/reporting could be important to cross-checking fishermen-supplied data, ensuring general compliance with mandatory reporting requirements, reconciling landings data in different areas, and more accurately assessing total catches and mortality by species. NMFS invites public comment on this possible measure.

Impacts on Endangered and Threatened Species and Marine Mammals

NMFS initiated a formal section 7 consultation under the Endangered Species Act on the directed and incidental Atlantic shark fisheries to be managed under the FMP. This formal consultation resulted in a Biological Opinion (Opinion) that concluded, among other things, that there would be no jeopardy to any listed species under the Endangered Species Act and that neither the proposed management actions under the FMP, nor shark fishing that would be authorized by the FMP, are likely to jeopardize the continued existence of any listed species. Details of the Opinion and associated findings were included in the proposed rule and are not repeated here.

The Assistant Administrator has determined that this rule will have no adverse impact on marine mammals.

Effective Dates

A significant number of the management measures implemented by this final rule depend, for application and enforcement, on the presence or absence of a vessel permit. To ensure timely implementation of these measures, it is necessary to make the permitting procedural requirements effective as soon as possible. Sections 678.4 (a)(2) and (a)(4), (b) through (g), and (i) through (k) of this rule contain the permitting procedural requirements and § 678.7(a) contains the prohibitions applicable to applications for permits. Because delay in effectiveness of these measures is not in the public interest, the Assistant Administrator finds that good cause exists under section 553(d)(3) of the Administrative Procedure Act (APA) not to delay their implementation. Accordingly, they are effective April 26, 1993.

Other sections of the final rule are procedural or administrative in nature and have no significant or immediate effect on fishermen. Specifically, these include §§ 678.1, 678.2, 678.3, 678.8, 678.9, 678.20, 678.26, and 678.27. Accordingly, the Assistant Administrator finds that good cause exists under section 553(d)(3) of the APA not to delay their implementation. Accordingly, they are effective April 26, 1993.

Certain management measures that depend on the presence or absence of a vessel permit for application and enforcement are not effective until July 1, 1993. Specifically, these include the measures at §§ 678.4 (a)(1), (a)(3), and (h), 678.5 (a) and (b), 678.6, 678.10, 678.22, 678.24, and 678.25 (a) and (b), and their corresponding prohibitions in § 678.7. The delayed effectiveness of these measures and prohibitions will allow sufficient time for owners and operators in the fishery to obtain and submit applications for permits and for NMFS to process and issue permits. The requirement to make sharks available for inspection (§ 678.5(c)), measures regulating "finning" (§§ 678.21 and 678.25(c)), and related prohibitions in § 678.7 are effective May 26, 1993. The varying effective dates of the above measures notwithstanding, the commercial quotas for large coastal species and pelagic species, as specified in § 678.23(b)(1), apply for the semi-annual period that commenced January 1, 1993.

Those management measures establishing commercial quotas and provisions for fishery closures in §§ 678.23 and 678.28 and in the corresponding prohibitions in § 678.7 must be made effective as soon as possible to ensure that the first semi-annual quotas for the large coastal and pelagic species groups are not exceeded. Enforcement of these quotas is imperative to prevent overfishing of shark stocks and to begin the rebuilding of overfished stocks. Because delay in the effectiveness of these measures is not in the public interest, the Assistant Administrator finds that good cause exists under section 553(d)(3) of the APA not to delay their implementation.

VOL 58 ISS 78 AP 26 1993 UMI

Accordingly, § 678.23 is effective April 26, 1993, and §§ 678.7 (u), (v), and (w) and 678.28 are effective April 26, 1993 through June 30, 1993.

Public Comments on the Proposed FMP and Regulations; Agency Responses

Background

During the comment periods, NMFS received written comments from 1,159 entities. Commenters included: (1) Numerous individuals with a variety of views (e.g., recreational and commercial fishermen, fish dealers or processors, charter vessel and headboat owners, and interested citizens); (2) many groups or organizations representing diverse fishery interests, including commercial and recreational sectors, fish processing or export-import businesses, environmental organizations, animal rights groups, and scientific research entities; (3) state and Federal agencies; and (4) five regional fishery management councils covering the east coast, Gulf of Mexico, and Caribbean areas.

NMFS has evaluated the public comments received and presents the following summary of the public concerns. In terms of number of comments, some 57 times (1,030 commenters) more commenters supported management of Atlantic Ocean sharks than (18 commenters) opposed it, and some four times more (765) commenters supported implementation of the FMP than opposed (175) it. Support for the FMP was from a broad cross section of constituents, including citizens, commercial and recreational fishermen, many coastal state agencies, and the five Councils. Opposition to the FMP came primarily from several commercial fishering associations, the State of North Carolina and certain North Carolina shark fishermen, and individual shark dealers/processors along the Atlantic and Gulf of Mexico coasts.

Summary of the Public Comments—Specific Issues and Concerns and NMFS Responses

Numerous issues and concerns regarding the FMP and proposed regulations were raised by the public comments. These issues and concerns, categorized by FMP objective or management measure, are summarized below with the following agency response.

1. *Objective:* Prevent overfishing of shark resources.

a. *Comment:* We support management of Atlantic Ocean shark resources.

Response: NMFS acknowledges this support.

b. *Comment:* We support implementation of proposed FMP.

Response: NMFS acknowledges this support.

c. *Comment:* We agree with the FMP's assessment of the fishery problem of overfishing.

Response: NMFS acknowledges this agreement and notes that the revised NMFS stock assessment altered somewhat the FMP's conclusions about the condition of large coastal species group. While this species group is still considered overfished, the time required for stock rebuilding to the MSY level should be less than indicated in the proposed FMP. See "Reevaluations of the Shark Resources and Fishery," above.

d. *Comment:* We agree with FMP's conclusion that the large coastal species group is overfished.

Response: See response to comment 1.c. above.

2. *Objective:* Encourage consistent management of shark resources throughout their oceanic ranges.

a. *Comment:* While domestic management of the shark fisheries is a good first step, it is imperative that consistent international management be undertaken. Otherwise, costs to U.S. fishermen from restrictive quotas will not be justified if there are no restraints on foreign harvest from the same resources. Both the economic costs and benefits of conserving oceanic shark resources should be shared by foreign fishermen using the same resources; this must involve bilateral or multilateral agreements among harvesting nations and might involve adding sharks to management under the International Convention for the Conservation of Atlantic Tunas (ICCAT).

Response: NMFS agrees that consistent international management is necessary to maximize the conservation benefits from the management of highly migratory (oceanic) shark species. Other nations have expressed interest in this FMP. As appropriate, NMFS and the United States will encourage other nations to adopt compatible conservation measures for the management of sharks, either independently or through ICCAT.

3. *Objective:* Establish a shark resource and fishery data collection, research, and monitoring program.

a. *Comment:* NMFS should require dealer/processor permits for those who purchase sharks and shark fins along with mandatory dealer/processor reporting. This information is critical to ensure reliable information on total fishing mortality by species required for stock assessments and to provide important economic information needed for economic impact analyses.

Response: NMFS believes that the reporting measures pertaining to fishermen and recreational tournament operators in this rule initially will provide adequate information to monitor and assess the fishery and shark resources, and to enforce quotas and bag limits. However, as discussed under the section "Other Matters," NMFS is considering adding a mandatory dealer permitting and reporting system that could significantly improve the reliability of fishery data on annual catches by species as well as total catches. Also, NMFS will direct the OT to review the benefits from this additional reporting system.

4. *Objective:* Increase the benefits from shark resources to the United States while reducing waste, consistent with the other management objectives.

a. *Comment:* Numerous commenters agreed with the FMP's assessment of the problems with finning.

Response: NMFS acknowledges this agreement.

5. *Measure:* Fishery management unit consisting of 39 species grouped by small coastal, large coastal, and pelagic species groups.

a. *Comment:* There were numerous objections to the grouping of 39 species into the proposed three resource categories; there were many suggestions for different groupings or different assignments of a given species to a different group. For example, it was recommended that bignose and silky sharks be moved from the large coastal species group to the small coastal species group. It is noted that the latter group does not have restrictive commercial quotas.

Response: NMFS acknowledges the suggestions for different species groupings but has decided to make no changes at this time. The three resource categories are not intended to represent ecologically distinct groups of species. Rather, the species groups are based on what species are caught predominately in which fisheries. Since a given species may occur in several fisheries (e.g., in both inshore and offshore fisheries), it could have been assigned to several species groups (e.g., to both large coastal and pelagic species groups). However, for management and assessment purposes, a given species is listed under only one species group. The OT will review the three species groups and the assignment of individual species, and may recommend changes. Such changes, if approved by NMFS, could be implemented through the framework regulatory adjustment procedure.

b. *Comment:* It will be difficult for many fishermen to distinguish species and, accordingly, to know what quotas or bag limits apply.

Response: NMFS will encourage fishermen to identify sharks. Field guides for identifying sharks are available in local stores. As appropriate, NMFS will supply information to interested fishermen.

c. *Comment:* The placement of the whale shark, basking sharks, and other similar species in the large coastal species group (which has a commercial quota) will not provide necessary protection for these species. NMFS should undertake an aggressive rebuilding program for the populations of these species.

Response: NMFS believes that the measures in this rule provide adequate protection. However, if new information indicates that these species need additional protection, the OT may consider recommending changes. NMFS is interested in reviewing any specific data bearing on the condition of these species.

d. *Comment:* Management units should be revised by establishing specific commercial quotas on individual shark species. NMFS should modify the large coastal and pelagic species groups to reflect what fishermen catch, and the different abundances in species.

Response: NMFS does not agree that sufficient information is available on the biology of individual shark species that would allow management through individual species commercial quotas. The OT may consider this management approach when the necessary information becomes available.

6. *Measure:* Fishing year from July 1 through June 30.

a. *Comment:* Some commenters supported the proposed fishing year of July 1 through June 30; others objected to it (see item 6.b.).

Response: NMFS acknowledges this support. However, the proposed fishing year was changed to a calendar year. This was based on several considerations: Adoption of the Review Committee's recommended rebuilding schedule which is based on calendar year; a revised NMFS stock assessment with all estimates of fishing mortality, stock abundance, and yield based on a calendar year; and a determination by NMFS that a calendar fishing year with semi-annual quotas will ensure equal access to available harvests for all coastal areas while still being consistent with the Review Committee's stock rebuilding schedule. Also, NMFS believes that the retention of the proposed fishing year of July 1 through June 30 (with full fishing year commercial quotas) could (1) encourage rapid expansion of a new shark fishery in the previously unfished area off the northeastern states, and, as such, be potentially destructive to already overfished shark resources, and (2) damage the historic fishery off the southern states by allowing the new northern fishery to take an unfair share of the annual quota.

For the above reasons, NMFS decided to establish calendar year commercial quotas for the large coastal and pelagic groups during the first several years of FMP implementation (1993 and 1994). Each calendar year quota is divided into halves, each half applying respectively to the fishing periods of January 1 through June 30 and July 1 through December 31. This approach to applying the commercial quotas should spread the fisheries in both southern and northern areas reasonably even throughout the year. Also, this approach should not eliminate the historic peak months of the established southern fisheries in the Gulf of Mexico and South Atlantic while still ensuring an open season and an unfished quota for the peak fishing months for the Northeast and Mid-Atlantic fisheries.

b. *Comment:* There were objections to the proposed fishing year based on alleged geographic discrimination regarding access to available commercial quotas. Alternative fishing years suggested including January 1 through December 31, November 1 through October 31, and April 1 through March 31.

Response: See response above to comment 6.a.

c. *Comment:* NMFS should start the fishing year on April 1 or September 1 to allow fishermen off North Carolina to harvest large coastal species during the two peak fishing periods of March–June and October–December. A July 1 start date would allow fishermen more to the south an unfair advantage in harvesting available quotas.

Response: NMFS was aware of North Carolina's concerns throughout the development of the FMP and has tried to ensure that the measures do not discriminate against the residents of any particular state(s). NMFS believes that the costs as well as benefits of the final FMP are distributed equally across all states and that no state bears an unfair burden of the conservation measures (reduced landings, fishery closures, etc.). In establishing season dates and commercial quotas in both the proposed and final FMPs, NMFS's objective is to provide equitable access to the allowable fishery harvest for all coastal states without adopting a more complicated system for geographic allocations. NMFS believes that the final FMP measures meet this objective.

NMFS adopted a calendar year (CY) for the fishing year based on the following considerations: (1) Data are collected on CY basis; (2) biological model used to assess the resource is based on data collected on a CY; (3) biological conclusions and the rebuilding schedule are based on CY data; (4) NMFS scientists indicate that the Review Committee's rebuilding schedule cannot be easily changed from a CY basis to a different basis; and (5) retaining the proposed fishing year beginning July 1 may, based on new information, encourage development of a new shark fishery in the northeast—this new fishery would be exploiting an overfished resource in a new area and could adversely affect the data base used by NMFS for assessing the condition of the large coastal species group.

NMFS decided on a split fishing year and semi-annual quotas (January–June and July–December) based on the following considerations: (1) The shark fishery occurs primarily in waters off the coastal states bordering the Gulf of Mexico and the Atlantic Ocean south of Virginia. The split fishing year and the semi-annual quotas should prevent the residents of those states from taking most of the annual quota; (2) the July–December season should enable the coastal states north of Virginia to obtain a fair share of the resource while yet retarding the development of new fisheries on the overfished large coastal species resource within this area; and (3) NMFS' review of the landings data in 1991, the latest year with reliable statistics, shows that while North Carolina has spring and fall season peaks for its fishery, so do other regions, particularly the Gulf of Mexico. While the semi-annual quotas, split season dates, and possible fishery closures may reduce North Caroline landings, it is not clear that North Carolina fishermen will suffer impacts greater than fishermen from any of the other states. NMFS concludes, at this time, that the split seasons and associated semi-annual quotas will serve to ensure that each coastal region receives a fair share of the available resource. In summation, NMFS believes that the calendar fishing year and the associated semi-annual commercial fishing quotas will provide equitable access to available quotas for all coastal fishermen.

7. *Measure:* Annual commercial fishing quotas.

a. *Comment:* The proposed estimates of MSY are too low and the commercial quotas, particularly the quota for the

large coastal species group, are

VOL 58 ISS 78 AP 26 1993 UMI

large coastal species group, are unreasonably low and are not justified based on conservation grounds.

Response: The estimates of MSY, as well as the commercial quotas, were changed in the final FMP based on NMFS revised stock assessment and on the Review Committee Report. See "Reevaluations of the Shark Resources and Fishery" above.

b. *Comment:* Commercial fishing for sharks should be eliminated by Federal regulations.

Response: NMFS does not agree. One of the objectives of any FMP, as mandated by the Magnuson Act, is to obtain the optimum yield from the fishery. Optimum yield refers to a harvest of fish that will provide the greatest overall benefit to the Nation, with particular reference to food production and recreational opportunities. All sectors of the commercial and recreational fishing interests are treated equally, sharing the shark resources landings based upon historical shares and fishing practices.

c. *Comment:* The FMP is a pro-commercial fishery management plan, favoring commercial fishing over recreational fishing and over conserving the shark resources.

Response: NMFS does not agree. See response to comment 7.b., above. Commercial quotas and recreational bag limits were adjusted so that both sectors' landings would be reduced annually over their recent historical average annual levels by about the same percentage (29 percent), and so that they would retain their relative recent historical shares (84 percent for commercial and 16 percent for recreational). The average annual commercial and recreational landings for the period 1986 through 1991 were used to determine recent historical levels and shares.

d. *Comment:* The fishery for the large coastal species should be closed immediately upon FMP implementation to protect this overfished species group.

Response: NMFS does not agree. See "Reevaluations of the Shark Resource and Fishery" above. The best available scientific information indicates that the large coastal species group is overfished, but that it can support commercial harvests while rebuilding to the MSY level by 1995.

e. *Comment:* The fishery for the large coastal species should not be closed immediately upon FMP implementation because these species are not overfished and such closure would be too disruptive for the fresh shark meat market.

Response: The subject fishery will not be closed immediately upon FMP implementation assuming that this FMP is implemented in early 1993. NMFS is establishing a restrictive annual commercial quota and bag limits that will prevent further overfishing and that should allow rebuilding the large coastal species group to the MSY level by 1995.

f. *Comment:* NMFS should review the quota for the pelagic species in view of the FMP's acknowledged problems with the data base. The quota for this species group is based directly on recent reported landing information that may not accurately reflect actual landings.

Response: NMFS quota for the pelagic species group was reviewed and changed based upon the latest available scientific information. These changes included adjustments for previous errors in landings statistics. See "Reevaluations of the Shark Resources and Fishery" above.

g. *Comment:* Separate quotas should be established for each of the three species groups for vessels in (1) the directed commercial shark fishery, (2) the incidental catch fishery, and (3) the charter/headboat fishery to ensure equitable allocation of available catches based on historical participation by these different user groups.

Response: NMFS does not believe sufficient, reliable fishery information currently exists to establish separate quotas for these fishery elements. The OT and NMFS will consider this proposal in the future when more data are available.

8. *Measure:* Recreational fishery bag limits.

a. *Comment:* NMFS should establish one bag limit for all recreational vessels (private and charter vessel/headboat alike) and for all species. For example, the bag limit could be two sharks per vessel per trip, irrespective of the type of vessel or species of shark. This approach would be easier to enforce and would not require fishermen to identify species and determine which bag limit applies.

Response: NMFS may consider this suggestion in the future when more data are available. The present recreational bag limits were determined based on the condition of the several species groups, achieving approximately equal landing reductions in both recreational and commercial fisheries, and general support from the fishing community. Also, it was assumed that recreational anglers know, or will be able to learn, how to differentiate between a small coastal species and the large coastal or pelagic species.

b. *Comment:* FMP is pro-recreational, favoring recreational fishing over legitimate commercial interests.

Response: NMFS does not agree. See response to comment 7.b., above.

c. *Comment:* The FMS should contain a specific recreational fishery quota for each of the three species groups just as is applied to the commercial fisheries.

Response: NMFS does not agree. Use of bag limits will control the fishery and prevent overfishing of the resource. As part of the standard procedure, the OT will review the effectiveness of the bag limits for controlling the recreational catch before recommending use of a quota.

d. *Comment:* The FMP should establish a recreational bag limit for mako sharks of two per trip for swordfish and tuna longline vessels to reduce incidental fishing mortality on this valuable and heavily exploited resource.

Response: The best available scientific information does not support this type of bag limit.

e. *Comment:* Commenters indicated general support for bag limits, but a number of alternatives were proposed. These included: (1) One shark per vessel per trip; (2) two sharks per vessel per day with exception for Atlantic sharpnose (5 per angler per day); (3) one shark from the large coastal species group per vessel per trip during April through June spawning season; (4) revised bag limits for headboats allowing anglers to catch and retain more large coastal or pelagic species; and (5) two sharks per vessel per trip for private recreational or charter vessels.

Response: NMFS and the OT may consider these alternative measures after more data are gathered. If the OT recommends any of these alternatives, NMFS could implement them through the framework regulatory adjustment procedure. This procedure provides an opportunity for public review and comment on proposed measures before they are implemented.

9. *Measure:* Prohibition on finning (proposed as five fins per carcass landed).

a. *Comment:* The FMP's anti-finning measure should be based on a ratio by weight of total fins to total carcasses landed because it would either allow landing more than 5 fins per carcass or be easier to measure (ratio of two total weight measurements) while still preventing finning. Several specific percentages were suggested including the 10 percent weight ratio used by Virginia and North Carolina (currently 7 percent) and the 6 percent ratio recommended by several dealers/processors. Some commenters objected to the proposed measure (5 fins per carcass landed) alleging that it would not adequately prevent finning since it would allow mixing large fins and small carcasses.

Response: NMFS has changed the finning measure to require that the total weight of wet fins not exceed 5 percent of the total weight of dressed carcasses at point of first landing. NMFS determined that the 5 percent by weight is appropriate and is supportable based on samples of sharks dressed at sea under commercial fishing conditions. NMFS believes that the fins-to-carcasses weight ratio will be easier to enforce and will better prevent finning. Also, see discussion under "changes from the Proposed Rule."

b. *Comment:* There was universal and strong support from the non-commercial fishing sectors for a prohibition on finning.

Response: NMFS believes that finning is wasteful of valuable shark resources and poses a threat to attaining the conservation objectives of fishery management under the Magnuson Act. The FMP should minimize the waste of shark resources while still allowing fishermen to sell fins from legally landed sharks.

c. *Comment:* Some commercial fishermen and fishermen's organizations and some dealers/processors opposed a finning prohibition, indicating an important need to land fins taken from dead sharks and from certain species with limited markets for the meat (e.g., hammerhead sharks).

Response: NMFS does not agree that finning should be allowed for dead sharks or for species with limited markets for the meat. Allowing this would create a loophole, making enforcement of the general finning prohibition very difficult.

10. *Measure:* Release sharks not retained by commercial fishermen under the quotas or by recreational fishermen under the caught bag limits in manner maximizing survival chances.

a. *Comment:* If a shark will not be landed by a commercial fisherman or consumed by a recreational angler, the fisherman should tag and release the shark without additional injury.

Response: NMFS agrees that sharks caught and not retained should be released in a manner that will ensure maximum probability of survival, but does not agree that all such released sharks must be tagged. A mandatory tag and release program would be expensive and difficult to enforce. NMFS will encourage a voluntary tagging program for both commercial and recreational fisheries.

11. *Measure:* Mako minimum size limit (66 inches).

a. *Comment:* Commenters from a wide cross section of constituent interests expressed general support for the mako minimum size measure, but some objected to the different application in the commercial and recreational fisheries.

Response: NMFS reevaluated this measure based on the public comment and on available biological data. The proposed minimum size limit is less than the smallest size at which shortfin mako become reproductively mature. Additionally, information for determining size at maturity does not exist for longfin mako sharks. Adequate scientific information is unavailable to assess the condition of mako stocks or to predict the stock conservation results of the proposed minimum size limit. Therefore, NMFS is reserving this measure until sufficient information is available to support this or other size limit measures.

b. *Comment:* The size limit measure was criticized for being unenforceable and having no legitimate biological basis.

Response: NMFS acknowledges these objections and decided, in part because of them, to reserve the mako size limit at this time.

c. *Comment:* There was general opposition to the proposed provision of the mako minimum size measure that allowed permitted commercial fishermen to retain and land dead, undersized makos, while recreational fishermen were prohibited from retaining dead, undersized makos. Arguments were made that all small mako sharks on the line would be considered dead and be retained; therefore, the conservation benefits would be lost. Arguments were made that the rationale of preventing waste (allowing small, dead sharks to be retained) is at the cost of favoritism for commercial fishermen. One state commented that the exception for commercial fishermen is inconsistent with the conservation objectives of its approved coastal zone management plan.

Response: NMFS acknowledges these criticisms of this measure, and has decided to reserve the mako minimum size limit at this time for lack of adequate supporting scientific information.

12. *Measure:* No sale of recreational catch; exception for permitted charter vessels and headboats allowing sale of their catch within applicable bag limits.

a. *Comment:* Many commenters objected to prohibiting the sale of recreational caught fish.

Response: The FMP clearly differentiates between recreational and commercial fishermen. Allowing recreational fishermen to sell their catch would undermine the commercial allocation and enforcement of the commercial quotas. It could also limit the achievement of the conservation objectives of the FMP, including preventing overfishing and rebuilding the overfished large coastal species group stock. Owners or operators of permitted charter vessels and headboats are allowed to sell their shark catch, subject to the cumulative bag limits applicable to the vessel, as long as the relevant commercial quotas are unfilled. Catches sold by these permitted vessels will be counted against the relevant commercial quotas. See also the response to 13.a.

13. *Measure:* Mandatory commercial fishing permits.

a. *Comment:* Commercial permits should be available to anyone if the applicant pays a flat fee; there should be no criteria limiting such commercial permits to those meeting some percentage of previously earned income from commercial fishing. The flat fee permit would allow the individual to fish commercially and sell his/her catch.

Response: NMFS does not agree. The life history of shark resources makes these fish particularly vulnerable to overfishing. The best available information indicates that certain Atlantic shark species are overfished. Accordingly, restrictive commercial quotas are required. The earned income requirement for a permit will exclude recreational and part-time commercial fishermen from participating in the commercial shark fishery and thereby lessen the impact of the restrictive commercial quotas on those who rely on fishing for their primary income.

b. *Comment:* There was wide support from diverse fishery interests for the FMP's proposed requirement that the sale of sharks be limited to commercial fishermen holding a Federal fishing permit. Some fishery interests opposed limiting the sale of sharks to those holding commercial permits and wanted to allow recreational fishermen to sell their catch, particularly to defray the costs of a fishing trip.

Response: No new information was provided to NMFS that would justify allowing the sale of recreational catches (other than by permitted charter vessels and headboats). See response to comment 13.a.

c. *Comment:* Commenters suggested different income criteria be used to qualify for a commercial permit such as the Gulf of Mexico Fishery Management Council's proposal that would allow qualifying on any 1 of 2 previous year's fishing income.

VOL 58 ISS 78 AP 26 1993 UMI

Response: NMFS agrees that different income criteria should be used and has adopted revised criteria. See the discussion of alternative criteria for a vessel permit under "Changes from the Proposed Rule."

d. *Comment:* Commenters suggested different criteria be used to qualify for a commercial permit such as no qualifying income level or at least a level well below the proposed 50 percent level. These commenters alleged that the proposed criteria discriminate unreasonably against many legitimate part-time or seasonal shark fishermen (e.g., those earning something below 25 percent of their income from fishing).

Response: NMFS does not agree. See response to comment 13.a. above.

e. *Comment:* The FMP should contain a multi-tiered permit system providing separate permits (and separate harvesting quotas) for vessels in the directed commercial shark fishery, the incidental commercial fishery, and in the charter/headboat fishery. Separate permits and quotas would reduce user conflicts, simplify business planning, and ensure equitable allocation of available catches to these different groups.

Response: NMFS and the OT may consider this measure for future implementation.

f. *Comment:* The permit condition that the recipient agrees to abide by Federal measures regardless of where a vessel fishes for or catches sharks (inside or outside EEZ) preempts the states' authority to manage resources and fishermen in their waters.

Response: NMFS reviewed the provisions of the FMP and regulations, and has made a change in section 678.4(a)(4) regarding the permit condition wherein the recipient of a Federal permit must agree that the vessel's fishing, catch, and gear are subject to Federal shark fishing regulations regardless of where the fishing occurs (e.g., in state, Federal, or international waters). To ensure that the FMP's management measures can be effectively implemented and enforced as well as to avoid diminishing any state's management authority within its waters, § 678.4(a)(4) has been revised to require as a permit condition that the recipient agree that the vessel's fishing, catch, and gear are subject to the Federal shark fishing regulations regardless of where the fishing occurs, with the exception that if a permitted vessel fishes only in state waters on a given trip, the vessel's fishing, catch, or gear may be subject to the more restrictive state requirements for that trip. Any state regulations limiting the landing or possession of sharks by commercial fishermen fishing legally in the waters of another state, in the EEZ, or outside the EEZ in a more restrictive manner than Federal requirements would frustrate the intent of the FMP to allow a commercial fishery in the EEZ. Permitted fishermen who fish for sharks in state waters during a closure of the shark fishery in the EEZ would violate a condition of the permit, not state law. Neither the final FMP nor the Federal fishing permit conditions established by this final rule, preempt state management authority of shark resources or fishing by state residents solely in state waters. The subject Federal permit condition is considered by NMFS to be essential for effective implementation of the FMP, including enforcement of any fishery closure in the EEZ. State residents who are unwilling to accept the Federal permit condition may still fish for sharks solely in state waters subject to state regulations.

14. *Measure:* Commercial vessel owner and operator reporting requirements.

a. *Comment:* Much better catch and effort data are needed for the commercial fishery; particular emphasis should be given to fishing mortality by species by gear type. Also, attention should be given to improving the ability of pelagic longline fishermen targeting swordfish or tuna as well as bottom longline fishermen to identify shark species caught incidentally or directly as appropriate.

Response: NMFS agrees that effective management of the shark fishery requires the receipt of timely catch and effort data from participants in the fishery. NMFS considers these reports to be of such importance to effective management that an applicant's submission of all required reports is necessary for renewal of a permit. An applicant for renewal of a permit who is deficient in a required report will be given an opportunity to correct the deficiency.

15. *Measure:* Tournament reporting requirements.

a. *Comment:* Much better data on numbers and weights by species landed are needed in the recreational fisheries.

Response: NMFS agrees and will obtain catch and effort information from selected shark fishing tournaments.

b. *Comment:* Much better catch and effort data are needed for the recreational fishery (from private, tournament, charter vessel, and headboat fishermen). Particular emphasis should be given to catch and effort data by species by areas. Also, education is required to improve anglers' ability to differentiate between various species.

Response: NMFS agrees and has recently improved the quality of its recreational fisheries statistics program through increases in survey sample sizes; greater statistical confidence in survey results is expected. NMFS will continue to develop better sampling methodologies to improve the quality of the data collected.

16. *Measure:* No foreign fishing in EEZ (zero total allowable level of foreign fishing (TALFF)).

a. *Comment:* Commenters expressed strong support for prohibiting foreign shark fishing in U.S. waters.

Response: Since there is no surplus allowable catch over what domestic fishermen are able to harvest, the TALFF in the EEZ is zero.

17. *Measure:* Vessel observers required at the direction of NMFS Science and Research Director.

a. *Comment:* NMFS should pay for the costs of mandatory observers on fishing vessels that catch sharks either in a directed or incidental fishery.

Response: Under current agency policy, NMFS pays for salary and benefits for Federal Government employees. Vessel owners and operators must provide accommodations and food.

b. *Comment:* NMFS should resolve the issue of who is liable for injuries to observers while on duty.

Response: The vessel owner or operator is liable and should be insured accordingly.

18. *Measure:* Framework regulatory adjustment procedure.

Comment: None received except those bearing on the authority of the Assistant Administrator to make management adjustments (see item 19 below).

19. *Measure:* The OT and FMP monitoring and changes.

a. *Comment:* The Assistant Administrator for Fisheries has too much authority under the FMP to accept or reject the OT's recommendations and to make management adjustments (regulatory actions) independent of the OT.

Response: NMFS disagrees. Management actions of the Assistant Administrator are subject to the terms of the FMP and its implementing regulations and to the requirements of the Magnuson Act, E.O. 12291, and all other applicable Federal administrative and legal requirements. The Assistant Administrator does not have the authority to make regulatory changes without following such requirements. In addition, the framework regulatory adjustment procedure provides for notice and comment, which will provide an opportunity for public participation.

b. *Comment:* The scope of the OT's recommendations should be limited to measures in the current FMP and not additional measures (e.g., trip limits, size limits for other species) that should be incorporated only by FMP amendment process and not through a framework regulatory adjustment mechanism.

Response: NMFS does not agree. The OT, composed of representatives of NMFS, the five Councils (including Council members, staff, and advisory panel or scientific committee members), and the ICCAT Advisory Committee, is the primary group with responsibility to recommend regulatory improvements. The regulatory process for implementing the recommendations differs according to the significance of the type of change. Complex and contentious changes to the management regime will request FMP amendments while less complex changes will be made by the framework regulatory adjustment process outlined in the FMP.

c. *Comment:* The OT should include members from industry, environmental groups, or other constituent interests who are not already affiliated with the Regional Fishery Management Councils.

Response: While NMFS seeks information and recommendations from all those knowledgeable of and experienced with the Atlantic shark fisheries, NMFS is restricted by Federal law in its use of non-Federal or outside advisors. In part to avoid statutory limitations at this time, NMFS is establishing an OT that will utilize knowledgeable and experienced Council members, staff, and advisory panel or scientific and statistical committee members as members. Also, NMFS will include an ICCAT Advisory Committee member on the OT. NMFS will ensure that either the OT or NMFS consult with appropriate representatives of all major fishery interests including recreational and commercial fishermen, fish dealers and processors, scientific experts, and the environmental or natural resources conservation community. In amending the FMP, NMFS will follow the procedures set forth in its published final process for the management of Atlantic highly migratory species.

20. Supporting environmental impact statement (EIS) and regulatory impact review (RIR).

a. *Comment:* The EIS requires additional information regarding the fishery data collection process and need for baseline catch data, potential impacts of foreign fleets, shark finning, and exploitation of small coastal species. This information is required to explain adequately why certain adverse environmental impacts could not be avoided or reduced. The FMP does not assess a wide enough range of alternatives, including prohibiting commercial shark fishing.

Response: In developing an initial shark management program, NMFS considered and rejected numerous alternatives for addressing identified problems with the fishery and shark resources. These alternative measures are discussed in the FMP, EIS, and RIR. Prohibiting commercial fishing was not considered to be a reasonable or appropriate management alternative, considering historical fishing practices and the overall condition of the shark resources. The OT could review this alternative at a future date, if there is new information. In time, through international agreements and associated data collection programs, NMFS may be able to determine the impact of different nations' fishing activities on the shark resources that move across international boundaries.

b. *Comment:* The regulatory impact review (RIR) is deficient because it: (1) Is based on erroneous information about the true volume and velue of recent shark landings; (2) underestimates the magnitude of adverse economic impacts on fishermen and dealers/processors by the restrictive quotas and probable fishery closures, particularly over the long term; and (3) does not adequately evaluate regional impacts of initial closures and market disruptions.

Response: The proposed FMP (dated October 28, 1991) was based on the best available scientific information at the time of its preparation. The final FMP was prepared based on a revised stock assessment that reflects the best available information at the close of 1992. See the section titled "Reevaluations of the Shark Resources and Fishery." Consistent with the above changes, the RIR was modified to include the new fishery information.

21. Habitat.

a. *Comment:* NMFS should review all available habitat information and determine if specific actions should be undertaken to protect and/or enhance shark habitat. The section on habitat should reflect such considerations.

Response: As part of FMP development, NMFS included what it believed to be all relevant information on shark habitat including a discussion of certain possible habitat protection/enhancement measures, such as closing nursery areas to fishing. NMFS is not aware of any information that would lead to specific actions to protect and/or enhance shark habitat not already discussed in the FMP. NMFS will assess new habitat information as it becomes available.

22. FMP consistency with state coastal zone management plans.

a. *Comment:* New Jersey stated that the FMP was not consistent with its coastal zone management plan because of the proposed different application of the mako minimum size measure to the recreational and commercial fishery sectors conflicted with its plan.

Response: This issue is resolved since NMFS is not implementing the mako minimum size limit at this time.

b. *Comment:* Ten coastal states concluded that the proposed FMP measures were consistent with their respective coastal zone management plans.

Response: NMFS acknowledges the responses from these states.

23. Other.

a. *Comment:* Approval and implementation of the FMP conflicts with the Presidential Moratorium on New Regulations.

Response: NMFS does not agree. First, the Presidential Moratorium ended with the recent change in Administrations. Second, approval and implementation of the FMP would not have conflicted with the previous moratorium because the FMP will prevent overfishing and maintain the shark stocks at MSY levels. These management results should ensure continuation of viable recreational and commercial fisheries, create additional employment over the long term, and thus promote economic growth. Regulations promoting economic growth were exempt from the moratorium.

b. *Comment:* NMFS should delay implementation of the FMP until implementation of the agency's proposed public process for preparing and amending fishery management plans for Atlantic highly migratory species, as defined in the 1990 Fishery Conservation Amendments.

Response: NMFS does not agree. The FMP was developed with substantial public participation and as such is consistent with the principles for preparing fishery management plans for Atlantic highly migratory species as set forth in the agency's proposed process.

c. *Comment:* NMFS should develop and implement a fishery management plan for Pacific ocean sharks.

Response: NMFS has reviewed these comments and forwarded them to the three west coast fishery management Councils for their consideration. These Councils have responsibility under the Magnuson Act for preparing management plans for Pacific sharks.

d. *Comment:* The finning prohibition poses vessel safety problems because it requires that heavy carcasses be carried on board, which make vessels less

VOL
58
ISS
78
AP
26
19 93
UMI

seaworthy. Finning should be allowed to prevent these safety problems.

Response: NMFS does not agree. There are strong rationales to prohibit finning. It is up to each Master to ensure safe operation of his vessel while fishing within the law.

e. *Comment:* NMFS should adopt and implement an FMP with measures similar to those applied by North Carolina and Virginia including trip limits, year round fisheries with no closures, fins-to-carcass weight ratio of 10 percent with a 10-percent tolerance applied, etc.

Response: NMFS does not agree. The proposed Federal regulations are generally more conservative than those implemented by the above states. Therefore, overfishing is more likely to be prevented. NMFS will work with the states toward conforming regulations.

f. *Comment:* FMP should contain trip limits that would prevent fishery closures and dampen market fluctuations in supply.

Response: NMFS considered and rejected this type of measure for the initial shark management program as not supportable based on available fishery information and too difficult to enforce at this time. The OT may consider this measure for implementation at a later date.

g. *Comment:* FMP should contain specific provisions for a spawning season closure to protect pregnant females and pups from fishing mortality.

Response: The OT may consider this measure for implementation at a later date when more data are available.

h. *Comment:* FMP should consider a management alternative that would close all fisheries (recreational and commercial) that kill sharks.

Response: NMFS does not agree. This alternative was considered and rejected. Available scientific information does not support this alternative.

i. *Comment:* FMP should establish a control date to be used later as a basis for determining historical fishery participation if a limited entry or other limited access system is to be implemented.

Response: NMFS will consider establishing a control date.

j. *Comment:* FMP should be amended to establish an ITQ system.

Response: The OT may consider this measure for implementation at a later date. Amending the FMP at this point to establish any ITQ system would cause long delays. FMP implementation and significant conservation benefits, including rebuilding overfished resources, would be delayed or lost.

k. *Comment:* Species other than mako should be managed through use of minimum size limit.

Response: The OT may consider this measure for implementation at a later date.

l. *Comment:* NMFS should consider issuing commercial and recreational permits by lottery.

Response: NMFS does not agree. The Magnuson Act does not allow this as a sole means of allocating permits.

m. *Comment:* NMFS should consider limiting entrants by increased user fees.

Response: NMFS does not agree. The Magnuson Act limits fees to the administrative costs.

Classification

The Secretary of Commerce determined that the FMP is necessary for the conservation and management of sharks in the Atlantic Ocean and that it is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law.

The Assistant Administrator has determined that this final rule is not a "major rule" requiring a regulatory impact analysis under E.O. 12291.

The Assistant Administrator prepared a Regulatory Impact Review (RIR) that concludes this rule will have the following economic effects.

Establishment of the first fishing year commencing on January 1, 1993, and imposition of semi-annual commercial quotas, should result in economic losses to the fishery of about $1.3 million for 1993. Despite these expected losses, the commercial quotas should help to rebuild the large coastal species group to the MSY level by 1995, with the result of long-term economic gains over what would occur without the management program. The annual commercial quota for the large coastal species group should increase by 5 percent annually as the rebuilding process continues to 1995, and should reach 3,192 mt (84 percent of the MSY level of 3,800 mt) at that point. By year 2000, the annual landings without a rebuilding program are projected to be lower than the landings under management. By year 2002, the cumulative discounted value of the landings under regulation is projected to exceed the value without regulation by about $1.9 million. The recreational bag limits are expected to reduce annual recreational landings by 29 percent over the 1986–1991 average. These reduced landings will provide for the conservation of all three resource groups; particularly, they should help rebuild the overfished large coastal species group and prevent overfishing of the fully utilized small coastal and pelagic species groups. These conservation results will provide long-term, net positive economic benefits from sustained optimum yields from the fishery.

The requirement that sharks not retained by fishermen be released with a minimum of harm should have net positive economic benefits, but these are difficult to quantify. The framework regulatory adjustment procedure for changing specified management measures should have indirect but positive economic effects through minimizing the waste of fishery resources, improving estimates of MSY and acceptable levels of fishing mortality, and establishing annual quotas most consistent with stock conservation. Prohibition of finning will have both positive and negative economic effects over the short term; over the long term, this measure should result in significant net positive economic benefits to society through resource conservation. Prohibition of sale of recreationally caught sharks will have a small, negative economic impact on recreational fishermen and a small, positive economic impact on commercial fishermen.

The requirement for a vessel permit for the commercial fishery will increase slightly the cost of doing business for commercial fishermen, but is necessary to ensure effective implementation and enforcement of the FMP. The criterion for a Federal permit is expected to prevent part-time commercial and recreational fishermen from selling their catches and will have a negative impact on their incomes. Commercial fishermen who qualify for a permit could see positive economic results over the long term.

The increased costs to commercial fishermen and recreational tournament operators associated with the mandatory reporting requirements are expected to be less than the increased annual economic value of the shark fishery that will result from obtaining additional data needed for improved management decisions. The additional costs to commercial fishermen of having to accommodate a NMFS-approved observer should be balanced, in part, by the benefits to society of additional information on the biological condition of shark resources, the operation of the fishery, and the fishery effects on marine mammals and endangered species. The aggregate net economic benefit of the FMP measures and implementing regulations is expected to be strongly positive.

NMFS prepared a regulatory flexibility analysis as part of the RIR, which concludes that this rule will have significant effects on small entities as specified under the Regulatory Flexibility Act. Those small entities directly involved in the fishery and affected by this rule include commercial fishing vessels (approximately 800) and processors/dealers (about 850). The rule is likely to result in a reduction in annual gross revenues by about 5 percent for some, but not necessarily all, of these small entities.

The Assistant Administrator prepared a Draft Environmental Impact Statement (DEIS) that discussed the expected impacts on the human environment as a result of the FMP and the proposed rule. A notice of availability of and request for comments on the DEIS was published on January 17, 1992 (57 FR 2093). A Final Environmental Impact Statement (FEIS) was prepared and filed with the Environmental Protection Agency on December 11, 1992, in support of the FMP, as revised, and this final rule. A notice of availability of the FEIS was published on December 18, 1992 (57 FR 60199).

The Assistant Administrator determined that the management measures in this final rule that have not changed from the proposed FMP and proposed regulations will be implemented in a manner consistent to the maximum extent practicable with the coastal zone management programs of those Atlantic, Gulf of Mexico, and Caribbean coastal states that have approved coastal zone management programs (Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Pennsylvania, Maryland, Virginia, North Carolina, South Carolina, Florida, Alabama, Mississippi, Louisiana, Puerto Rico, and the U.S. Virgin Islands). This determination was submitted by NMFS to the responsible state agencies for their review under section 307 of the Coastal Zone Management Act. Connecticut, New York, Delaware, Pennsylvania, Virginia, North Carolina, South Carolina, Florida, Mississippi, and Puerto Rico egreed with the determination.

New Jersey did not agree with the determination because it determined that the mako minimum size measure was inconsistent with its coastal zone plan based on the different means of applying it in the commercial and recreational fisheries. This issue is resolved since this final rule contains no minimum size limit for mako sharks. The other states did not respond during the statutory time period; therefore, state agency agreement with the consistency determination is presumed.

Certain measures of the final FMP and final regulations changed from those proposed and will be implemented by an interim final rule. NMFS is inviting public comment on these changed measures for 60 days. After considering the public comment, NMFS will make any necessary changes in these measures and implement them on a permanent basis through a final rule. NMFS has determined that the interim final rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal management programs of all the coastal states listed above. This determination is being submitted for review by the responsible state agencies under section 307 of the Coastal Zone Management Act.

This final rule contains four new, but previously approved, collection-of-information requirements subject to the Paperwork Reduction Act: (1) Applications for annual vessel permits; (2) submission of logbooks and copies of sales receipts/trip tickets by vessels off-loading sharks; (3) tournament operator reports; and (4) advance notification of shark fishing trips. These collections of information have been approved by OMB and OMB control numbers 0648–0205, 0648–0016, 0648–0031, and 0648–0016 apply. The public reporting burdens for these collections of information are estimated to average 15, 15, 30, and 10 minutes per response, respectively, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information.

This final rule involves three existing collection-of-information requirements that have already been approved by OMB:

(1) The requirement that foreign vessels submit quarterly reports (OMB Control No. 0648–0075) is restated for clarity; (2) copies of sales receipts/trip tickets by vessels off-loading sharks, if not submitted with the shark logbook forms, are to be submitted with existing vessel logbook forms (OMB Control No. 0648–0016); and (3) the requirement to make sharks available for inspection and to answer questions regarding catch and effort (OMB Control Nos. 0648–0013 and 0648–0229) would make a currently voluntary information program mandatory. The public reporting burdens for these existing collections of information are estimated to average 35, 6, and 10 minutes per response, respectively, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collections of information. Send comments regarding these burden estimates or any other aspect of these collections of information, including suggestions for reducing the burdens, to Edward E. Burgess, NMFS, 9450 Koger Boulevard, St. Petersburg, FL 33702; and to the Office of Information and Regulatory Affairs, OMB, Washington, DC 20503 (Attn: Paperwork Reduction Act Project 0648–0016).

A federalism assessment was prepared that concludes that implementation of this final rule would be consistent with the principles, criteria, and requirements of E.O. 12612.

List of Subjects

50 CFR Part 204

Recordkeeping and reporting requirements.

50 CFR Part 611

Fisheries, Fishing, Foreign relations, Reporting and recordkeeping requirements.

50 CFR Part 678

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: April 20, 1993.

Samuel W. McKeen,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set forth in the preamble, 50 CFR parts 204 and 611 are amended and a new part 678 is added as follows:

PART 204—OMB CONTROL NUMBERS FOR NOAA INFORMATION COLLECTION REQUIREMENTS

1. The authority citation for part 204 continues to read as follows:

Authority: Paperwork Reduction Act of 1980, 44 U.S.C. 3501–3520 (1982).

§ 204.1 [Amended]

2. In § 204.1(b), the table is amended by adding in the left hand column, in numerical order, "678.4", "678.5(a)", "678.5(b)", "678.5(c)", and "678.10(a)" and adding in the right hand column, in the corresponding positions, "–0205", "–0016", "–0031", "–0013", and "–0016".

PART 611—FOREIGN FISHING

3. The authority citation for part 611 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*, 16 U.S.C. 971 *et seq.*, 22 U.S.C. 1971 *et seq.*, and 16 U.S.C. 1361 *et seq.*

4. In § 611.60, in paragraph (d), the phrase "Atlantic Ocean, Gulf of Mexico and Caribbean Sea" is revised to read

VOL 58 ISS 78 AP 26 1993 UMI

"Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea"; and paragraph (a) is revised to read as follows:

§ 611.60 General provisions.

(a) *Purpose and scope.* (1) This subpart regulates:

(i) All foreign longline fishing conducted under a GIFA that involves catching, processing, or receipt of swordfish, billfish, sharks, or other fish in the EEZ in the Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea; and

(ii) All other foreign fishing conducted under a GIFA within the EEZ south of 35°00'N. latitude in the Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea.

(2) Regulations governing fishing by vessels of the United States for swordfish, billfish, or sharks off the Atlantic, Gulf of Mexico, and Caribbean coastal states are published at parts 630, 644, and 678 of this chapter.

(3) The terms *swordfish, billfish,* and *shark,* as used in this subpart, are defined at §§ 630.2, 644.2, and 678.2 of this chapter.

* * * * *

5. In § 611.61, paragraph (d) is removed and reserved; and the section heading, paragraphs (a), (b)(1), (b)(2) introductory text, (c)(3) and (e) are revised to read as follows:

§ 611.61 Atlantic swordfish, billfish, and shark incidental catch fishery.

(a) *Purpose.* This section regulates all foreign fishing conducted under a GIFA that involves the catching of swordfish, billfish, or sharks in the EEZ in the Atlantic Ocean, including the Gulf of Mexico and Caribbean Sea.

(b) * * *

(1) Except as provided in paragraph (b)(2) of this section, foreign fishing under this section may be conducted throughout the year. Because there are no allocations for swordfish, billfish, or sharks, the closure provisions of § 611.13(a)(1) through (a)(3) do not apply to this section.

(2) From June 1 through November 30, foreign vessels fishing under this section, and longline gear deployed from such vessels, are prohibited in the area defined by the following coordinates in the order listed:

* * * * *

(c) * * *

(3) All swordfish, billfish, and sharks must be released at the surface of the water by cutting the line without removing the fish from the water.

* * * * *

(e) *Statistical reporting.* (1) A foreign vessel fishing under this section is exempt from the requirements of §§ 611.4(f)(2) and 611.9(d), but must provide the reports required by § 611.4(f)(3) and (f)(4), when applicable. In addition, each vessel must submit the following additional quarterly reports:

(i) Catch and effort data, summarized weekly by one degree squares, containing the following information:

(A) Number of hooks set.

(B) Number of prohibited species (by species code from appendix D to subpart A) caught and released.

(C) Number of prohibited species (by species code) released alive.

(ii) Summary of vessel activities containing the following information:

(A) Permit number of each vessel fishing.

(B) For each successive day of the reporting period, the vessel's noon-day location (within 0.1 degree of latitude and longitude).

(2) The quarterly reports required by paragraph (e)(1) of this section must be submitted not later than 60 days from the end of the quarter for which the report is being made to: Science and Research Director, Southeast Fisheries Science Center, NMFS, 75 Virginia Beach Drive, Miami, FL 33149, telephone 305–361–5761.

* * * * *

6. A new part 678 is added to read as follows:

PART 678—ATLANTIC SHARKS

Subpart A—General Provisions

Sec.

678.1 Purpose and scope.
678.2 Definitions.
678.3 Relation to other laws.
678.4 Permits and fees.
678.5 Recordkeeping and reporting.
678.6 Vessel identification.
678.7 Prohibitions.
678.8 Facilitation of enforcement.
678.9 Penalties.
678.10 At-sea observer coverage.

Subpart B—Management Measures

678.20 Fishing year.
678.21 Harvest limitations.
678.22 Bag limits.
678.23 Commercial quotas.
678.24 Closures.
678.25 Restrictions on sale upon landing.
678.26 Adjustment of management measures.
678.27 Specifically authorized activities.
678.28 Closures prior to July 1, 1993.

Authority: 16 U.S.C. 1801 *et seq.*

Subpart A—General Provisions

§ 678.1 Purpose and scope.

(a) The purpose of this part is to implement the Fishery Management Plan for Sharks of the Atlantic Ocean (FMP) prepared by the Secretary of Commerce.

(b) This part governs conservation and management of sharks in the management unit.

§ 678.2 Definitions.

In addition to the definitions in the Magnuson Act and in § 620.2 of this chapter, the terms used in this part have the following meaning:

Charter vessel means a vessel less than 100 gross tons (90.8 metric tons) that meets the requirements of the Coast Guard to carry six or fewer passengers for hire and that carries a passenger for hire at any time during the calendar year. A charter vessel with a permit issued under § 678.4 is considered to be operating as a charter vessel when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew.

Headboat means a vessel that holds a valid Certificate of Inspection issued by the Coast Guard to carry passengers for hire. A headboat with a permit issued under § 678.4 is considered to be operating as a headboat when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew.

Landed or *landing* means to arrive at a dock, berth, beach, seawall, or ramp.

Large coastal species means any of the species, or a part thereof, listed in paragraph (1) of the definition of *management unit.*

Management unit means the following species in the Western North Atlantic Ocean including the Gulf of Mexico and the Caribbean Sea:

(1) Large coastal species:

Basking sharks—Cetorhinidae
  Basking shark, *Cetorhinus maximus*
Hammerhead sharks—Sphyrnidae
  Great hammerhead, *Sphyrna mokarran*
  Scalloped hammerhead, *Sphyrna lewini*
  Smooth hammerhead, *Sphyrna zygaena*
Mackerel sharks—Lamnidae
  White shark, *Carcharodon carcharias*
Nurse sharks—Ginglymostomatidae
  Nurse shark, *Ginglymostoma cirratum*
Requiem sharks—Carcharhinidae
  Bignose shark, *Carcharhinus altimus*
  Blacktip shark, *Carcharhinus limbatus*
  Bull shark, *Carcharhinus leucas*
  Caribbean reek shark, *Carcharhinus perezi*
  Dusky shark, *Carcharhinus obscurus*
  Galapagos shark, *Carcharhinus galapagensis*
  Lemon shark, *Negaprion brevirostris*
  Narrowtooth shark, *Carcharhinus brachyurus*
  Night shark, *Carcharhinus signatus*
  Sandbar shark, *Carcharhinus plumbeus*
  Silky shark, *Carcharhinus falciformis*
  Spinner shark, *Carcharhinus brevipinna*
  Tiger shark, *Galeocerdo cuvieri*
Sand tiger sharks—Odontaspididae
  Bigeye sand tiger, *Odontaspis noronhai*
  Sand tiger shark, *Odontaspis taurus*
Whale sharks—Rhincodontidae
  Whale shark, *Rhincodon typus*

(2) Small coastal species:

Angel sharks—Squatinidae
  Atlantic angel shark, *Squatina dumerili*
Hammerhead sharks—Sphyrnidae
  Bonnethead, *Sphyrna tiburo*
Requiem sharks—Carcharhinidae
  Atlantic sharpnose shark, *Rhizoprionodon terraenovae*
  Blacknose shark, *Carcharhinus acronotus*
  Caribbean sharpnose shark, *Rhizoprionodon porosus*
  Finetooth shark, *Carcharhinus isodon*
  Smalltail shark, *Carcharhinus porosus*

(3) Pelagic species:

Cow sharks—Hexanchidae
  Bigeye sixgill shark, *Hexanchus vitulus*
  Sevengill shark, *Heptranchias perlo*
  Sixgill shark, *Hexanchus griseus*
Mackerel sharks—Lamnidae
  Longfin mako, *Isurus paucus*
  Porbeagle shark, *Lamna nasus*
  Shortfin mako, *Isurus oxyrinchus*
Requiem sharks—Carcharhinidae
  Blue shark, *Prionace glauca*
  Oceanic whitetip shark, *Carcharhinus longimanus*
Thresher sharks—Alopiidae
  Bigeye thresher, *Alopias superciliosus*
  Thresher shark, *Alopias vulpinus*

Pelagic species means any of the species, or a part thereof, listed in paragraph (3) of the definition of *management unit.*

Regional Director means the Director, Southeast Region, NMFS, 9450 Koger Boulevard, St. Petersburg, FL 33702, telephone 813–893–3141, or a designee.

Science and Research Director means the Science and Research Director, Southeast Fisheries Science Center, NMFS, 75 Virginia Beach Drive, Miami, FL 33149, telephone 305–361–5761, or a designee.

Shark means any of these species listed in the definition of the management unit, or a part thereof.

Shark tournament means any fishing competition involving sharks in which participants must register or otherwise enter or in which a prize or award is offered for catching a shark.

Small coastal species means any of the species, or a part thereof, listed in paragraph (2) of the definition of *management unit.*

Trip means a fishing trip, regardless of number of days duration, that beings with departure from a dock, berth, beach, seawall, or ramp and that terminates with return to a dock, berth, beach, seawall, or ramp.

Weightout slip means the document provided by the person weighing the shark carcasses and fins to the owner or operator of a permitted vessel that records the weights of the shark carcasses and fins, prior to or as part of, a commercial transaction involving such shark carcasses and/or fins. Any document such as "tally slip," "trip ticket," or "sales receipt," that contains such information will be considered as a weighout slip.

§ 678.3 Relation to other laws.

(a) The relation of this part to other laws is set forth in § 620.3 of this chapter and paragraphs (b) and (c) of this section.

(b) In accordance with regulations issued under the Marine Mammal Protection Act of 1972, as amended, it may be unlawful for a commercial fishing vessel, a vessel owner, or a master or operator of a vessel to engage in a longline or gillnet shark fishery in the Atlantic Ocean (including the Gulf of Mexico and Caribbean Sea) unless the vessel owner or authorized representative has complied with specified requirements including, but not limited to, registration, exemption certificates, decals, and reports, as contained in 50 CFR part 229.

(c) Regulations governing fishing in the EEZ by vessels other than vessels of the United States appear at 50 CFR part 611, subpart A, and §§ 611.60 and 611.61 of subpart D.

§ 678.4 Permits and fees.

(a) *Applicability.* (1) As a prerequisite for a person to sell a shark in or from the EEZ or to be eligible for an exemption from the bag limits specified in § 678.22(b) for a shark taken in the EEZ, an owner or operator of a fishing vessel must obtain an annual vessel permit.

(2) For a vessel owned by a corporation or partnership to be eligible for a vessel permit, the earned income qualification specified in paragraph (b)(2)(vi) of this section must be met by, and the statement required by that paragraph must be submitted by, an officer or shareholder of the corporation, a general partner of the partnership, or the vessel operator.

(3) A vessel permit issued upon the qualification of an operator is valid only when that person is the operator of the vessel.

(4) An owner or operator who applies for a permit under paragraph (b) of this section must agree, as a condition of such permit, that the vessel's shark fishing, catch, and gear are subject to the requirements of this part during the period of validity of the permit, without regard to whether such fishing occurs in the EEZ, landward of the EEZ, or outside the EEZ, and without regard to where such shark or gear are possessed, taken, or landed. However, if a vessel fishes on a trip solely in the waters of a single state and that state has more restrictive regulations on shark fishing, those more restrictive regulations may be applied by that state to fishing, catch, and gear on that trip.

(b) *Application for an annual vessel permit.* (1) An application for a vessel permit must be submitted and signed by the owner (in the case of a corporation, the qualifying officer or shareholder; in the case of a partnership, the qualifying general partner) or operator of the vessel. The application must be submitted to the Regional Director at least 30 days prior to the date on which the applicant desires to have the permit made effective.

(2) An applicant must provide the following information:

(i) A copy of the vessel's U.S. Coast Guard certificate of documentation or, if not documented, a copy of its state registration certificate.

(ii) The vessel's name and official number.

(iii) Name, mailing address including ZIP code, telephone number, and social security number, and date of birth of the owner (if the owner is a corporation/partnership, in lieu of the social security number, provide the employer identification number, if one has been assigned by the Internal Revenue Service (IRS), and, in lieu of the date of birth, provide the date the corporation/partnership was formed).

(iv) If the owner does not meet the earned income qualification specified in paragraph (b)(2)(vi) of this section and the operator does meet that qualification, the name, mailing address including ZIP code, telephone number, social security number, and date of birth of the operator.

(v) Information concerning vessel, gear used, fishing areas, and fisheries vessel is used in, as requested by the Regional Director and included on the application form.

(vi) A sworn statement by the applicant certifying that, during 1 of the 3 calendar years preceding the application,

(A) More than 50 percent of his or her earned income was derived from commercial fishing, that is, sale of the catch, or from charter or headboat operations; or

(B) His or her gross sales of fish were more than $20,000; or

(C) For a vessel owned by a corporation or partnership, the gross sales of fish of the corporation or partnership were more than $20,000.

(vii) Documentation supporting the statement of income, if required under paragraph (b)(3) of this section.

(viii) A sworn statement that the applicant agrees to the conditions

VOL 58 ISS 78 AP 26 1993 UMI

specified in paragraph (a)(4) of this section.

(ix) Any other information that may be necessary for the issuance or administration of the permit, as requested by the Regional Director and included on the application form.

(3) The Regional Director may require the applicant to provide documentation supporting the sworn statement under paragraph (b)(2)(vi) of this section before a permit is issued or to substantiate why such permit should not be revoked or otherwise sanctioned under paragraph (i) of this section. Such required documentation may include copies of appropriate forms and schedules from the applicant's income tax return. Copies of income tax forms and schedules are treated as confidential.

(c) *Change in application information.* The owner or operator of a vessel with a permit must notify the Regional Director within 30 days after any change in the application information specified in paragraph (b) of this section. The permit is void if any change in the information is not reported within 30 days.

(d) *Fees.* A fee is charged for each permit application submitted under paragraph (b) of this section. The amount of the fee is calculated in accordance with the procedures of the NOAA Finance Handbook for determining the administrative costs of each special product of service. The fee may not exceed such costs and is specified with each application form. The appropriate fee must accompany each application.

(e) *Issuance.* (1) The Regional Director will issue a permit at any time to an applicant if the application is complete and the applicant meets the earned income requirement specified in paragraph (b)(2)(vi) of this section. An application is complete when all requested forms, information, and documentation have been received and the applicant has submitted all applicable reports specified at § 678.5(a).

(2) Upon receipt of an incomplete application, the Regional Director will notify the applicant of the deficiency. If the applicant fails to correct the deficiency within 90 days of the date of the Regional Director's letter of notification, the application will be considered abandoned.

(f) *Duration.* A permit remains valid for the period specified on it, and the conditions accepted upon its issuance remain in effect for that period, unless the vessel is sold or the permit is revoked, suspended, or modified pursuant to subpart D of 15 CFR part 904.

(g) *Transfer.* A permit issued pursuant to this section is not transferable or assignable. A person purchasing a permitted vessel who desires to conduct activities for which a permit is required must apply for a permit in accordance with the provisions of paragraph (b) of this section. The application must be accompanied by a copy of a signed bill of sale.

(h) *Display.* A vessel permit issued pursuant to this section must be carried on board the vessel and such vessel must be identified as required by § 678.6. The operator of a vessel must present the permit for inspection upon the request of an authorized officer.

(i) *Sanctions and denials.* A permit issued pursuant to this section may be revoked, suspended, or modified, and a permit application may be denied, in accordance with the procedures governing enforcement-related permit sanctions and denials found at subpart D of 15 CFR part 904.

(j) *Alteration.* A permit that is altered, erased, or mutilated is valid.

(k) *Replacement.* A replacement permit may be issued. An application for a replacement permit will not be considered a new application. A fee, the amount of which is stated with the application form, must accompany each request for a replacement permit.

§ 678.5 Recordkeeping and reporting.

(a) *Vessel reports*—(1) *All permitted vessels.* An owner or operator of a vessel for which a permit has been issued pursuant to § 678.4 must submit copies of weighout slips that record the weights of fish sold from any trip from which a shark is off-loaded. Such weighout slips must be submitted as follows:

(i) The owner or operator of a vessel that has been selected by the Science and Research Director to maintain and submit the logbook forms described in paragraph (a)(2) of this section must submit the copies of the sales receipts attached to such logbook forms.

(ii) The owner or operator of a vessel that has not been selected to submit the logbook forms described in paragraph (a)(2) of this section but has been selected to maintain and submit logbook forms to the Science and Research Director in a fishery other than the shark fishery must attach the copies of the sales receipts to the logbook forms for that other fishery and submit them in the time frame required for those logbook forms.

(iii) The owner or operator of a vessel that has not been selected to submit logbook forms to the Science and Research Director in any fishery must submit the copies to the Science and Research Director postmarked not later than the third day after sale of the fish off-loaded from a trip.

(2) *Selected permitted vessels.* An owner or operator of a vessel for which a permit has been issued pursuant to § 678.4 and that is selected by the Science and Research Director must maintain and submit logbook forms for each trip on forms provided by the Science and Research Director. The logbook forms will provide a record of fishing location, time fished, fishing gear used, numbers of each species caught, and numbers of each species discarded. Logbook forms must be maintained and submitted for each trip, whether or not shark are caught on that trip. The logbook forms must be submitted to the Science and Research Director postmarked not later than the third day after sale of the fish off-loaded from a trip. If no fishing occurred during a month, a report so stating must be submitted in accordance with instructions provided with the forms.

(b) *Tournament operators.* A person conducting a shark tournament who is selected by the Science and Research Director must maintain and submit a record of catch and effort on forms available from the Science and Research Director. Completed forms must be submitted to the Science and Research Director postmarked not later than the seventh day after the conclusion of the tournament and must be accompanied by a copy of the tournament rules.

(c) *Additional data and inspection.* Additional data may be collected by authorized statistical reporting agents, as designees of the Science and Research Director, and by authorized officers. An owner or operator of a fishing vessel and a dealer are required to make sharks available for inspection by the Science and Research Director or an authorized officer and to provide data on catch and effort, as requested.

§ 678.6 Vessel identification.

(a) *Official number.* A vessel for which a permit has been issued pursuant to § 678.4 must display its official number—

(1) On the port and starboard sides of the deck house or hull and on an appropriate weather deck so as to be clearly visible from an enforcement vessel or aircraft;

(2) In block arabic numerals in contrasting color to the background;

(3) At least 18 inches (45.7 cm) in height for fishing vessels over 65 feet (19.8 meters) in length and at least 10 inches (25.4 cm) in height for all other vessels; and

(4) Permanently affixed to or painted on the vessel.

(b) *Duties of operator.* The operator of each fishing vessel must—

(1) Keep the official number clearly legible and in good repair; and

(2) Ensure that no part of the fishing vessel, its rigging, its fishing gear, or any other material aboard obstructs the view of the official number from an enforcement vessel or aircraft.

§ 678.7 Prohibitions.

In addition to the general prohibitions specified in § 620.7 of this chapter, it is unlawful for any person to do any of the following:

(a) Falsify information required in § 678.4(b)(2) on an application for a permit.

(b) Fail to display a permit, as specified in § 678.4(h).

(c) Falsify or fail to provide information required to be maintained, submitted, or reported, as specified in § 678.5 (a) or (b).

(d) Fail to make a shark available for inspection or provide data on catch and effort, as required by § 678.5(c).

(e) Falsify or fail to display and maintain vessel identification, as required by § 678.6.

(f) Falsify or fail to provide requested information regarding a vessel's trip, as specified in § 678.10(a).

(g) Fail to embark an observer on a trip when selected, as specified in § 678.10(b).

(h) Assault, resist, oppose, impede, harass, intimidate, or interfere with an NMFS-approved observer aboard a vessel.

(i) Prohibit or bar by command, impediment, threat, coercion, or refusal of reasonable assistance, an observer from conducting his/her duties aboard a vessel.

(j) Fail to provide an observer with the required food, accommodations, access, and assistance, as specified in § 678.10(c).

(k) Remove the fins from a shark and discard the remainder, as specified in § 678.21(a)(1).

(l) Possess shark fins aboard or off-load shark fins from a fishing vessel, except as specified in § 678.21(a) (2) and (3).

(m) Fail to release a shark in the manner specified in § 678.21(b).

(n) Exceed the bag limits, as specified in § 678.22 (a) through (c).

(o) Operate a vessel with a shark aboard in excess of the bag limits, as specified in § 678.22(d).

(p) Transfer a shark at sea, as specified in § 678.22(e).

(q) During a closure for a shark species group, retain a shark of that species group aboard a vessel that has been issued a permit under § 678.4, except as provided in § 678.24(a)(2), or sell, purchase, trade, or barter or attempt to sell, purchase, trade, or barter a shark of that species group, as specified in § 678.24.

(r) Sell, trade, or barter or attempt to sell, trade, or barter a shark harvested in the EEZ except as an owner or operator of a vessel with a permit, as specified in § 678.25(a).

(s) Purchase, trade, or barter or attempt to purchase, trade, or barter shark meat or fins harvested from the EEZ from an owner or operator of a vessel that does not have a vessel permit, as specified in § 678.25(b).

(t) Sell, purchase, trade, or barter or attempt to sell, purchase, trade, or barter shark fins that are disproportionate to the number of carcasses landed, as specified in § 678.25(c).

(u) Interfere with, obstruct, delay, or prevent by any means an investigation, search, seizure, or disposition of seized property in connection with enforcement of the Magnuson Act.

(v) Make any false statement, oral or written, to an authorized officer concerning the taking, catching, harvesting, landing, purchase, sale, possession, or transfer of a shark.

(w) During a closure for a shark species group, as specified in § 678.28(a),

(1) Possess shark of that species group in excess of the vessel trip limit, as specified in § 678.28(b)(1);

(2) Sell, trade, barter, or attempt to sell, trade or barter a shark carcass or fin of the closed species group, as specified in § 678.28(b)(2);

(3) Operate a vessel that has shark of that species group aboard in excess of the vessel trip limit, as specified in § 678.28(d); or

(4) Transfer a shark of that species group at sea, as specified in § 678.28(e).

§ 678.8 Facilitation of enforcement.

See § 620.8 of this chapter.

§ 678.9 Penalties.

See § 620.9 of this chapter.

§ 678.10 At-sea observer coverage.

(a) When requested by the Science and Research Director, an owner or operator of a vessel for which a permit has been issued pursuant to § 678.4 must advise the Science and Research Director in writing not less than 10 days in advance of each trip of the following:

(1) Departure information (port, dock, date, and time); and

(2) Expected landing information (port, dock, and date).

(b) If a vessel's trip is selected by the Science and Research Director for observer coverage, the owner or operator of such vessel must accommodate an NMFS-approved observer.

(c) An owner or operator of a vessel on which an NMFS-approved observer is embarked must—

(1) Provide, at no cost to the observer or the United States government, accommodations and food that are equivalent to those provided to the crew;

(2) Allow the observer access to and use of the vessel's communications equipment and personnel upon request for the transmission and receipt of messages related to the observer's duties;

(3) Allow the observer access to and use of the vessel's navigation equipment and personnel upon request to determine the vessel's position;

(4) Allow the observer free and unobstructed access to the vessel's bridge, working decks, holding bins, weight scales, holds, and any other space used to hold, process, weigh, or store fish; and

(5) Allow the observer to inspect and copy the vessel's log, communications logs, and any records associated with the catch and distribution of fish.

Subpart B—Management Measures

§ 678.20 Fishing year.

The fishing year is January 1 through December 31.

§ 678.21 Harvest limitations.

(a) *Finning.* (1) The practice of "finning," that is, removing only the fins and returning the remainder of the shark to the sea, is prohibited in the EEZ or aboard a vessel that has been issued a permit pursuant to § 678.4.

(2) Shark fins that are possessed aboard or off-loaded from a fishing vessel must be in proper proportion to the weight of carcasses. That is, the weight of fins may not exceed five percent of the weight of the carcasses. All fins must be weighed in conjunction with the weighing of the carcasses at the vessel's first point of landing and such weights of the fins landed must be recorded on the weighout slips submitted by the vessel owner or operator under § 678.5(a).

(3) Shark fins may not be possessed aboard a fishing vessel after the vessel's first point of landing.

(b) *Release.* A shark that is harvested in the EEZ or harvested by a vessel that has been issued a permit pursuant to § 678.4 that is not retained—

(1) Must be released in a manner that will ensure maximum probability of survival; and

(2) If caught by hook and line, must be released by cutting the line near the

VOL 58 ISS 78 AP 26 1993 UMI

hook without removing the fish from the water.

§ 678.22 Bag limits.

(a) *Applicability.* The bag limits apply to a person who fishes in the EEZ or possesses a shark in or from the EEZ aboard a vessel—

(1) When the vessel does not have on board a permit issued under § 678.4; or

(2) When the vessel is operating as a charter vessel or headboat.

(b) *Bag limits.* Bag limits are as follows:

(1) Large coastal species and pelagic species, combined—4 per fishing vessel per trip; and

(2) Small coastal species—5 per person per day.

(c) *Combination of bag limits.* A person to whom the bag limits apply may not combine a bag limit specified in paragraph (b) of this section with a bag or possession limit applicable to state waters.

(d) *Responsibility for the bag limits.* The operator of a vessel for which the bag limits apply is responsible for the vessel trip limit applicable to large coastal species and pelagic species combined, and for the cumulative bag limit applicable to small coastal species based on the number of persons aboard.

(e) *Transfer of sharks.* A person for whom a bag limit specified in this section applies may not transfer at sea a shark—

(1) Taken in the EEZ, regardless of where such transfer takes place; or

(2) In the EEZ, regardless of where such shark was taken.

§ 678.23 Commercial quotas.

(a) *Applicability.* Persons fishing aboard vessels for which vessel permits have been issued under § 678.4, except for persons aboard vessels that are operating as charter vessels or headboats, are limited to the quotas specified in this section. Persons aboard vessels that are operating as charter vessels or headboats are limited to the bag limits, as specified in § 678.22(a)(2) and (b). Large coastal or pelagic species sharks that are sold are counted against the appropriate quota for their species group.

(b) *Semi-annual quotas.* The following commercial quotas apply:

(1) For the period January 1 through June 30, 1993:

(i) Large coastal species—1,218 metric tons, dressed weight.

(ii) Pelagic species—290 metric tons, dressed weight.

(2) For the period July 1 through December 31, 1993:

(i) Large coastal species—1,218 metric tons, dressed weight.

(ii) Pelagic species—290 metric tons, dressed weight.

(4) For the period January 1 through June 30, 1994:

(i) Large coastal species—1,285 metric tons, dressed weight.

(ii) Pelagic species—290 metric tons, dressed weight.

(2) For the period July 1 through December 31, 1994:

(i) Large coastal species—1,285 metric tons, dressed weight.

(ii) Pelagic species—290 metric tons, dressed weight.

(c) *Adjustments to quotas.* The Assistant Administrator may adjust a semi-annual quota to reflect actual catches during the preceding semi-annual period. That is, catch in excess of the semi-annual quota in the preceding period may be deducted from the current semi-annual quota and catch less than the semi-annual quota may be added. Such adjustments to semi-annual quotas will be published in the **Federal Register**. Quotas may also be adjusted under the framework procedure for adjustment of management measures, as specified in § 678.26.

§ 678.24 Closures.

(a) When a commercial quota specified in § 678.23(b) is reached, or is projected to be reached, the Assistant Administrator will publish a notice to that effect in the **Federal Register**. The effective date of such notice will be at least 5 days after the date such notice is filed with the Office of the Federal Register.

(1) On the effective date of such notice, for the remainder of the semi-annual period,

(i) A person aboard a vessel that has been issued a permit under § 678.4 may not retain shark of the species group for which the commercial quota has been reached, except as provided in paragraph (a)(2) of this section; and

(ii) The sale, purchase, trade, or barter or attempted sale, purchase, trade, or barter of a shark carcass or fin of that species group harvested by a person aboard a vessel that has been issued a permit under § 678.4 is prohibited.

(2) A person aboard a charter vessel or headboat that has been issued a permit under § 678.4 may retain, subject to the bag limits specified in § 678.22(b), shark of the species group for which the commercial quota has been reached, provided the vessel is operating as a charter vessel or headboat. However, the prohibition of paragraph (a)(1)(ii) and of this section regarding sale, purchase, trade, or barter, or attempted sale, purchase, trade, or barter, apply to such shark.

(b) The prohibition of paragraph (a)(1)(ii) of this section regarding sale, purchase, trade, or barter, or attempted sale, purchase, trade, or barter, by a dealer does not apply to trade in shark carcasses or fins that were harvested, off-loaded, and sold, traded, or bartered, prior to the effective date of the notice in the **Federal Register**, and were held in storage by a dealer or processor.

§ 678.25 Restrictions on sale upon landing.

Subject to the restrictions of § 678.24,

(a) Upon landing, meat or fins from a shark harvested in the EEZ may be sold, traded, or bartered or attempted to be sold, traded, or bartered only by an owner or operator of a vessel that has been issued a permit pursuant to § 678.4;

(b) Upon landing, meat or fins from a shark harvested in the EEZ may be purchased, traded, or bartered or attempted to be purchased, traded, or bartered only from the owner or operator of a vessel that has been issued a permit under § 678.4; and

(c) Fins from a shark harvested in the EEZ, or by a vessel that has been issued a permit under § 678.4, that are disproportionate to the weight of carcasses landed (see § 678.21(a)(2)) may not be sold, purchased, traded, or bartered or attempted to be sold, purchased, traded, or bartered.

§ 678.26 Adjustment of management measures.

In accordance with the framework regulatory adjustment procedures specified in the FMP, the Assistant Administrator may establish or modify for species or species groups in the shark fishery the following: maximum sustainable yield, total allowable catch, quotas, trip limits, bag limits, size limits, the fishing year or fishing season, the species of sharks managed and the specification of the species groups to which they belong, and permitting and reporting requirements.

§ 678.27 Specifically authorized activities.

The Assistant Administrator may authorize, for the acquisition of information and data, activities otherwise prohibited by these regulations.

§ 678.28 Closures prior to July 1, 1993.

(a) Other provisions of this part 678 notwithstanding, when a commercial quota specified in § 678.23(b)(1) is reached, or is projected to be reached, the Assistant Administrator will publish a notice to that effect in the **Federal Register**. The effective date of such notice will be at least 5 days after the date such notice is filed with the Office of the Federal Register.

(b) On the effective date of such notice, through June 30, 1993,

(1) Possession of a shark of the closed species group in or from the EEZ is limited to 4 per fishing vessel per trip; and

(2) The sale, purchase, trade, or barter or attempted sale, purchase, trade, or barter of a shark carcass or fin of the closed species group in or from the EEZ is prohibited.

(c) An applicable possession limit of paragraph (b)(1) of this section may not be combined with a bag or possession limit applicable to state waters.

(d) The operator of a vessel for which a possession limit of paragraph (b)(1) of this section applies is responsible for the vessel trip limit for the closed species group.

(e) A person aboard a vessel subject to a possession limit specified in paragraph (b)(1) of this section may not transfer at sea a shark of the closed species group—

(1) Taken in the EEZ, regardless of where such transfer takes place; or

(2) In the EEZ, regardless of where such shark was taken.

(f) The prohibition of paragraph (b)(2) of this section regarding sale, purchase, trade, or barter, or attempted sale, purchase, trade, or barter, does not apply to trade in shark carcasses or fins of the closed species group that were harvested, off-loaded, and sold, traded, or bartered, prior to the effective date of the notice in the **Federal Register**, and were held in storage by a dealer or processor.

Appendix—Framework Procedures for Adjusting Management Measures as Specified in the Shark Fishery Management Plan for the Atlantic Ocean (FMP)

Note: This appendix will not appear in the Code of Federal Regulations.

(a) As provided for in 50 CFR 602.12(e), the Assistant Administrator annually will assure that: A stock assessment and fishery evaluation (SAFE) report for sharks is prepared, reviewed, and changed as necessary; current fishing mortality is estimated; other appropriate population parameters are estimated (e.g., revised MSY estimates); catch statistics on the fishery are analyzed; and relevant environmental, social, and economic data are evaluated.

(b) The Assistant Administrator will appoint an OT that includes representatives from the following: NMFS Northeast and Southeast Regional Offices and the Washington Office, the five affected Councils (including council members, staff, and advisory panel, and/or, scientific and statistical committee members), NMFS Fisheries Research Centers, ICCAT Advisory Panel, and others as necessary and appropriate. The OT will review the SAFE report and other relevant data annually and, based thereon, submit a written report of its findings to the Assistant Administrator. If the OT determines that adjusting the management measures is necessary, it will include in the report specified ranges of acceptable biological catch (ABC) for individual species, species groups, or all sharks. The ABC will be calculated so as to prevent overfishing or to prevent further declines of an overfished species, species groups, or all managed species of sharks.

Recommendations in the report may include implementing or changing the following: maximum sustainable yield; total allowable catch; commercial quotas; commercial trip limits; recreational bag limits; species size limits; the fishing year or fishing season; the species of sharks managed and the species groups to which they belong; and permitting and reporting requirements. The biological, environmental, social, and economic impacts of each recommendation will be included in the report. In formulating its recommendations, the OT will consult with the Assistant Administrator, Regional Directors of the NMFS Northeast and Southeast Regions, and any intercouncil shark committee. The OT may hold public hearings as appropriate.

(c) If the Assistant Administrator concurs with the OT's recommendations, he will prepare the regulatory package and file within 30 days a proposed rule and a request for public comment with the Office of the Federal Register. The regulatory package will include a discussion of the need for action; the proposed adjustments to the management measures; analyses as required by applicable law of the social, economic, and biological impacts of the proposed measures; and the proposed rule. From 15 to 30 days will be provided for public comment, consistent with the magnitude of the action.

(d) After reviewing public comments and additional information or data that may be available, the Assistant Administrator will, after consultation with the OT, if appropriate, make final determinations regarding consistency of the proposed conservation and management measures with the objectives of the FMP, the national standards, and other applicable law. Within 30 days of the close of the public comment period on the proposed rule, the Assistant Administrator will publish a final rule in the **Federal Register**.

(e) The Assistant Administrator may take action independent of the recommendations of the OT if he finds, based on the best available scientific information on the biological conditions of the shark resources or economic conditions of the fishery, that adjustments in the management measures are required. In this situation, the Assistant Administrator would follow the same procedure that the OT would follow in preparing recommendations for regulatory changes. The Assistant Administrator would consult with the OT, as necessary and appropriate.

(f) The Assistant Administrator will consult with and consider the comments and views of the affected Councils in developing proposed and final adjustments in management measures.

[FR Doc. 93–9641 Filed 4–23–93; 8:45 am]
BILLING CODE 3510–22–M

50 CFR Part 663

[Docket No. 921253–2353]

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Adjustment to management measures and request for comments.

SUMMARY: NMFS announces reductions in vessel trip limits for yellowtail rockfish, thornyheads, and the deepwater complex (thornyheads, Dover sole, and trawl-caught sablefish) in the groundfish fishery off Washington, Oregon, and California. This action is authorized by the regulations implementing the Pacific Coast Groundfish Fishery Management Plan (FMP). The trip limits are designed to keep the catch within the 1993 harvest guidelines while extending these fisheries as long as possible during the year.

DATES: Effective from 0001 hours (local time) April 21, 1993, until modified, superseded, or rescinded. Comments will be accepted until May 11, 1993.

ADDRESSES: Submit comments to Rolland A. Schmitten, Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way NE., BIN C15700—Bldg. 1, Seattle, Washington 98115; or Gary Matlock, Operations Director, Southwest Region, National Marine Fisheries Service, 501 West Ocean Blvd., suite 4200, Long Beach, California 90802–4213. Information relevant to these actions has

VOL 58 ISS 78 AP 26 1993 UMI

been compiled in aggregate form and is available for public review during business hours at the office of the NMFS Northwest Regional Director or may be obtained from the Pacific Fishery Management Council (Council), by writing Pacific Fishery Management Council, Metro Center, suite 420, 2000 SW. First Avenue, Portland, OR 97201.

FOR FURTHER INFORMATION CONTACT: William L. Robinson (Northwest Region, NMFS) 206–526–6140; or Rodney R. McInnis (Southwest Region, NMFS) 310–980–4040.

SUPPLEMENTARY INFORMATION: The FMP and its implementing regulations (58 FR 736, January 8, 1991) provide for rapid changes to specific management measures that have been designated as "routine." Trip limits for yellowtail rockfish, thornyheads, and the deepwater complex (thornyheads, Dover sole, and trawl-caught sablefish) are among those management measures that have been designated as routine at 50 CFR 663.23(c)(1). At its April 1993 meeting, the Pacific Fishery Management Council (Council) reviewed the progress of the groundfish fishery and recommended the following changes to the current trip limits to the Secretary of Commerce (Secretary). The current trip limits were announced in the **Federal Register** on January 7, 1993 (58 FR 2990) as "1993 Management Measures."

Yellowtail Rockfish

Yellowtail rockfish (also called "greenies") are a major component of the *Sebastes* complex of rockfish. The current coastwide trip limit for the *Sebastes* complex is 50,000 pounds in a 2-week period. Within that 50,000 pounds, no more than 8,000 pounds (3,629 kg) cumulative may be yellowtail rockfish caught north of Coos Bay, Oregon. If fishing takes place north of Coos Bay at any time during the 2-week period, the trip limit for yellowtail rockfish applies for the entire 2-week period.

The best available information presented at the April 1993 Council meeting indicated that the 4,400-mt harvest guideline for yellowtail rockfish in the Vancouver/Columbia subarea could be reached as early as late summer if landing rates were not further curtailed. Consequently, the Council recommended that the cumulative trip limit for yellowtail rockfish be reduced at the beginning of the next 2-week period (April 21) from 8,000 pounds to 6,000 pounds. Even at this rate, there is some risk that the harvest guideline will be reached before the end of the year. An even lower trip limit was not suggested at this time because it could result in increased discards. Without monitoring of discard rates, the Council's Groundfish Management Team recommends against a lower limit. The 50,000-pound coastwide cumulative trip limit for the *Sebastes* complex remains unchanged.

Thornyhead and the Deepwater Complex (Which Includes Thornyheads, Dover Sole, and Trawl-Caught, Sablefish)

Thornyheads, Dover sole, and sablefish are managed together because they are often caught together unavoidably in the trawl fishery. On January 1, 1993, the trip limit for the deepwater complex was 45,000 pounds cumulative in a 2-week period, of which no more than 20,000 pounds could be thornyheads. The trip limit for sablefish taken with trawl gear, which was applied to each trip rather than cumulatively over the 2-week period, was 25 percent of the deepwater complex if more than 1,000 pounds of sablefish was landed. In any landing, no more than 5,000 pounds could be sablefish smaller than 22-inches (total length).

The best available information presented at the April 1993 Council meeting indicated that the trawl allocation for sablefish of 3,886 mt would be exceeded between late September and late October. If catch rates are not significantly curtailed, the total catch is projected to exceed the allocation by 16–30 percent. Even though the catch of sablefish in 1993 is 86–95 percent of the rate in 1991–1992, this is not low enough to stay within the 1993 trawl allocation. The trawl allocation is 78 percent of the 1992 level as a result of the reduction in the 1993 harvest guideline. The catch rate for sablefish must decline from a projected average of about 450 mt per month to 300 mt per month from May–December 1993 to avoid exceeding the trawl allocation.

The Council's Groundfish Management Team does not advocate a reduction in the sablefish trawl trip limit from the current level of 25 percent of the deepwater complex. Many trips are at this level, and a discard rate of 20 percent is already incorporated in the catch projections. Further trip limit reductions will increase discards of sablefish. Reduction in the trip limit for the deepwater complex will slow the sablefish harvest, but will also require a reduction in the trip limit for thornyheads to prevent excessive discard of the lower-valued Dover sole. Neither Dover sole nor thornyheads are expected to reach their harvest guidelines before the end of the year.

By extending the cumulative trip limit period from 2 weeks to 4 weeks, a fishing vessel operator will have the opportunity to make at least one relatively large landing (of up to 60,000 pounds) in the 4-week period, rather than two smaller landings (of 30,000 pounds) that would result in higher operating costs and perhaps higher discards.

Therefore, the Council recommended that the cumulative limit for the deepwater complex be reduced from 45,000 pounds per 2-week period to 60,000 pounds per 4-week period, a 30 percent reduction, while maintaining the sablefish trip limit at 25 percent of the deepwater complex. This was considered to be the best way to reduce the catch of sablefish without increasing potential discards of sablefish or Dover sole. To avoid an increase in the rate of thornyhead landings, the thornyhead trip limit also is reduced, from 20,000 pounds cumulative per 2-week period, to 35,000 pounds cumulative per 4-week period.

The language at 58 FR 2990 (January 7, 1993) also is revised to clarify that the deepwater complex trip limits for thornyheads and Dover sole apply to all gear types, whereas the sablefish trip limit applies only to trawl-caught sablefish. The management measures for sablefish caught with nontrawl gear appear in paragraph E(5) of the 1993 Management Measures at 58 FR 2990.

Inseason Adjustments in 1993

Due to budget constraints, the Council canceled its July 1993 meeting. Consequently, the Council will not have an opportunity to review landings in the groundfish fishery until its next meeting in September. The Council previously had recommended implementation of a 3,000-pound trip limit for widow rockfish, a 10,000-pound trip limit for Pacific whiting, and a 250-pound daily trip limit for nontrawl-caught sablefish on the dates necessary to keep landings close to their respective harvest guidelines or allocations in 1993. At its April meeting, the Council also recommended that the Regional Director, NMFS, Northwest Region, make further adjustments to routine management measures before the September Council meeting, in consultation with the Council's Groundfish Management Team, if it appears that a harvest guideline will be reached by October 31, 1993.

Secretarial Action

The Secretary concurs with the Council's recommendations and announces the following changes to the 1993 cumulative trip limits announced at 58 FR 2990. The new trip limits will apply to the 2-week and 4-week periods beginning April 21, 1993.

Sebastes Complex (Including Yellowtail and Bocaccio Rockfish)

Coastwide, no more than 50,000 pounds (22,680 kg) cumulative of the *Seabastes* complex may be taken and retained, possessed or landed per vessel in a 2-week period. Of this 50,000 pounds (22,680 kg), no more than 6,000 pounds (22,722 kg) cumulative may be yellowtail rockfish taken and retained north of Coos Bay, and no more than 10,000 pounds (4,536 kg) cumulative may be bocaccio taken and retained south of Cape Mendocino. (This modifies paragraph (C)(2) of the 1993 Management Measures announced at 58 FR 2996, January 7, 1993.)

Trip and Size Limits for the Deepwater Complex (Thornyheads, Dover Sole, and Trawl-Caught Sablefish)

These provisions apply to thornyheads and Dover sole caught with any legal groundfish gear, and sablefish caught with legal trawl gear.

Coastwide, no more than 60,000 pounds (27,216 kg) cumulative of the deepwater complex may be taken and retained, possessed, or landed per vessel in a 4-week period. Within this 60,000 pounds (27,216 kg), no more than 35,000 (15,876 kg) cumulative may be thornyheads. In any landing of the deepwater complex, no more than 25 percent of the deepwater complex may be trawl-caught sablefish, unless less than 1,000 pounds (454 kg) of sablefish are landed, in which case the percentage does not apply. In any landing, no more than 5,000 pounds (2,268 kg) of trawl-caught sablefish may be smaller than 22 inches (56 cm) (total length). (This modifies paragraphs E(4) and E(4)(c) of the 1993 Management Measures announced at 58 FR 2997, January 7, 1993.)

Classification

These actions are taken under the authority of and in accordance with the regulations implementing the FMP at 50 CFR part 663.

An Environmental Impact Statement (EIS) was prepared for the FMP in 1982 and a Supplemental EIS was prepared for Amendment 4 in accordance with the National Environmental Policy Act (NEPA). The alternatives considered and environmental impacts of the actions contained in this notice are not significantly different than those considered in either the EIS or SEIS for the FMP. Therefore this action is categorically excluded from the NEPA requirements to prepare an environmental assessment in accordance with paragraph 6.02c3(f) of the NOAA Administrative Order 216–6 because the alternatives and their impacts have not changed significantly and this action falls within the scope of the EIS and SEIS.

This action is in compliance with Executive Order 12291 and the Regulatory Flexibility Act.

This action does not conain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

Since these measures were publicized and discussed publicly, with opportunity for public comment, at the April Council meeting, the Secretary finds good cause that publication of a general notice of proposed rulemaking would be unnecessary and contrary to the public interest under section 553(b)(B) of the Administrative Procedure Act (APA). The APA requires that the publication of an action be made not less than 30 days before its effective date unless the Secretary finds and publishes with the rule good cause for an earlier effective date. Good cause for waiving the delay in effectiveness is found if the delay is impracticable, unnecessary, or contrary to the public interest. If not implemented by April 21, 1993, the next 4-week period for the deepwater complex begins May 19, 1993. A delay in implementation could compromise the management strategies that are based on the projected landings from these trip limits and would result in the need for much more restrictive limits before the end of the year. Therefore, a delay in effectiveness is unnecessary and contrary to the public interest and these actions are effective on April 21, 1993.

List of Subjects in 50 CFR Part 663

Administrative practice and procedure, Fisheries, Fishing, Reporting and recordkeeping requirements.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 21, 1993.

BILLING CODE 3510–22–M

50 CFR Part 675

[Docket No. 921185–3021]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing the directed fishery for Pacific ocean perch in the Aleutian Islands subarea (AI) of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the Pacific ocean perch total allowable catch (TAC) in the AI.

EFFECTIVE DATES: Effective 12 noon, Alaska local time (A.l.t.), April 22, 1993, until 12 midnight, A.l.t., December 31, 1993.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, Resource Management Specialist, Fisheries Management Division, NMFS, 907–586–7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by the Secretary of Commerce according to the Fishery Management Plan for the Groundfish Fishery of the BSAI (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

In accordance with § 675.20(a)(7)(ii) the Pacific ocean perch TAC for the AI was established by the final groundfish specifications (58 FR 8703, February 17, 1993) as 11,815 metric tons (mt).

The Director of the Alaska Region, NMFS (Regional Director), has determined, in accordance with § 675.20(a)(8), that the Pacific ocean perch TAC in the AI soon will be reached. Therefore, the Regional Director has established a directed fishing allowance of 10,815 mt, with consideration that 1,000 mt will be taken as incidental catch in directed fishing for other species in the AI. The Regional Director has determined that the directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific ocean perch in the AI, effective from 12 noon, A.l.t., April 22, 1993, until 12 midnight, A.l.t., December 31, 1993.

Directed fishing standards for applicable gear types may be found in the regulations at § 675.20(h).

Proposed Rules

Federal Register
Vol. 58, No. 78
Monday, April 26, 1993

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 700, 701, and 722

Definitions; Organization and Operation of Federal Credit Unions; and Appraisals

AGENCY: National Credit Union Administration (NCUA).

ACTION: Proposed amendments.

SUMMARY: The NCUA Board is issuing proposed amendments to reduce regulatory burden. The amendments: extend the maturity date of investments not considered risk assets from 3 to 5 years; increase the dollar value from $25,000 to $50,000 for determining when loans are subject to the business loan regulation; make the recordkeeping requirements for business loans consistent with the proposed definition of member business loans; and raise the de minimus amount for an appraisal performed by a state-certified or -licensed appraiser from $50,000 to $100,000.

DATES: Comments must be postmarked by May 26, 1993.

ADDRESSES: Send comments to Becky Baker, Secretary of the Board, National Credit Union Administration, 1776 G Street, NW., 20456.

FOR FURTHER INFORMATION CONTACT: D. Michael Riley, Director, Office of Examination and Insurance, at the above address or telephone: (202) 682-9640 or Michael J. McKenna, Office of General Counsel, at the above address or telephone: (202) 682-9630.

SUPPLEMENTARY INFORMATION: NCUA continually reviews its regulations to improve efficiency and reduce burdens on credit unions. NCUA's goal is to strike a proper balance between safety and soundness concerns and credit unions' need to compete in the marketplace. On July 28, 1992, the NCUA Board issued a request for comment on regulations affecting federally insured credit unions which impose unnecessary or excessive costs or burdens and what changes could be made to reduce those costs or burdens (*See* 57 Fed. Reg. 34090, 8/3/92). Although most of the comments addressed rules for which NCUA does not promulgate (e.g. IRS and FRB requirements), commenters did suggest changes in, among other things, the appraisal rule, member business loan rule and the risk asset rule. Some of the commenters' suggestions are being proposed and are discussed fully below. NCUA believes the proposed changes will decrease paperwork requirements and regulatory burden without any effect on safety and soundness.

Section 700.1(i)—Risk Assets

Section 116(a) of the Federal Credit Union Act (12 U.S.C. 1762(a) (the "Act") requires that federal credit unions set aside a certain percentage of gross income at the end of each accounting period as a Regular Reserve. According to Section 116(a) of the Act, the amount of reserve transfer is made according to a two-tiered formula, according to the size and age of the credit union. This formula is based on the ratio of reserves to risk assets. Section 700.1(i) of NCUA's Regulations (definition of risk assets) lists which assets are exempt from the reserve requirements. Section 741.9 of NCUA's Regulations states that federally insured state chartered credit unions must comply with the statutory reserve requirements.

Currently, NCUA's Regulations require that certain assets with maturities in excess of 3 years be treated as risk assets for reserving purposes. This requirement is not intended to restrict or limit investments in assets over the 3 year threshold, but to acknowledge that making longer term investments does create some interest rate risk, which should be reserved against. However, from a practical standpoint, the vast majority of credit unions today are not in a required reserve transfer position. Thus, this regulation has had only a minimal impact in the last few years.

Recognizing that longer term investments have and will continue to be a large part of credit union assets, NCUA is proposing to change the 3 year maturity requirement to 5 years. This change will provide credit unions with additional flexibility in this area. Although there is some additional interest rate risk between assets with maturities of 3 years versus those of 5 years, the additional risk is acceptable given the strong capital position of credit unions and thus should not affect safety and soundness.

This amendment will expand the number of assets which are exempt from the definition of risk assets. This will result in a corresponding increase in the reserves to risk asset ratio for many credit unions and will reduce the number of credit unions required to make transfers of gross income to regular reserves or reduce the amount of transfer for some credit unions. However, credit unions with assets that may be exempt from inclusion as risk assets must, as a minimum, adequately document and track them as required by full and fair disclosure requirements in Section 702.3 of NCUA's Regulations. At the time of each required reserve transfer, the credit union must document which assets are exempt.

Section 701.21(h)—Member Business Loans

As proposed, the member business loan rule would be changed in two ways—first, by raising the exclusion threshold for defining business loans to $50,000, and second, by requiring reporting of only those loans meeting that threshold.

Section 701.21(h)(1)(i) defines member business loans and sets forth five exclusions from the general definition. One of the exclusions is for loans of less than $25,000 (Section 701.21(h)(1)(i)(C)). In today's market, $25,000 is too low a threshold. A $25,000 increase in the threshold will not affect safety and soundness but will reduce paperwork and reporting requirements. Therefore, NCUA proposes to raise the threshold amount to $50,000 for determining when a business purpose loan is within the definition of the member business loan rule.

Section 701.21(h)(5) establishes recordkeeping requirements for business purpose loans. It provides that a loan which meets the general definition of a member business loan, regardless of exclusions or exemptions, must be identified as such in the records of the credit union and reported on the semiannual financial and statistical reports required by NCUA. This makes credit unions keep track of business purpose loans that are not defined as

VOL 58 ISS 78 AP 26 1993 UMI

member business loans. This is a substantial burden for small credit unions that do not make member business loans subject to the other requirements of the regulation, but do grant small business purpose loans. Such double tracking of loans has proved confusing and difficult for many credit unions. Furthermore, NCUA's loss experience shows that major losses have not been caused by small business purpose loans. Accordingly, NCUA proposes to require only those loans which meet the general definition of a member business loans as set forth in Section 701.21(h)(1)(i) be identified as such and reported on the financial and statistical reports required by NCUA. This change will reduce paperwork requirements for credit unions without affecting safety and soundness.

Part 722—Appraisals

Title XI of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) directed NCUA and the other financial institution regulatory agencies to publish appraisal rules for federally related real estate transactions within the jurisdiction of each agency. Section 1121(4) of FIRREA defines a federally related transaction as a real estate-related financial transaction that, among other things, requires the services of an appraiser. NCUA recognized that not all real estate-related financial transactions would require an appraiser. Accordingly, NCUA adopted the current regulation which does not require a state-certified or -licensed appraiser for real estate-related financial transactions having a transaction value less than or equal to $50,000. (*See* 55 Fed. Reg. 30199, July 25, 1990.) Congress confirmed and clarified the authority of the financial institution regulatory agencies to set threshold levels below which the services of state certified or licensed appraisers are not required in connection with federally related transactions if the threshold does not represent a threat to the safety and soundness of financial institutions. *See* § 954 of the Housing and Community Development Act of 1992, 106 Stat. 3894.

NCUA believes the requirement of an appraisal in accordance with Part 722 can impose significant costs, both direct and indirect, on the credit union and the member without an equal benefit to federal financial or public policy interests. While in many cases an appraisal is a necessary part of a sound loan underwriting decision process, NCUA also recognizes that appraisals should not be required when they impose significant costs without promoting the safety and soundness of credit unions or furthering the purposes of FIRREA.

Since the establishment of the $50,000 threshold level in 1990, NCUA has not found any evidence indicating that there has been a significant increase in the defaults on real estate-related loans of $50,000 or less because the services of an appraiser have not been required. NCUA believes that the reason for this low loss experience is twofold. First, the majority of transactions falling below the $50,000 threshold are loans on 1-to-4 family residential properties. NCUA's experience shows that major credit losses have been primarily caused by loans secured by commercial buildings, condominiums, shopping centers, and agricultural and other commercial properties. Second, NCUA's requirement that a credit union obtain a valuation on property under $50,000 performed by an individual who is both qualified and experienced with the type of property being valued and has no direct or indirect interest in the property being valued, protects the credit union's interest throughout the term of the loan.

As a result of this loss experience, NCUA proposes to require appraisals only for those real estate-related financial transactions in which the transaction value exceeds $100,000. NCUA does not believe the proposed increase would represent a threat to the safety and soundness of credit unions but rather it will reduce unnecessary costs and paperwork requirements. Furthermore, NCUA does not believe that the proposed increase would represent a major qualitative change in the types of loans falling below the threshold level. Even though more 1-to-4 family residential loans would fall below the threshold level, NCUA does not believe these loans would pose a significantly greater risk to credit unions than similar loans below the current threshold. Furthermore, NCUA does not believe that a $100,000 threshold level would exclude from the appraisal requirement a significant number of real estate development and commercial loans that have caused major credit losses in the past, especially, in light of the restrictions on such loans contained in the member business loan rule. Finally, the requirement of a valuation for any loan less than $100,000 will continue to provide protection in the assessment of collateral for credit unions and the National Credit Union Share Insurance Fund, as well as mitigate any potential risk associated with an increase in the threshold.

Paperwork Reduction Act

The proposed amendments would reduce paperwork requirements. The paperwork reductions will be submitted to the Office of Management and Budget for approval under the Paperwork Reduction Act. Written comments on this decrease in requirements should be forwarded directly to the OMB Desk Officer at the following address: OMB Reports Management Branch, New Executive Office Building, room 3208, Washington, D.C. 20530, Attn: Gary Waxman.

Regulatory Flexibility Act

The Regulatory Flexibility Act requires NCUA to prepare an analysis to describe any significant economic impact a proposed regulation may have on a substantial number of small credit unions (primarily those under $1 million in assets). The proposed amendments reduce regulatory burden and are less restrictive than current requirements. The NCUA Board expects the changes to benefit credit unions by reducing paperwork and reporting requirements. Overall, the NCUA Board expects the changes to benefit members and federally-insured credit unions regardless of size by reducing costs without substantially increasing the risk of loss for federally insured credit unions. In addition, most small credit unions do not offer business and real estate loans, nor are they in a position to make a required reserve transfer. Accordingly, the Board determines and certifies that the proposed amendments do not have a significant economic impact on a substantial number of small credit unions and that a Regulatory Flexibility Analysis is not required.

Executive Order 12612

Executive Order 12612 requires NCUA to consider the effect of its actions on state interests. The current member business loan regulation, appraisal regulation and the definition of risk assets apply to all federally insured credit unions, including state-chartered federally-insured credit unions. The proposed amendments would reduce regulatory requirements for all federally insured credit unions. The NCUA Board has determined that the proposed amendments would not have a substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

List of Subjects

12 CFR Part 700

Credit unions, Reserve requirements, Risk assets.

12 CFR Part 701

Civil rights, Conflicts of interests, Credit, Credit unions, Fair housing, Insurance, Mortgages, Reporting and recordkeeping requirements, Signs and symbols, Surety bonds.

By the National Credit Union Administration Board on April 19, 1993.

Becky Baker,

Secretary of the Board.

Accordingly, NCUA proposes to amend 12 CFR parts 700, 701 and 722 as follows:

PART 700—DEFINITIONS

1. The authority citation for part 700 continues to read as follows:

Authority: 12 U.S.C. 1752(5), 1757(6) and 1766.

2. It is proposed that section 700.1 be amended by revising paragraphs (i) (2) through (6), (i)(15) and (i)(16) introductory text and by amending (i)(7) introductory text as follows:

§ 700.1 Definitions.

* * * * *

(i) * * *

(1) * * *

(2) Deposits and/or shares in federally or state-insured banks, savings and loan associations, and credit unions that have a remaining maturity of 5 years or less.

(3) Assets that have a remaining maturity of 5 years or less and are insured by, fully guaranteed as to principal and interest by, or due from the U.S. Government, its agencies, the Federal National Mortgage Association, Federal Home Loan Mortgage Corporation or the Government National Mortgage Association. Collateralized mortgage obligations that are comprised of government guaranteed mortgage loans shall be included in this asset category.

(4) Loans to other credit unions that have a remaining maturity of 5 years or less.

(5) Student loans insured under the provisions of Title IV, Part B of the Higher Education Act of 1965 (20 U.S.C. 1071, et seq.) or similar state insurance programs that have a remaining maturity of 5 years or less.

(6) Loans that have a remaining maturity of 5 years or less and are fully insured or guaranteed by the Federal or a state government or any agency of either.

(7) Shares or deposits in a corporate credit union that have a remaining maturity of 5 years or less, other than Membership Capital Share Deposit accounts as defined in Part 704. * * *

* * * * *

(15) Assets included in numbered items 2, 3, 4, 5, 6, and 7 with maturities greater than 5 years are exempt from risk assets if the asset is being carried on the credit union's records at the lower of cost or market, or are being marked to market value monthly.

(16) Assets included in numbered items 2, 3, 4, 5, 6, and 7, with remaining maturities greater than 5 years are exempt from risk assets provided they meet the following criteria, irrespective of whether or not the asset is being carried on the credit union's records at the lower of cost or market, or are being marked to market value monthly: * * *

* * * * *

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

3. The authority citation for part 701 continues to read as follows:

Authority: 12 U.S.C. 1752(5), 1755, 1756, 1757, 1759, 1761a, 1761b, 1766, 1767, 1782, 1784, 1787 and 1789. Section 701.6 is also authorized by 31 U.S.C. 3717.

Section 701.31 is also authorized by 15 U.S.C. 1601 et seq., 42 U.S.C. 1861 and 42 U.S.C. 1861 and 42 U.S.C. 3601–3610.

4. It is proposed that Section 701.21 be amended by revising paragraphs (h)(1)(i)(C) and (h)(5) to read as follows:

§ 701.21 Loans to members and lines of credit to members.

* * * * *

(h) * * *

(1) * * *

(i) * * *

(C) A loan meeting the general definition of member business loans under this paragraph (h)(1)(i), and, made to a borrower or an associated member (as defined in paragraph (h)(1)(iii) of this section), which when added to other such loans to the borrower or associated member, is less than $50,000.

* * * * *

(5) *Recordkeeping.* All loans, lines of credit, or letters of credit, that meet the definition of Section 701.21(h)(1)(i), shall be separately identified in the records of the credit union and reported as such in financial and statistical reports required by the National Credit Union Administration.

* * * * *

PART 722—APPRAISALS

5. The authority citation for Part 722 continues to read as follows:

Authority: 12 U.S.C. 1766, 1789 and Pub. L. No. 101–73.

6. It is proposed that § 722.3 be amended by revising paragraphs (a)(1) and (d) as follows:

§ 722.3 Appraisals not required; transactions requiring a State-certified or -licensed appraiser.

(a) *Appraisals not required.* An appraisal performed by a state-certified or -licensed appraiser is not required for any real estate-related financial transaction in which:

(1) The transaction value is $100,000 or less;

* * * * *

(d) *Valuation requirement.* Secured transactions exempted from appraisal requirement pursuant to paragraph (a)(1) of this section (transactions of $100,000 or less) and not otherwise exempted from this regulation shall be supported by a written estimate of market value, as defined in this regulation, performed by an individual having no direct or indirect interest in the property, and qualified and experienced to perform such estimates of value for the type and amount of credit being considered.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 93–NM–23–AD]

Airworthiness Directives; British Aerospace Model BAe 146 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain British Aerospace Model BAe 146 series airplanes. This proposal would require inspection of the autopilot pitch servomotor mounting to ensure that foul pins and the corresponding foul pin holes are aligned properly, and corrective action, if necessary. This proposal is prompted by reports that incorrect autopilot pitch servomotor mountings and mounting brackets may have been installed on Model BAe 146 series airplanes. The actions specified by the proposed AD are intended to prevent adverse airplane

VOL 58 ISS 78 AP 26 1993 UMI

flight characteristics during autopilot operation.

DATES: Comments must be received by June 21, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 93-NM-23-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from British Aerospace, Inc., Avro Division, 22070 Broderick Drive, Sterling, Virginia 20166. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: William Schroeder, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 93-NM-23-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 93-NM-23-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain British Aerospace Model BAe 146 series airplanes. The CAA advises that incorrect autopilot pitch servomotor mountings and mounting brackets may have been installed during production of certain British Aerospace Model BAe 146 series airplanes. Investigation into this problem revealed that the foul pin holes may have been positioned incorrectly on the mounting brackets. Consequently, the corresponding foul pins on the pitch servomotor mounting may have been reset to match the incorrect hole pattern in the mounting bracket. This condition, if not corrected, could result in adverse airplane flight characteristics during autopilot operation.

British Aerospace has issued BAe 146 Inspection Service Bulletin S.B. 27-135, dated April 23, 1992, that describes procedures for a visual inspection of certain autopilot pitch servomotor mountings and brackets to ensure that the foul pins and the corresponding foul pin holes are aligned properly. This service bulletin also describes procedures for a torque check of the autopilot pitch servomotor mounting, if the foul pins and the corresponding foul pin holes do not align properly. For certain other autopilot pitch servomotor mountings and brackets, this service bulletin describes procedures for removal, modification, and installation of a specific autopilot servomotor and mounting. The CAA classified this service bulletin as mandatory in order to assure the continued airworthiness of these airplanes in the United Kingdom.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require inspection of the autopilot pitch servomotor mounting to ensure that foul pins and the corresponding foul pin holes are aligned properly, and corrective action, if necessary. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 1 airplane of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $55. This total cost figure assumes that the proposed requirements of this AD action have not yet been accomplished by the affected operator.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace: Docket 93-NM-23-AD.

Applicability: Model BAe 146 airplanes, as listed in British Aerospace BAe 146 Inspection Service Bulletin S.B. 27-135, dated April 23, 1992, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent adverse airplane flight characteristics during autopilot operation, accomplish the following:

(a) Within 60 days after the effective date of this AD, perform a visual inspection of the autopilot pitch servomotor mounting to identify the part number on the dataplate in accordance with British Aerospace BAe 146 Inspection Service Bulletin S.B. 27-135, dated April 23, 1992.

(b) If the part number is 209RAA6-135CAF (for Model BAe 146-100A and -200A series airplanes) or 209RAA6-175ABC (for Model BAe 146-300A series airplanes), prior to further flight, perform a visual inspection of the position of the foul pin holes in the mounting bracket in accordance with British Aerospace BAe 146 Inspection Service Bulletin S.B. 27-135, dated April 23, 1992.

(1) If the foul pin holes align with foul pin hole positions "CAF" (for Model BAe 146-100A and -200A series airplanes) or "ABC" (for Model BAe 146-300A series airplanes) on the mounting bracket, no further action is required by this AD.

(2) If the foul pin holes do not align with foul pin hole positions "CAF" (for Model BAe 146-100A and -200A) or "ABC" (for Model BAe 146-300A series airplanes) on the mounting bracket, accomplish the requirements of paragraphs (b)(2)(i) and (b)(2)(ii) of this AD.

(i) Prior to further flight, perform a torque check of the autopilot pitch servomotor mounting in accordance with the service bulletin to ensure that the slip torque corresponds to the values specified in the service bulletin. If the autopilot pitch servomotor mounting slip torque does not correspond to the values specified in the service bulletin, prior to further flight, remove the autopilot pitch servomotor mounting and install a serviceable autopilot pitch servomotor mounting having the correct slip torque in accordance with the service bulletin.

(ii) Within 12 months after the effective date of this AD, modify the mounting bracket and reposition the foul pins on the servomotor mounting in accordance with the service bulletin.

(c) If the part number is not 209RAA6-135CAF (for Model BAe 146-100A and -200A series airplanes) or 209RAA6-175ABC (for Model BAe 146-300A series airplanes), prior to further flight, remove the autopilot pitch servomotor and servomotor mounting, modify the mounting bracket, and install an autopilot pitch servomotor and servomotor mounting having part number 209RAA6-135CAF (for Model BAe 146-100A and -200A series airplanes) or 209RAA6-175ABC (for Model BAe 146-300A series airplanes), in accordance with British Aerospace BAe 146 Inspection Service Bulletin S.B. 27-135, dated April 23, 1992.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM-113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Standardization Branch, ANM-113.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on April 20, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

14 CFR Part 39

[Docket No. 92-CE-23-AD]

Airworthiness Directives; British Aerospace, Regional Aircraft Limited, Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking (NPRM); Reopening of comment period.

SUMMARY: This notice revises an earlier proposed airworthiness directive (AD), which would apply to certain British Aerospace (BAe), Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. The previous document proposed inspecting the locking mechanism for existence of a tapering pin, and installing a pin if nonexistent. Installation of a passenger door on one of the affected airplanes revealed that the tapering pin was missing. Since the initial proposal, the manufacturer has revised the service bulletin to correct the serial numbers of certain doors. This document incorporates these serial numbers into the proposed AD. The actions specified by this AD are intended to prevent the inability to open the passenger/crew door, which could result in passenger injury if emergency evacuation was needed.

DATES: Comments must be received on or before July 9, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-23-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Jetstream Aircraft, Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44-292) 79888; Facsimile (44-292) 79703; or Jetstream Aircraft, Inc., Librarian, P.O. Box 16029, Dulles International Airport, Washington, DC 20041-6029; Telephone (703) 406-1161; Facsimile (703) 406-1469. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Mr. Raymond A. Stoer, Program Officer, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium; Telephone (322) 513.38.30 ext. 2710; Facsimile (322) 230.68.99; or Mr. John P. Dow, Sr., Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64106; Telephone (816) 426-6932; Facsimile (816) 426-2169.

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before

VOL
58
ISS
78
AP
26
19 93
UMI

and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket 92–CE–23–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92–CE–23–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain BAe, Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. The CAA reported that a missing taper pin on the locking mechanism of a passenger/crew door on one of the affected airplanes was discovered during installation of the door. The absence of a locking mechanism taper pin could result in the inability to open the passenger/crew door and possible passenger injury if emergency evacuation was needed.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA kept the FAA informed of the situation described above. The FAA examined the findings of the CAA, reviewed all available information, and then determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

The FAA proposed to amend the Federal Aviation Regulations to include an AD that would apply to certain BAe, Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes by publishing a notice of proposed rulemaking (NPRM) in the **Federal Register** on May 26, 1992 (57 FR 21911). The action proposed inspecting the locking mechanism for existence of a tapering pin, and installing a pin if nonexistent. The proposed actions would have been accomplished in accordance with BAe Service Bulletin (SB) 52–A–JA 911140, dated February 3, 1992.

Interested persons were afforded an opportunity to participate in the making of this amendment. No comments were received concerning the proposed rule or the FAA's determination of the cost to the public.

Since the issuance of the proposal, BAe has revised SB 52–A–JA 911140 twice to (1) correct the serial numbers of certain doors; and (2) remove the diagram that shows the locking dog in the unlocked position because it was incorrectly drawn, and delete unlocked position dimensions. These service bulletin revisions do not increase the scope of work or cost over that which was originally proposed; however, they do correct the applicability to include airplanes with different serial numbered passenger doors than that which was originally proposed.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that (1) the previously proposed AD action is still valid; (2) the serial numbers of the passenger doors should be corrected to reflect those in the revised service information; and (3) additional AD action should be proposed to prevent the inability to open the passenger/crew door, which could result in passenger injury if emergency evacuation was needed.

Since Revision 2 of BAe SB 52–A–JA 911140 specifies corrected serial numbers that were not originally included in the proposed AD, the notice has been revised accordingly and the comment period has been reopened to provide additional time for public comment.

The FAA estimates that 68 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 2 workhours per airplane to accomplish the proposed inspection, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $7,480.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

British Aerospace, Regional Aircraft Limited: Docket No. 92–CE–23–AD.

Applicability: Jetstream Models 3101 and 3201 airplanes (all serial numbers), certificated in any category, that have a main passenger/crew door installed with one of the following serial numbers: WIPL–SD–001 through WIPL–SD–006, WIPL–SD–008 through WIPL–SD–032, WIPL–SD–034 through WIPL–SD–038, WIPL–SD–0039 through WIPL–SD–0046, WIPL–SD–0049, WIPL–SD–0051 through WIPL–SD–0065, WIPL–SD–0067, WIPL–SD–0070, WIPL–SD–0071, SDJ10883, SDJ10884A, SDJ10884B, and SDJ10886 through SDJ10891.

Compliance: Required within the next 500 hours time-in-service after the effective date of this AD, unless already accomplished (see paragraph (c) of this AD).

To prevent the inability to open the passenger/crew door, which could result in passenger injury if emergency evacuation was needed, accomplish the following:

(a) Visually inspect the passenger/crew door locking mechanism in the area between the locking dog and indicator button assembly in accordance with Part 2 of the ACCOMPLISHMENT INSTRUCTIONS section of British Aerospace (BAe) Service Bulletin (SB) 52–A–JA 911140, Revision 2, dated October 6, 1992, to ensure that a taper pin (part number SP28E4) is installed.

(b) If a taper pin (part number SP28E4) is not installed, prior to further flight, accomplish Part 3 of the ACCOMPLISHMENT INSTRUCTIONS section of BAE SB 52–A–JA 911140, Revision 1, dated June 26, 1992.

(c) Accomplishing the actions specified in paragraphs (a) and (b) of this AD in accordance with the ACCOMPLISHMENT INSTRUCTIONS section of BAe SB 52–A–JA 911140, dated February 3, 1992, or BAe SB 52–A–JA 911140, Revision 1, dated June 26, 1992, is considered equal to the "unless already accomplished" statement in the Compliance section of this AD.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Brussels Aircraft Certification Office.

(f) All persons affected by this directive may obtain copies of the document referred to herein upon request to British Aerospace, Regional Aircraft Limited, Manager Product Support, Airlines Division, Prestwick Airport, Ayrshire, KA9 2RW Scotland; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041. This document may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on April 19, 1993.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92–NM–218–AD]

Airworthiness Directives; Aerospatiale Model ATR72–100 and –200 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Aerospatiale Model ATR72–100 and –200 series airplanes. This proposal would require replacement of certain main landing gear (MLG) side braces. This proposal is prompted by reports of corrosion on the MLG side braces on Model ATR42 series airplanes. The actions specified by the proposed AD are intended to prevent collapse of the landing gear.

DATES: Comments must be received by June 21, 1993.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–218–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Gary Lium, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (206) 227–1112; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–218–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–218–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, recently notified the FAA that an unsafe condition may exist on certain Aerospatiale Model ATR72–100 and –200 series airplanes. The French DGAC advises that corrosion previously was found on the connecting ball bearings of the main landing gear (MLG) side braces on certain Model ATR42 series airplanes. Further investigation into the cause of this corrosion indicated that the cadmium plating on the ball bearings was inadequate to inhibit the propagation of corrosion. The FAA previously issued AD 91–08–10, Amendment 39–6953 (56 FR 14462, April 10, 1991), to address corrosion on the MLG side braces on Model ATR42 series airplanes.

Since the landing gear side braces on the Model ATR72–100 and –200 series airplanes are similar in design to those installed on Model ATR42 series airplanes, corrosion may also occur on the side braces of these airplanes. (However, there have been no in-service reports of corrosion on side braces of Model ATR72 series airplanes.) Corrosion on MLG side braces, if not detected and corrected, could cause the side braces to fail, which could result in the collapse of the landing gear.

Aerospatiale has issued Service Bulletin ATR72–32–1011, dated August 7, 1992, that describes procedures for replacement of certain part-numbered MLG side braces (having unprotected ball bearings) with modified or repaired MLG side braces. The modification entails cadmium plating the ball cages of the MLG side braces and replacing one of the peripheral stakes with a machined lip. The repaired or modified side braces have been designated with a new part number. The French DGAC classified this service bulletin as mandatory and issued Airworthiness Directive 92–135–015(B), dated June 24,

VOL 58 ISS 78 AP 26 1993 UMI

1992, in order to assure the continued airworthiness of these airplanes in France.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the French DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the French DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require replacement of the MLG side braces with repaired or modified MLG side braces. The actions would be required to be accomplished in accordance with the service bulletin described previously.

The FAA estimates that 10 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 4 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would be provided at no cost to the operators. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $2,200, or $220 per airplane. This total cost figure assumes that no operator has yet accomplished the proposed requirements of this AD action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. App. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Aerospatiale: Docket 92-NM-218-AD.

Applicability: Model ATR72-100 and -200 series airplanes, equipped with main landing gear (MLG) side braces having part number (P/N) D23207000 or D23207000-1, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent collapse of the landing gear, accomplish the following:

(a) Prior to the accumulation of 7,500 landings on the MLG side brace or within the next 100 landings after the effective date of this AD, whichever occurs later, replace any side brace having P/N D23207000 or D23207000-1 with a repaired or modified side brace having P/N D23207000-2, in accordance with Aerospatiale Service Bulletin ATR72-32-1011, dated August 7, 1992.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Standardization Branch, ANM-113.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Manager, Standardization Branch, ANM-113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on April 20, 1993.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Management and Disposition of HUD-Owned Multifamily Projects and Certain Multifamily Projects Subject to HUD-Held Mortgages—Preliminary Regulatory Impact Analysis

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice of preliminary regulatory impact analysis.

SUMMARY: This document requests public comment on a Preliminary Regulatory Impact Analysis that the Department of Housing and Urban Development has prepared for its proposed rule amending the Department's current multifamily property disposition regulations, which was published on August 6, 1992 (57 FR 34834).

DATES: Comment due date: May 26, 1993.

ADDRESSES: Interested persons are invited to submit comments on the Preliminary Regulatory Impact Analysis of the Office of the General Counsel, Rules Docket Clerk, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410-0500. Comments should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

FOR FURTHER INFORMATION CONTACT: Steven J. Hans, Office of Multifamily Property Disposition, Department of Housing and Urban Development, room 6282, 451 Seventh St. SW., Washington, DC 20410-8000. Telephone (202) 708-3343; TDD (202) 708-4594. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: On August 6, 1992, HUD published a proposed rule

in the **Federal Register** (57 FR 34834) seeking public comment on a rule amending the Department's multifamily property disposition regulations at 24 CFR part 290. Part 290 implements HUD's statutory authority, contained in section 207(k) and (l) of the National Housing Act and in section 203 of the Housing and Community Development Amendments of 1978, to handle and dispose of such real property. The rule would incorporate several statutory amendments to section 203 that specify the type of assistance to be provided when the Department determines to preserve units as affordable low- and moderate-income housing, and include certain projects with HUD-held mortgages within the scope of section 203. In addition, the rule would also cover rental housing projects that are subject to HUD-held mortgages that are either delinquent, under workout agreement, or being foreclosed upon.

In the preamble to the proposed rule, HUD advised that it would prepare and publish a preliminary regulatory impact analysis on the economic impact of the rule, in accordance with Executive Order 12291. Under this order, a regulatory agency must determine whether a new regulation is a "major" rule and, if so, must conduct a regulatory impact analysis. A major rule is defined as one that is likely to result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individuals, industries, Federal, State or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Today's notice publishes for public comment HUD's Preliminary Regulatory Impact Analysis on the economic impact of the proposed rule.

Dated: March 19, 1993.

James E. Schoenberger,

Associate General Deputy Assistant Secretary for Housing.

Regulatory Impact Analysis of Proposed Rule for the Management and Disposition of HUD-Owned Multifamily Projects and Certain Multifamily Projects Subject to HUD-Held Mortgages

I. Introduction

On August 6, 1992 (57 FR 34834), the Department of Housing and Urban Development published a proposed rule for the management and disposition of HUD-owned multifamily projects and certain multifamily projects subject to HUD-held mortgages. This analysis discusses the economic impact that may be expected to result from that rule. The discussion focuses on the economic impact resulting from (1) statutorily mandated changes and (2) primarily regulatory changes.

Section 203 of the Housing and Community Development Amendments of 1978 (12 U.S.C. 1701z-1711), which is the main statutory basis for the proposed rule, was substantially revised by section 181 of the Housing and Community Development Act of 1987 (1987 Act), which was enacted on February 5, 1988. Two changes mandated by that amendment are the subject of this analysis: (1) The expansion of coverage of section 203 to include multifamily rental housing projects subject to a mortgage held by HUD that is either delinquent, under workout agreement, or being foreclosed upon by HUD; and (2) the requirement that units of local government and State housing finance agencies be given the right of first refusal to purchase a HUD-owned project on terms specified in the disposition program or on other items that will further preservation objectives.

The regulatory changes that may result in an economic impact are: (1) The limited circumstances in which HUD may appropriately determine to dispose of a HUD-owned rental housing project, or to foreclose a HUD-held mortgage on a rental housing project, without ensuring its continued availability as affordable rental or cooperative housing for low- and moderate-income families; (2) the requirement for development of foreclosure packages; and (3) the requirement for tenant notification of pending foreclosure of HUD-held mortgages.

II. Statutorily Mandated Changes

1. Extension of Section 203 requirements for management and disposal of HUD owned properties to multifamily housing projects that are subject to a mortgage held by HUD that is either delinquent, under workout agreement, or being foreclosed upon by HUD. The guidelines for providing financial assistance when units are to be preserved as affordable rental or cooperative housing for low- and moderate-income families are at 24 CFR 290.105(f) of the proposed rule.

The intent of the Congress in extending these requirements to projects in the HUD foreclosure process was to maintain the supply of low- and moderate-income housing as well as to prevent the displacement of low- and moderate-income families when the federal government becomes involved with the resolution of troubled, unsubsidized housing projects with low- and moderate-income tenants (families whose income is below 80 percent of area median income). For the purpose of maintaining the subsidized status of specific housing projects, project-based Section 8 subsidies are more effective than certificates or vouchers.

Before the legislative changes, HUD purchased subsidized projects at foreclosure [1] and re-sold them with 100 percent project based Section 8. When unsubsidized projects were sold to third parties at foreclosure sale, HUD gave 5-year certificates to very low-income tenants—families with incomes below 50 percent of area median income (AMI). Between 5 and 10 percent of tenants in these projects received Section 8 certificates, even though the number of tenants with income below 50 percent of AMI was probably higher. Some would have been unqualified for Section 8 (e.g., single-person households), and others would have failed to respond to the opportunity to receive it. A recent study found that about 22 percent of tenants in unsubsidized projects have very low incomes (see Draft Report, U.S. Department of Housing and Urban Development, Capital Needs Assessment: Multifamily Rental Housing with HUD- Insured (or Held) Mortgagees, 1992). Following the legislative changes, HUD gave 15-year project-based Section 8 assistance for all units in unsubsidized projects occupied by low- and moderate-income families (families with incomes below 80 percent of AMI). The study referenced above found that a total of 59 percent of tenants in unsubsidized housing projects have low and moderate incomes. Assuming that the proportion of those actually assisted remains the same, it is estimated that between 13 percent and 27 percent of tenants would receive project-based Section 8 assistance.

Benefits. The benefits of this provision are in the form of income transfers to the families living in distressed, unsubsidized projects who are provided rental assistance because of this program. The rental assistance will allow improvements in low- and moderate-income tenants' living conditions, due to rehabilitation of these newly-subsidized projects, without

[1] At foreclosure auction of subsidized projects, HUD would bid the level of outstanding debt which was virtually always the high bid.

UMI

increases (and perhaps with decreases) in their monthly housing expenses.

Costs. The cost of this provision is in terms of the increased transfer payment outlays of HUD subsidies. Unit cost estimates are based on fiscal year 1993 budget projections. For estimation purposes, it is assumed that all start-of-year cases are taken to foreclosure and that 50 percent of projects taken to foreclosure are sold to third parties.

It is estimated that 95 unsubsidized projects containing a total of 15,295 units would be sold to third parties at foreclosure sales under these assumptions. Subsidy costs for project-based Section 8 and vouchers are estimated to be $6,508 per unit per year. Under former practice (before the legislative changes), 5 to 10 percent of households in these units would be given 5-year Section 8 vouchers resulting in a yearly expenditure of $5.0 million to $10.0 million for an undiscounted 5-year expenditure of $24.9 million to $49.8 million in budget authority. Under the amended statute and proposed rule, 13 to 27 percent of these units would be assisted. This increases yearly subsidy outlays to $12.9 to $26.9 million for a total 15-year undiscounted expenditure of $147.8 to $306.9 million. Therefore, the new law and rule is estimated to increase HUD outlays for these 95 projects by $7.9 to $16.9 million in contract authority and $122.9 to $257.1 million in budget authority.

2. Requirement to give units of local government and State housing finance agencies the right of first refusal to purchase a HUD-owned project on the terms specified in the disposition program, or on other terms that will further preservation objectives. The provisions implementing this requirement are at 24 CFR 290.109 of the proposed rule.

The intent of Congress in this change is to provide opportunities for State housing finance agencies (SHFAs) and local governments to acquire HUD-owned rental housing projects.

Benefits. The benefits of this provision are the larger numbers of low- and moderate-income units that SHFAs and local governments will be able to acquire and make available for low- and moderate-income use for longer periods than private buyers (e.g., 20 years vs. 15 years).

Costs. Costs of the right-of-first-refusal (RFR) provisions arise from three sources: (1) Lower prices received by HUD for properties sold under RFR; (2) delays caused by the RFR process, and (3) possible downward price bias when SHFAs and local governments reject HUD offers during the RFR process.

Based on FY 1992 experience, HUD lost $549,561 on RFR sales of 364 units, for an average of about $1,510 per unit, compared to selling the same units at the average competitive market price. The RFR process requires a 90-day waiting period after a SHFA or local government expresses interest in an RFR purchase. In FY 1992, this waiting period resulted in additional holding costs of $3.2 million.

As part of the RFR process, HUD is required to make public an estimated price offer to the SHFA or local government potentially purchasing under an RFR agreement. If the SHFA or local government rejects the RFR offer, the announced offer price serves as a benchmark for the eventual competitive bidding. This may cause downward biases in the competitive market bids. The losses due to this effect have not been quantified but could be considerable.

In FY 1992, 14 projects were sold for a total of $22,168,460 under competitive bid after being rejected by SHFAs or local governments under RFR and after HUD estimated values had been announced. If the announcement of the HUD price depressed market bids by just 5 percent, then HUD lost $1.1 million due to this aspect of the RFR requirements.

HUD would prefer to deal with SHFAs and local governments expressing interest in purchasing HUD-controlled distressed projects on a private-negotiation basis so that these biases are not introduced into the competitive bidding process. However, the open form of the RFR process is required by law.

III Regulatory Changes

1. The limited circumstances in which HUD may appropriately determine to dispose of a HUD-owned rental housing project, or to foreclose a HUD-held mortgage on a rental housing project, without ensuring its continued availability as affordable rental or cooperative housing for low- and moderate-income families. These circumstances are identified in 24 CFR 290.105(d) of the proposed rule.

This provision implements section 579(b) of the National Affordable Housing Act, which amended section 203. When sufficient low- and moderate-income housing is available in a market, HUD may deem it unnecessary to preserve affordable units involved in a disposition. Instead, qualified low- and moderate-income tenants would be given 5-year Section 8 vouchers.

Benefits. This provision generates benefits for tenants and for HUD. For FY 1993, it is estimated that non-preservation under this rule will save HUD $107 million in subsidy outlays by substituting 5-year vouchers or certificates for 15-year project-based Section 8 contracts in these cases. Further, competitive sales will bring higher prices when no affordability restrictions are placed on these projects.

Low- and moderate-income tenants will benefit from the wider array of housing choices they have under the certificate or voucher programs that would be unavailable to them under a preservation contract.

Costs. Primarily, the costs of this rule are in the form of risk, and are borne by project owners who participate in the non-preservation program. Non-preserved projects no longer have a guaranteed income stream. Since non-preservation will only occur in "loose" low- and moderate-income housing markets, these owners face the risk of revenue losses due to the departure of certificate- or voucher-holding tenants paying the fair-market rent (FMR). In loose markets, subsidized tenants may only be replaceable by unsubsidized tenants willing and able to pay something less than the FMR.

In addition, tenants who choose to move because they are participants in the certificate or voucher program may incur relocation costs. However, any such costs are incurred only because of the increased choices available to tenants, which would be unavailable under a preservation contract.

2. Development of foreclosure packages. This provision is at 24 CFR 290.103 of the proposed rule.

The foreclosure package includes expense and rent analyses, repair estimates, tenants' input, and Section 8 needs estimates. The development of formal foreclosure packages facilitates the statutory goal of preserving units for low- and moderate-income residents while promoting HUD's objective of selling the maximum number of projects at competitive foreclosure sales. Under this provision, this analysis will be prepared prior to foreclosure sale.

Benefits. The foreclosure package permits HUD to establish a realistic sales price for a project based on a standardized pricing procedure and taking into account statutory restrictions. The standardization of the foreclosure package provides the market with a consistent means of evaluating properties which HUD is selling.

Costs. Since more foreclosure analyses will be performed, a major cost of this regulatory change is increased staff time. There is no estimate currently available for this cost. Another cost arises from the delay that assembly of the foreclosure package causes in the foreclosure process. There currently is no estimate for the level of these costs.

3. Notification to tenants of pending foreclosure of HUD-held mortgages. This provision is at 24 CFR 290.100.

To further HUD's homeownership goals as well as assure timely disposition of foreclosed property, a single tenant notification of a foreclosure sale is made.

Benefits. Tenant notification increases the efficiency of the sales process by providing early input on potential interest or lack of interest by tenants in acquisition of a project.

Costs. Costs of tenant notification are limited to preparation and postal delivery costs of written notices, as well as posting notices in public area where required. There are no estimates of this cost available.

Petroleum Tax Imposed on Natural Gasoline

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains a proposed regulation relating to the taxes imposed on natural gasoline under section 4611 of the Internal Revenue Code. The proposed regulation reflects changes to the law made by the Hazardous Substance Response Revenue Act of 1980 and the Superfund Revenue Act of 1986 and affects producers of natural gasoline.

DATES: Written comments and requests for a public hearing must be received by June 25, 1993.

ADDRESSES: Send comments and requests for a public hearing to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044 (Attn: CC:CORP:T:R (PS-158-86), room 5228). In the alternative, comments and requests may be hand delivered to: CC:CORP:T:R (PS-158-86), Internal Revenue Service, room 5228, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Ruth Hoffman, (202) 622-3130 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Under section 4611 of the Internal Revenue Code, tax is imposed on crude oil received at a United States refinery. Section 4612(a)(1) provides that, for purposes of section 4611, the term "crude oil" includes natural gasoline. Section 4612(a)(5) provides that a United States refinery is any facility in the United States at which crude oil, including natural gasoline, is refined. Thus, any facility in the United States that produces natural gasoline is a United States refinery, even though the production of natural gasoline is not considered "refining" in the traditional sense of that term.

Under section 4612(a)(6), the natural gasoline produced at a United States refinery is treated as received at that refinery at the time the natural gasoline is produced. Generally, natural gasoline is produced by the fractionation of natural gas liquids.

To reflect these statutory provisions, the proposed regulation provides that any facility that produces natural gasoline by fractionation or similar operation is treated as a United States refinery. This provision does not represent a change in the Treasury Department's interpretation of sections 4611 and 4612.

Special Analyses

It has been determined that these proposed rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to those regulations and, therefore, an Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, these regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be scheduled and held upon written request by any person who submits timely written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Ruth Hoffman, Office of Assistant Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 52

Chemicals, Excise taxes, Petroleum.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 52 is proposed to be amended as follows:

PART 52—ENVIRONMENTAL TAXES

Paragraph 1. The authority citation for part 52 continues to read in part as follows:

Authority: 26 U.S.C. 7805 • • •

Par. 2. Section 52.4612-1 is added to read as follows:

§ 52.4612-1 United States refinery.

(a) *In general.* For purposes of the tax imposed by section 4611(a)(1), a United States refinery includes any facility in the United States at which natural gasoline is produced by fractionation or similar operation.

(b) *Effective date.* This section is effective as of April 26, 1993.

Michael P. Dolan,

Acting Commissioner of Internal Revenue.

BILLING CODE 4830-01-U

DEPARTMENT OF JUSTICE

28 CFR Part 16

[AAG/A Order No. 75-93]

Exemption of Records System Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Proposed rule.

SUMMARY: The Department of Justice proposes to exempt a system of records from subsections (c)(3) and (4); (d); (e)(1), (2), and (3); (e)(4)(I); (e)(5) and (8); and (g) of the Privacy Act, 5 U.S.C. 552a. This system of records is the "National Drug Intelligence Center Data Base (JUSTICE/NDIC-001)." Information in this system relates to the mission of the National Drug Intelligence Center (NDIC), as set forth in section 9078 of Public Law 102-396, to coordinate and consolidate drug intelligence from all

VOL 58 ISS 78 AP 26 1993 UMI

national security and law enforcement agencies and to produce information regarding the structure, membership, finances, communications, and activities of drug trafficking organizations and their memberships. The exemptions are necessary to avoid interference with the law enforcement-related functions of NDIC and of those agencies that provide information to, or receive information from, NDIC. Specifically, the exemptions are necessary to preserve the safety of law enforcement personnel and of confidential informants and other witnesses, to prevent disclosure of investigative techniques, to prevent persons suspected of illegal activities related to narcotic trafficking from frustrating law enforcement activities (for example, by flight or destruction of evidence), and to protect the privacy of third parties. The exemptions may also be necessary, in some cases, to safeguard information properly classified, pursuant to Executive Order, in the interest of national defense or foreign policy.

DATES: Submit any comments by May 26, 1993.

ADDRESSES: Address all comments to Patricia E. Neely, Staff Assistant, Systems Policy Staff, Information Resources Management, Justice Management Division; Room 850, Washington Center Building; Department of Justice, Washington, DC 20530.

FOR FURTHER INFORMATION CONTACT: Patricia E. Neely, (202) 616–0178.

SUPPLEMENTARY INFORMATION: In the Notice Section of today's **Federal Register**, the Department of Justice provides a description of the "National Drug Intelligence Center Data Base, JUSTICE/NDIC-001."

This Order relates to individuals rather than small businesses. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, it is hereby stated that the Order will not have "a significant impact on a substantial number of small entities."

List of Subjects in Part 16

Administrative Practices and Procedure, Courts, Freedom of Information Act, Privacy Act and Government in the Sunshine Act.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793–78, it is proposed to amend 28 CFR part 16 by adding a new section, § 16.82, as set forth below.

Dated: April 16, 1993.

Stephen R. Colgate,

Assistant Attorney General for Administration.

1. The authority for part 16 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b(g), 553; 18 U.S.C. 4203(a)(1); 28 U.S.C. 509, 510, 534; 31 U.S.C. 3717, 9701.

2. It is proposed to amend 28 CFR part 16 by adding § 16.82 to read as follows:

§ 16.82 Exemption of the National Drug Intelligence Center Data Base—Limited Access

(a) The following system of records is exempted pursuant to the provisions of 5 U.S.C. 552a(j)(2) from subsections (c)(3) and (4); (d); (e)(1), (2), and (3); (e)(4)(I); (e)(5) and (8); and (g) of 5 U.S.C. 552a. In addition, the following system of records is exempted pursuant to the provisions of 5 U.S.C. 552a (k)(1) and (k)(2) from subsections (c)(3), (d), and (e)(1) and (e)(4)(I) of 5 U.S.C. 552a:

(1) National Drug Intelligence Center Data Base (JUSTICE/NDIC–001).

(b) These exemptions apply only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a (j)(2), (k)(1), and (k)(2). Where compliance would not appear to interfere with or adversely affect the law enforcement process, and/or where it may be appropriate to permit individuals to contest the accuracy of the information collected, e.g., public source materials, the applicable exemption may be waived, either partially or totally, by the National Drug Intelligence Center (NDIC). Exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) for the same reasons that the system is exempted from the provisions of subsection (d).

(2) From subsection (c)(4) because this system is exempt from the access provisions of subsection (d) pursuant to subsection (j)(2) of the Privacy Act.

(3) From subsection (d) because disclosure to the subject could alert the subject of an investigation pertaining to narcotic trafficking or related activity of the fact and nature of the investigation, and/or of the investigative interest of NDIC and other intelligence or law enforcement agencies (including those responsible for civil proceedings related to laws against drug trafficking); lead to the destruction of evidence, improper influencing of witnesses, fabrication of testimony, and/or flight of the subject; reveal the details of a sensitive investigative or intelligence technique, or the identity of a confidential source; or otherwise impede, compromise, or interfere with investigative efforts and other related law enforcement and/or intelligence activities. In addition, disclosure could invade the privacy of third parties and/or endanger the life and safety of law enforcement personnel, confidential informants, witnesses, and potential crime victims. Finally, access to records could result in the release of properly classified information that could compromise the national defense or foreign policy. Amendment of the records would interfere with ongoing investigations and law enforcement activities and impose an impossible administrative burden by requiring investigations, analyses, and reports to be continuously reinvestigated and revised.

(4) From subsection (e)(1) because, in the course of its acquisition, collation, and analysis of information, NDIC will need to retain information not immediately shown to be relevant to counterdrug law enforcement to establish patterns of activity and to assist other agencies charged with the enforcement of laws and regulations regarding drug trafficking and charged with the acquisition of intelligence related to international aspects of drug trafficking. This consideration applies equally to information acquired from, or collated or analyzed for, both law enforcement agencies and agencies of the U.S. foreign intelligence community.

(5) From subsection (e)(2) because application of this provision could present a serious impediment to law enforcement in that it would put the subject of an investigation, study or analysis on notice of the fact of such investigation, study, or analysis, thereby permitting the subject to engage in conduct intended to frustrate the activity; because, in some circumstances, the subject of an investigation may not be required to provide to investigators certain information; and because thorough analysis and investigation may require seeking information from a number of different sources.

(6) From subsection (e)(3) (to the extent applicable) because the requirement that individuals supplying information be provided a form stating the requirements of subsection (e)(3) would constitute a serious impediment to law enforcement in that it could compromise the existence of a confidential investigation and reveal the identity of confidential informants and endanger their lives and safety.

(7) From subsection (e)(4)(I), to the extent that this subsection is interpreted to require more detail regarding the record sources in this system than have been published in the **Federal Register.** Should the subsection be so interpreted,

exemption from this provision is necessary to protect the confidentiality of the sources of criminal and other law enforcement information and to protect the privacy and physical safety of witnesses and informants. Furthermore, greater specificity concerning the sources of properly classified records could compromise national defense or foreign policy.

(8) From subsection (e)(5) because the acquisition, collation and analysis of information for law enforcement purposes does not permit advance determination whether such information is accurate or relevant, nor can such information be limited to that which is complete or apparently timely. Information of this type often requires further analysis and investigation to develop into a comprehensive whole that which is otherwise incomplete or even fragmentary. Moreover, its accuracy is continually subject to analysis and review, and, upon careful examination, seemingly irrelevant or untimely information may acquire added significance as additional information brings new details to light. The restrictions imposed by subsection (e)(5) would restrict the ability of trained investigators and intelligence analysts to exercise their judgment in collating and analyzing information and would impede the development of criminal intelligence necessary for effective law enforcement.

(9) From subsection (e)(8) because the individual notice requirements of subsection (e)(8) could present a serious impediment to law enforcement by revealing investigative techniques, procedures, or evidence.

(10) From subsection (g) to the extent that the system is exempt from subsection (d).

BILLING CODE 4410–02–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 938

Pennsylvania Abandoned Mine Lands Reclamation Plan

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule; reopening and extension of public comment period.

SUMMARY: OSM is reopening and extending the public comment period on a proposed amendment to the Pennsylvania permanent regulatory program (hereinafter referred to as the Pennsylvania program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The proposed amendment provides for changes to the approved Pennsylvania Plan to allow for the initiation of a State administered emergency reclamation program.

This document sets forth the times and locations that the Pennsylvania plan and the proposed amendment to that plan are available for public inspection, the comment period during which interested persons may submit written comments on the amendment and the procedures that will be followed regarding the public hearing, if one is requested.

DATES: Written comments must be received on or before 4 p.m. on May 22, 1993, to ensure consideration in the rulemaking process. If requested, a public hearing on the amendment will be held at 9 a.m. on May 11, 1993. Requests to present testimony at the hearing must be received on or before 4 p.m. on May 10, 1993.

ADDRESSES: Written comments and requests to testify at the hearing should be mailed or hand delivered to Robert J. Biggi, Director, Harrisburg Field Office at the address listed below. Copies of the Pennsylvania plan, the proposed amendment, and all written comments received in response to this document will be available for public review at the addresses listed below during normal business hours, Monday through Friday, excluding holidays. Each requestor may receive, free of charge, one copy of the proposed amendment by contacting OSM's Harrisburg Field Office.

Office of Surface Mining Reclamation and Enforcement, Harrisburg Field Office, Harrisburg Transportation Center, Third Floor, suite 3C, 4th and Market Streets, Harrisburg, Pennsylvania 17101, Telephone: (717) 782–4036.

Pennsylvania Department of Environmental Resources, Bureau of Abandoned Mine Reclamation, P.O. Box 1467, Harrisburg, Pennsylvania 17105, Telephone: (717) 783–2156.

A public hearing, if held, will be at the Penn Harris Motor Inn and Convention Center at the Camp Hill Bypass and U.S. Routes 11 and 15, Camp Hill, Pennsylvania.

FOR FURTHER INFORMATION CONTACT: Robert J. Biggi, Director, Harrisburg Field Office, (717) 782–4036.

SUPPLEMENTARY INFORMATION:

I. Background on the Pennsylvania Program

The Secretary of the Interior approved the Pennsylvania plan effective July 31, 1982. Information on the background of the Pennsylvania plan including the Secretary's findings, and the disposition of comments can be found in the July 30, 1982, **Federal Register** (47 FR 33079). Effective October 30, 1992, the Pennsylvania Plan was amended to update existing policies and procedures, and to allow for the new initiatives provided under the Abandoned Mine Reclamation Act of 1990 (Public Law 101–508). The Secretary's findings and the disposition of comments relative to the Plan amendment can be found in the October 30, 1992 **Federal Register** (57 FR 49135–49138).

II. Discussion of the Proposed Amendment

By notice dated September 29, 1982, (47 FR 42729–42730), the Secretary extended an opportunity to the States and Tribes to amend their AML Reclamation Plans to allow for a self-administered emergency reclamation program. Until that time, projects declared an emergency pursuant to section 410 of the SMCRA had been administered solely by OSM. To ensure that State/Tribal reclamation plan amendments submitted in response to the notice were consistent and adequately addressed necessary program requirements, OSM established guidelines on March 7, 1983. These guidelines for submission of amendments to State reclamation plans to conduct emergency reclamation contain specific authorizations, policies, and procedures that should be addressed as part of the amendment request. In addition, the March 7, 1983 guidance also contains information on the administration of State emergency reclamation programs.

By letter dated December 30, 1992, the Pennsylvania Department of Environmental Resources (PADER) submitted to OSM a proposed amendment to revise the Pennsylvania Plan to assume responsibility for a State administered emergency reclamation program. The amendment, as submitted, proposes to add a new part F to the current Pennsylvania Plan. Part F is composed of six sections that address AML Reclamation Plan amendment requirements under 30 CFR 884.13. The following is a summary of each section under the new part F:

VOL 58 ISS 78 APR 26 1993 UMI

1. Governor's Designation of the Department of Environmental Resources

This section addressed the designation by the Governor of Pennsylvania that PADER is authorized to conduct the reclamation program.

2. The Legal Opinion Authorizing PADER to Administer the Emergency Program

PADER has submitted a revised legal opinion from the Assistant Counsel of the Bureau of Legal Services concerning its authorities for conducting an emergency program.

3. Policies and Procedures in Conducting the Emergency Program

This section of the amendment contains a discussion of the purpose of the emergency program, coordination activities with other State and Federal agencies, and procedures for entering onto private property and conducting lien evaluations. In addition, this section addresses the planning and design of emergency projects, the determination of site eligibility, and the participation of the public in the development of the amendment.

4. Administrative and Managerial Structure for the Emergency Program

This section of the amendment provides information on the structure and staffing of the emergency program, assistance to be provided by OSM during the period of transition from a Federal to a State administered program, and on the overall funding of the Pennsylvania emergency program. In addition, this section discusses the procurement and accounting systems to be used for emergency projects.

5. Emergency Problem Quantification

This section provides information on the types of emergencies and where they may occur in the State.

6. Emergency Program in Pennsylvania

This section provides a statement on the objectives of the overall reclamation program and the emergency program in Pennsylvania.

OSM published a notice announcing receipt of this amendment and the opening of the public comment period in the March 23, 1993, **Federal Register** (54 FR 15456). The public comment period was set to end on April 22, 1993. The public hearing was scheduled to be held at 9 a.m. on April 19, 1993. As a consequence of this reopening and extension, the public comment period will now end on May 22, 1993, and the public hearing is rescheduled for 9 a.m. on May 11, 1993.

III. Public Comment Procedures

OSM is reopening and extending the public comment period for Pennsylvania's proposed amendment due to the interest expressed in this amendment and for the sake of providing ample opportunity for all commenters to comment. In accordance with the provisions of 30 CFR 884.14, OSM is now seeking comments on whether the amendment proposed by Pennsylvania satisfies the applicable plan approval criteria of 30 CFR 884.13. If the amendment is deemed adequate, it will become part of the Pennsylvania Plan.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "**DATE**" or at locations other than the Harrisburg Field Office will not necessarily be considered in the final rulemaking or included in the Administrative Record.

Public Hearing

Persons wishing to comment at the public hearing should contact the person under "**FOR FURTHER INFORMATION CONTACT**" by 4 p.m. on May 10, 1993. If no one requests an opportunity to comment at a public hearing, the hearing will not be held.

Filing of a written statement at the time of the hearing is requested as it will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare adequate responses and appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment, and who wish to do so, will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

If only one person requests an opportunity to comment at a hearing, a public meeting, rather than a public hearing, may be held.

Persons wishing to meet with OSM representatives to discuss the proposed amendments may request a meeting at the Harrisburg Field Office by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**" All such meetings will be open to the public and, if possible, notices of meetings will be posted at the locations listed under "**ADDRESSES.**" A written summary of each meeting will be made part of the Administrative Record.

IV Procedural Determinations

Executive Order 12291

On March 30, 1992, the Office of Management and Budget (OMB) granted the Office of Surface Mining Reclamation and Enforcement (OSM) an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions related to approval or disapproval of State and tribal abandoned mine land reclamation plans and revisions thereof. Therefore, preparation of a regulatory impact analysis is not necessary and OMB regulatory review is not required.

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State and Tribal abandoned mine land reclamation plans and revisions thereof since each such plan is drafted and adopted by a specific State or Tribe, not by OSM. Decisions on proposed State and Tribal abandoned mine land reclamation plans and revisions thereof submitted by a State or Tribe are based on a determination of whether the submittal meets the requirements of title IV of the Surface Mining Control and reclamation Act (SMCRA) (30 U.S.C. 1231–1243) and the Federal regulations at 30 CFR parts 884 and 888.

National Environmental Policy Act

No environmental impact statement is required for this rule since agency decisions on proposed State and Tribal abandoned mine land reclamation plans and revisions thereof are categorically excluded from compliance with the National Environmental Policy Act (42 U.S.C. 4332) by the Manual of the Department of the Interior (516 DM 6, appendix 8, paragraph 8.4B(29)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under the Paperwork Reduction Act, 44 U.S.C. 3507 *et seq.*

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a

substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State (or Tribal) submittal which is the subject of this rule is based upon Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Hence, this rule will ensure that existing requirements established by SMCRA or previously promulgated by OSM will be implemented by the State (or Tribe). In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions in the analyses for the corresponding Federal regulations.

BILLING CODE 4310–05–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR 285, 602, 630, and 678

Receipt of Petition for Rulemaking; Center for Marine Conservation

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of receipt of petition for rulemaking and request for comments.

SUMMARY: NMFS announces receipt of a petition for rulemaking on issues related to fishery management regulations promulgated under the Magnuson Fishery Conservation and Management Act (Magnuson Act), the Endangered Species Act (ESA) and the Marine Mammal Protection Act (MMPA). The Center for Marine Conservation (CMC) has petitioned the Secretary of Commerce to: (1) Amend guidelines for fishery management plans to create a presumption that proposed new fishing gear is prohibited from any fishery under U.S. jurisdiction until it has been observed in operation, evaluated and certified not to cause harm to protected fishery resources; and (2) amend the fishery management plans for Atlantic swordfish and other fisheries and their implementing regulations to regulate pair trawling as an experimental fishery. In addition, CMC has asked NMFS to reinitiate consultation on the effects of pair trawl gear on endangered marine turtles and whales under section 7 of the ESA, and to reclassify fisheries in which pair trawl gear is used from Category II to Category I under Interim Exemption for Commercial Fisheries established pursuant to section 114 of the NMPA. The request to reinitiate consultation under section 7 of the Endangered Species Act has been denied based on the lack of any new information indicating interactions between pair trawl gear and endangered or threatened species. NMFS has already initiated rulemaking to address the reclassification of fisheries under the Interim Exemption for Commercial Fisheries (57 FR 34553, August 5, 1992) and is not soliciting further comments on this request at this time. The information presented by the Center for Marine Conservation is being considered in the rulemaking process.

DATES: Comments on the petition are requested through May 26, 1993.

ADDRESSES: Comments on the petition should be directed to: Nancy Foster, Assistant Administrator (Acting), National Marine Fisheries Service, 1335 East-West Highway, Silver Spring, MD 20910 (Attention: Richard Stone—F/CM4). Please indicate in the letter that your comment is in response to the "CMC Petition for Rulemaking."

FOR FURTHER INFORMATION CONTACT: Regarding Fishery Management Plan issues, please contact Aaron King, 301–713–2347; regarding ESA and MMPA issues, please contact Victoria Credle at 301–713–2322. Copies of the Center for Marine Conservation's petition for rulemaking are available upon request. Also available are aggregated data on catch of target species and bycatch in the pair trawl fishery as collected by observers during the fall of 1992.

SUPPLEMENTARY INFORMATION: Pair trawling involves the deployment of a large mesh midwater trawl between two vessels. Participants describe the pelagic fishery as a nighttime fishery, with trawl times averaging 2.5 to 3 hours to preserve the quality of the catch. The head rope is no less than 30 feet (9–10 meters) below the surface of the water while the gear is fishing. First introduced on the U.S. northeast coast in 1991, pair trawl gear targeted tuna and swordfish for one season under the regulations existing at that time, which did not restrict the types of gear that could be used to take swordfish commercially. At that time, fishing occurred slightly inshore on the continental shelf, from the Hudson Canyon north to the Grand Banks. In a final rule published on December 13, 1991 (56 FR 65007), NMFS restricted the directed catch of Atlantic swordfish gear to longline, harpoon and drift gillnet, except under an experimental fishery permit.

Presently, information on pair trawl interactions with marine mammals is limited to unofficial reports on the striped bass and albacore tuna fisheries in the Bay of Biscay, France, and some preliminary data collected by NMFS during the last few pair trawl trips taken during the fall of 1992 off the northeast coast of the United States. Information from the French pair trawl albacore tuna fishery indicates that interactions with marine mammals occur at a rate greater than that documented in the drift gillnet fishery when the head rope is 2 meters under water. Little information is available on the pair trawl striped bass fishery. However, unofficial reports indicate a noticeable increase in the number of stranded dolphins on the northern coast of Brittany since the introduction of pair trawls. No data on interaction rates are available; however, the European Economic Community is currently considering a report on this issue.

Pursuant to a December 13, 1991, rulemaking, NMFS has the authority to require all selected Atlantic swordfish fishery vessels, whether taking swordfish in a directed fishery or incidental to another fishery, to carry NMFS approved observers. NMFS is now using this authority to collect scientific data on all aspects of this fishery. By the end of 1992, there were 11 vessels in the fishery consisting of four pairs and one group of three vessels that pair off in different combinations.

In addition to the requested rulemakings, CMC has petitioned NMFS to reinitiate consultation on the effects of pair trawl gear on endangered marine turtles and whales under section 7 of the ESA, and to reclassify fisheries (at 50 CFR part 229) in which pair trawl gear is used from Category II to Category I under the Interim Exemption for Commercial Fisheries established pursuant to section 114 of the MMPA. NMFS is denying the request to reinitiate consultation under section 7 of the ESA as there is no new evidence to suggest that vessels using pair trawl gear are interacting with endangered or threatened marine animals to a greater degree than previously considered. However, any new proposed rulemakings which affect the pair trawl fishery will be subject to consultation under section 7. NMFS has already initiated rulemaking to address the reclassification of fisheries under the Interim Exemption for Commercial

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Butler Rural Electric Cooperative, Inc.; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA) has made a finding of no significant impact (FONSI) with respect to the potential environmental impact resulting from a proposal by Butler Rural Electric Cooperative, Inc. (BREC), to construct a new headquarters and warehouse facility (project) in Butler County, Ohio. The FONSI is based on the Borrower's Environmental Report (BER) prepared by BREC. REA conducted an independent evaluation of the report and concurs with its scope and content. In accordance with REA Environmental Policies and Procedures, 7 CFR 1794.61, REA has adopted the BREC's BER as the Environmental Assessment (EA) for the project.

FOR FURTHER INFORMATION CONTACT: Jennifer A. Corwin, Environmental Protection Specialist, Environmental Compliance Branch, Electric Staff Division, room 1246, South Agriculture Building, Rural Electrification Administration, Washington, DC 20250-1500, telephone (202) 720-1784.

SUPPLEMENTARY INFORMATION: The proposed project will be located in Butler County, Ohio. The project will include a 10,000-square foot office and service center building, a 12,000-square foot warehouse, parking to accommodate more than 60 vehicles, and a storm water detention basin with a surface area of approximately one acre. BREC has purchased a little over 12 acres of land for the project, all of which will be affected by construction and landscaping activities.

Alternatives examined for the proposed project include taking no action, renovating the existing headquarters building, demolishing the old headquarters facility and constructing a new facility on the existing site, and constructing the facility at alternative sites.

Based on an independent analysis of the adopted BER, REA has concluded that the construction of the proposed project will have no significant impact on air quality, water quality, the 100-year floodplain, existing land uses, historic properties, federally-listed threatened and endangered species, or designated critical habitat or species proposed for listing or proposed critical habitat. A Farmland Conversion Impact Rating Form was completed by BREC and the U.S. Soil Conservation Service and it was determined that the 12-acre site has a low ranking for important farmland. Also, a wetland delineation report was prepared for BREC by KEMRON Environmental Sciences. The report concluded that the proposed project will not affect wetlands.

No other potential significant impact resulting from the construction and use of the proposed project has been identified. Copies of the EA and FONSI are available for review at, or can be obtained from, REA at the address provided herein or from Butler Rural Electric Cooperative, Inc., P.O. Box 13030, Hamilton, Ohio 45013-0030.

Dated: April 20, 1993.

James B. Huff, Sr.,

Administrator.

BILLING CODE 3410-15-F

DEPARTMENT OF COMMERCE

Bureau of Export Administration

Action Affecting Export Privileges; Also Known as Golamreza Zandianjazi, et al.

In the matter of: Reza Zandian, also known as Golamreza Zandianjazi, with addresses at 5 Hillsborough, Newport Beach, California 92660 and c/o Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626; Charles Robert Reger, 9582 Erskine Drive, Huntington Beach, California 92646; Iran Business Machines, No. 50 Molla Sadra Avenue, 14357 Tehran, Iran; Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626; Lucach Corporation, and its division, Computerworld North America, also known as Computer World, 17526-B Von Karman, Irvine, California 92714 and Computerworld Europe, also known as Computer World and C.E.P.A.T., Rue Jean-Grandel, BP 12-95102 Argenteuil, France, Respondents.

Order Temporarily Denying Export Privileges

The Office of Export Enforcement, Bureau of Export Administration, United States Department of Commerce (Department), pursuant to the provisions of § 788.19 of the Export Administration Regulations (currently codified at 15 CFR parts 768-799 (1992)) (the Regulations), issued pursuant to the Export Administration Act of 1979, as amended (currently codified at 50 U.S.C.A. app. 2401-2420 (1991, Supp. 1992, and Pub. L. 103-10, March 27, 1993)) (the Act), has asked the Acting Assistant Secretary for Export Enforcement to issue an order temporarily denying all United States export privileges to Reza Zandian, also known as Golamreza Zandianjazi (Zandian); Charles Robert Reger (Reger); Iran Business Machines; Iran Business Machines, USA; Lucach Corporation and its division, Computerworld North America, also known as Computer World (Lucach); and Computerworld Europe, also known as Computer World and C.E.P.A.T. (Computerworld Europe) (hereinafter collectively referred to as respondents).[1]

In its request, the Department states that, as a result of an ongoing investigation, it has reason to believe that, during the period from approximately July 1991 through approximately January 1993, Zandian and Reger, acting through Zandian's companies, Iran Business Machines, USA, a company located in Costa Mesa, California, and Lucach, located in Irvine, California, exported and attempted to export U.S.-origin computers, controlled for reasons of national security, nuclear non-proliferation, and foreign policy, to Iran without the validated export licenses required by the Regulations for such exports.

The Department believes that Zandian and Reger, acting through Zandian's companies both in the United States and overseas, would obtain orders from

[1] All of the companies identified above are owned or controlled by Zandian. Reger is the General Manager of Zandian's companies in the United States.

VOL 58 ISS 78 AP 26 1993 UMI

customers in Iran for U.S.-origin commodities. The commodities would be ordered from U.S. suppliers by Iran Business Machines, USA, on the representation that the goods were intended for use in the United States. Once the goods were delivered to Iran Business Machines, USA, Zandian and Reger would use another of Zandian's companies in the United States, Lucach, to export the goods to Iran.

In at least two instances, they submitted license applications to the Department seeking authorization to export U.S.-origin computers from the United States to Iran. Upon receiving notification that the Department intended to deny the applications, however, they requested that the license applications be returned to them without action. They then attempted to export the computers to Zandian's company in France, Computerworld Europe, also known as Computer World and C.E.P.A.T., pursuant to a general license, when they knew the computers were destined for Iran and that no authorization for the reexport of the computer from France to Iran had been granted by the Department.[2]

In another instance in which no application was filed, Zandian and Reger exported a U.S.-origin computer from the United States to Iran without the required validated export license. In connection with that export, they submitted a Shipper's Export Declaration (SED) to the U.S. government, stating that the export was authorized under general license G–DEST. In fact, a validated license was required for the export of the computer to Iran.[3]

In light of the above-described events, the Department believes that the violations respondents are suspected of having committed were significant, deliberate and covert and are likely to occur again unless a temporary denial order naming respondents is issued by the Acting Assistant Secretary. In addition, the Department believes that a temporary denial order is necessary to give notice to companies in the United States and abroad that they should cease dealing with respondents in export-related transactions involving U.S.-origin goods.

Accordingly, based on the showing made by the Department, I find that an order temporarily denying the export privileges of Reza Zandian, also known as Golamreza Zandianjazi; Charles Robert Reger; Iran Business Machines; Iran Business Machines, USA; Lucach Corporation and its division, Computerworld North America, also known as Computer World; and Computerworld Europe, also known as Computer World and C.E.P.A.T., is necessary in the public interest to prevent an imminent violation of the Act and the Regulations and to give notice to companies in the United States and abroad to cease dealing with respondents in goods and technical data subject to the Act and the Regulations, in order to reduce the substantial likelihood that respondents will continue to engage in activities that are in violation of the Act and the Regulations. This order is issued on an *ex parte* basis without a hearing, based on the Department's showing that expedited action is required.

Accordingly, it is hereby *Ordered*.

I. All outstanding individual validated licenses in which any of the respondents appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of respondents' privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

II. For a period of 180 days from the date of entry of this order, Reza Zandian, also known as Golamreza Zandianjazi, with addresses at 5 Hillsborough, Newport Beach, California 92660 and c/o Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626; Charles Robert Reger, 9582 Erskine Drive, Huntington Beach, California 92646; Iran Business Machines, No. 50 Molla Sadra Avenue, 14357 Tehran, Iran; Iran Business Machines, USA, 600 Anton Boulevard, Costa Mesa, California 92626; Lucach Corporation, and its division, Computerworld North America, also known as Computer World, 17526–B Von Karman, Irvine, California 92714; and Computerworld Europe, also known as Computer World and C.E.P.A.T., Rue Jean-Grandel, BP 12–95102 Argenteuil, France, and all their successors, assignees, officers, partners, representatives, agents, and employees, hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction in the United States or abroad involving any commodity or technical data exported or to be exported from the United States, in whole or in part, and subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Department; (ii) in preparing or filing with the Department any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining from the Department or using any validated or general export license, reexport authorization, or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported or to be exported from the United States, in whole or in part, and subject to the Regulations; and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. After notice and opportunity for comment as provided in § 788.3(c), any person, firm, corporation, or business organization related to respondents by affiliation, ownership, control, or position of responsibility in the conduct of trade or related services may also be subject to the provisions of this Order. Based on the showing made by the Department, I have determined that the following companies are related to one or more of the respondents by affiliation, ownership, or control in the conduct of trade and related services and, accordingly, are hereby made subject to this Order:

Optima Technology Corporation, also known as O.T.C., 17526 Von Karman, Irvine, California 92714
Optima Technology Europe, also known as O.T.E., Rue Jean-Grandel, BP 12–95102 Argenteuil, France
Optima Technology Middle East, also known as O.T.M.E., 132 Pelestin Avenue, Tehran, Iran
Computerworld Middle East, No. 50 Molla Sadra Avenue, 14357 Tehran, Iran
AS/TEQ Corporation, 17526 Von Karman, Irvine, California 92714
U.S. Business Machines Corporation, 17526 Von Karman, Irvine, California 92714
RISQ Technology Corporation, 17526 Von Karman, Irvine, California 92714

and

ICSAA Trade Company, with addresses at 7502 Mar Avenue, La Jolla, California 92037

and

P.O. Box 27082, 1395 Marine Drive, West Vancouver, British Columbia, V7T2X8 Canada

IV. As provided by § 787.12(a) of the Regulations, without prior disclosure of the facts to and specific authorization of the Office of Export Licensing, in consultation with the Office of Export Enforcement, no person may directly or indirectly, in any manner or capacity: (i) Apply for, obtain, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to an export or reexport of commodities or technical data by, to, or for another person then subject to an order revoking or denying his export privileges or then excluded from practice before the Bureau of Export Administration; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate: (a) In any transaction which may involve any commodity or technical data exported or to be exported from the United States; (b) in any reexport thereof; or (c) in any other transaction which is subject to the Export Administration Regulations, if the person denied export privileges may obtain any benefit or have any interest in, directly or indirectly, any of these transactions.

V. In accordance with the provisions of § 788.19(e) of the Regulations, any respondent may, at any time, appeal this temporary denial order by filing with the Office of the Administrative Law Judge, U.S. Department of Commerce/Export Control, room H–4017, 14th Street and Constitution Avenue, NW., Washington, DC 20230, a full written statement in support of the appeal. Any related person may appeal the finding that it is related to one or more of the denied parties, but may not appeal the underlying issuance of the temporary denial order.

VI. This order is effective immediately and shall remain in effect for 180 days.

VII. In accordance with the provisions of § 788.19(d) of the Regulations, the Department may seek renewal of this temporary denial order by filing a written request not later than 20 days before the expiration date. Any respondent may oppose a request to renew this temporary denial order by filing a written submission with the Assistant Secretary for Export Enforcement, which must be received not later than seven days before the expiration date of this order.

A copy of this order shall be served on each respondent and each related person. This order shall be published in the **Federal Register.**

Dated: April 16, 1993.

Douglas E. Lavin,

Acting Assistant Secretary for Export Enforcement.

[FR Doc. 93–9577 Filed 4–23–93; 8:45 am]

BILLING CODE 3510–DT–M

[2] On January 22, 1993, a three count indictment was returned against Zandian and Reger charging them with conspiracy, attempted unlawful export and making a false statement to the U.S. government on the Shipper's Export Declaration submitted in connection with the attempted export of an International Business Machine ES 9000 model 9121–190 computer on or about January 4, 1993.

[3] The Department also stated that the investigation has given it reason to believe that respondents have possession of a U.S.-origin computer that they ordered for a company in Iran.

International Trade Administration

[A–427–812]

Initiation of Antidumping Duty Investigation: Calcium Aluminate Cement and Cement Clinker From France

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: April 26, 1993.

FOR FURTHER INFORMATION CONTACT: Jim Cunningham, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 482–4207.

Initiation of Investigation

The Petition

On March 31, 1993, we received a petition filed in proper form by Lehigh Portland Cement Company (petitioner). Petitioner filed a supplement to the petition on April 15, 1993. In accordance with 19 CFR 353.12, petitioner alleges that calcium aluminate cement and cement clinker from France is being, or is likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports are materially injuring, or threaten material injury to, a U.S. industry.

Petitioner has stated that it has standing to file the petition because it is an interested party, as defined under section 771(9)(C) of the Act, and because the petition was filed on behalf of the U.S. industry producing the product subject to this investigation. If any interested party, as described under paragraphs (C), (D), (E) or (F) of section 771(9) of the Act, wishes to register support for, or opposition to, this petition, it should file a written notification with the Assistant Secretary for Import Administration.

Scope of Investigation

The products covered by this investigation are calcium aluminate cement and cement clinker other than white, high purity calcium aluminate cement and cement clinker. The products included in this investigation contain by weight more than 32 percent but less than 65 percent alumina and more than one percent each of iron and silica. Clinker is the primary raw material used in the cement production process.

Calcium aluminate cement and cement clinker covered by the scope of this investigation are currently classifiable under the following HTSUS subheadings: 2523.30.0000 and 2523.10.0000, respectively. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this investigation is dispositive.

United States Price and Foreign Market Value

Petitioner based its estimate of United States Price (USP) on observed price quotations during August and September, 1992, by a party in the United States related to the French producer, Lafarge Fondu International. The prices are delivered, bagged prices for cement. Petitioner claims that virtually all of the subject merchandise imported into the United States from France has been entered in the form of cement clinker, which is sold to the French producer's wholly-owned subsidiary in the United States, Lafarge Calcium Aluminates Incorporated (Lafare CA). Lafarge CA further manufactures cement clinker into cement in the United States. Therefore, petitioner calculated margins for cement clinker by taking a USP for cement and adjusting for further manufacturing in the United States, profit, on further manufacturing, ocean freight and insurance charges and VAT.

Petitioner based its estimate of Foreign Market Value (FMV) on observed price quotations obtained by a market research firm in France. The price quotations were effective from March through July, 1992. The prices are delivered, bagged, and VAT-exclusive prices for cement. Since petitioner could not find sales of cement clinker by Lafarge to unrelated parties in France, petitioner adjusted cement prices for differences in merchandise to obtain a cement clinker price. Petitioner also adjusted FMV for freight charges, credit and value-added tax (VAT).

The range of dumping margins for calcium aluminate cement and cement clinker based on price-to-price comparisons alleged by petitioner is 41.23—198.10 percent.

Initiation of Investigation

We have examined the petition on calcium aluminate cement and cement clinker from France and have found that it meets the requirements of section

732(b) of the Act. Therefore, we are

Extraordinary Challenge Committee

Docket Number: 92–147. *Applicant:*

VOL 58 ISS 78 AP 26 1993 UMI

732(b) of the Act. Therefore, we are initiating an antidumping duty investigation to determine whether imports of calcium aluminate cement and cement clinker from France are being, or are likely to be, sold in the United States at less than fair value.

Preliminary Determination by the International Trade Commission

The International Trade Commission (ITC) will determine by May 17, 1993, whether there is a reasonable indication that imports of calcium aluminate cement and cement clinker from France are materially injuring, or threaten material injury to, a U.S. industry. A negative ITC determination will result in the investigation being terminated; otherwise, the investigation will proceed according to statutory and regulatory time limits.

This notice is published pursuant to section 732(c)(2) of the Act and 19 CFR 353.13(b).

Dated: April 20, 1993.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

[FR Doc. 93-9677 Filed 4-23-93; 8:45 am]

BILLING CODE 3510-DS-M

United States-Canada Free-Trade Agreement, Article 1904 Binational Panel Reviews; Completion of Panel Review

AGENCY: United States-Canada Free-Trade Agreement, Binational Secretariat, United States Section, International Trade Administration, Department of Commerce.

ACTION: Notice of completion of panel review in the matter of live swine from Canada, Secretariat File No: USA-91-1904-03.

SUMMARY: On April 8, 1993, an Extraordinary Challenge Committee issued its decision affirming two binational panel decisions in this matter. Pursuant to Rule 60 of the Rules of Procedure for Article 1904 Extraordinary Challenge Committees, and the Extraordinary Challenge Committee Memorandum Opinion and Order dated April 8, 1993, and Rule 81 of the Article 1904 Panel Rules, the binational panel review described above was completed on April 12, 1993.

FOR FURTHER INFORMATION CONTACT: James R. Holbein, United States Secretary, Binational Secretariat, suite 2061, 14th and Constitution Avenue, Washington, DC 20230, (202) 482-5438.

SUPPLEMENTARY INFORMATION: By a decision dated April 8, 1993, The Extraordinary Challenge Committee (Secretariat File No: ECC-93-1904-01USA), which was convened to review the binational panel decisions in this matter, dismissed the request for an extraordinary challenge for failure to meet the standards of an extraordinary challenge set forth under FTA Article 1904.13. The Committee ordered that the Binational Panel's October 30, 1992 Decision shall remain in effect and affirmed the Order of the Panel dated December 21, 1992.

Pursuant to Rule 61 of the Rules of Procedure for Article 1904 Extraordinary Challenge Committees, the Committee members were discharged from their duties effective April 9, 1993, the day after the decision affirming the panel decision. On the basis of Rule 81 of the Article 1904 Panel Rules, the Panel Review was completed and the panelists discharged from their duties effective April 12, 1993, the day after the Extraordinary Challenge Committee was discharged.

Dated: April 19, 1993.

James R. Holbein,

United States Secretary, FTA Binational Secretariat.

BILLING CODE 3510-GT-M

Loyola University Medical Center, et al.; Consolidated Decision on Applications for Duty-Free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instruments described below, for such purposes as each is intended to be used, is being manufactured in the United States.

Docket Number: 92-145. *Applicant:* Loyola University Medical Center, Maywood, IL 60153. *Instrument:* Two #3D Micromanipulators with Adaptor for Microscope, Models WR-89 and P-1. *Manufacturer:* Narishige Scientific Instruments, Japan. *Intended Use:* See notice at 57 FR 49456, November 2, 1992. *Reasons:* The foreign instrument provides superior isolation from vibration and electrical interference and 30 mm working distances in the X, Y, and Z axes.

Docket Number: 92-147. *Applicant:* Pomona College, Claremont, CA 91711-6338. *Instrument:* Stopped Flow Spectrofluorimeter with Accessories, Model SF-51. *Manufacturer:* Hi-Tech Scientific Ltd., United Kingdom. *Intended Use:* See notice at 57 FR 49456, November 2, 1992. *Reasons:* The foreign instrument provides: (1) Sample volume as small as 100 µl, (2) an inert flow system and (3) temperature control to 0.02°C with independently thermostatted sample reservoir and syringes.

Docket Number: 92-148. *Applicant:* University of Rochester Medical Center, Rochester, NY 14642. *Instrument:* Digital Microspectrofluorimeter. *Manufacturer:* Newcastle Photometric Systems, United Kingdom. *Intended Use:* See notice at 57 FR 49456, November 2, 1992. *Reasons:* The foreign instrument provides precisely synchronized dual filter wheels correlated in the millisecond time frame.

Docket Number: 92-153. *Applicant:* Iowa State University of Science and Technology, Ames, IA 50011. *Instrument:* Short Lifetime and Steady State Wide Wavelength Spectrofluorimeter System, Model FL 900. *Manufacturer:* Edinburg Instruments Ltd., United Kingdom. *Intended Use:* See notice at 57 FR 54972, November 23, 1992. *Reasons:* The foreign instrument provides: (1) Lifetime measurement in the 200ps to 10s range, (2) time-resolved single photon counting and (3) luminescence spectra capability.

Docket Number: 92-155. *Applicant:* The Johns Hopkins University, Baltimore, MD 21287-9131. *Instrument:* Linear Motion Stimulator. *Manufacturer:* Linear Motors Limited, United Kingdom. *Intended Use:* See notice at 57 FR 54972, November 23, 1992. *Reasons:* The foreign instrument provides linear and rotational forces up to 0.05 gravity.

Docket Number: 92-157. *Applicant:* The Ohio State University, Columbus, OH 43210-1292. *Instrument:* Micro Stopped-flow Spectrophotometer System, Model SF-61AX. *Manufacturer:* Hi-Tech Scientific Ltd., United Kingdom. *Intended Use:* See notice at 57 FR 54972, November 23, 1992. *Reasons:* The foreign instrument provides: (1) Guaranteed anaerobic and low temperature (−10°C) operation, (2) 0.8 ms deadtime and (3) simultaneous monitoring of absorbance and fluorescence.

Docket Number: 92-163. *Applicant:* West Virginia University, Morgantown, WV 26506-6045. *Instrument:* Micro Stopped-flow Spectrophotometer/

Fluorimeter System, Model SF-61AF. *Manufacturer:* Hi-Tech Scientific, United Kingdom. *Intended Use:* See notice at 57 FR 54973, November 23, 1992. *Reasons:* The foreign instrument provides: (1) Sub-millisecond deadtime, (2) two-color simultaneous dual detection and (3) a "spectroscan" repetition rate of 95ms per scan.

Docket Number: 92-167. *Applicant:* Bowman Gray School of Medicine of Wake Forest University, Winston-Salem, NC 27157. *Instrument:* Stopped-flow Spectrofluorimeter, Model DX.17MV. *Manufacturer:* Applied Photophysics Ltd., United Kingdom. *Intended Use:* See notice at 58 FR 4978, January 19, 1993. *Reasons:* The foreign instrument provides: (1) Small (to 25 µl) sample volume, (2) sub-millisecond deadtime and (3) effective oxygen and temperature control (to 5°C).

The National Institutes of Health advises in its memoranda dated February 9, 1993, that (1) the capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) they know of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-F

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with subsections 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC.

Docket Number: 93-025. *Applicant:* Washington University, 1130 Hampton Avenue, Box 1147, St. Louis, MO 63139. *Instrument:* (2) 3-D Micromanipulators, Model WR-88-R. *Manufacturer:* Narishige Instrument Co., Japan. *Intended Use:* The instrument will be used to position glass micropipettes which will be used to monitor membrane currents in cultured cells during experiments conducted to define fundamental biophysical and pharmacological properties of specific subtypes of ion channels. *Application Received by Commissioner of Customs:* March 12, 1993.

Docket Number: 93-026. *Applicant:* University of Minnesota, Department of Pharmacology, 3-249 Millard Hall, Minneapolis, MN 55455. *Instrument:* (2) Microelectrode Pullers, Models PN-3 and PP-83 and (3) 3-D Micromanipulators, Model M-2. *Manufacturer:* Narishige Scientific Instrument Co., Japan. *Intended Use:* The instrument will be used to measure the membrane potentials, ion currents in xenopus oocytes. The objectives of the studies are: (a) to establish an in vitro bioassay system for G-protein receptor activations; (b) to elucidate the mechanism of G-protein and receptor interactions; and (c) to delineate the identities of G-proteins which mediate specific receptor functions. *Application Received by Commissioner of Customs:* March 12, 1993.

Docket Number: 93-027. *Applicant:* University of Minnesota, 495 Borlaug Hall, 1991 Upper Buford Circle, St. Paul, MN 55108. *Instrument:* Electron Microscope, Model CM 12. *Manufacturer:* Philips Electronic Instruments, The Netherlands. *Intended Use:* The instrument will be used for experiments involving biological aspects of plant and animal production, analysis of food substances, and the geology of soils. The investigations will include the determination of host-pathogen anatomy and life cycle of fungal, bacterial and viral systems, isolation and identification of plant viruses, measurement of soil chemistry and identification and quantification of soil structure. In addition, the instrument will be used for educational purposes in various related science courses. *Application Received by Commissioner of Customs:* March 18, 1993.

Docket Number: 93-028. *Applicant:* Woods Hole Oceanographic Institution, Woods Hole, MA 02543. *Instrument:* Mass Spectrometer, Model OPTIMA. *Manufacturer:* VG Instruments, United Kingdom. *Intended Use:* The instrument will be used to measure the stable carbon isotope ratios of CO_2 from samples of seawater collected throughout the world's oceans. *Application Received by Commissioner of Customs:* March 23, 1993.

Docket Number: 93-029. *Applicant:* University of Colorado, Boulder, Campus Box 449, Boulder, CO 80309-0449. *Instrument:* Field Portable Spectrometer, Model PIMA II. *Manufacturer:* Integrated Spectronics Pty. Ltd., Australia. *Intended Use:* The instrument will be used for studies of rocks and soils in their natural field environments. Experiments will consist of systematic measurements of the geologic materials including both fresh and weathered surfaces in field locations primarily in the southwestern United States. *Application Received by Commissioner of Customs:* March 18, 1993.

Docket Number: 93-030. *Applicant:* University of California, San Diego, Scripps Institution of Oceanography, 8655 Production Avenue, San Diego, CA 92121. *Instrument:* Wave Measuring Equipment. *Manufacturer:* Datawell, BV, The Netherlands. *Intended Use:* The instrument will be used for statistical analysis of waves. *Application Received by Commissioner of Customs:* March 22, 1993.

Docket Number: 93-031. *Applicant:* University of Utah, Department of Medicinal Chemistry, 311A Skaggs Hall, Salt Lake City, UT 84112. *Instrument:* Mass Spectrometer, Model API III-R. *Manufacturer:* Perkin-Elmer Sciex Instruments, Canada. *Intended Use:* The instrument will be used to investigate the following phenomena: (a) Molecular structure of RNA, with respect to identity and sequence location of post-transcriptional modifications; (b) gas-phase ionization and dissociation chemistry of oligonucleotides; and (c) analytical chemistry protocols for structure analysis of naturally modified RNA, based principally on atmospheric pressure ionization liquid chromatography-tandem mass spectrometry. *Application Received by Commissioner of Customs:* March 25, 1993.

Docket Number: 93-032. *Applicant:* University of Nevada, Reno, Department of Physics, Reno, NV 89557. *Instrument:* ECR Multicharge Ion Source. *Manufacturer:* Centre D'Etudes Nucleaires De Grenoble, France. *Intended Use:* The instrument will be used to produce beams of highly ionized ions for studies of the fundamental charge-changing processes involving highly charged ions. The fundamental phenomena to be studied include electron-impact excitation, ionization, recombination, charge exchange

VOL 58 ISS 78 AP 26 1993 UMI

collisions and neutralization of ions at solid surfaces. In addition, the instrument will be used in physics courses to provide students a "hands-on" introduction to modern experimental techniques, instruments and devices. *Application Received by Commissioner of Customs:* March 30, 1993.

Docket Number: 93–033. *Applicant:* Albert Einstein College of Medicine, 1300 Morris Park Avenue, Bronx, NY 10461. *Instrument:* Stopped-Flow Spectrophotometer System, Model SF-61AX with Model OPT.690 Anaerobic Kit. *Manufacturer:* Hi-Tech Scientific, Ltd., United Kingdom. *Intended Use:* The instrument will be used to study the fast reactions catalyzed by a number of enzymes presently under investigation to determine for each enzyme in precise details the chemical mechanism by which the enzyme performs catalysis. *Application Received by Commissioner of Customs:* March 30, 1993.

BILLING CODE 3510–22–M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Summer Study Task Force on Tactical Air Warfare

AGENCY: Department of Defense.

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board Summer Study Task Force on Tactical Air Warfare will meet in closed session on May 5–6, 1993 at the Institute for Defense Analysis, Alexandria, Virginia.

The mission of the Defense Science board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will review the nation's acquisition options for tactical air warfare over the next 10 to 10 years as force structure is drawn down. They should then recommend promising concepts and technologies to pursue that may have high leverage cost and effectiveness against foreseeable threats.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92–463, as amended (5 U.S.C. app. II, (1988), it has been determined that this DSB Task Force meeting, concerns matter listed in 5 U.S.C. 552b(c) (1) (1988), and that accordingly this meeting will be closed to the public.

Dated: April 21, 1993.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting.

Name of Committee: Army Science Board (ASB).

Date of Meeting: 07 May 1993.

Time of Meeting: 1200–1600 hours.

Place: Pentagon.

Agenda: The Army Science Board's Ad Hoc Panel on "Technology for the Future Land Warrior," will meet to finalize issues for the draft final report and to discuss the issues with the Sponsor. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (4) thereof and title 5, U.S.C. Appendix 2, subsection 10(d). The proprietary and non-proprietary information to be discussed will be so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information (703) 695–0781.

Sally A. Warner,

Administrative Officer, Army Science Board.

[FR Doc. 93–9631 Filed 4–23–93; 8:45 am]

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

[CFDA No.: 84.999H]

The National Assessment of Educational Progress (NAEP) Program

Notice inviting applications for new awards for fiscal year 1993.

Purpose of Program: To conduct data collection, scoring, analysis and reporting for the State component of the 1994 National Assessment of Educational Progress (NAEP) which will be conducted in reading in grades 4, 8, and 12. NAEP supports the National Education Goals by providing measures of progress toward the Goals.

Eligible Applicants: Public, private, for-profit, and non-profit institutions, agencies, and other qualified organizations or consortia of such institutions, agencies, and organizations.

Deadline for Transmittal of Applications: June 9, 1993.

Applications Available: April 27, 1993.

Available Funds: The Department estimates that about $750,000 can be made available in fiscal year 1993 for the State component of NAEP. The Department's request for fiscal year 1994 includes additional funds for this activity. Should the State component of NAEP be authorized by the Congress, the Department expects to award funds for the initial work by the middle of July, 1993, and additional funds for the second budget period in November, 1994.

Estimated Number of Awards: 1.

Project Period: Up to 34 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) 34 CFR parts 74, 75, 77, 80, 81, 82, 85, 86; and (b) The regulations in 34 CFR Part 98 (Students Rights in Research, Experimental Activities, and Testing). (Note that 34 CFR Parts 74 through 77 were amended July 8, 1992 (see **Federal Register** of that date, pages 30328 to 30342)). These amendments are not yet codified. (Copies of the pertinent portions of the **Federal Register** are available on request from this Department.)

SUPPLEMENTARY INFORMATION: A national component of the National Assessment of Educational Progress (NAEP) is authorized by section 406 of the General Education Provisions Act (20 U.S.C. 1221e-1). This law provides for the establishment of the National Assessment Governing Board (NAGB). The law requires NAGB, among other responsibilities, to formulate the policy guidelines for the National Assessment and select the subject areas to be assessed. Copies of these guidelines are available from the Department. Three cooperative agreements are currently in effect: one to develop assessment instruments for the 1994 assessment; a second to conduct data collection for a national component of NAEP; and a third to score, analyze, and report data from the national component of NAEP.

This notice is limited to seeking applications for activities in connection with the State component of the National Assessment. Applications are being invited to allow sufficient time to complete the grant process before the end of the fiscal year, should the Congress authorize this State component.

In the past, Congress authorized trial assessments in 1990 and 1992 for the purpose of determining whether such assessments yield valid, reliable State-representative data. The Department presently has no authority to conduct a State component of the 1994 assessment, but reasonably anticipates enactment of such authority in the Spring of 1993. No awards may be made under this Application Notice unless Congress authorizes a State component of the 1994 National Assessment.

Priorities:

Absolute Priority: Under 34 CFR 75.105(c)(3), the Secretary gives an absolute preference to applications that meet the following priority. The Secretary funds under this competition only applications that meet this absolute priority:

Collection, Scoring, Analysis and Reporting of Data From the State Component of the 1994 National Assessment of Educational Progress.

The data collection, scoring, analysis and reporting for the State component of the 1994 NAEP must be performed in accordance with guidelines developed by NAGB.

Selection Criteria: Applications are evaluated according to the selection criteria in 34 CFR 75.210. Under 34 CFR 75.210(c), the Secretary is authorized to distribute an additional 15 points among the selection criteria to bring the total possible points to a maximum of 100 points. For the purpose of this competition, the Secretary will distribute the additional points as follows:

Plan of operation (34 CFR 75.210(b)(3)). Fifteen (15) additional points will be added for a possible total of 30 points for this criterion.

FOR APPLICATIONS OR INFORMATION CONTACT: Steve Gorman, U.S. Department of Education, 555 New Jersey Avenue, NW., room 308b, Washington, DC 20208–5653. Telephone: (202) 219–1937. Individuals who are hearing impaired may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 20 U.S.C. 1221e–1.

Dated: April 20, 1993.

Emerson J. Elliott,

Acting Assistant Secretary for Office of Educational Research and Improvement.

BILLING CODE 4000–01–U

DEPARTMENT OF ENERGY

Office of Fossil Energy

[FE Docket No. 93–26–NG]

Western Gas Resources, Inc.; Application for Blanket Authorization To Import and Export Natural Gas From and to Mexico

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on February 22, 1993, of an application filed by Western Gas Resources, Inc. (Western) requesting blanket authorization to import up to 73 Bcf of natural gas from Mexico and to export up to 73 Bcf of natural gas to Mexico over a two-year period beginning with the date of the first import or export delivery. Western states would use existing pipeline facilities to transport the gas. Also, Western would advise DOE of the date of first deliveries and submit quarterly reports detailing each transaction.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures, and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, May 26, 1993.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–05, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478.

FOR FURTHER INFORMATION CONTACT:

Stanley C. Vass, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3H–087, FE–53, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9482.

Lot Cooke, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, GC–14, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: Western is a natural gas marketer with its principal place of business in Denver, Colorado. Under the authority requested, Western will import and export the gas under spot and short-term purchase arrangements, either on its own behalf or as the agent for others. The specific terms of these arrangements would be negotiated individually, including the price and volumes.

The decision on Western's request for import authority will be made consistent with DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the market served is the primary consideration determining whether it is in the public interest (49 FR 6684, February 22, 1984). In reviewing Western's export proposal DOE considers the domestic need for the gas to be exported and any other issues determined to be appropriate, including whether the arrangement is consistent with DOE's policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties that may oppose this application should comment in their responses on these issues. Western asserts the proposed imports would be competitive and there is no current need for the domestic gas that would be exported. Parties opposing Western's application bear the burden of overcoming these assertions.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

VOL 58 ISS 78 AP 26 1993 UMI

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the applications must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Western's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, April 20, 1993.

Clifford P. Tomaszewski,

Director, Office of Natural Gas, Office of Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Projects Nos. 2458–009 and 2572–005–Maine]

Great Northern Paper, Inc.; Intent To Prepare an Environmental Impact Statement

April 20, 1993.

The Federal Energy Regulatory Commission (FERC) has received applications for new license for the Penobscot Mills and Ripogenus Projects Nos. 2458 and 2572, situated on the West Branch of the Penobscot River and Millinocket Stream in Penobscot and Piscataquis Counties, Maine.

The FERC staff has determined that issuing new licenses for these projects would constitute a major federal action significantly affecting the quality of the human environment. Therefore, the staff intends to prepare an environmental impact statement (EIS) on the hydroelectric projects in accordance with the National Environmental Policy Act. The staff's EIS will objectively consider both site specific and cumulative environmental effects of the projects and reasonable alternatives, and will include an economic, financial and engineering analysis.

A draft EIS will be issued and circulated for review by all interested parties. All comments filed on the draft EIS will be analyzed by the staff and considered in a final EIS. The staff's conclusions and recommendations will then be presented for the consideration of the Commission in reaching its final licensing decisions. Public and agency scoping meetings will be held at a future date to be announced.

For further information, please contact Robert Bell at (202) 219–2806.

Lois D. Cashell,

Secretary.

[FR Doc. 93–9595 Filed 4–23–93; 8:45 am]

BILLING CODE 6717–01–M

[Project No. 2333–005 Maine]

Rumford Falls Power Co.; Availability of Environmental Assessment

April 20, 1993.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the application for new license for the Rumford Falls Hydroelectric Project located on the Androscoggin River, in the Town of Rumford, Oxford County, Maine, and has prepared an Environmental Assessment (EA) for the project. In the EA, the Commission's staff analyzed the environmental impacts of the project and concluded that approval of the project, with appropriate mitigative measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, room 3308, of the Commission's offices at 941 North Capitol Street, NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 93–9594 Filed 4–23–93; 8:45 am]

BILLING CODE 6717–01–M

Hydroelectric Application Filed With the Commission

April 20, 1993

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Approval of Plan to Relocate a Hang-Glider Landing Zone.

b. *Project No:* 2426–057.

c. *Dates Filed:* April 1, 1993 and April 7, 1993.

d. *Applicant:* California Department of Water Resources.

e. *Name of Project:* Devil Canyon Hydroelectric Project.

f. *Location:* California Aqueduct, San Bernardino County, California.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mr. Don Colson, Chief, Plants and Pipeline Branch, California Department of Water Resources, 1416 Ninth Street, P.O. Box 942836, Sacramento, CA 94236–0001. (916) 653–7092.

i. *FERC Contact:* Heather Campbell, (202) 219–3097.

j. *Comment Date:* May 21, 1993.

k. *Description of Project:* The California Department of Water Resources, licensee for the Devil Canyon Project, requests approval of a plan to relocate a hang-glider landing zone operated by the Crestline Soaring Society. The original landing zone is needed for construction of the Second Afterbay which is part of a power enhancement project for the State Water Project. The licensee would like to relocate the landing zone 800 feet east of the location approved in a September 23, 1992 Commission order. The new landing zone will be located at the southern foot of the San Bernardino Mountains.

l. *This notice also consists of the following standard paragraphs:* B, C1, and D2.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR § 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "PROTEST" OR "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these documents must be filed by providing the original and 8 copies to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Motion to intervene must also be served upon each representative of the applicant specified in the particular application.

D2. *Agency Comments*—The Commission invites federal, state, and local agencies to file comments on the described application. (Agencies may obtain a copy of the application directly from the applicant.) If an agency does not file comments within the time specified for filing comments, the Commission will presume that the agency has none. One copy of an agency's comments must also be sent to the applicant's representatives.

Lois D. Cashell,

Secretary.

[FR Doc. 93–9596 Filed 4–23–93; 8:45 am]

BILLING CODE 6717–01–M

Order Delegating Authority to the Secretary and Certain Office Directors

Before Commissioners: Elizabeth Anne Moler, Chair; Jerry J. Langdon, Martin L. Allday, and Branko Terzic.

Issued April 16, 1993.

The Commission anticipates that it may lack a quorum for the transaction of business for particular matters or for a temporary period in the near future.[1] At the same time, the Commission recognizes that it has a continuing responsibility to fulfill its statutory and regulatory obligations in the most effective and efficient manner possible. Companies subject to the Commission's jurisdiction will continue to file rate cases that, in the absence of Commission action, would take effect without suspension or refund protection. Parties will also file petitions for rehearing that, absent Commission action, would be denied without consideration of the merits of the issues raised. To meet its responsibility to protect the public interest, the Commission is delegating certain authority to the Secretary, the Directors of the Office of Pipeline and Producer Regulation and the Office of Electric Power Regulation, and the General Counsel, to be exercised in circumstances where the absence of a quorum would otherwise allow various actions to occur without Commission consideration.

These delegations are made under the authority granted the Commission in section 401(f) of the Department of Energy Organization Act, Public Law 95–91, 91 Stat, 565 (1977), section 309 of the Federal Power Act (16 U.S.C. 825h), section 16 of the Natural Gas Act (15 U.S.C. 717o) and section 501(a) of the Natural Gas Policy Act (5 U.S.C. 3411(a)) to issue orders and to perform any and all acts the Commission may find necessary or appropriate to carry out the provisions of those statutes.

Public notice and comment is impractical because of the immediate need for Commission action. The public interest requires that these delegations take effect immediately.

Any action taken by the staff under this order may, to the extent authorized by law, be the subject of a petition for rehearing to the Commission in accordance with the procedures in 18 CFR 385.1902. In accordance with existing regulations, a petition for rehearing of staff action taken under this order does not stay the action.

The Commission Delegates

1. To the Secretary, or, in her absence, her designee, authority to:

a. Grant requests for rehearing filed under Rules 713 and 1902, solely for purposes of further consideration;

b. Issue other notices or orders as appropriate in order to extend the time within which the Commission would otherwise be required to act.

2. To the Director, Office of Pipeline and Producer Regulation, or, in his absence, his designee, authority to:

a. Suspend tariff filings for an appropriate length of time under the Natural Gas Act;

b. Set suspended tariff filings for hearing under the Natural Gas Act;

c. Take whatever further action is necessary to process those tariff filings.

3. To the Director, Office of Electric Power Regulation, or, in his absence, his designee, authority to:

a. Suspend rate schedules for an appropriate length of time under the Federal Power Act;

b. Set suspended rate schedules for hearing under the Federal Power Act;

c. Take whatever further action is necessary to process those rate schedules.

4. To the General Counsel, or in his or her absence, his or her designee, authority to act upon requests for exempt wholesale generator status under section 32 of the Public Utility Holding Company Act.

All existing delegations of authority to staff in effect prior to the date of this order remain in full force and effect. For the reasons given above, the Commission finds good cause to make this order effective immediately in accordance with 5 U.S.C. 553(d).

By the Commission.

Lois D. Cashell,

Secretary.

[FR Doc. 93–9592 Filed 4–23–93; 8:45 am]

BILLING CODE 6717–01–M

[1] Commissioner Trabandt resigned effective March 31, 1993. Commissioner Allday will resign effective April 16, 1993. Commissioners Langdon and Terzic have announced an intention to resign in the near future. On April 12, 1993, the President announced an intention to nominate four named individuals as new Commissioners. The confirmation process has not been completed for any of the four.

VOL 58 ISS 78 APR 26 1993 UMI

[Docket No. RS92-73-000]

Pacific Interstate Offshore Co.; Conference

April 20, 1993.

Take notice that on Tuesday, April 27, 1993, a conference will be convened, pursuant to the Commission's March 17, 1993 order in the captioned restructuring docket, to discuss certain disputed tariff provisions in Pacific Interstate Offshore Company's December 31, 1992 restructuring proposal.

The conference will be held at 10 a.m. at the Federal Energy Regulatory Commission, 810 First Street, NE., Washington, DC 20426. All interested persons and Staff are invited to attend. Attendance at the conference will not confer party status. For additional information, interested persons may call Erica Yanoff at (202) 208-0708.

Lois D. Cashell,

Secretary.

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), this notice announces the Office of Management and Budget's (OMB) responses to Agency PRA clearance requests.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer (202) 260-2740.

SUPPLEMENTARY INFORMATION:

OMB Responses to Agency PRA Clearance Requests

OMB Approvals

EPA ICR No. 1054.05; NSPS for Petroleum Refineries (Subpart J)--Recordkeeping and Reporting; was approved 03/17/93; OMB No. 2060-0022; expires 03/31/96.

EPA ICR No. 1629.01; Evaluation of Environmental Programs; was approved 03/01/93; OMB No. 2010-0024; expires 03/31/96.

EPA ICR No. 0988.05; Water Quality Standards Regulation; was approved 02/17/93; OMB No. 2040-0049; expires 02/28/96.

EPA ICR No. 1343.04; State Hazardous Waste Capacity Assurances Process, CERCLA; was approved 03/01/93; OMB No. 2050-0099; expires 03/31/96.

EPA ICR No. 0160.04; Application for Registration of Pesticide-Producing Establishments, Pesticide Report for Pesticide-Producing Establishments; was approved 02/18/93; OMB No. 2070-0078; expires 02/28/96.

EPA ICR No. 0664.04; NSPS for Bulk Gasoline Terminals (Subpart XX) Information Requirements; was approved 03/03/93; OMB No. 2060-0006; expires 03/31/96.

EPA ICR No. 0138.03; Modification of Secondary Treatment Requirements for Discharges into Marine Waters; was approved 02/19/93; OMB No. 2040-0088; expires 02/28/96.

EPA ICR No. 0161.06; Foreign Purchaser Acknowledgement Statement of Unregistered Pesticides; was approved 03/30/93; OMB No. 2070-0027; expires 03/31/96.

EPA ICR No. 0982.04; Standards of Performance for New Stationary Sources Metallic Mineral Processing Plants (Subpart LL) was approved 03/24/93; OMB No. 2060-0016; expires 03/31/96.

EPA ICR No. 0988.04; Amendments to Water Quality Standards Reg. to Establish Numeric Criteria for Priority Toxic Pollutants Necessary to Bring all States into Compliance with Clean Water Act; was approved 03/24/93; OMB No. 2040-0049; expires 02/28/96.

EPA ICR No. 0152.04; Notice of Arrival of Pesticides or Devices; OMB No. 2070-0020; was approved 04/05/93; expires 04/30/96.

EPA ICR No. 0222.03; Investigations into Possible Noncompliance of Motor Vehicles with Federal Emission Standards; was approved 03/31/93; OMB No. 2060-0086; expires 03/31/96.

OMB Correction/Approval

This is a correction of EPA ICR No. 0575.05; OMB N0. 2070-0004; Health and Safety Data Reporting, Submission of Lists and Copies of Health and Safety Studies. The OMB Notice of Approval was published in the CFR on 02/17/93; the EPA ICR No. is 0575.06 and it expires 02/28/96.

OMB Disapprovals

EPA ICR No. 1623.01; State Certification of Effective Petroleum Response/Remediation Programs for TC Suspension; was disapproved 02/19/93.

EPA ICR No. 0276.05; Application for an Experimental Use Permit (EUP) to Ship and Use Pesticides for Experimental Purposes Only; was disapproved 03/02/93.

Withdrawal

EPA ICR No. 1628.01; Certified/Commercial Pesticide Applicator Survey; was withdrawn at the request of the Agency.

OMB Extensions of Expiration Dates

EPA ICR No. 1541; NESHAP for Benzene Waste Operations (Subpart FF); OMB No. 2060-0183; expiration date was extended to 06/30/93.

EPA ICR No. 1241; Suspended and Cancelled Pesticide Products: Claim for Indemnification; OMB No. 2070-0071; expiration date was extended to 07/31/93.

EPA ICR No. 1086; NSPS for Onshore Natural Gas Processing Plants/Equipment Leaks of VOC and Emissions of SO2-Reporting and Recordkeeping; OMB No. 2060-0120; expiration date was extended to 07/31/93.

EPA ICR No. 1139; TSCA section 4 Test Rules and Exemptions; OMB No. 2070-0033; expiration date was extended to 09/30/93.EPA ICR No. 0607; Pesticide Use Survey; OMB No. 2070-0115; expiration date was extended to 08/31/93.

EPA ICR No. 0601; FIFRA section 29 Annual Report on Conditional Registrations; expiration date was extended to 07/31/93.

EPA ICR No. 1049; Notification of Episodic Releases of Oil and Hazardous Substances; OMB No. 2050-0046; expiration date was extended to 09/30/93.

EPA ICR No. 1331; Accidental Release Information Program (ARIP); 2050-0065; expiration date was extended to 08/31/93.

Conditional Approvals

EPA ICR No. 0794.04; Notification of Substantial Risk of Injury to Health and the Environment under section 8(E) of the Toxic Substances Control Act (TSCA, The Act); OMB No. 2070-0046; expires 09/30/93. Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before May 26, 1993.

FOR FURTHER INFORMATION OR A COPY OF THIS ICR CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: Hazardous Waste Industry Studies (EPA ICR #0818.05; OMB No. 2050-0042). This ICR is a revision of a currently approved information collection.

Abstract: EPA will conduct surveys of, and site visits to, facilities in various industries to collect hazardous waste information, including information on products, industrial processes, residual characteristics and management methods, capacity, source reduction and recycling practices, and health/risk assessment. Data will be gathered primarily through industry questionnaires and supplemented with a selected number of site visits. Under this revised ICR, the Agency has consolidated related information collection activities required by several RCRA programs into an expanded 3007 questionnaire. The information will be used to support listing determinations, land disposal restrictions, and capacity assurance investigations.

Burden Statement: The estimated average public burden for this collection of information is about 8 to 13 hours per response to complete the pre-questionnaire; about 25 to 100 hours per response to complete the questionnaire; and about 40 hours per response to provide survey updates. These estimates include all aspects of the information collection, including time for reviewing instructions, gathering the data needed, reviewing the collection of information, and submitting the form.

Respondents: Industries that generate or manage hazardous waste. The specific eight industries projected for study are: Solvents, Chlorinated Aliphatics, Petroleum Refining, Dyes and Pigments, Paint Production, Inorganics, Pulp and Paper, and Smelting Wastes.

Estimated Number of Respondents: 2,282.

Frequency of Collection: On occasion.

Estimated Number of Responses Per Respondent: 1.

Estimated Total Annual Burden on Respondents: 17,737.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460

and

Jonathan Gledhill, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: April 20, 1993.

Government-Owned Inventions: Available for Licensing

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of inventions for licensing.

SUMMARY: The inventions listed below are owned by the U.S. Government and are available for licensing in the United States in accordance with 35 U.S.C. 207 and 37 CFR part 404. Pursuant to 37 CFR 404.7, the Government may grant exclusive or partially exclusive licenses on any of the inventions listed below three months after the date of this notice.

Copies of the listed patents and patent applications are available from the person indicated below. Requests for copies of patent applications must include the patent number or patent application serial number. An application for a license should include the information set forth in 37 CFR 404.8, including applicant's plan for development or marketing the invention.

DATES: Exclusive licenses may be granted for the inventions listed below after July 26, 1993.

FOR FURTHER INFORMATION CONTACT: Thomas Gorman, Patent Counsel, Office of General Counsel (LE-132K), U.S. Environmental Protection Agency, Washington, DC 20460, Telephone (202) 260-1339.

Superfund Program and Office of Enforcement—Superfund; Model Administrative Order on Consent for Removal Actions and Model Unilateral Administrative Order for Removal Actions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The Agency is announcing today the availability of its "Model Administrative Order on Consent for Removal Actions" and "Model Unilateral Administrative Order for Removal Response Activities," OSWER Directives # 9833.06 and 9833.07, both dated March 16, 1993, in order to inform the public on important aspects of the Superfund Program. These documents contain model language which EPA's regional offices may consider when issuing or negotiating an administrative order for removal actions. A potentially responsible party may also find these models helpful. The Agency believes these documents will provide additional benefit to the removal enforcement process.

ADDRESSES: To obtain a copy of these directives please contact the National Technical Information Service at (703) 487–4650. The NTIS order numbers are PB 93–963605 for the "Model Administrative Order on Consent for Removal Actions" and PB 93–963606 for the "Model Unilateral Administrative Order for Removal Response Activities."

FOR FURTHER INFORMATION CONTACT: Fred Zimmerman, U.S. Environmental Protection Agency, Office of Waste Programs Enforcement, 5502–G, 401 M Street, SW., Washington, DC 20460, (703) 603–9063.

Transfer of Data to Contractor

AGENCY: Environmental Protection Agency.

ACTION: Notice of transfer of data and request for comments.

SUMMARY: The Environmental Protection Agency (EPA) plans to transfer data to its contractor, ICF, Inc., and its subcontractors: Booz-Allen & Hamilton, Inc.; Clayton Environmental Consultants; DPRA, Inc.; Eastern Research Group, Inc.; Franklin Associates; Hydro-Geologic, Inc.; Jaakko Poyry Consulting, Inc.; Labat-Anderson, Inc.; Mastech Systems Corp.; Resources for the Future; Ross & Associates Environmental Consulting, Ltd.; Sullivan Environmental Consulting, Inc.; Tellus Institute; Vigyan, Inc.; and Westat, Inc. These data pertain to facility management practices, waste characteristics and constituent concentrations, waste volumes, and the costs of waste management, treatment and disposal. These data have been, or will be, submitted to EPA under the authority of the Resource Conservation and Recovery Act (RCRA) Section 3007. Some of these data may have been, or may be, claimed as confidential business information. These firms are conducting cost and economic analyses of RCRA waste programs and regulations, analyses of environmental and human health effects, cost and risk comparative analyses, regulatory support, data collection and management.

DATES: The Transfer of data submitted to EPA will occur no sooner than May 3, 1993.

ADDRESSES: Comments should be sent to Margaret Lee, Document Control Officer, Office of Solid Waste (OS–312), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Comments should be identified as "Transfer of Confidential Data."

FOR FURTHER INFORMATION CONTACT: Margaret Lee, Document Control Officer, Office of Solid Waste (OS–312), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC, (202) 260–3410.

SUPPLEMENTARY INFORMATION:

1. Transfer of Data

The U.S. Environmental Protection Agency is conducting cost and economic analyses, analyses of environmental and human health effects, cost and risk comparative analyses, regulatory support, and data collection and management including support of the RCRA Docket. The contractors will support the policies and programs established for solid and hazardous waste management under the authority of Section 3007(b) of the Resource Conservation and Recovery Act of 1976, including subsequent amendments through 1984.

Under EPA Contract 68–W3–0008, ICF, Inc., and its subcontractors, will assist the Communications Analysis and Budget Division, of the Office of Solid Waste in conducting cost and economic analyses, analyses of environmental and human health effects, cost and risk comparative analyses, regulatory support, data collection and management. The data being transferred to ICF, Inc., and its subcontractors, pertain to facility waste management practices, waste characteristics and constituent concentrations, waste volumes and the costs of waste management, treatment and disposal. These data have been, or will be, submitted to EPA under the authority of the Resource Conservation and Recovery Act (RCRA). Some of the data may have been, or may be, claimed as Confidential Business Information (CBI).

In accordance with 40 CFR 2.305(h) EPA has determined that ICF, Inc., and its subcontractors, require access to Confidential Business Information (CBI) submitted to EPA, under the authority of RCRA, to perform work satisfactorily under the above-noted contract. EPA is issuing this notice to inform all submitters of CBI that EPA may transfer to these firms, on a need-to-know basis, CBI collected under the authority of RCRA. Upon completing their review of materials submitted, ICF, and its subcontractors will return all such materials to EPA.

ICF, Inc., and its subcontractors, have been authorized to have access to RCRA CBI under the EPA "Contractors Requirements for the Control and Security of RCRA Confidential Business Information Security Manual." EPA will approve the security plans of the contractors to insure that their facilities comply with security procedures outlined in the security manual prior to RCRA CBI being transferred to the contractors.

Personnel from these firms will be required to sign non-disclosure agreements and be briefed on appropriate security procedures before they are permitted access to confidential information.

Dated: April 12, 1993.

Richard J. Guimond,

Acting Assistant Administrator.

BILLING CODE 6560–50–M

FEDERAL RESERVE SYSTEM

First Virginia Banks, Inc., et al.; Notice of Applications to Engage de novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 13, 1993.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Senior Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. First Virginia Banks, Inc., Falls Church, Virginia; to engage *de novo* through its subsidiary, First Virginia Insurance Services, Inc., Falls Church, Virginia, in providing securities brokerage services and related investment advice including the purchase and sale as agent of stocks, bonds, and mutual funds; purchase and sale of agent of fixed and variable rate annuities pursuant to § 225.25(b)(15)(ii) of the Board's Regulation Y and previous Board Order. *Norwest Corporation*, 76 Federal Reserve Bulletin 873 (1990). These activities will be conducted in the States of Maryland, Virginia, Tennessee and the District of Columbia.

2. Premier Bankshares Corporation, Tazewell, Virginia; to engage *de novo* through its subsidiary, Premier Bank Services Corporation, Tazewell, Virginia, in acting as an investment or financial advisor by providing portfolio investment advice to banks, other financial institutions, and other persons; and to provide financial advice to state and local governments pursuant to §§ 225.25(b)(4)(iii) and (b)(4)(v) of the Board's Regulation Y.

3. Signet Banking Corporation, Richmond, Virginia; to engage *de novo* through its subsidiaries, Signet Financial Services, Inc., and Signet Insurance Services, Inc., Richmond, Virginia, in the sale as agent of variable-rate and fixed-rate annuities pursuant to the Board's previous order. *Norwest Corporation*, 76 Federal Reserve Bulletin 873 (1990)

Board of Governors of the Federal Reserve System, April 20, 1993.

Jennifer J. Johnson,

Associate Secretary of the Board.

The Fort Bancorp, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications mustbe received not later than May 17, 1993.

A. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. The Fort Bancorp, Inc., Fort Deposit, Alabama; to become a bank holding company by acquiring 100 percent of the voting shares of First Lowndes Bank, Fort Deposit, Alabama.

B. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Fairfield Bancshares, Inc., Fairfield, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of Fairfield National Bank, Fairfield, Illinois.

2. Trans Financial Bancorp, Inc., Bowling Green, Kentucky; to acquire 100 percent of the voting shares of Trans Kentucky Bancorp, Pikeville, Kentucky, and thereby indirectly acquire Citizens Bank of Pikeville, Pikeville, Kentucky.

C. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. Citizens Bancshares of El Reno, Inc., El Reno, Oklahoma; to become a bank holding company by acquiring 90 percent of the voting shares of Citizens National Bank and Trust Co., El Reno, Oklahoma.

2. Continental Security Bancshares, Inc., Springfield, Missouri; to become a bank holding company by acquiring at least 84.8 percent of the voting shares of Deepwater State Bank, Deepwater, Missouri.

3. Orchard Valley Financial Corporation, Englewood, Colorado; to acquire 15 percent of the voting shares of MegaBank Financial Corporation, Englewood, Colorado, and thereby indirectly acquire MegaBank of Arapahoe, Englewood, Colorado.

4. Southeastern Capital Corporation Employee Stock Ownership Plan, Idabel, Oklahoma; to become a bank holding company by acquiring 38 percent of the voting shares of Southeastern Capital

VOL 58 ISS 78 AP 26 1993 UMI

Corporation, Idabel, Oklahoma, and thereby indirectly acquire Idabel National Bank, Idabel, Oklahoma.

D. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. A.N.B. Holding Company, Ltd., Terrell, Texas; to acquire up to an additional 30 percent of The American National Bank of Terrell, Terrell, Texas.

2. M & F Bancshares, Inc., Weatherford, Texas, and M & F Financial Corp., Wilmington, Delaware; to acquire 100 percent of the voting shares of Texas Bank, Grapevine, Texas.

4. Texas Security First Bancshares, Inc. and SSSB Delaware Bancorporation, Inc., Dover, Delaware; to become bank holding companies by acquiring 100 percent of the voting shares of Sulphur Springs State Bank, Sulphur Springs, Texas.

Board of Governors of the Federal Reserve System, April 20, 1993.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 92N-0424]

Mohammed Azeem; Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under section 306(a)(2) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 335a(a)(2)) permanently debarring Mr. Mohammed Azeem, Medical Center for Federal Prisoners Springfield 27247-037, P.O. Box 4000, Springfield, MO 65808, from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Mr. Azeem was convicted of felonies under Federal law for conduct relating to the development and approval, including the process for development and approval, of a drug product; and relating to the regulation of a drug product under the act. Mr. Azeem has failed to request a hearing and, therefore, has waived his opportunity for a hearing concerning this action.

EFFECTIVE DATE: April 26, 1993.

ADDRESSES: Application for termination of debarment to the Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mary E. Catchings, Center for Drug Evaluation and Research (HFD-366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8041.

SUPPLEMENTARY INFORMATION:

I. Background

Mr. Mohammed Azeem has been convicted of Federal felony offenses in two separate cases. On June 5, 1990, the United States District Court for the District of Maryland entered judgment against Mr. Azeem for one count of aiding and abetting interstate travel in aid of racketeering in violation of 18 U.S.C. 1952 and 18 U.S.C. 2, and one count of giving an unlawful gratuity in violation of 18 U.S.C. 201(c)(1)(A). Judgment was also entered against Mr. Azeem on May 1, 1992, for one count of conspiracy to make false statements to an agency of the United States in violation of 18 U.S.C. 371, and two counts of aiding and abetting the making of false statements to an agency of the United States in violation of 18 U.S.C. 1001 and 18 U.S.C. 2.

As a result of these convictions, FDA served Mr. Azeem by certified mail on January 11, 1993, a notice proposing to permanently debar him from providing services in any capacity to a person that has an approved or pending drug product application and offered him an opportunity for a hearing on the proposal. The proposal was based on a finding, under section 306(a)(2)(A) and (a)(2)(B) of the act, that he was convicted of felonies under Federal law for conduct (1) relating to the development and approval, including the process for development and approval, of a drug product; and (2) relating to the regulation of a drug product under the act. Mr. Azeem did not request a hearing. His failure to request a hearing constitutes a waiver of his opportunity for a hearing and a waiver of any contentions concerning his debarment.

II. Findings and Order

Therefore, the Deputy Commissioner for Operations, under section 306(a) of the act, and under authority delegated to her (21 CFR 5.20), finds that Mr. Mohammed Azeem has been convicted of felonies under Federal law for conduct (1) relating to the development and approval, including the process for development and approval, of a drug product (21 U.S.C. 335a(a)(2)(A)); and (2) relating to the regulation of a drug product (21 U.S.C. 335a(a)(2)(B)).

As a result of the foregoing findings, Mr. Mohammed Azeem is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application under section 505, 507, 512, or 802 of the act (21 U.S.C. 355, 357, 360b, or 382), or under section 351 of the Public Health Service Act (42 U.S.C. 262), effective April 26, 1993 (21 U.S.C. 355a(c)(1)(B) and (c)(2)(A)(ii) and 21 U.S.C. 321(ee)). Any person with an approved or pending drug product application who knowingly uses the services of Mr. Azeem in any capacity, during his period of debarment, will be subject to civil money penalties. If Mr. Azeem, during his period of debarment, provides services in any capacity to a person with an approved or pending drug product application, he will be subject to civil money penalties. In addition, FDA will not accept or review any abbreviated new drug application or abbreviated antibiotic drug application from Mr. Azeem during his period of debarment.

Any application by Mr. Azeem for termination of debarment under section 306(d)(4) of the act (21 U.S.C. 335a(d)(4)) should be identified with Docket No. 92N-0424 and sent to the Dockets Management Branch (address above). All such submissions are to be filed in four copies. The public availability of information in these submissions is governed by 21 CFR 10.20(j). Publicly available submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 9, 1993.

Jane E. Henney,

Deputy Commissioner for Operations.

BILLING CODE 4160-01-F

[Docket No. 92N-0420]

Charles Y. Chang; Debarment Order; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that published in the **Federal Register** of March 8, 1993 (58 FR 12967). That notice permanently debarred Mr. Charles Y. Chang from providing services in any capacity to a person that has an approved or pending drug product application. The document was published with an incorrect authority citation. This document corrects that error.

EFFECTIVE DATE: March 8, 1993.

FOR FURTHER INFORMATION CONTACT: Megan L. Foster, Center for Drug Evaluation and Research (HFD-366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8041.

In FR Doc. 93-5247 appearing on page 12967 in the **Federal Register** of Monday, March 8, 1993, the following correction is made:

On page 12697, in the second column, in the fifth line in the caption "**SUMMARY:**" "(21 U.S.C. 355a(a)(2))" is corrected to read "(21 U.S.C. 335a(a)(2))".

Dated: April 6, 1993.

Jane E. Henney,

Deputy Commissioner for Operations.

[FR Doc. 93-9586 Filed 4-23-93; 8:45 am]

BILLING CODE 4160-01-F

[Docket No. 92N-0461]

Gloria H. Schetlick; Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is issuing an order under section 306(a)(2) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 335a(a)(2)) permanently debarring Ms. Gloria H. Schetlick, No. 27831-037, Federal Prision Camp Alderson, Alderson, WV 24910, from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Ms. Schetlick was convicted of felonies under Federal law for conduct relating to the development and approval, including the process for development and approval, of a drug product; and relating to the regulation of a drug product under the act. Ms. Schetlick has failed to request a hearing and, therefore, has waived her opportunity for a hearing concerning this action.

EFFECTIVE DATE: April 26, 1993.

ADDRESSES: Application for termination of debarment to the Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Diane M. Sullivan, Center for Drug Evaluation and Research (HFD-366), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301-295-8041.

SUPPLEMENTARY INFORMATION:

I. Background

On July 14, 1992, the United States District Court for the District of Maryland entered judgment against Ms. Gloria H. Schetlick for one count of obstruction of an agency proceeding, and one count of aiding and abetting the making of a false statement in a matter within the jurisdiction of a Federal agency, Federal felony offenses under 18 U.S.C. 1505, 18 U.S.C. 1001, and 18 U.S.C. 2.

As a result of these convictions, FDA served Ms. Schetlick by certified mail on February 8, 1993, a notice proposing to permanently debar her from providing services in any capacity to a person that has an approved or pending drug product application and offered her an opportunity for a hearing on the proposal. The proposal was based on a finding, under section 306(a)(2)(A) and (a)(2)(B) of the act, that she was convicted of felonies under Federal law for conduct (1) relating to the development and approval, including the process for development and approval, of a drug product; and (2) relating to the regulation of a drug product under the act. Ms. Schetlick did not request a hearing. Her failure to request a hearing constitutes a waiver of her opportunity for a hearing and a waiver of any contentions concerning her debarment.

II. Findings and Order

Therefore, the Deputy Commissioner for Operations, under section 306(a) of the act, and under authority delegated to

her (21 CFR 5.20), finds that Ms. Gloria

VOL 58 ISS 78 AP 26 1993 UMI

her (21 CFR 5.20), finds that Ms. Gloria H. Schetlick has been convicted of felonies under Federal law for conduct (1) relating to the development and approval, including the process for development and approval, of a drug product (21 U.S.C. 335a(a)(2)(A)); and (2) relating to the regulation of a drug product (21 U.S.C. 335a(a)(2)(B)).

As a result of the foregoing findings, Ms. Gloria H. Schetlick is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application under section 505, 507, 512, or 802 of the act (21 U.S.C. 355, 357, 360b, or 382), or under section 351 of the Public Health Service Act (42 U.S.C. 262), effective April 26, 1993 (21 U.S.C. 335a(c)(1)(B) and (c)(2)(A)(ii) and 21 U.S.C. 321(ee)). Any person with an approved or pending drug product application who knowingly uses the services of Ms. Schetlick in any capacity, during her period of debarment, will be subject to civil money penalties. If Ms. Schetlick, during her period of debarment, provides services in any capacity to a person with an approved or pending drug product application, she will be subject to civil money penalties. In addition, FDA will not accept or review any abbreviated new drug application or abbreviated antibiotic drug application from Ms. Schetlick during her period of debarment.

Any application by Ms. Schetlick for termination of debarment under section 306(d)(4) of the act (21 U.S.C. 335a(d)(4)) should be identified with Docket No. 92N-0461 and sent to the Dockets Management Branch (address above). All such submissions are to be filed in four copies. The public availability of information in these submissions is governed by 21 CFR 10.20(j). Publicly available submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 9, 1993.

Jane E. Henney,

Deputy Commissioner for Operations.

BILLING CODE 4160-01-F

[Docket No. 92M-0446]

DePuy®; Premarket Approval of the Unicompartmental Device Configuration of the New Jersey LCS® Total Knee System

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by DePuy®, Warsaw, IN, for premarket approval, under the Medical Device Amendments of 1976, of the Unicompartmental Device Configuration of the new jersey LCS® Total Knee System. After reviewing the recommendation of the Orthopedic and Rehabilitation Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of October 30, 1992, of the approval of the application.

DATES: Petitions for administrative review by May 26, 1993.

ADDRESSES: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Nirmal K. Mishra, Center for Devices and Radiological Health (HFZ-410), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1036.

SUPPLEMENTARY INFORMATION: On March 25, 1991, DePuy®, Warsaw, IN 46581, submitted to CDRH an application for premarket approval of the Unicompartmental Device Configuration of the new jersey LCS® Total Knee System. The device is indicated for uncemented use in patients over 60 years old undergoing unicompartmental knee surgery for rehabilitating knees when only one condyle has been damaged as a result of noninflammatory degenerative joint disease or its composite diagnoses of osteoarthritis or post-traumatic arthritis.

On August 16, 1991, the Orthopedic and Rehabilitation Devices Panel of the Medical Devices Advisory Committee, an FDA advisory committee, reviewed and recommended approval of the application. On October 30, 1992, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Nirmal K. Mishra (HFZ-410) (address above).

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under part 12 (21 CFR part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before May 26, 1993, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h) (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: April 9, 1993.

Elizabeth D. Jacobson,

Deputy Director for Science, Center for Devices and Radiological Health.

BILLING CODE 4160-01-F

Health Resources and Services Administration

Program Announcement and Proposed Review Criteria and Funding Priority for Grants for Nurse Anesthetist Traineeships for Fiscal Year 1993

The Health Resources and Services Administration (HRSA) announces that applications will be accepted for fiscal year (FY) 1993 Grants for Nurse Anesthetist Traineeships under the authority of section 831(a), title VIII of the Public Health Service (PHS) Act, as amended by the Nurse Education and Practice Improvement Amendments of 1992, title II of the Health Professions Education Extension Amendments of 1992, Public Law 102-408, dated October 13, 1992. Comments are invited on the proposed review criteria and funding priority.

Approximately $800,000 will be available in FY 93 for this program. It is anticipated that 50 competing awards will be made ranging from $16,000 to $30,000.

Previous Funding Experience

Previous funding experience information is provided to assist potential applicants to make better informed decisions regarding submission of an application for this program. In FY 1992, HRSA reviewed 62 applications for Grants for Nurse Anesthetist Traineeships. Of those applications, 100 percent were approved. In FY 1991, HRSA reviewed 64 applications for Grants for Nurse Anesthetist Traineeships. Of those applications, 100 percent were approved. Grant funds were distributed by formula to all approved applicants. Amending legislation requires peer review.

Purpose

Section 831(a) of the Public Health Service Act authorizes the Secretary to award grants to cover the costs of traineeships for licensed registered nurses to become nurse anesthetists. To receive support, programs must meet the requirements of regulations as set forth in 42 CFR 57, subpart F. Federal support can be requested for up to 2 years.

Eligibility

Eligible applicants for Grants for Nurse Anesthetist Traineeships are public or private nonprofit institutions.

The applicant must agree that, in providing traineeships, the institution will give preference to individuals who are residents of health professional shortage areas designated under section 332. The applicant must also agree that traineeships provided with the grant will pay all or part of the costs of (A) the tuition, books, and fees of the program of nursing with respect to which the traineeships is provided; and (B) reasonable living expenses of the individual during the period for which the traineeship is provided.

National Health Objectives for the Year 2000

The Public Health Service urges applicants to submit work plans that address specific objectives of Healthy People 2000. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017-001-00474-0) or Healthy People 2000 (Summary Report; Stock No. 017-001-00473-1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402-9325 (Telephone 202-783-3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthening linkages between U.S. Public Health Service education programs and programs which provide comprehensive primary care services to the underserved.

Review Criteria

The following criteria are proposed for review of applications for this program:

1. Program information including total full-time enrollment, and full-time enrollment beyond the first 12 months of the program; and information on other financial aid available to students.

2. The extent to which the program includes clinical experiences in medically underserved communities.

3. The extent to which the applicant offers didactic and/or clinical courses which address issues of cultural diversity and special needs of minority populations.

4. The extent to which the applicant offers didactic and/or clinical courses which promote the development of cultural competence.

5. Qualifications of the Program Director.

Other Considerations

In addition, the following funding factors may be applied in determining funding of approved applications.

A funding preference is defined as the funding of a specific category or group of approved applications ahead of other categories or groups of approved applications.

A funding priority is defined as the favorable adjustment of aggregate review scores of individual approved applications when applications meet specified criteria.

It is not required that applicants request consideration for a funding factor. Applications which do not request consideration for funding factors will be reviewed and given full consideration for funding.

Statutory Funding Preferences

In making awards of grants under this section, preference will be given to any qualified applicant that—(A) has a high rate for placing graduates in practice settings having the principal focus of serving residents of medically underserved communities; or (B) during the 2-year period preceding the fiscal year for which such an award is sought, has achieved a significant increase in the rate of placing graduates in such settings. Preference will be given only for applications ranked above the 20th percentile of applications that have been recommended for approval by the appropriate peer review group. Additional details about the implementation of this preference were published in the **Federal Register** on February 22, 1993 (58 FR 9570).

Preference will also be given to qualified applicants carrying out traineeship programs whose participants gain significant experience in providing health services at rural health facilities.

Proposed Funding Priority

A funding priority will be given to programs which demonstrate either substantial progress over the last 3 years or a significant experience of 10 or more years in enrolling and graduating students from those minority or low-income populations identified as at-risk of poor health outcomes. This priority is consistent with a HRSA strategy to increase the number of health professionals from minority and other at risk populations, to assure equal access to health professions education for all population groups, and ultimately, to provide a greater volume of health care in underserved areas.

Additional Information

Interested persons are invited to comment on the proposed review criteria and funding priority. The comment period is 30 days. All comments received on or before May 26, 1993 will be considered before the final review criteria and funding priority are established. Written comments should be addressed to: Marla E. Salmon, ScD, RN, FAAN, Director, Division of Nursing, Bureau of Health Professions, Health Resources and Services

individuals who are most in need of

Administration, Parklawn Building, room 9–35, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Nursing, Bureau of Health Professions, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Application Requests

Requests for application materials and questions regarding grants policy and business management issues should be directed to: Sandra Bryant, Grants Management Officer (A22), Nurse Anesthetist Traineeship Program, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8–26, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6915, FAX: (301) 443–6343.

Completed applications should be returned to the Grants Management Branch at the above address.

If additional programmatic information is needed, please contact: Ms. Anastasia Buchanan, Chief, Nursing Practice Resources Section, Division of Nursing, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 9–36, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–5763, FAX: (301) 443–8586.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB Clearance Number is 0915–0060.

The deadline date for receipt of applications is May 28, 1993. Applications will be considered to be "on time" if they are either:

(1) *Received on or before* the established deadline date, or

(2) *Sent on or before* the established deadline date and received in time for orderly processing. (Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.)

Late applications not accepted for processing will be returned to the applicant.

This program, Grants for Nurse Anesthetist Traineeships, is listed at 93.124 in the *Catalog of Federal Domestic Assistance*. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100). This program is not subject to the Public Health System Reporting Requirements.

Dated: March 19, 1993.

Robert G. Harmon,

Administrator.

BILLING CODE 4160–15–P

Program Announcement and Proposed Criteria for Fellows and Proposed Review Criteria for Grants for Nurse Anesthetist Faculty Fellowships for Fiscal Year 1993

The Health Resources and Services Administration (HRSA) announces that applications will be accepted for fiscal year (FY) 1993 Grants for Nurse Anesthetist Faculty Fellowships under the authority of section 831(b), title VIII of the Public Health Service (PHS) Act, as amended by the Nurse Education and Practice Improvement Amendments of 1992, title II of the Health Professions Education Extension Amendments of 1992, Public Law 102–408, dated October 13, 1992. Comments are invited on the proposed criteria for fellows and proposed review criteria.

Approximately $160,000 will be available in FY 1993 for this program. It is anticipated that $160,000 will be available to support 16 competing awards averaging $10,000.

Previous Funding Experience

Previous funding experience information is provided to assist potential applicants to make better informed decisions regarding submission of an application for this program. In FY 1992, HRSA reviewed 9 applications for Grants for Nurse Anesthetist Faculty Fellowships. Of those applications, 100 percent were approved and funded. In FY 1991, HRSA reviewed 13 applications for Grants for Nurse Anesthetist Faculty Fellowships. Of those applications, 100 percent were approved and funded.

Purpose

Section 831(b) of the Public Health Service Act authorizes the Secretary to make grants to provide financial assistance to certified registered nurse anesthetists (CRNA) who are faculty members in accredited programs to enable such nurse anesthetists to obtain advanced education relevant to their teaching functions. Applicants must compete for Federal support annually.

Eligibility

Public and private nonprofit institutions which employ CRNA faculty to teach registered nurses in a full-time accredited nurse anesthetist training program may apply for a Grant for Nurse Anesthetist Faculty Fellowships.

National Health Objectives for the Year 2000

The Public Health Service urges applicants to submit work plans that address specific objectives of Healthy People 2000. Potential applicants may obtain a copy of *Healthy People 2000* (Full Report; Stock No. 017–001–00474–0) or *Healthy People 2000* (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone 202–783–3238).

Education and Service Linkage

As part of its long-range planning, HRSA will be targeting its efforts to strengthening linkages between U.S. Public Health Service education programs and programs which provide comprehensive primary care services to the underserved.

Proposed Criteria for Fellows

It is proposed that to be eligible for traineeship support an individual must be:

1. A United States citizen, noncitizen national, or foreign national who possesses a visa permitting permanent residence in the United States;

2. A certified registered nurse anesthetist with current licensure to practice, and with teaching responsibilities in an accredited nurse anesthetist education program;

3. Enrolled or accepted for enrollment in a formal program of study which leads to a master's or doctoral degree;

4. Proposed for a fellowship in the applicant institution's grant proposal; and

5. A faculty member employed by, or affiliated with, the applicant institution during the period of approved fellowship support.

Policy on Payment of Stipends

The following policy on payment of stipends was established in fiscal year 1990 after public comment (55 FR 36325, dated September 5, 1990) and is being extended in fiscal year 1993.

A faculty member may be paid a stipend for living costs if attending an educational institution as a full-time student; no stipend would be available for a faculty member who is enrolled in part-time study or who is employed on a full-time basis. This policy is designed to target stipend assistance to the individuals who are most in need of such aid.

Proposed Review Criteria

The following criteria are proposed for review of applications for this program:

1. The plan for faculty development at the applicant school, and the relationship of the faculty fellowship request to the overall program plan.

2. The extent to which the described advanced education is relevant to the faculty member's teaching function.

3. The extent to which the faculty practices and/or teaches in medically underserved and rural communities.

4. The justification and reasonableness of the budget request.

5. Qualifications of the Program Director.

Other Considerations

In addition, the following funding factors may be applied in determining funding of approved applications.

A funding preference is defined as the funding of a specific category or group of approved applications ahead of other categories or groups of approved applications.

It is not required that applicants request consideration for a funding factor. Applications which do not request consideration for funding factors will be reviewed and given full consideration for funding.

Statutory Funding Preference

Section 860(e) of the PHS Act, as amended by the Nurse Education and Practice Improvement Amendments of 1992, title II of the Health Professions Education Extension Amendments of 1992, Public Law 102–408, enacted on October 13, 1992, provides for the following statutory preference for this program of Grants for Nurse Anesthetist Faculty Fellowships, as well as for certain other programs under titles VII and VIII of the PHS Act.

Statutory preference will be given to qualified applicants that: (1) have a high rate for placing graduates in practice settings having the principal focus of serving residents of medically underserved communities; or (2) have achieved, during the 2-year period preceding the fiscal year for which such an award is sought, a significant increase in the rate of placing graduates in such settings.

This preference will only be applied to applications that rank above the 20th percentile of applications that have been recommended for approval by peer review groups under section 831(b) of the PHS Act, as amended. Additional details about the implementation of this preference were published in the **Federal Register** on February 22, 1993 (58 FR 9570).

Established Funding Preference

The following funding preference was established in fiscal year 1990 after public comment (55 FR 36325, dated September 5, 1990). A revised version is being extended in fiscal year 1993. The Department determined that this is a more appropriate means to achieve program goals.

A funding preference will be given first to faculty who will be completing degree requirements before or by the end of the funded budget year, second to faculty who are full-time students, and third to faculty who are part-time students.

Additional Information

Interested persons are invited to comment on the proposed criteria for fellows and proposed review criteria. The comment period is 30 days. All comments received on or before May 26, 1993 will be considered before the final criteria for fellows and proposed review criteria are established. Written comments should be addressed to: Marla Salmon, ScD, RN, FAAN, Division of Nursing, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 9–35, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Nursing, Bureau of Health Professions, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Application Requests

Requests for application materials and questions regarding grants policy and business management issues should be directed to: Ms. Sandra Bryant (A–22), Grants Management Specialist, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 8C–26, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443–6915, FAX: (301) 443–6343.

Completed applications should be returned to the Grants Management Branch at the above address.

If additional programmatic information is needed, please contact: Mary S. Hill, R.N., Ph.D., Chief, Nursing Education Practice Resources Branch, Division of Nursing, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, room 9–36, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone: (301) 443–6193, FAX: (301) 443–8586.

The standard application form PHS 6025–1, HRSA Competing Training Grant Application, General Instructions and supplement for this program have been approved by the Office of Management and Budget under the Paperwork Reduction Act. The OMB Clearance Number is 0915–0060.

The deadline date for receipt of applications is June 4, 1993. Applications will be considered to be "on time" if they are either:

(1) *Received on or before* the established deadline date, or

(2) *Sent on or before* the established deadline date and received in time for orderly processing. (Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

This program, Grants for Nurse Anesthetist Faculty Fellowships, is listed at 93.907 in the *Catalog of Federal Domestic Assistance*. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100). This program is not subject to the Public Health System Reporting Requirements.

Dated: March 19, 1993.

Robert G. Harmon,

Administrator.

BILLING CODE 4160–15–P

Health Education Assistance Loan Program; Maximum Interest Rates for Quarter Ending June 30, 1993

Section 701 of the Public Health Service Act (42 U.S.C. 292) authorizes the Secretary of Health and Human Services to establish a Federal program of student loan insurance for graduate students in health professions schools.

Section 60.13(a)(4) of the program's implementing regulations (42 CFR part 60, previously 45 CFR part 126) provides that the Secretary will announce the interest rate in effect on a quarterly basis.

The Secretary announces that for the period ending June 30, 1993, three interest rates are in effect for loans executed through the Health Education Assistance Loan (HEAL) program.

1. For loans made before January 27, 1981, the variable interest rate is 6⅝ percent. Using the regulatory formula

(45 CFR 126.13(a)), in effect prior to

(Catalog of Federal Domestic Assistance No.

VOL 58 ISS 78 AP 26 1993 UMI

(45 CFR 126.13(a)), in effect prior to January 27, 1981, the Secretary would normally compute the variable rate for this quarter by finding the sum of the fixed annual rate (7 percent) and a variable component calculated by subtracting 3.50 percent from the average bond equivalent rate of the 91-day U.S. Treasury bills for the preceding calendar quarter (3.05 percent), and rounding the result (6.55 percent) upward to the nearest ⅛ percent (6⅝ percent).

However, the regulatory formula also provides that the annual rate of the variable interest rate for a 3-month period shall be reduced to the highest one-eighth of 1 percent which would result in an average annual rate not in excess of 12 percent for the 12-month period concluded by those 3 months. Because the average rate of the 4 quarters ending June 30, 1993, is not in excess of 12 percent, there is no necessity for reducing the interest rate. For the previous 3 quarters the variable interest at the annual rate was as follows: 7⅜ percent for the quarter ending September 30, 1992; 6¾ percent for the quarter ending December 31, 1992; and 6¾ percent for the quarter ending March 31, 1993.

2. For variable rate loans executed during the period of January 27, 1981 through October 21, 1985, the interest rate is 6⅜ percent. Using the regulatory formula (42 CFR 60.13(a)) in effect for that time period, the Secretary computes the maximum interest rate at the beginning of each calendar quarter by determining the average bond equivalent rate for the 91-day U.S. Treasury bills during the preceding quarter (3.05 percent); adding 3.50 percent (6.55 percent) and rounding that figure to the next higher one-eighth of one percent (6⅝ percent).

3. For fixed rate loans executed during the period of April 1, 1993 through June 30, 1993, and for variable rate loans executed on or after October 22, 1985, the interest rate is 6⅛ percent. The Health Professions Training Assistance Act of 1985 (Public Law 99–129), enacted October 22, 1985, amended the formula for calculating the interest rate by changing 3.5 percent to 3 percent. Using the regulatory formula (42 CFR 60.13(a)), the Secretary computes the maximum interest rate at the beginning of each calendar quarter by determining the average bond equivalent rate for the 91-day U.S. Treasury bills during the preceding quarter (3.05 percent); adding 3.0 percent (6.05 percent) and rounding that figure to the next higher one-eighth of one percent (6⅛ percent).

BILLING CODE 4160–15–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D–93–1023; FR–3515–D–01]

Chicago Regional Office; Designation of Order of Succession

AGENCY: Department of Housing and Urban Development.

ACTION: Designation of order of succession—Region V, Chicago.

SUMMARY: The Regional Administrator—Regional Housing Commissioner of designating officials who may serve as Action Regional Administrator—Regional Housing Commissioner during the absence, disability or vacancy in the position of the Regional Housing Commissioner.

EFFECTIVE DATE: This designation is effective as of March 22, 1993.

FOR FURTHER INFORMATION CONTACT: Lewis Nixon, Regional Counsel, Chicago Regional Office, 77 West Jackson Blvd, #2604, Chicago, Illinois, 60604–3507, (312) 353–4681. (This is not a toll-free number.)

Designation

Each of the officials appointed to the following positions is designated to serve as Acting Regional Administrator—Regional Housing Commissioner during the absence, disability or vacancy in the position of the Regional Administrator—Regional Housing Commissioner, with all the powers, functions and duties redelegated or assigned to the Regional Administrator—Regional Housing Commissioner: Provided that no official in this designation is authorized to serve as the Regional Administrator—Regional Housing Commissioner unless all other officials whose title precedes his or hers in this designation are unable to act by reason of absence, disability or vacancy.

1. Deputy Regional Administrator
2. Regional Counsel
3. Director of Regional Housing
4. Director of Community Planning Development
5. Director of Regional Administration
6. Director of Regional Fair Housing and Equal Opportunity
7. Director of Regional Indian Programs
8. Director of Regional Public/Housing

This designation supersedes the designation published, July 7, 1986, FR Doc. 86–15140, Filed 7–3–83 (Citation) Vol. 51, No. 129, effective May 28, 1986.

Authority: Delegation of Authority, 27 FR 4319, 1962; section 9(c), Department of Housing and Urban Development Act, 42 U.S.C. 3531 note; and Interim Order II, 31 FR 815, 1966.

Joseph Garaffa,

Acting Regional Administrator, Regional Housing Commissioner, Region V, Chicago Regional Office.

BILLING CODE 4210–01–M

Office of the Assistant Secretary for Administration

[Docket No. N–93–3615; FR–3516–N–01]

Privacy Act of 1974; Proposed Amendment to a System of Records

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of a proposed amendment to an existing system of records.

SUMMARY: Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), HUD proposed to amend a system of records entitled "Single Family Case Files, HUD/DEPT–46." Notice of the system was last published in the **Federal Register** Privacy Act Issuances 1991 Compilation.

The system notice has been amended to include holders of subordinate or junior lien mortgages in the routine use category.

EFFECTIVE DATE: This amendment shall become effective without further notice in 30 calendar days (May 26, 1993) unless comments are received on or before that date which would result in a contrary determination.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communications submitted will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

FOR FURTHER INFORMATION CONTACT: For Privacy Act: Jeanette Smith, Departmental Privacy Act Officer, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410, Telephone Number (202) 708–2374. For Program: John J. Coonts, Director, Office of Insured Single Family Housing, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410, Telephone Number (202) 708–3046. [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: The Department has decided that the system of records should be amended to allow the release of certain information to holders of subordinate or junior mortgages.

A report of the Department's intention to amend the system has been submitted to the Committee on Governmental Affairs of the Senate, the Committee on Government Operations of the House of Representatives, and the Office of Management and Budget (OMB) pursuant to paragraph 4b of Appendix I to OMB Circular No. A–130, "Federal Agency Responsibilities for Maintaining Records About Individuals," dated December 12, 1985.

Authority: 5 U.S.C. 552a, 88 Stat. 1986; sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d)).

The system description is printed below.

Issued at Washington, DC, April 20, 1993.

Michael F. Hill,

Deputy Assistant Secretary for Resource Planning and Operations.

HUD/DEPT–46

SYSTEM NAME:

Single Family Case Files.

SYSTEM LOCATION:

Headquarters and Field Offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have applied for HUD/FHA mortgage insurance in connection with single family housing programs of the Department.

CATEGORIES OF RECORDS IN THE SYSTEM:

Files contain standard records used for day-to-day maintenance of single-family mortgage cases, including daily case control, mortgage servicing, payment records, loan recommendations, information concerning borrower inability to make payments, cancellations, and monies returned. Also, requests for refinancing, income and employment information used in determination of applicant eligibility, insurance documents, sales agreements, conditional and firm commitments, owner requests for appraisals, property descriptions, appraisal and inspection reports; verification of employment and income; credit bureau reports; mortgage note and deed of trust; record of escrow account; correspondence and complaints.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Housing Act as amended, 12 U.S.C. 1702 et seq.

The information collection under the National Housing Act will enable HUD to process applications for HUD mortgage insurance and respond to requests for applications and insurance endorsement information.

The system will assist the Department in complying with requests for information regarding HUD processing of mortgage insurance applications and servicing of Secretary-held mortgages.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

See Routine Uses paragraphs of prefatory statement. Other routine uses: To welfare agencies—for fraud investigation, to VA—for coordination with HUD in processing construction complaints, Congressional delegation—providing information concerning status of complaints, complainants and attorneys representing them—review of complaint file for status information, builders and attorneys representing them—review of complaint file for status information, and to holders of subordinate or junior mortgages—to determine the outstanding balance due to HUD on a Secretary-held mortgage.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are stored in the file folders and computerized tape, disc and drum.

RETRIEVABILITY:

Records are retrieved by name of individual and case file number.

SAFEGARDS:

Records are maintained in lockable file cabinets with access limited to authorized personnel.

RETENTION AND DISPOSAL:

Records are primarily active with some historical data. Inactive files are normally disposed after a two-year period.

SYSTEM MANAGER AND ADDRESS:

Director, Office of Insured Single Family Housing, HSS, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410.

NOTIFICATION PROCEDURE:

For information, assistance, or inquiry about the existence of records, contact the Privacy Act Officer at the appropriate location, in accordance with 24 CFR part 16. A list of all locations is given in Appendix A.

RECORD ACCESS PROCEDURES:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR part 16. If additional information or assistance is required, contact the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A.

CONTESTING RECORD PROCEDURES:

The Department's rules for contesting the contents of records and appealing initial denials, by the individual concerned, appear in 24 CFR part 16. If additional information or assistance is needed in relation to contesting the contents of records, it may be obtained by contacting the Privacy Act Officer at the appropriate location. A list of all locations is given Appendix A. If additional information or assistance is needed in relation to appeals of initial denials, it may be obtained by contacting the HUD Departmental Privacy Appeals Officer, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AK–966–4230–05–P; AA–6697–A]

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that decisions to issue conveyance under the provisions of Sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Tanadgusix Corporation for approximately 28.00 acres. The lands involved are in the vicinity of St. Paul Island, Alaska.

All Streets and Alleys encompassed within Tract A of U.S. Survey No. 4943, Alaska.

A notice of the decisions will be

The following described public land

incidental take permit/application

VOL 58 ISS 78 AP 26 1993 UMI

A notice of the decisions will be published once a week, for four (4) consecutive weeks, in the Anchorage Daily News. Copies of the decisions may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513–7599 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decisions, an agency of the Federal government, or regional corporation, shall have until May 26, 1993 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Ana M. Stafford,

Acting Chief, Branch of Southwest Adjudication.

Farmington District; Realty Action—Termination and Order Providing for Opening of Public Land in San Juan County, New Mexico, and Classification of Land for Recreation and Public Purposes Act

AGENCY: Bureau of Land Management, Farmington District, Interior.

ACTION: Notice of Realty Action. Recreation and public purposes patent of public land in San Juan County, New Mexico.

SUMMARY: On Monday, July 20, 1992, certain lands were classified as being suitable for leasing and later patenting under the Recreation and Public Purposes Act. This is a notice of termination of that classification which was placed on the following land, in the **Federal Register**, Vol. 57, No. 139, Monday, July 20, 1992.

New Mexico Principal Meridian

T. 29 N., R. 13 W.,
Sec. 20, E½NW¼SE¼.
Containing 20 acres, more or less.

This notice also modifies the notice placed in the **Federal Register**, Vol. 57, No. 139, Monday, July 20, 1992. Information concerning that proposal remains correct except for termination of the original classification stated above and the following information.

The following described public land has been determined suitable for classification for patenting to the City of Farmington under the provisions of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 et. seq.).

New Mexico Principal Meridian

T. 29 N., R. 14 W.,
Sec. 9, NE¼NE¼.
Containing 40 acres, more or less.

The land would not be leased prior to being patented to the City of Farmington as stated in the July 20, 1992 notice. The estimated intended time of patent issuance is July 15, 1993.

At 9 a.m. on May 26, 1993, the land classified in the **Federal Register**, Vol. 57, No. 139, Monday, July 20, 1992 shall be open to all forms of appropriation under the public land laws, including the general mining laws subject to valid existing rights, and the requirements of applicable law. All applications received at or prior to 9 a.m. on May 26, 1993 shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Dated: April 20, 1993.

Mike Pool,

District Manager.

BILLING CODE 4310–FB–M

Fish and Wildlife Service

Availability of an Environmental Assessment and Receipt of an Application for an Incidental Take Permit for the Proposed Canyon Ridge Phase A and B Development, Austin, Travis County, TX

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: Beard Family Partnership (Applicant) has applied to the Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a) of the Endangered Species Act. The Applicant has been assigned Permit Number PRT–777083. The requested permit, which is for a period not to exceed 30 years, would authorize the incidental take of the endangered golden-cheeked warbler (*Dendroica chrysoparia*). The proposed take would occur as a result of the construction and operation of a commercial and residential development on a 197.6 acre tract, of which 18.8 acres are already developed, in Austin, Travis County, Texas.

The Service has prepared an environmental assessment (EA) for the incidental take permit application. A determination of jeopardy to the species or a finding of no significant impact (FONSI) will not be made before 30 days from the date of publication of this notice. This notice is provided pursuant to section 10(c) of the Act and National Environmental Policy Act regulations. (40 CFR 1506.6)

DATES: Written comments on the application and draft EA should be received within 30 days of the date of this publication.

ADDRESSES: Persons wishing to review the application may obtain a copy by writing the Austin Field Office, U.S. Fish and Wildlife Service, 611 East Sixth Street, suite 407, Austin, Texas 78701. Persons wishing to review the draft EA may obtain a copy by contacting Joseph E. Johnston, Austin Field Office. Documents will be available by written request for public inspection, by appointment, during normal business hours at the Austin Field Office (8 a.m. to 4:30 p.m.). Written data or comments concerning the application and draft EA should be submitted to Sam Hamilton, State Administrator, Austin Field Office. Please refer to Permit Number PRT–777083 when submitting comments.

Austin Field Office, U.S. Fish and Wildlife Service, U.S. Fish and Wildlife Service, 611 East Sixth Street, suite 407, Austin, Texas 78701

FOR FURTHER INFORMATION CONTACT: Robert B. Simpson at the above Austin Field Office address.

SUPPLEMENTARY INFORMATION: Section 9 of the Act prohibits the "taking" of any endangered species, including the golden-cheeked warbler. However, the Service, under limited circumstances, may issue permits to take endangered wildlife species if such taking is incidental to, and not the purpose of otherwise lawful activities. Regulations governing permits for endangered species are at 50 CFR 17.22.

The Applicant plans to build a commercial and residential development on the northwest side of Austin near the intersection of Ranch to Market Road 2222 and Jester Boulevard in Travis County, Texas. The development will occupy approximately 80.8 acres with the remaining 98 acres proposed as parkland and conservation areas. These activities will permanently eliminate about 71 acres of occupied and/or potential endangered species habitat. The Applicant proposes to mitigate the incidental take via dedicating 98 acres for open space, conducting golden-cheeked warbler monitoring studies, establishing an escrow fund of $40,000 to fund a golden-cheeked warbler population study in the Bull Creek area, and constructing and maintaining a fence between the proposed development and the areas of open space set aside for the golden-cheeked warbler.

The Applicant considered four alternatives but rejected them because they were not economically viable.

James A. Young,

Assistant Regional Director, Ecological Services, U.S. Fish and Wildlife Service, Southwest Region (2), Albuquerque, New Mexico.

[FR Doc. 93–9673 Filed 4–23–93; 8:45 am]

BILLING CODE 4310–55–M

Availability of an Environmental Assessment and Receipt of an Application for an Incidental Take Permit for Valley Community Chapel and Good Shepherd Lutheran Church, Town of Yucca Valley, San Bernardino County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that the Valley Community Chapel and Good Shepherd Lutheran Church (Churches) have applied to the U.S. Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act (Act). The proposed permit would authorize the incidental take of the threatened desert tortoise (*Gopherus agassizii*). The Service also announces the availability of an environmental essessment (EA) for the incidental take permit application. This notice is provided pursuant to section 10(c) of the Act and National Environmental Policy Act regulations (40 CFR 1506.6).

DATES: Written comments on the permit application and EA should be received on or before May 26, 1993.

ADDRESSES: Comments regarding the application or adequacy of the EA should be addressed to Mr. Craig Faanes, Field Supervisor, U.S. Fish and Wildlife Service, Ventura Field Office, 2140 Eastman Avenue, suite 100, Ventura, California 93003.

FOR FURTHER INFORMATION CONTACT: Mr. Ray Bransfield, U.S. Fish and Wildlife Service, 2140 Eastman Avenue, suite 100, Ventura, California 93003 (805–644–1766). Individuals wishing copies of the application or EA for review should immediately contact the above individual.

SUPPLEMENTARY INFORMATION: Section 9 of the Act prohibits the "taking" of a threatened species like the desert tortoise. However, the service, under limited circumstances, may issue permits to take threatened species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for threatened species are in 50 CFR 17.32.

The Churches proposed to construct two places of worship and associated facilities on a 5-acre parcel, which is located in the town of Yucca Valley, San Bernardino County, California. The proposed development would permanently eliminate five acres of threatened species habitat. The Churches propose to minimize and mitigate for this incidental take via several on-site and off-site measures. Such mitigation measures include providing funds to the Desert Tortoise Preserve Committee to acquire off-site desert tortoise habitat within California Department of Fish and Game's crucial habitat for the desert tortoise and to enhance and manage the conveyed lands in perpetuity for the desert tortoise. Incidental take will be minimized from various on-site measures to avoid take of the desert tortoises to the maximum extent possible during construction of the Churches and associated facilities.

The EA considers the environmental consequences of the proposed action and the no action alternative. The Churches considered a third alternative to not develop those portions of the parcel that were inhabited by desert tortoises. The proposed action would result in the loss of a portion of a population of desert tortoises already fragmented by development in and around the town of Yucca Valley. The proposed action would also result in the preservation and enhancement of desert tortoise habitat within high quality desert tortoise habitat that could be better managed for this species. Although the no action alternative would not permit the take of the desert tortoise on the proposed project site, the effects of other activities in the vicinity would likely prevent the long-term survival of desert tortoises at this site. The third alternative was rejected because of the small size of the proposed site.

Dated: April 16, 1993.

William E. Martin,

Acting Regional Director, U.S. Fish and Wildlife Service, Portland, Oregon.

[FR Doc. 93–9620 Filed 4–23–93; 8:45 am]

BILLING CODE 4310–55–M

INTERNATIONAL TRADE COMMISSION

Investigations Relating to Potential Breaches of Administrative Protective Orders, Sanctions Imposed for Actual Violations.

AGENCY: International Trade Commission.

ACTION: Summary of Commission practice relating to administrative protective orders.

SUMMARY: This notice provides a summary by the International Trade Commission (Commission) of its investigations of breaches of administrative protective orders (APOs) issued in connection with investigations under Title VII of the Tariff Act of 1930.

This notice is intended to inform the public of the Commission's experience with APO breaches. The Commission also intends that this notice will educate and alert representatives of parties to Commission proceedings as to some specific types of APO breaches encountered by the Commission. This notice is illustrative only and does not limit the Commission's Rules or standard APO. The notice does not provide an exclusive list of conduct that will be deemed to be a breach of the Commission's APOs, and does not indicate how the Commission will rule in future cases.

FOR FURTHER INFORMATION CONTACT: Charles H. Nall, Esq., Assistant General Counsel for Antidumping and Countervailing Duty Investigations, U.S. International Trade Commission, telephone 202–205–3106.

SUPPLEMENTARY INFORMATION: The discussion below illustrates APO breach investigations that the Commission has conducted during 1992 including a description of sanctions imposed. The Commission will report a summary of its actions in response to violations of Commission APOs periodically in an effort to educate those obtaining access under an APO of the common problems encountered in handling business proprietary information (BPI). This is the third notice of its kind, the first one having been published at 56 FR 4846–4850 (Feb. 6, 1991), and the second at 57 FR 12335 (Apr. 9, 1992). The Commission intends to publish summaries at least annually, and more frequently as appropriate.

As part of the effort to educate practitioners about APO practice, the Commission's Secretary issued in September 1991 An Introduction to Administrative Protective Order Practice in Antidumping and Countervailing Duty Investigations. This

document is available upon request

III. Specific Investigations in Which

document is available upon request from the Office of the Secretary, U.S. International Trade Commission, 500 E. Street, SW., Washington, DC 20436, telephone 202–205–2000.

Section 1332 of the Omnibus Trade and competitiveness Act of 1988 requires the Commission to release under APO to the authorized representatives of interested parties in dumping and countervailing duty investigations the business proprietary information (BPI) collected by the Commission in the course of such investigations. 19 U.S.C. 1677f. The Commission has implemented procedures governing the release of BPI under APO. 19 CFR 207.7. The APO rules were amended effective April 1991. 56 FR 11,918 (March 21, 1991). Among other changes, those rules amendments provided parties with an extra day in which to file the public version of certain submissions containing BPI. This "one day rule," which also permits correction of the bracketing of BPI during that extra day, was intended to reduce the incidence of APO breaches caused by inadequate bracketing and improper placement of BPI. The Commission urges parties to make use of the rule.

The rules provide that the Secretary of the Commission will provide BPI only to "authorized applicants" who agree to be bound by the terms and conditions of an APO. The standard APO form for antidumping and countervailing duty investigations issued by the Commission requires the applicant to swear that he or she will:

(1) Not divulge any of the BPI obtained under the APO and not otherwise available to him, to any person other than

(i) Personnel of the Commission concerned with the investigation,

(ii) The person or agency from whom the BPI was obtained,

(iii) A person whose application for disclosure of BPI under the APO his been granted by the Secretary, and

(iv) Other persons, such as paralegal and clerical staff, who: (a) Are employed or supervised by and under the direction and control of the authorized applicant or another authorized applicant in the same firm whose application has been granted: (b) have a need thereof in connection with the investigation; (c) are not involved in competitive decisonmaking for an interested party which is a party to the investigation; and (d) have submitted to the Secretary a signed Acknowledgment for Clerical Personnel in the form attached hereto (the authorized applicant shall also sign such acknowledgment and will be deemed responsible for such persons' compliance with the APO);

(2) Use such BPI solely for the purposes of the above-captioned Commission investigation or for judicial or binational panel review of such Commission investigation;

(3) Not consult with any person not described in paragraph (1) concerning BPI disclosed under the APO without first having received the written consent of the Secretary and the party or the attorney of the party from whom such BPI was obtained;

(4) Whenever materials (*e.g.*, documents, computer disks, etc.) containing such BPI are not being used, store such material in a locked file cabinet, vault, safe, or other suitable container (N.B.: storage of BPI on so-called hard disk computer media is to be avoided, because mere erasure of data from such media may not irrecoverably destroy the BPI and may result in violation of paragraph C of the APO);

(5) Serve all materials containing BPI disclosed under the APO as directed by the Secretary and pursuant to § 207.7(f) of the Commission's rules;

(6) Transmit each document containing BPI disclosed under the APO:

(i) With a cover sheet identifying the document as containing BPI,

(ii) With all BPI enclosed in brackets and each page warning that the document contains BPI,

(iii) If the document is to be filed by a deadline, with each page marked "Bracketing of BPI not final for one business day after date of filing," and

(iii) If by mail, within two envelopes, the inner one sealed and marked "Business Proprietary Information—To be opened only by [name of recipient]", and the outer one sealed and not marked as containing BPI;

(7) Comply with the provisions of the APO and § 207.7 of the Commission's rules;

(8) Make true and accurate representations in the authorized applicant's application and promptly notify the Secretary of any changes that occur after the submission of the application and that affect the representations made in the application (*e.g.*, change in personnel assigned to the investigation);

(9) Report promptly and confirm in writing to the Secretary any possible breach of the APO; and

(10) Acknowledge that breach of the APO may subject the authorized applicant and other persons to such sanctions as the Commission deems appropriate, including the administrative sanctions set out in the APO.

Breach of the protective order may subject an applicant to:

(1) Disbarment from practice in any capacity before the Commission along with such person's partners, associates, employer, and employees, for up to seven years following publication of a determination that the order has been breached;

(2) Referral to the United States Attorney;

(3) In the case of an attorney, accountant, or other professional, referral to the ethics panel of the appropriate professional association; and

(4) Such other administrative sanctions as the Commission determines to be appropriate, including public release of or striking from the record any information or briefs submitted by, or on behalf of, the offender or the party represented by the offender, and denial of further access to business proprietary information in the current or any future investigations before the Commission.

Commission employees are not signatories to the Commission's APOs and do not obtain access to BPI through the APO procedure. Consequently, they are not subject to the APOs' requirements with respect to the handling of BPI. However, Commission employees are subject to strict statutory and regulatory constraints concerning BPI, and face severe penalties for noncompliance. See 18 U.S.C. 1905; Title 5, U.S. Code; and Commission personnel policies implementing the statutes. Although the Privacy Act (5 U.S.C. 552a) limits the Commission's authority to disclose personnel actions against agency employees, this should not lead the public to conclude that no such actions have been taken.

In April of 1989, the Commission delegated authority to the Secretary for the issuance of letters of inquiry to suspected breachers of APOs in Title VII investigations. If, based on the response made to such a letter of inquiry, the Commission determines that a breach has occurred, the Commission issues a second letter asking the breacher to address the questions of mitigating circumstances and possible sanctions. The Commission then decides the appropriate sanction. However, in two cases in 1992, the Commission determined that breaches had occurred but that sanctions were not warranted, and therefore found it unnecessary to issue a second letter concerning what sanctions might be appropriate. The Commission retains sole authority to make final determinations regarding the existence of a breach and the appropriate sanction if a breach occurred.

The records of Commission investigations of APO breaches are not publicly available and are exempt from disclosure under the Freedom of Information Act, 5 U.S.C. 552. Section 135(b) of the Customs and Trade Act of 1990, 19 U.S.C. 1677f(g).

I. Breach Investigations Generally

The breach most frequently investigated by the Commission involves paragraph (1) of the standard APO which prohibits the dissemination of BPI to unauthorized persons. Such dissemination usually occurs as the result of failure to delete BPI from public versions of documents filed with the Commission. Other breaches in past years have involved: The failure to properly bracket BPI in proprietary documents filed with the Commission; the failure to immediately report known violations of an APO; improper or inadequate application for access to BPI; failure to adequately supervise junior attorneys or non-legal personnel in the handling of BPI in certain circumstances; and failure to destroy confidential information in a timely manner.

II. Sanction Determinations

Sanctions for APO violations serve two basic interests: (a) Preserving the confidence of submitters of BPI in the Commission as a reliable protector of BPI, and (b) disciplining breachers and deterring future violations. As the Conference Report to the Omnibus Trade and Competitiveness Act of 1988 observed, "the effective enforcement of limited disclosure under administrative protective order depends in part on the extent to which private parties have confidence that there are effective sanctions against violation." H.R. Conf. Rep. No. 576, 100th Cong., 1st Sess. 623 (1988). The Commission has worked to develop consistent jurisprudence, not only in determining whether a breach has occurred, but also in selecting an appropriate sanction. In determining the appropriate sanction, the Commission generally considers mitigating factors such as whether the breach was unintentional, lack of prior breaches committed by the breaching party, the mitigating measures taken by the breaching party, the promptness with which the breaching party reported the violation to the Commission, and any relevant circumstances peculiar to the situation.

III. Specific Investigations in Which Breaches Were Found

The following case studies are presented to illustrate the various types of APO breaches found by the Commission and the sanctions imposed by the Commission. In addition, the case studies discuss the factors considered by the Commission as mitigating the sanctions imposed in particular instances. While each situation is slightly different, the Commission has pursued a consistent jurisprudence over the period that the current APO procedures have been in effect. The Commission has not included some of the specific facts in the descriptions of investigations where such disclosure could reveal the identity of a particular breacher. Thus, in some cases, apparent inconsistencies in the facts set forth in this notice result from the Commission's inability to disclose particular facts more fully.

The APO summary for 1991 discussed 26 cases, in 7 of which the Commission found that a breach had occurred. The following discussion covers the 3 cases in 1992 in which violations were found. The discussion also covers one case in 1992 involving a violation of the "one day rule" as well as a breach of the APO. In general, the Commission has experienced a decline in APO breaches, apparently due to practitioners' increasing familiarity with the Commission's rules and jurisprudence, as well as to the April 1991 rules amendments, including the "one day rule."

Case 1: An attorney (1) failed to delete significant amounts of BPI obtained under APO from the public version of a brief, and (2) made BPI available to other attorneys in the same firm who had not applied for or been granted access to BPI under the APO. The breaches were not discovered by the attorney but were found by the Secretary to the Commission. The Commission found that the attorney had breached the APO in an egregious manner, but that mitigating circumstances existed because this was the attorney's first appearance before the Commission, the attorney's firm did not practice regularly before the Commission, and the breaches were not willful. The attorney was given a private letter of reprimand and was instructed that, in the attorney's next appearance before the Commission in a case involving BPI, the attorney would be required to provide a written description of the steps taken to insure that BPI was adequately protected, including (1) reading the APO handbook, (2) requiring the firm's other attorneys to read the handbook, (3) arranging for keeping BPI documents in a locked container, and (4) careful proofreading of documents to insure that all BPI is bracketed in confidential documents and redacted in public versions.

Case 2: Two attorneys filed with the Commission a document that contained BPI obtained under APO but that neither bracketed such BPI nor identified the document as containing BPI. The Commission found the following to be mitigating circumstances: the breach was inadvertent; the document was intended only for use with a confidential brief so that only persons authorized to see the document received copies of it; and the attorneys acted expeditiously to correct their error. The Commission determined that a breach had occurred, but that, in view of the mitigating circumstances in the case, a sanction was not warranted. Both attorneys received letters of warning urging them to use greater caution in the future.

Case 3: An attorney failed to delete BPI obtained under APO from the public version of a brief. The Commission found that the attorney had breached the APO. Two colleagues were not found to have breached, because they apparently had not participated in preparing their brief. Mitigating circumstances were found in the fact that the BPI was subsequently made public by the submitter. The breaching attorney was not sanctioned but received a letter of warning.

Case 4: An attorney violated Commission rule 207.3(c) (the "one day rule") by submitting a "corrected" version of a postconference brief containing numerous substantive and editorial changes from the version filed the previous day. The same attorney and an associate attorney under his supervision also breached the APO by failing to serve the original confidential version of the brief on counsel to the other parties.

As discussed above, the "one day rule" permits correction of the bracketing of BPI the day after the confidential version of the document is filed, but specifically states: "No changes to the document other than bracketing and deletion of business proprietary information are permitted after the deadline." The Commission issued a private letter of reprimand to the attorney for the APO breach and violation of the "one day rule." The Commission also suspended his privilege to use that rule the next time he appears before the Commission in a Title VII investigation. Although violation of the "one day rule" is not an

APO breach, the Commission considers

Washington, DC 20436, telephone 202–

DEPARTMENT OF JUSTICE

VOL 58 ISS 78 AP 26 1993 UMI

APO breach, the Commission considers it appropriate to report this case here because of the extensive use and important role of the "one day rule" in helping reduce the number of APO breaches. As for the associate attorney, the Commission determined to take no formal disciplinary action against him, although it did issue a warning letter. Among the mitigating factors that the Commission considered was the fact that the associate attorney had been instructed not to serve the original postconference brief on the other parties.

IV. Investigations in Which No Breach Was Found

During 1992, the Commission completed 11 investigations in which no breach was found. The reasons for a finding of no breach included:

(1) The information allegedly mishandled by the alleged breacher considered entirely of information pertaining to the alleged breacher's own client;

(2) The information in question was not BPI; and

(3) The information in question was available to the alleged breacher from sources other than disclosure under the APO.

By order of the Commission.

Issued: April 19, 1993.

Certain Cutting Tools for Flexible Plastic Conduit and Components Thereof; Notice of Commission Determination Not To Review an Initial Determination Amending the Complaint and Notice of Investigation To Delete a Claim

AGENCY: International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review the presiding administrative law judge's (ALJ) initial determination (ID) (Order No. 12) in the above-captioned investigation amending the notice of investigation to delete the claim that respondents have infringed U.S. Letters Patent Des. 266,736.

FOR FURTHER INFORMATION CONTACT: Robin L. Turner, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202–205–3103.

SUPPLEMENTARY INFORMATION: On April 2, 1993, the ALJ issued an ID granting a motion by complaints Dawn Industries, Inc., Dextel Inc., and Duane Robertson to amend the complaint and notice of investigation to delete a claim that respondents have infringed on U.S. Letters Patent Des. 266,736. No petitions for review or government agency comments were filed.

This section is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and section 210.53(h) of the Commission's Interim Rules of Practice and Procedure (19 CFR 210.53(h)).

Copies of the nonconfidential version of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone 202–205–2000. Hearing-impaired persons are advised that information on the matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810.

Information Collections Under Review

April 20, 1993.

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;
(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;
(3) How often the form must be filled out or the information is collected;
(4) Who will be asked or required to respond, as well as a brief abstract;
(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;
(6) An estimate of the total public burden (in hours) associated with the collection; and,
(7) An indication as to whether section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jefferson B. Hill on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Don Wolfrey, on (202) 514–4115 or facsimile: (202) 514–1534. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Don Wolfrey, DOJ Clearance Officer, SPS/JMD/850 WCTR, Department of Justice, Washington, DC 20530.

New Collection

(1) Dedicated Commuter Lane Usage Survey
(2) Immigration and Naturalization Service
(3) As Needed.
(4) Individuals or households. The Immigration and Naturalization Service will pilot test various fee-driven alternative inspection methods at land borders. This survey of the general public crossing the border will assist in the evaluation, planning and implementation of these pilot projects at selected locations.
(5) 100,000 annual responses at .083 hours per response
(6) 8,300 annual burden hours
(7) Not applicable under 3504(h).

Public comment on these items is encouraged.

Dated: April 20, 1993.

Don Wolfrey,

Department Clearance Officer, Department of Justice.

BILLING CODE 4410–10–M

[AAG/A Order No. 74–93]

Privacy Act of 1974; New System of Records

Pursuant to the Privacy Act of 1974 (5 U.S.C. 552a), notice is given that the Department of Justice, National Drug Intelligence Center (NDIC), proposes to establish a new system of records entitled, "National Drug Intelligence Center Data Base, JUSTICE/NDIC–001." A rule document promulgating exemptions for the system appears in the Proposed Rules Section of today's **Federal Register**.

Title 5 U.S.C. 552a(e)(4) and (11) provide that the public be provided a 30-day period in which to comment on the routine uses of a new system; the office of Management and Budget (OMB), which has oversight responsibilities under the Act, requires that it be given a 60-day period in which to review the system.

Therefore, please submit any comments by May 26, 1993. The public, OMB, and Congress are invited to send written comments to Patricia E. Neely, Staff Assistant, Systems Policy Staff, Information Resources Management, Justice Management Division, Room 850, Washington Center Building, Department of Justice, Washington, DC. 20530.

In accordance with Privacy Act requirements, the Department of Justice has provided a report on the proposed system to OMB and the Congress.

Dated: April 6, 1993.

Stephen R. Colgate,

Assistant Attorney General for Administration.

JUSTICE/NDIC–001

SYSTEM NAME:

National Drug Intelligence Center Data Base (JUSTICE/NDIC–001).

SYSTEM LOCATION:

The primary location of the system will be the National Drug Intelligence Center, 319 Washington Street, 5th Floor, Johnstown, PA 15907. In addition, information in the NDIC Data Base will be retrieved at the NDIC Washington area office, located at Suite 1001, 8201 Greensboro Drive, McLean, VA 22102.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Individuals suspected of, charged with, or convicted of, illicit narcotic trafficking or activities related thereto.

2. Non-implicated persons with pertinent knowledge of some circumstances or aspect of a case or record subject; such persons may include witnesses or associates of record subjects.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records may contain any information, including but not limited to personal identification data, which may assist the National Drug Intelligence Center (NDIC) in fulfilling its responsibilities to collect, consolidate, analyze, and coordinate multi-source drug intelligence data from all national security and law enforcement agencies; to produce information regarding the structure, finances, communications and activities of drug trafficking organizations and their memberships; and to make such information available, as appropriate, to domestic and foreign law enforcement agencies and to agencies of the U.S. foreign intelligence community. Information will include any data that may assist law enforcement agencies and agencies of the U.S. foreign intelligence community in executing their responsibilities with respect to counterdrug enforcement, including identification, location, arrest and prosecution of persons for narcotics trafficking and related activities and civil proceedings related to such enforcement activities. Such information may be derived from investigative and intelligence reports prepared by law enforcement agencies and agencies of the U.S. foreign intelligence community, from documents or other record media seized by law enforcement agencies and made available to NDIC for exploitation, and publicly available information such as media reports and commercially acquired data bases. Records may also include information on persons not implicated in narcotics trafficking or related activities, but with pertinent knowledge of some circumstance of a case or record subject. Such records may contain any information, including but not limited to personal identification data, which may assist NDIC in discharging its responsibilities generally, e.g., information which may assist in identifying and locating such persons.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Sec. 9078, Pub. L. 102–396.

PURPOSE(S):

This system of records will allow the NDIC to collect and consolidate information from multiple sources, including law enforcement agencies and agencies of the U.S. foreign intelligence community, in order to be able to produce a more complete picture of the activities of drug trafficking organizations and their memberships than any one such agency can produce by itself. The system will enable NDIC to provide the results of its analyses and other relevant information acquired by it, to Federal, State, and local law enforcement and regulatory agencies, to certain foreign law enforcement agencies, and to agencies of the U.S. foreign intelligence community, to assist them in fulfilling their responsibilities with respect to enforcement of law related to drug trafficking, including civil proceedings related to enforcement of such laws.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Relevant information contained in this system of records may be disclosed as follows:

1. To the appropriate Federal, State, local, or foreign agency responsible for investigating, enforcing, or implementing a statute, rule, regulation, or order, to the extent that the information is relevant to the recipient's law enforcement function.

2. To the Department of Defense, and components thereof, to support its role in the detection and monitoring of the transportation of illegal drugs into the United States or such other roles in support of counterdrug law enforcement as may be permitted by law.

3. To individuals or organizations, including Federal, State, local or foreign agencies, in the course of counterdrug law enforcement efforts, to the extent

VOL 58 ISS 78 AP 26 1993 UMI

necessary to elicit information pertinent to counterdrug law enforcement.

4. To the news media, to the extent releasable in accordance with 28 CFR 50.2, and provided, in each case, that release of the specific information in that situation would not constitute an unwarranted invasion of personal privacy.

5. To the Department of State, and to agencies of the U.S. foreign intelligence community, to further the efforts of those agencies with respect to the national security and foreign affairs aspects of international drug trafficking.

6. To Members of Congress, or their staffs acting upon the Members' behalf, when they request the information on behalf of and at the request of the individuals who are the subjects of the respective records.

7. To the National Archives and Records Administration and the General Services Administration in records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored on computer at NDIC's headquarters in Johnstown, Pennsylvania and retrieved both there and at NDIC's Washington area office. Some information, including investigative files and information incorporated into analytical products, may be retained in hard copy format in file folders.

RETRIEVABILITY:

Access to individual records is gained by use of data retrieval capabilities of computer software acquired and developed for processing of information in the NDIC Data Base. Data will be retrieved through a number of criteria, including personal identifying information such as name.

SAFEGUARDS:

The NDIC Data Base is protected by both physical security methods and dissemination and access controls. Fundamental in all cases is that all access to information is limited by a system of password and access control to those NDIC personnel or representatives of other agencies with a demonstrated and lawful need to know the information in order to perform assigned functions. All NDIC personnel capable of accessing the NDIC Data Base will have successfully passed a background investigation, and access by such persons will be limited to those having a "need to know." All accesses to the data base, both internal and external, will be electronically recorded, and such records will be reviewed periodically to ensure against inappropriate access. The NDIC Data Base will be retained within a 24-hour guarded facility which is secured by intruder alarms and other appropriate physical security devices.

RETENTION AND DISPOSAL:

A schedule for the retention and disposal of these records is under review and development.

SYSTEM MANAGER AND ADDRESS:

Director, National Drug Intelligence Center, 319 Washington Street, 5th Floor, Johnstown, PA 15907.

NOTIFICATION PROCEDURES

Inquires should be addressed to: Chief, Administration Branch, National Drug Intelligence Center, 319 Washington Street, 5th Floor, Johnstown, PA 15907.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES

Same as above.

RECORD SOURCE CATEGORIES:

Information provided by Federal, State, local and foreign law enforcement agencies; agencies of the U.S. foreign intelligence community; and open sources, such as broadcast and print media and publicly available data bases.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT

The Attorney General has exempted this system from subsections (c)(3) and (4); (d); (e)(1), (2) and (3); (e)(4)(I); (e)(5) and (8); and (g) pursuant to 5 U.S.C. 552a(j)(2). In addition, the Attorney General has exempted the system from subsections (c)(3), (d), (e)(1) and (e)(4)(I) pursuant to 5 U.S.C. 552a(k) (1) and (2). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c), and (e) and have been published in the **Federal Register**.

BILLING CODE 4410-02

NATIONAL SCIENCE FOUNDATION

Collection of Information Submitted For OMB Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, the National Science Foundation is posting a notice of information collection that will affect the public. Interested persons are invited to submit comments by May 7, 1993. Comments may be submitted to: (A) *Agency Clearance Officer.* Herman G. Fleming, Division of Personnel and Management, National Science Foundation; Washington, DC 20550, or by telephone (202) 357-7335. Copies of materials may be obtained at the above address or telephone. Comments may also be submitted to:

(B) *OMB Desk Officer.* Officer of Information and Regulatory Affairs, ATTN: Dan Chenok, Desk Officer, OMB, 722 Jackson Place, room 3208, NEOB, Washington, DC 20503.

Title: Instructional Materials Development Program Principal Investigators

Affected Public: Individuals

Respondents/Reporting Burden: 486 respondents: 1 hour per response.

Abstract: The survey of principal investigators of Instructional Materials Development program awards is needed in order to develop an on-line, public use database that will provide information on the subject matter, instructional methods, and other characteristics of the materials developed to teachers, educational administrators and researchers throughout the country. A report on these materials will be provided to Congress.

Dated: April 20, 1993.

Herman G. Fleming,

Reports Clearance Officer.

BILLING CODE 7555-01-M

Advisory Panel for Neuroscience; Meeting Amendments

The following announcement is being amended to reflect changes in meeting dates and times. The notice for this meeting originally appeared in the April 8, 1993 edition of the **Federal Register**, Vol. 58, No. 66, p. 18232.

Name: Advisory Panel for Neuroscience.

Date and Time: April 28-29, 1993, 9 a.m. to 5 p.m.

Place: Room 1243, 1800 G Street NW., Washington, DC.

Type of Meeting: Part-Open.

Contact Person: Dr. Sanya Springfield, Program Director, Neuronal and Glial Mechanisms, Division of Integrative Biology and Neuroscience, room 321, National Science Foundation, 1800 G Street NW., Washington, DC 20550. Telephone: (202) 357-7471.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: Open session: April 29, 1993; 3 p.m. to 5 p.m. To discuss research trends and opportunities in Neuroscience.

Closed session: April 28, 1993; 9 a.m. to 5 p.m. and April 29, 1993; 9 a.m. to 3 p.m. To review and evaluate Neuronal and Glial Mechanisms proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: April 21, 1993.

M. Rebecca Winkler,

Committee Management Officer.

[FR Doc. 93-9625 Filed 4-23-93; 8:45 am]

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Abnormal Occurrences for Fourth Quarter CY 1992 Dissemination of Information

Section 208 of the Energy Reorganization Act of 1974, as amended, requires the NRC to disseminate information on abnormal occurrences (i.e., unscheduled incidents or events that the Commission determines are significant from the standpoint of public health and safety.) During the fourth quarter of CY 1992, the following incidents at NRC licensees were determined to be abnormal occurrences (AOs) and are described below, together with the remedial actions taken. The events are also being included in NUREG-0090, Vol. 15, No. 4 ("Report to Congress on Abnormal Occurrences: October-December 1992"). This report will be available at the NRC's Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555 about three weeks after the publication date of this **Federal Register** Notice.

Nuclear Power Plants

92-12 *Operation With Degraded Steam Generator Tubs at Arkansas Nuclear One Unit 2 and McGuire Nuclear Station Units 1 and 2*

One of the AO reporting guidelines notes that a major degradation of fuel integrity, primary coolant pressure boundary, or primary containment boundary can be considered an abnormal occurrence.

Date and Place—March 9, 1992; Arkansas Nuclear One Unit 2, a Combustion Engineering-designed pressurized-water reactor (PWR), operated by Entergy Operations, Incorporated and located near Russelville, Arkansas; and January 16, 1992, McGuire Nuclear Station Units 1 and 2, Westinghouse-design PWRs, operated by Duke Power Company, and located in Mecklenburg County, North Carolina.

Nature and Probable Consequences—The NRC received notifications from two nuclear power plant licensees indicating that some of their steam generator (SG) tubes have degraded to a point where they no longer have adequate margin for structural integrity. SG tubing constitutes more than half of the reactor coolant pressure boundary. Thus, its integrity is important in minimizing the loss of primary coolant and release of radioactive fission products. Requirements for periodic inservice inspection of the SG tubes have been established in the plant Technical Specifications to ensure that the SG tubes retain adequate structural margin as defined in NRC Regulatory Guide 1.121, "Bases for Plugging Degraded PWR Steam Generator Tubes." The structural margins that a SG tube must possess at the end of an operating cycle, as described in the NRC Regulatory Guide, take into account inspection measurement uncertainty and flaw growth between inspections.

A partial inservice of the SG tubing is typically performed every refueling outage with eddy current probes. During the past year, two utilities identified SG tubes that failed to satisfy the structural margin criteria of NRC Regulatory Guide 1.121. These SG tubes did not retain adequate structural margins to ensure their integrity for the full range of normal operating, transient, and postulated accident conditions.

On March 9, 1992, Arkansas Nuclear One Unit 2 (ANO-2) shut down upon detecting a primary-to-secondary coolant leak of 360 gallons per day, which is approximately half of its Technical Specifications limit. Entergy Operations, Incorporated, the licensee for ANO-2, conducted an eddy current inspection of the SG tubing and identified the location of the leak. The licensee reviewed the eddy current test data from the previous inspection (April 1991), and found that this tube had exhibited a flaw-like indication at that time. In addition, the licensee identified six additional tubes that had been incorrectly analyzed in 1991. To further characterize the degradation mechanism affecting this particular location on the SG tubes, the licensee removed several tube sections from the SG for analysis.

On August 7, 1992, the licensee for ANO-2 reported to the NRC that for three of the tubes, the examination revealed circumferentially oriented intergranular stress corrosion cracking (IGSCC) beginning on the outer surface of the tubes. The cracks extended 360 degrees around each of the tubes and had average depths ranging between 88 and 94 percent of the tube wall thickness. Due to the extent of this degradation, these SG tubes did not retain adequate structural margins, consistent with NRC Regulatory Guide 1.121, at the time of the March 1992 shutdown of ANO-2.

On January 16, 1992, McGuire 1 shut down after the primary-to-secondary coolant leak rate approached 250 gallons per day. The licensee subsequently identified the source and location of the leak using eddy current techniques. The licensee reviewed the eddy current test data from the previous inspection (October 1991) for the leaking tube, and found that this tube had exhibited a flaw indication at that time. This tube, however, was not removed from service as required by the plant's Technical Specifications due to improper classification and administrative handling of the indication. In addition, the licensee identified an additional indication on this tube that had not been identified in the previous inspection of October 1991. The licensee, therefore, reviewed all of the eddy current data from the 1991 inspection. Since McGuire 2 was in a scheduled refueling outage at this time, the licensee decided to further characterize the degradation mechanism affecting this particular location of the SG tubing by removing several tube sections for analysis. The eddy current indications in these sections exhibited similar characteristics to those in the Unit 1 SGs.

In April 1992, Duke Power reported the preliminary results from the examination of the SG tube segments from McGuire 2 to the NRC. One tube was found to contain axially oriented IGSCC beginning on the outer surface of the tube. The crack was approximately 1.4 inches long with an average through-wall depth of 72 percent of the wall thickness. Furthermore, the burst pressure for this tube section was lower than specified in NRC Regulatory Guide 1.121. Both McGuire 1 and 2 were shut down in May 1992 for further examination of the SG tubing. At this time, several tube sections were removed from the Unit 1 SGs, including the tube that had leaked and was subsequently plugged in January 1992. The destructive examination of a segment of the tube that leaked in January 1992 revealed an axially oriented stress corrosion crack initiating from the outer surface of the tube. This tube was found not to retain structural integrity consistent with the NRC Regulatory Guide.

VOL
58
ISS
78
AP
26
19 93
UMI

A previous SG tube failure, in this case a SG tube rupture, occurred at McGuire Unit 1 in March of 1989, and was reported as an abnormal occurrence in NUREG–0090, Vol. 12, No.1, "Report to Congress on Abnormal Occurrences: January–March 1989."

Cause or Causes—The licensee for ANO–2 attributed the missed eddy current flaw indications from the 1991 inspection to: (1) Lack of training for the eddy current data analysts in guidelines for SG tube damage mechanisms specific to ANO–2 and similar sites; (2) lack of a performance demonstration test by the data analysts using actual site data; and (3) inherent difficulties in analyzing signals at the location where the defect was found caused by interference from surrounding structures, the geometry of the tube at this location, and deposits on the SG tubes.

Although the above may have been contributing factors, the NRC staff believes inappropriate test probes were used for tube locations susceptible to circumferential cracking. Circumferential cracks can only be detected satisfactorily with specialized probes, as discussed in NRC Information Notice 90–49, "Stress Corrosion Cracking in PWR Steam Generator Tubes," and in NRC Information Notice 92–80, "Operation with Steam Generator Tubes Seriously Degraded." During the ANO–2 SG tube inspections in 1991, the licensee did not use the type of probe discussed in Information Notice 90–49. However, during subsequent plant outages in 1992, the licensee did use an appropriate probe for the detection of circumferential cracking.

The primary-to-secondary leakage observed at McGuire 1 in January 1992 was attributed primarily to a SG tube that had not been removed from service during the previous refueling outage (October 1991) as required by the plant's Technical Specifications. The failure to plug the tube to remove it from service was due to misclassification of the tube's flaw indication during the data analysis process. Althouhg the tube was reinspected during the process with a more sensitive probe, the process still failed to assure that the tube was plugged.

Actions Taken to Prevent Recurrence

Licensee—The licensee for ANO–2 has taken several corrective steps to address the causes of the missed eddy current flaw indications including: (1) Enhancement of the eddy current guidelines; (2) implementation of an analyst training and performance demonstration program; (3) broadening of the SG tube inspection scope; and (4) the use of a probe appropriate for the detection of circumferential cracking. The licensee plans to perform a mid-cycle inspection of SG tubes beginning at the end of April 1993.

As a result of the missed eddy current indications during the 1991 outage at McGuire 1, Duke Power Company took several corrective steps to address the causes of the missed indications including: (1) Re-evaluation of eddy current data from the previous outage using enhanced guidelines; (2) implementation of administrative controls to address the manner in which information on SG tubes is conveyed for tub disposition; and (3) reducing the work schedule of the eddy current data analysts. As a result of the metallographic examination of the tube sections in April 1992, the licensee: (1) Further enhanced their eddy current guidelines and reinspected the SGs; (2) performed additional training; and (3) administratively lowered the allowable amount of primary-to-secondary leakage.

NRC—NRC Information Notice 92–80 "Operation with Steam Generator Tubes Seriously Degraded" was issued on December 7, 1992 to inform licensees of findings from SG tube inspections and investigations at ANO–2. As a result, recipients can consider, as appropriate, actions to avoid similar problems at their facilities. The generic implications of undetected degradation of SG tubes will continue to be actively studied by the NRC.

* * * * *

92–13 *Engineered Safety Features Actuation System Design Deficiency—Single Failure Vulnerability at Millstone Power Station Unit 2*

One of the AO reporting guidelines notes that a major degradation of essential safety-related equipment can be considered an abnormal occurrence.

Date and Place—July 6, 1992; Millstone Unit 2, a Combustion Engineering-designed pressurized water reactor (PWR), operated by Northeast Nuclear Energy Company and located in New London County, Connecticut.

Nature and Probable Consequences—On July 6, 1992, during a planned outage at the Millstone Nuclear Power Station, Unit 2, with the fuel removed from the reactor pressure vessel and stored in the spent fuel pool, the licensee, Northeast Nuclear Energy Company, was preparing to replace two vital inverters. Millstone Unit 2 uses four inverters, two on each vital dc bus, to power two trains of engineered safety features actuation system (ESFAS), comprised of four sensor cabinets and two actuation cabinets. Operators removed power from one actuation train, which caused a false loss of normal power signal and a false start signal for the emergency core cooling system. The effect of this action was similar in consequence to the complete loss of one of the two vital dc buses.

One emergency diesel generator (EDG) started and tied onto the bus. The second EDG did not start because it was out of service for maintenance. After the one EDG started, the safety loads failed to sequence onto the bus because of a continuous false load shed signal. Operators recovered from the event by stopping the EDG and restoring power to one of the sensor cabinets. This action removed the false loss of power signal and thus the load shed signal.

The licensee reviewed the event and concluded that an unblocking feature of the automatic test insertion (ATI) system had caused the continuous load shedding signal. The ATI system, a continuous, on-line, logic tester that is common for both trains, was still energized and permitted the spurious loss of power signal to continue to shed the loads.

In reviewing the event, the licensee determined that the ESFAS could also cause other unintended actions under certain power supply failure conditions. These automatic actions are not related to the ATI modification.

(1) If power is lost to either one of the two dc vital buses, both the safety injection actuation signal and sump recirculation actuation signal would be simultaneously initiated. The recirculation actuation signal would result in tripping all low pressure injection pumps. Also, the spurious sump recirculation actuation signal would cause one of the containment sump outlet valves to open.

(2) If power was lost only to the sensor cabinets in one actuation train, both containment sump outlet valves would open. If this occurred during a loss-of-coolant accident, high pressure in containment could shut down refueling water storage tank check valves, inhibiting flow to all emergency coolant injection pumps.

(3) The loss of all dc power to one actuation train would cause a power operated relief valve in the other train to open. In addition, when control power alone is lost to only the sensor cabinets in a single actuation train, spurious high pressurizer pressure signals would cause the relief valves in both trains to open. Both cases would result in a loss of primary coolant.

The design deficiency in the on-line testing feature could have prevented both emergency diesels from accepting emergency loads under certain single failure conditions. The licensee investigated this event and found several design vulnerabilities related to loss of a vital dc bus which may apply to ESFAS at other plants. Although the described event resulted from an ATI modification, the other vulnerabilities are inherent in the ESFAS design and its power supplies.

The licensee is planning modifications to correct these problems and is reviewing the design of Unit 2 for other similar problems. The NRC will be reviewing the licensee's corrective actions prior to plant re-start.

Cause or Causes—The event was caused by a failure to correctly transfer design package requirements into the plant modification. The implementation plan identified the proper sequence that the inverters would have to be replaced and turned on, but when the work order was prepared the planned sequence was not followed.

Some plant design vulnerabilities were known to the licensee prior to this event. In 1990, the licensee discovered a long standing Technical Specifications interpretation that had permitted indefinite operation of an emergency electrical bus on the non-safety related backup supply.

The NRC reviewed the design change, the outage plan, and the operation implementation procedures. In addition, the NRC interviewed the engineer that was responsible for the design change, the personnel that prepared the work order, and the operations personnel that released the work order. The NRC concluded that there was ample opportunity for the licensee personnel to identify the error in the work order that caused the partial loss of normal power. The staff considers the subsequently discovered design vulnerabilities in the ESFAS to be significant because, had the plant been operating at the time of the event, the licensee would have been required to take immediate remedial action.

Actions Taken to Prevent Recurrence

Licensee—Implementation of the pertinent aspects of the Performance Enhancement Program will enhance pre-performance review of design change records and help resolve plant requirements to support multiple work activities in outage planning.

An ESFAS analysis has thus far identified three areas in which design changes were needed. These include:

1. Eliminate the interaction of the automatic test insertion unit with the load shed actuation module.
2. Modify the action of the simultaneous safety injection actuation signal and the sump recirculation actuation signal to eliminate the low pressure injection pump trip and to prevent premature pump suction shift to the containment sump.
3. Modify the power operated relief valve control relay logic to prevent inadvertent opening on loss of control power.

These changes are complete. Satisfactory operation of the ESFAS was demonstrated during recent testing performed as a part of startup preparations following the steam generator replacement project.

An Independent Review Committee was formed to investigate this event. The recommendations from the Committee have been evaluated and, where appropriate, implemented.

NRC—The NRC conducted an inspection to investigate the circumstances of the July 6, 1992 event. On February 4, 1993, the NRC issued Information Notice No. 93–11, "Single Failure Vulnerability of Engineered Safety Features Actuation Systems," that described the Millstone 2 event.

* * * * *

Other NRC Licensees (Industrial Radiographers, Medical Institutions, Industrial Users, etc.)

92–14 *Medical Therapy Misadministration at Memorial Hospital of Laramie County in Cheyenne, Wyoming*

One of the AO reporting guidelines notes that a therapeutic dose that is greater than 1.5 times the prescribed dose can be considered an abnormal occurrence.

Date and Place—August 19, 1992; Memorial Hospital of Laramie County; Cheyenne, Wyoming.

Nature and Probable Consequences—On October 22, 1992, the licensee notified NRC Region IV that a therapeutic misadministration had occurred on August 19, 1992, involving a brachytherapy implant procedure utilizing iridium-192 as seeds encased in nylon ribbon (small sealed radiation sources utilized for interstitial treatment of cancer). The proposed treatment included a prescribed dose of 3,258 rads for the patient's prostate gland.

On October 21, 1992, while reviewing the shipping documents associated with the implant performed on August 19, 1992, the licensee's dosimetrist noted a discrepancy in the units of measurement between what she had ordered as opposed to what she had received. The licensee ordered brachytherapy ribbons containing 0.79 millicuries per ribbon. However, the vendor delivered brachytherapy ribbons containing 0.79 milligrams radium equivalent (1.36 millicuries) per ribbon. When the shipment was received, the dosimetrist checked the prescription order against what was received and noted that the quantities (0.79) matched, but she failed to note that the amount received was measured in milligrams radium equivalent rather than the requested millicurie units. As a result, the radiation dose to the patient's prostate gland was 5,669 rads rather than the prescribed 3,258 rads.

The referring physician was notified and chose not to inform the patient.

The patient was examined during subsequent follow-up visits and has shown no adverse effects due to the increased radiation exposure. The licensee does not anticipate any significant effects to the patient as a result of the misadministration.

Cause or Causes—The cause is attributed to human error by the licensee's staff resulting in the failure to perform an adequate verification of source strengths prior to implanting the brachytherapy sources. The licensee's dosimetrist had checked the prescription order against the receipt records but failed to note the discrepancy in units of measurement. Additionally, miscommunication between the licensee and the vendor also appears to have contributed to the error.

Actions Taken To Prevent Recurrence

Licensee—Revised procedures have been implemented to prevent recurrence of administering implants without complete verification of brachytherapy source strengths. This includes an implant checklist that must be completed and initialed to ensure that units of measurement received correspond to that which was ordered. Additionally, the licensee's physicists will verify source strengths by direct measurement prior to implantation.

NRC—An NRC Region IV inspector conducted a special safety inspection on November 19–20, 1992, to review the circumstances associated with the misadministration and to review the licensee's corrective actions. The licensee's determination of the cause of the event was considered accurate based upon interviews of the individuals involved. The inspection revealed violations associated with the failure of the licensee's authorized user to instruct individuals under his supervision in the licensee's quality management program. Enforcement action is under consideration.

* * * * *

VOL 58 ISS 78 AP 26 1993 UMI

92–15 *Medical Therapy Misadministration and Unplanned Exposure at St. Clares Riverside Medical Center in Denville, New Jersey*

One of the AO reporting guidelines notes that a therapeutic exposure to a part of the body not scheduled to receive radiation can be considered an abnormal occurrence.

Date and Place—October 2, 1992; St. Clares Riverside Medical Center; Denville, New Jersey.

Nature and Probable Consequences—On October 2, 1992, the licensee notified the NRC by telephone that a therapeutic misadministration involving the implant of two tridium–192 ribbons had occurred that day at its facility. At 2:30 p.m. on October 1, 1992, a patient was implanted with 48.25 millicuries of iridium–192 contained in two nylon ribbons. The ribbons were inserted into catheters that extended from the patient's abdomen into the common bile duct. The procedure was scheduled to last 20 to 23 hours during which a dose of 1500 to 2,000 rads would be delivered to a colon tumor obstructing the common bile duct. After implanting the iridium–192 ribbons into the two catheters, the implant site was dressed and instructions were given to nursing personnel not to change the dressing. These instructions were not detailed on the patient's chart. Due to excessive drainage of bile at the implant site during the evening and early morning hours, the patient's dressings were changed several times and then reinforced with additional absorbent. At 4:15 a.m. on the morning of October 2, 1992, the nurse on duty noted that the dressing was completely displaced and acted to replace the dressing. The nurse noticed that the two ribbons were displaced but, not knowing what they were, coiled the ribbons in her hand and taped the ribbons to the patient's abdomen. A routine X-ray identified that the seeds were no longer implanted, and the coiled ribbons were removed from the surface of the patient's abdomen by a physician to approximately 12:00 p.m. on October 2, 1992.

The licensee estimated that the patient received 1,145 rads to the targeted tumor site, between 172 and 1,032 rads to the skin of the abdomen, 19.9 rads to the liver and small bowel, 12.7 rads to the kidneys, 50.9 rads to the colon, and 6.7 rads to the testes. The licensee estimated that the nurse who coiled the ribbons and taped them to the patient's abdomen received approximately 7.6 rads to her hands. The licensee expects no adverse clinical effects as a result of the reduced dose to the target organ since this brachytherapy treatment was a booster to the external beam dose that was yet to be administered.

Both the patient and nurse were notified of the misadministration.

Cause or Causes—The misadministration was caused by: (1) lack oversight of the procedure by the licensee's Radiation Safety Officer (RSO); and (2) inadequate training of the nursing staff in that they were unable to identify the brachythraphy source ribbon.

Actions Taken to Prevent Recurrence

Licensee—The licensee initiated an expanded training program that includes familiarization of personnel with the size and appearance of the radioactive sources used in brachytherapy treatments at the licensee's facility. The licensee stated that a manager will be responsible for ensuring that personnel on all shifts involved in the care and treatment of radiation therapy patients receive this training. The licensee decided to name a new RSO because the current RSO was unable to devote sufficient time to the radiation safety program due to his other responsibilities. The licensee's actions also included: (1) Committing that a new RSO would be in place before another brachytherapy procedure is performed; (2) developing a nurses' procedure manual; (3) conducting formal inservice training in radiation safety with all nursing unit workers; and (4) requiring a written directive be initiated before ordering radioactive material.

NRC—NRC Region I conducted an inspection on October 5, 6, 7, and 9, 1992, and held an Enforcement Conference on November 5, 1992, to discuss the inspection findings. The licensee's corrective and preventive actions will be reviewed during the next inspection of the licensed program. Several violations of NRC requirements were identified including: (1) Failure to adequately train nursing personnel to recognize brachytherapy procedures; (2) failure to train personnel on potential radiological emergencies for brachytherapy procedures; (3) failure to implement radiation safety and quality management programs to ensure adequate safety.

A civil penalty of $10,000 was proposed in a letter dated January 11, 1993. The licensee paid the civil penalty on February 5, 1993.

* * * * *

92–16 *Medical Therapy Misadministration at the Lahey Clinic Medical Center in Burlington, Massachusetts*

One of the AO reporting guidelines notes that a therapeutic exposure to a part of the body not scheduled to receive radiation can be considered an abnormal occurrence.

Date and Place—October 14, 1992; Lahey Clinic Medical Center; Burlington, Massachusetts.

Natural and Probable Consequences—On October 19, 1992, the licensee notified the NRC Operations Center of a therapeutic misadministration involving a high dose rate remote afterloader (HDR) that occurred at the facility on October 14, 1992. A patient was scheduled to receive brachytherapy treatment to the right main stem bronchus in three fractions using a Gamma Med HDR. Each fraction was to deliver 700 rads to the targeted tumor site. On October 7, 1992, the patient was administered the first treatment as prescribed. On October 14, 1992, the therapist made an error during input of the offset distance into the treatment computer, entering an offset distance of 7 millimeters rather than 7 centimeters as required. This error resulted in the second fraction delivering 90 percent of the prescribed fractionated radiation dose to unintended tissues away from the tumor site and underdosing the tumor site. The underdose was made up during the administration of the third fraction on October 22, 1992. The physician stated that he expected no adverse clinical effect on the patient due to underdosing the tumor site as the dose was made up in the third and final fraction.

The referring physician and patient were both notified of the misadministration.

Cause or Causes—The licensee followed established procedures; however, the procedure did not include a mechanism to verify data entries on the HDR console at the time of treatment.

Actions Taken to Prevent Recurrence

Licensee—The licensee instituted a new procedure that requires that a second individual verify the data input on the HDR console prior to administration of the therapy.

NRC—NRC Region I conducted a routine inspection at the facility on December 3, 1992. The inspection resulted in the identification of six apparent violations: (1) Failure to have a quality management program to meet the regulatory requirements; (2) failure to make timely notification to the NRC; (3) failure to provide radiation safety training to workers; (4) failure to perform the required tests on the dose calibrator; (5) failure to perform radiation surveys; and (6) failure to maintain the prior exposure record of a new employee.

The licensee stated that there were no adverse effects to the patient as a result of the misadministration.

Enforcement action is under consideration.

* * * * *

92–17 *Medical Therapy Misadministration at Indiana University Medical Center in Indianapolis, Indiana*

One of the AO reporting guidelines notes that a therapeutic dose that is greater than 1.5 times the prescribed dose can be considered an abnormal occurrence.

Date and Place—November 13–14, 1992; Indiana University Medical Center; Indianapolis, Indiana.

Nature and Probable Consequences—A 31-month old patient, being treated for a brain tumor, was to receive two cobalt-60 teletherapy treatments of 150 rads each for total dose of 300 rads to reduce swelling behind the patient's eye. The dosimetrist mistakenly prepared the dose calculations for 300 rads per treatment. The patient was treated November 13 and 14, 1992, with 300 rads per treatment for a total dose of 600 rads.

Prior to the treatment, the treatment plan was reviewed by the treating physician. Following the treatments, the dose calculations were reviewed by a medical physicist and approved. The error was discovered by a student technologist during a monthly chart review on December 2, 1992.

Both the patient's referring physician and guardian were informed of the misadministration. The treatment accomplished its intended purpose and the swelling was reduced. The licensee reported that no adverse medical effects were expected because of the additional radiation exposure.

Cause or Causes—The error was caused by the mistaken calculations by the dosimetrist and by the apparent inadequate review by the physician before the treatment began. The doses normally used for this type of treatment are 300 rads per treatment, and this further contributed to the failure to identify the error before the treatments occurred. There was also a problem with the legibility and format of the treatment plan.

Actions Taken to Prevent Recurrence

Licensee—The licensee has provided additional training to treatment personnel to eliminate the types of problems that contributed to the misadministration. The licensee also intends to revise the treatment form to make it more understandable.

NRC—The NRC retained a medical consultant to review the case and to provide clinical assessment of the misadministration. NRC Region III conducted a special inspection on December 14–15, 1992, to review the circumstances surrounding this misadministration. Enforcement action on the inspection findings is pending.

* * * * *

92–18 *Loss of Iridium-192 Source and Medical Therapy Misadministration at Indiana Regional Cancer Center in Indiana, Pennsylvania*

One of the AO reporting guidelines notes that a therapeutic dose that is greater than 1.5 times the prescribed dose can be considered an abnormal occurrence. In addition, another AO reporting guideline notes that an exposure to an individual in an unrestricted area such that the whole body dose received exceeds 0.5 rem in one calendar year may be considered an abnormal occurrence.

Date and Place—November 16, 1992; Indiana Regional Cancer Center; Indiana, Pennsylvania.

Nature and Probable Consequences—On December 1, 1992, the licensee, Oncology Services Corporation (OSC), notified NRC Region I of the loss of an approximately 4.3-curie sealed iridium-192 source from their high dose rate (HDR) remote afterloader unit at their Indiana Regional Cancer Center (IRCC), Indiana, Pennsylvania. The licensee stated that they were notified by a local nursing home that a manager from Brown-Ferris Industries (BFI), a biological and hazardous waste handler, found radioactive material in the biowaste that was picked up from the nursing home. The licensee performed radiological surveys of the HDR and noted that the iridium-192 source was missing.

On December 1, 1992, Region I dispatched a section chief and inspector to the IRCC to ascertain the facts surrounding the loss of the iridium-192 source and how it was transferred to BFI facilities. On December 3, 1992, the NRC upgraded its response to an Incident Investigation Team (IIT). On February 8, 1993, the IIT presented its findings (NUREG-1480) to the Nuclear Regulatory Commission. The following are synopses of the Region I inspection and IIT findings.

On November 16, 1992, an elderly patient was treated for anal carcinoma at the IRCC in Indiana, Pennsylvania, using HDR brachytherapy. The patient died on the evening of November 21, 1992, five days after the treatment. Before the treatment, five catheters were placed in the tumor. During the treatment, an approximate 4.3-curie iridium-192 source was placed at various positions in each catheter to irradiate the tumor by use of a remotely controlled Omnitron 2000 afterloader. This treatment was the first of a series of three 600-rad treatments planned by the physician, and the five catheters were to remain in the patient for subsequent treatments.

On November 16, 1992, after a trial run through the five catheters with a dummy wire, the iridium source wire was placed in four catheters without difficulty. After several unsuccessful attempts to insert the source wire and the dummy wire into a fifth catheter, the treatment was terminated. An area radiation monitor in the treatment area was observed in an alarm condition at various times when the source should have been retracted during the unsuccessful attempts to insert the source wire through the catheter. Although three technologists and the physician attending the patient were aware of the alarm condition, no one conducted a survey for radiation levels with the available portable radiation survey instrument. The only action taken was to check the control console of the HDR remote after loader. Because the console indicator showed "safe," they believed the source to be fully retracted into the lead shield and assumed the area radiation monitor was malfunctioning. They were unaware the source wire had broken, leaving the source in one of the catheters in the patient. The patient was transported by ambulance, with the source, to a local nursing home.

The source remained in the patient's body for almost four days. The catheter with the source came loose on the fourth day and, eventually, the catheter fell out early on the morning of November 20, 1992. It was placed in a medical biohazards bag (red-bag) in a storage room by nursing home personnel who did not know it contained the radioactive source. Later, on the same day, the catheter containing the source was moved to another storage location at the nursing home and placed in a box with other red bags. From November 16 through November 25, 1992, numerous residents, employees, and visitors to the nursing home were unknowingly irradiated. The ambulance staff who returned the patient to the nursing home were irradiated along with employees and patients at the IRCC.

VOL

1993
UMI

On November 25, 1992, a driver from BFI picked up the red-bag biowaste and transported it to a BFI facility in Carnegie, Pennsylvania, and from there, it was transported to a BFI medical waste incinerator in Warren, Ohio.

At the Warren facility, fixed radiation monitors identified radiation emanating from the trailer, and, on facility personnel direction, the trailer was returned to Carnegie the same day. It was left over the weekend and on Monday, November 30, 1992, the BFI staff searched the truck for the radiation source. They identified the box with the radiation source and looked at individual red bags to identify the origin of the waste. On December 1, 1992, BFI successfully identified a name found with the red-bag waste in the box, and traced it to the nursing home.

After being notified by BFI, the nursing home called the IRCC on December 1, 1992. The cancer center had not used the HDR afterloader after the single treatment on November 16, 1992. Upon being informed of the source discovery, the medical physicist determined that no source was present in the HDR afterloader and informed the NRC Region I office of this fact. The physician and the medical physicist drove to Carnegie and retrieved the source.

A second Omnitron 2000 source wire broke at the Greater Pittsburgh Cancer Center (GPCC) of OSC on December 7, 1992. This wire broke in the same approximate location as the first wire. The GPCC medical physicist who was conducting the treatment was aware of the first incident and immediately recognized the problem and promptly and appropriately intervened, thereby preventing significant dose consequences to the patient or the cancer center staff.

An NRC medical consultant concluded that an analysis of the medical records and physical dosimetry would indicate that the massive radiation dose was a probable contributing cause of death in this patient. The licensee reported the prescribed dose at one centimeter was 1,800 rads to be delivered in three treatments and that the delivered dose was 1,600,000 rads to the same point, an overdose of about three orders of magnitude. The licensee stated the effect on the patient would be significant local tissue damage and possible significant tissue damage to organs outside the treatment area, depending upon the progression of radiation damage with time before the patient expired. The licensee stated the dose was of sufficient magnitude that it believed it was highly probable that the radiation exposure was at least a contributing factor to the patient's subsequent death. In a press release dated January 26, 1993, the Indiana County Coroner stated that the cause of death listed in the official autopsy report was "Acute Radiation Exposure and Consequences Thereof."

In addition to the patient, the team evaluated the radiation doses to 94 persons associated with the IRCC event. Radiation doses received by these individuals ranged between 40 mrem and 22 rem.

Of these individuals, nine residents who were involved in recreational activities at the Scenery Hill Manor Nursing Home were not notified regarding the exposure they had received. The IIT was unable to determine their identity. The rest of the individuals were notified either by the NRC or were monitored by their employer for occupational dose.

Cytogenetic studies were also performed on a number of these exposed individuals and the results were consistent with calculated doses within the limits of accuracy of both techniques. The highest extremity dose was calculated to be between 73 to 160 rem to the hands of one of the Certified Nursing Assistants.

No personnel or property contamination occurred and no occupational worker received a whole body radiation dose above the NRC occupational limit of 1.25 rem. While members of the public received radiation doses above applicable limits, no one received a dose at which acute radiation injury or clinical signs are expected to occur.

Cause or Causes—The IIT reported that the event was caused by the following:

1. OSC had weaknesses in their radiation safety program that were a major contributing cause of the seriousness of the event and radiation exposure consequences. Some of these were a result of a rapid expansion in their HDR brachytherapy program from one facility to ten facilities in less than a year. The Radiation Safety Officer (RSO) failed to ensure that the staff at all facilities received adequate radiation safety training and that all management instructions relating to HDR were being followed.

Informal and unwritten procedures that may have been adequate when the licensee possessed one HDR unit under the direct control of the RSO were ineffective for the expanded program.

2. A number of weaknesses were found in the design and testing of the Omnitron 2000. Weaknesses were identified in the testing and validation of source-wire design, and in the design of certain safety features of the HDR afterloader. These could allow the undetected retraction and further use of a broken wire with no warning to the user. Although not contributing to this event, weaknesses were found in Omnitron's quality assurance/quality control (QA/QC) program. The cause of the wire failure is not known with certainty at this time. The vender believes it has evidence to show that storage of the source wire in teflon, if moisture is present, causes degradation of the teflon with release of fluorine or hydrogen fluoride that causes degradation of the Nitinol (nickel-titanium alloy) wire. The NRC and its consultant are still evaluating this hypothesis and conducting further studies.

3. The safety culture at IRCC contributed significantly to the event. Technologists routinely ignored the PrimAlert-10 alarm. Its problems were worked around and not fixed. Technologists did not survey patients, the afterloader, or the treatment room following HDR treatments. No one was sure who was responsible for radiation safety training or the radiation safety program. The authorized user failed to wear a film badge on both occasions when the source was encountered.

4. Overall regulatory oversight was weak. NRC regulations do not directly address HDR brachytherapy to the extent that teletherapy and low dose rate brachytherapy are addressed. Licensing guidance for HDR has been unchanged since 1986 in spite of significant changes in medical regulations and other medical licensing guidance. Inspection guidance for medical licensees does not specifically address HDR brachytherapy. Although inspected by the NRC Region I office within a year of initial licensing, the inspection program does not require early reinspection in cases where licensees significantly expand the scope of their program through license amendments. The regulatory interaction between the NRC, the FDA, and the involved Agreement States in the regulation and authorization of the Omnitron 2000 HDR afterloader is poorly defined.

Action taken to Prevent Recurrence

Licensee—Licensee actions to prevent recurrence are still undergoing NRC staff review.

NRC—The NRC initiated the IIT. The NRC issued Bulletin 92-03 to users of Omnitron 2000 HDR afterloaders, Information Notice 92-84 to all NRC licensees, and Confirmatory Action Letters curtailing the use of Omnitron 2000 HDR and providing safety precautions.

On January 20, 1993, the NRC issued an Order Suspending License (Effective Immediately) to preclude the licensee from performing licensed activities at any of its facilities pending further order. Issuance of this order does not preclude additional enforcement action.

* * * * *

92-19 *Medical Therapy Misadministration and Temporary Loss of Brachytherapy Source at Yale-New Haven Hospital in New Haven, Connecticut*

One of the AO reporting guidelines notes that a therapeutic exposure to a part of the body not scheduled to receive radiation can be considered an abnormal occurrence.

Date and Place—December 2, 1992; Yale-New Haven Hospital; New Haven, Connecticut.

Nature and Probable Consequences—On December 2, 1992, the NRC was notified by the licensee that it had recovered a 35 millicurie brachytherapy source that was discovered to be missing earlier that day. On December 3, 1992, NRC Region I was notified that the source had probably been lost before or during a brachytherapy treatment, resulting in a therapeutic misadministration. A female patient, approximately 39 years old, was to receive 1,848 rads to the cervix for cancer treatment. One of the sources that was prescribed was either never inserted or was removed from the applicator during treatment. Assuming maximum deviation from the planned treatment, the actual dose to the patient was only 1,235 rads. The licensee stated that a source was also misplaced and was in contact with one of the patient's legs for a period of time, resulting in an estimated dose to the leg of 260 rads. The physicians responsible for the treatment, after reviewing the dose estimates, decided no additional treatments were necessary.

The misplaced source was inadvertently put with hospital linen. The linen with the brachytherapy source was taken to an off-site laundry facility, from which it was subsequently recovered.

Cause or Causes—The licensee failed to recognize the significance to radiation safety of a procedural change that eliminated the use of disposable pads in favor of reusable linen pads. Previously, the licensee disposed pads by putting them in infectious waste, which stayed in the room until after the final radiation survey was performed, after removal of the radiation sources. The reusable pads, when changed, were placed in laundry bags in the hallway, which were taken to the laundry facility daily. The nursing staff failed to follow the procedure that prohibited removing anything from the patient's room that had not been checked for the presence of a brachytherapy source.

The referring physician and patient were notified of the misadministration.

Actions Taken to Prevent Recurrence

Licensee—The licensee has taken the following steps:

1. Physicians have been instructed to visually confirm that sources are properly loaded into applicators.
2. Dosimetrists have been instructed to observe the loading process and confirm that applicators are correctly loaded.
3. A linen hamper will be placed in each brachytherapy patient's room so that linen will not, generally, be removed until after the final room survey to confirm that no sources have been lost.
4. Soiled linen that cannot be left in the room until the end of treatment will be surveyed to ensure that no sources are in the linen prior to its removal from the patient's room.
5. Physicians have been instructed to visually check for the presence of sources at the time they are removed from the patients.

NRC—The NRC retained a medical consultant to review the case to provide clinical assessment of this misadministration. NRC Region I conducted a special inspection on December 3–4, 1992, and three violations of NRC requirements were identified: (1) failure to survey soiled linen pads prior to removing them from a patient's room; (2) loss of control of the radioactive source; and (3) existence of radiation levels above the regulatory limit in unrestricted areas. Enforcement action is under consideration.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-32171; International Series Release No. 533; File No. SR-DTC-92-17]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to Extended Eligibility in the Foreign Securities Option of the Existing Elective Dividends Function.

April 19, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on October 15, 1992, the Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by DTC. The Commission is publishing this notice to solicit comments from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change extends eligibility in DTC's existing Elective

[1] 15 U.S.C. 78s(b)(1) (1988).

VOL 58 ISS 78 APR 26 1993 UMI

Dividends ("EDS") foreign securities option function to include all foreign securities. This will enable Participants to deposit at DTC foreign issues beneficially owned by nonresidents of the United States and others whose securities were previously ineligible for deposit at DTC.

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to extend the benefits of DTC's existing EDS foreign securities option to all foreign securities. The EDS foreign securities option was developed for issues from foreign countries which have tax treaties with the U.S. that provide for withholding of foreign taxes from distributions of foreign issues at different rates for different classes of beneficial owners.

Currently the EDS foreign securities option is available for upcoming distributions on Canadian securities and on United Kingdom ("UK") American Depositary Receipts ("ADRs").[2] This option permits a DTC Participant to use DTC's Participant Terminal System to certify the number of Canadian securities and UK ADRs credited to its account as of record date that are entitled to favorable tax treatment ("treaty rate") "at source" (*i.e.*, the tax exempt benefit to which the participant is entitled will be included in the payment DTC receives from the foreign payor). For Canadian securities, the Participant may also certify the portion of its record date position that is completely exempt from Canadian nonresident withholding tax.

Securities of other foreign issuers are currently covered not by EDS but by DTC's existing rule concerning the Tax Certificate as to Beneficial Ownership ("Tax Certificate"). Except for Canadian securities and UK ADRs, the Tax Certificate requires Participants to refrain from depositing at DTC physical certificates evidencing foreign issues beneficially owned by customers (primarily foreign persons) not entitled to the treaty rate. The Tax Certificate also requires that Participants withdraw for custody outside the depository system certificates evidencing such foreign securities received by book-entry for any such customers.

Under the proposed rule change, DTC will advise Participants as each country's securities become eligible for the EDS foreign securities option. Participants will then be able to deposit at DTC all such foreign securities held for customers. Shortly after record date for a distribution on the security, the Participant will certify to DTC the quantity of securities entitled to the treaty rate or other favorable treatment. This certification will override the Tax Certificate. On payment date, the Participant will not receive the treaty rate for securities not certified through EDS.

The distributions received on payment date on securities certified through EDS will depend on DTC's agreement with the tax authorities of each foreign country. Some foreign countries, such as Canada and the UK, will permit receipt of the treaty benefit at source. Other foreign countries will not permit payment of the treaty benefit at source but may permit a streamlined refund process.

The EDS foreign securities option is designed to be transparent. Participants will follow the existing EDS foreign securities procedure regardless of when and how the tax benefit is to be paid.

The proposed rule change is consistent with Section 17A of the Act, as amended, and the rules and regulations thereunder applicable to DTC because it removes a disincentive to depository immobilization and because it extends depository eligibility to certain securities whose beneficial owners were previously denied access to the depository.

B. Self-Regulatory Organization's Statement on Burden on Competition

DTC does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

DTC has been working with Participants, depositories for foreign ADRs, foreign issuers, and US and foreign tax authorities for years to obtain favorable treatment for treaty rate and exempt foreign securities held at DTC in order to avoid withdrawal or exclusion of any securities from DTC. For treaty rate customers who are entitled to favorable treatment at source if the securities are registered in their own names, DTC developed methods to obtain treaty benefits for their securities registered in DTC's nominee name, Cede & Co. Otherwise, to obtain the benefit such customers would have to withdraw certificates evidencing their securities from the depository and transfer registration.

Where the benefit is not available at source, many treaty rate customers find the procedures for claiming refunds so burdensome that they forgo the refund to which they are entitled and thereby frustrate the purpose of the tax treaty. For example, the current procedure for obtaining French refunds requires each of some 14,000 beneficial owners holding through DTC to file a six-part form in duplicate with French tax authorities. When Participants determine that the French authorities would not permit the treaty benefit to be available at source, Participants asked DTC to concentrate development efforts on a streamlined refund procedure to replace the six-part form.

The EDS foreign securities option was designed to enable flexibility when negotiating with each foreign country. There have been no written comments from Participants or others.

III. Date of Effectiveness of the Proposed rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act rule 19b-4 because the proposal effects a change in an existing service that (A) does not adversely affect the safeguarding of securities or funds in the custody or control of DTC or for which DTC is responsible and (B) does not significantly affect the respective rights or obligations of DTC or persons using the service. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purpose of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW, Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to the File No. SR-DTC-92-17 and should be submitted by May 17, 1993.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[3]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[2] Securities Exchange Act Release No. 29650, International Series Release No. 254 (April 5, 1991), 56 FR 15387 [File No. SR-DTC-91-03] [order approving changes to tax exempt dividend services for Canadian issues] and Securities Exchange Act Release No. 25908 [July 14, 1988], 53 FR 27587 [File No. SR-DTC-88-12] [notice of filing and order approving ADR tax withholding service].

[3] 17 CFR 200.30-3(a) (12) (1991).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of a restatement of the procedures for the Institutional Delivery ("ID") System of DTC. The ID System procedures constitute Section M of DTC's Participant Operating Procedures.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, DTC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. DTC has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Numerous enhancements have been added to the ID System since 1983 when the ID System procedures were last reprinted as a single document. For convenience of reference by ID System users, the ID System procedures are being restated to include in one document all changes made in the ID System since 1983 and to make minor typographical and format changes in the text. No substantive changes in the ID System are being made at this time.

The proposed rule change is consistent with the requirements of the Act, particularly section 17A of the Act,[2] and the rules and regulations thereunder applicable to DTC because the proposed rule change will contribute to the ease of use of the ID System. The proposed rule change will be implemented consistently with the safeguarding of securities and funds in DTC's custody or control or for which it is responsible because the proposed rule change enhances DTC's existing ID System.

B. Self-Regulatory Organization's Statement on Burden on Competition

DTC perceives no impact on competition by reason of the proposed rule change.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments from DTC participants or others have not been solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A)(i) of the Act[3] and subparagraph (e)(4) of Securities Exchange Act Rule 19b-4[4] because the proposed rule change effects changes in existing services of DTC that (i) Do not adversely affect the safeguarding of securities or funds in the custody or control of DTC or for which it is responsible and (ii) do not significantly affect the respective rights or obligations of DTC or persons using the services.

At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of DTC. All submissions should refer to File No. SR-DTC-93-03 and should be submitted by May 17, 1993.

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Regarding the Institutional Delivery System

April 16, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on March 31, 1993, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR-DTC-93-03) as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

BILLING CODE 8010-01-M

[Release No. 34-32170; File No. SR-CSE-93-03]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change To Extend the Pilot on The Cincinnati Stock Exchange, Inc., Relating to the Preferencing of Public Agency Market and Marketable Limit Orders by Approved Dealers and Other Proprietary Members

April 19, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 29, 1993, the Cincinnati Stock Exchange, Incorporated ("CSE or Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the CSE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Cincinnati Stock Exchange, Inc. ("CSE" or "Exchange") hereby proposes to extend for an additional year, ending May 7, 1994, the CSE's pilot program regarding preferencing. The pilot was initially approved by the Commission on February 7, 1991.[1]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CSE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CSE has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Purpose

The purpose of the rule filing is to extend for another year the Exchange's pilot program governing preference trading. The Commission originally approved the pilot in February 1991, and subsequently extended the pilot on August 5, 1991[2], and on August 7, 1992.[3]

At this time, the CSE has determined not to request an increase in the maximum number of securities in which a preferencing dealer may be registered. The CSE will continue to provide the Commission staff with information regarding the pilot. Such information will include lists of the dealers, the number of issues assigned to each and the level of volume transacted by each. The CSE has also agreed to furnish, upon Commission request, information relating to the specific time intervals of the dealer transactions. Restrictions that 1) preference trading not be used for index arbitrage purposes, and 2) that no order referenced by a firm will have been purchased from the customer for a direct cash payment, also will remain in effect.

(2) Statutory Basis

The proposed rule change is consistent with section 6(b) of the Act in general and furthers the objectives of section 6(b)(5) in particular in that it will promote just and equitable principals of trade and remove impediments to and perfect the mechanisms of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The CSE does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The CSE solicited comments on the original filing from other Intermarket Trading System participants.[4]

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Room. Copies of the filing will also be available for inspection and copying at the principal office of the CSE. All submissions should refer to the file number in the caption above and should be submitted by May 17, 1993.

For the Commission by the Division of Market Regulation, pursuant to the delegated authority, 17 CFR 200.30-3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 93-9603 Filed 4-23-93; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-32168; File No. SR-MSRB-93-4]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the Municipal Securities Rulemaking Board Relating to Arbitration Code.

April 19, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 23, 1993, the Municipal Securities Rulemaking Board ("Board" or "MSRB") filed with the Securities and Exchange Commission ("Commission" or "SEC") a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Self-Regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 17 CFR 200.30-3(a)(12) (1991).

[3] Securities Exchange Act Release No. 30353.

[4] Securities Exchange Act Release No. 31011.

[5] See File No. SR-CSE-90-6.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Board is filing amendments to rule G-35, the Board's Arbitration Code (hereafter referred to as "the proposed rule change"). The proposed rule change would amend various sections of the Board's Arbitration Code. Since 1977, the Securities Industry Conference on Arbitration ("SICA") has worked to develop a Uniform Code of Arbitration ("Uniform Code") in an effort to promote consistency in the securities industry arbitration process. Rule G-35, the Board's Arbitration Code, closely follows the Uniform Code. Over the past few years, SICA has modified and refined its Uniform Code. The proposed rule change is based on such changes to the Uniform Code. The Board requests that the Commission delay only the effective date of the amendment to Section 36, concerning predispute arbitration agreements, in order to provide dealers with sufficient time to amend their arbitration agreements.

II. Self-Regulatory Organization's statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Board included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The texts of these statements may be examined at the places specified in Item IV below. The Board has prepared summaries, set forth in section (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Since 1977, SICA has worked to develop a Uniform Code in an effort to promote consistency in the securities industry arbitration process. Rule G-35, the Board's Arbitration Code, closely follows the Uniform Code. Over the Past few years, SICA has modified and refined its Uniform Code. The proposed rule change is based on such changes to the Uniform Code. The Board believes that the proposed rule change will facilitate the just and timely resolution of disputes between customers and dealers, and will further the Board's statutory mandate to protect investors and the public interest.

Matters Subject to Arbitration (Section 1)

At its January 1992 meeting, SICA unanimously adopted a rule governing class action which provides that class actions between dealers and their customers are to be resolved in court, rather than through arbitration. Currently, the Board's arbitration code does not specifically address class action claims. Thus, the proposed rule change adds new language (identical to the Uniform Code) to exclude class action claims from Board arbitration proceedings. The amendments also provide that a claimant may pursue a claim in arbitration even if that claim is the subject of a class action, as long as the claimant has complied with any court-imposed conditions for properly withdrawing from the class. In addition, the amendments prohibit dealers from attempting to compel a customer to arbitrate a claim included in a class action, or from attempting to enforce an arbitration agreement against any customer that has initiated a class action claim in court and who has not opted out of the class, until a court denies class certification, the class is decertified, or the court excludes the customer from the class.

Persons Subject to the Board's Arbitration Code (Section 2)

Section 15B(b)(2) of the Act states that:

> The Board shall propose and adopt rules to effect the purposes of [the Act] with respect to transactions in municipal securities effected by brokers, dealers, and municipal securities dealers.

In general, Board rules state that they apply to "brokers, dealers, and municipal securities dealers." However, Sections 1 and 2 of the arbitration code speak in terms of "municipal securities broker and municipal securities dealer." Thus, the amendments conform these references to the statutory reference, thereby promoting consistency among Board rules.

Joinder and Consolidation—Multiple Parties (Section 5)

In the past, the various self-regulatory organizations ("SROs") had conflicting policies concerning joining multiple parties in the same claim. In reviewing this issue, SICA believed that two competing interests must be weighed: convenience to the parties and prejudice to the respondents. Section 20 of the Federal Rules of Civil Procedure, concerning joinder and consolidation, strikes an appropriate balance between these two interests. Accordingly, SICA amended its Uniform Code to conform to the language of the Federal Rules. The amendments to rule G-35 track this language and provide that (i) all claimants may join in one action if their claims arise out of the same transaction; (ii) all respondents may be joined in one action if the claims asserted against them arise out of the same transaction; and (iii) judgments may be apportioned according to the claimants' rights to relief and the respondents' liabilities. In addition, the amendments clarify that parties are permitted to file claims with multiple claimants, that the Director of Arbitration is permitted to consolidate claims that have been filed separately, and that all further determinations made by an arbitration panel concerning such matters shall be deemed final.

Designation of Time and Place of Hearings (Section 16)

Currently, the Director of Arbitration is authorized to determine the time and place of the initial hearing and an arbitration panel is authorized to determine the time and place of subsequent hearings, "unless the law directs otherwise." Some SROs have experienced problems with this section. Thus, SICA amended the Uniform Code to delete the conditional language ("unless the law directs otherwise"), thereby making final the Director's and arbitrators' determinations concerning the time and place of hearings. This amendment is intended to ensure that a dealer cannot unfairly control the selection of a hearing location and in so doing cause a customer to incur unreasonable costs in pursuing an arbitration claim.

Failure to Appear (Section 19)

The amendments to this section merely clarify that arbitrators are authorized to proceed with and dispose of a case if a party fails to appear at a hearing or at any continuation of a hearing session.

Discovery (Section 22)

The amendments to this section merely clarify when discovery requests may be served.

Party Service of Amended Pleadings (Section 29)

Rule G-35 currently provides that, when a claim is amended, the arbitration staff serves copies of such amended pleadings on the other parties. This intermediary role results in unnecessary delays and additional costs to the Board's arbitration program. The amendments are designed to save

VOL 58 ISS 78 AP 26 1993 UMI

administrative time and costs by requiring that parties serve copies of amended pleadings on all other parties and provide the Director of Arbitration with sufficient additional copies for each arbitrator.

Awards (Section 31)

While arbitrators may rule in a party's favor and grant a monetary award, this does not necessarily mean that the prevailing party will receive that award in a timely manner, or at all. In an effort to facilitate the prompt payment of awards, SICA amended the Uniform Code to provide for the accrual and payment of interest on awards. Accordingly, the amendments provide that interest shall accrue on awards that are not paid within 20 calendar days of receipt unless an appeal or motion to vacate has been filed in court. The amendments also provide that interest on awards shall be assessed at either the prevailing "legal" rate in the state where the award was rendered or at a rate specified by the arbitrators.

In addition, the amendments require that awards contain (amount other information) the names of counsel, if any. This amendment is intended to enhance the general flow of information about arbitration proceedings.

Agreement to Arbitrate (formerly entitled "Miscellaneous") (Section 32)

Currently, this section incorporates the Board's arbitration code into every duly executed submission agreement. If a party does not sign a submission agreement, then it could be argued that the party is not bound by the code. Certain other documents, however, are recognized as contractual agreements to arbitrate. Thus, the amendments are intended to ensure that a party who does not sign a submission agreement, but is subject to other agreements to arbitrate, also is bound by the Board's arbitration code.

Use of Simplified Arbitration for Small Claims (Section 34)

The amendments to paragraph (a), concerning use of simplified arbitration procedures, eliminate the requirement that a customer demand use of such procedures before they can be implemented. The amendments also eliminate the requirement that parties first consent in writing to use of these procedures. All SROs use simplified arbitration procedures in cases involving public customers where the amount in dispute does not exceed $10,000 without requiring that the customer demand use of such procedures or that the parties agree in writing to such use. The amendments to rule G–35 simply codify this current SRO practice.

The amendments to paragraph (d), concerning referring claims, counterclaims, and third-party claims to a panel of arbitrators, are intended to correct earlier changes to this section, in conformity with Section 12(a) of the Board's arbitration code.

The amendments to paragraph (h), concerning submission of further documentary evidence in simplified arbitration procedures, add new language which (1) codifies the applicability of Board discovery procedures to simplified arbitrations when a public customer demands a hearing; and (2) establishes a procedure to resolve discovery disputes when no hearing is demanded or consented to. This latter amendment includes setting shorter time frames for discovery under such circumstances, in keeping with the Board's (and SICA's) policy of expediting small claims.

Simplified Arbitration—Intra-Industry (Section 35)

The amendments to paragraph (a) merely clarify that only those inter-dealer small claims that are subject to the Board's arbitration code shall be resolved pursuant to the simplified procedures set forth in this section.

The amendments to paragraph (c), concerning referring claims, counterclaims, and third-party claims to a panel of arbitrators, are intended to correct earlier changes to this section, in conformity with section 12(b) of the Board's arbitration code.

Predispute Arbitration Agreements (Section 36)

The amendments add new language requiring that all new predispute arbitration agreements signed by customers must include a prescribed statement excluding class actions from the arbitration contract and clarifying investors' ability to pursue class actions in court.[1] This language is intended to prohibit dealers from bringing class actions to arbitration and from attempting to enforce an agreement to arbitrate against a member of a class action. This amendment shall apply only to new agreements signed by an existing or new customer. As noted above, the Board requests that the Commission delay the effectiveness of this particular amendment to Section 36 until one year after Commission approval, in order to provide dealers with sufficient time to amend their arbitration agreements.

(b) The Board has adopted the proposed rule change pursuant to sections 15B(b)(2)(C) and 15B(b)(2)(D) of the Securities Exchange Act of 1934, as amended ("Act"). Section 15B(b)(2)(C) requires, in pertinent part, that the Board's rules be designed:

> to promote just and equitable principles of trade * * * to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general, to protect investors and the public interest * * *.

Section 15B(b)(2)(D) of the Act states that the Board shall, if it deems appropriate:

> provide for the arbitration of claims, disputes, and controversies relating to transactions in municipal securities: Provided, however, That no person other than a municipal securities broker, municipal securities dealer, or person associated with such a municipal securities broker or municipal securities dealer may be compelled to submit to such arbitration except at this instance and in accordance with section 29 of this title.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Board does not believe that the proposed rule change will effect any burden on competition since it will apply equally to all brokers, dealers, and municipal securities dealers.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Board neither solicited nor received comments.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested people are invited to submit written data, views, and arguments concerning the foregoing. People making written submissions should file six copies thereof with the

[1] See the amendments to Section 1, above, concerning class actions.

Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of the filing will also be available for inspection and copying at the Board's principal offices. All submissions should refer to the file number in the caption above and should be submitted by May 17, 1993.

For the Commission by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–32166; File No. SR–NASD–93–20]

Self-Regulatory Organizations; Notice of Proposed Rule Change by National Association of Securities Dealers, Inc., Relating To Use of a Special Indicator for Average-priced Trade Reports

April 19, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 30, 1993, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing amendments to trade reporting requirements pertaining to average-priced transactions in Nasdaq securities.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The Association is proposing amendments to Parts XII and XIII in Schedule D to the By-Laws to require use of a special indicator for averaged-price weighted trades. Confusion has arisen recently regarding a limited number of trades that have been reported at a price based on average-weighting or another formula rather than current negotiated price. An example of such a transaction would be a trade negotiated as an agency cross during the trading day to be executed after 4 p.m. at a price equal to the average of weighted prices of transactions taking place during the trading day. Certain institutions find such a trade attractive because it ensures that they will not purchase at the high for the day or sell at the low. Trade reports such as these, although timely made, may not relate to the last sale price on Nasdaq and carry no identifier describing their specialized nature. In order to alleviate confusion with regard to these trade reports, the NASD is proposing amendments to the transaction reporting plans for Nasdaq National Market System and Nasdaq SmallCap securities in Schedule D to require members to mark all such trades with a special identifier, ".W" to denote their specialized sale condition.

While there are various specialized sale condition indicators employed in the reporting of Nasdaq transaction data to vendors (e.g., ".SLD" for late trades and ".T" for trade reports executed outside of the normal market hours of 9:30 a.m. to 4 p.m. Eastern Time), none accurately describe average-price weighted trades. Accordingly, a new indicator (".W" for price weighted trades) is appropriate to cover these types of trades. The NASD has already adopted amendments to Schedule G to the By-Laws with identical trade reporting requirements for members using average-price weighting formulas for exchange-listed securities and the special indicator has been approved and implemented in the consolidated data stream operated by the Consolidated Tape Association.[1]

The NASD believes the proposed rule change is consistent with section 15A(b)(6) of the Act. Section 15A(b)(6) requires that the rules of a national securities association be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and in general to protect investors and the public interest.

In addition, the proposed rule change furthers the objective set forth in section 11A(a)(1)(C)(iii) of ensuring the availability to brokers, dealers and investors of information with respect to quotations for and transactions in securities. Reporting transactions in Nasdaq securities that are market with a special indicator to identify their unique pricing formulas is appropriate for regulatory purposes and obviates investor confusion with regard to these transactions.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

[1] Securities Exchange Act Release Nos. 30437, SR–NASD–91–37 (March 3, 1992) and 30955, SR–NASD–92–23 (August 25, 1992).

VOL 58 ISS 78 AP 26 1993 UMI

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by May 17, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–32169; File No. SR–NASD–93–24]

Self-Regulatory Organizations; Filing of Proposed Rule Change by the National Association of Securities Dealers, Inc., Relating to Securities Eligible for Quotation in the OTC Bulletin Board Service

April 19, 1993.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) ("Act"), notice is hereby given that on April 5, 1993, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I and II below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD hereby files this proposed rule change pursuant to section 19(b)(1) of the Act and Rule 19b–4 thereunder, to expand the universe of equity securities eligible for quotation in the OTC Bulletin Board Service ("OTCBB"). Specifically, it is proposed that any equity security meeting the following criteria be deemed eligible for quotation in the OTCBB: (1) The security is listed on one or more regional stock exchanges in the U.S. and (2) the security does not meet the requirements for dissemination of transaction reports through the facilities of the Consolidated Tape.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Through this filing, the NASD is seeking the Commission's approval of a more expansive definition of equity securities eligible for quotation in the OTCBB. In the NASD's original filing on the Service (File No. SR–NASD–88–19),[1] the universe of securities classified as potentially eligible for inclusion was limited to equity securities that were neither qualified for inclusion on Nasdaq nor listed on a U.S. securities exchange. The instant filing would produce a modest expansion by permitting certain exchange-listed equities to be quoted in the OTCBB. The subset of equity securities affected by this proposal is limited to only those listed on any regional stock exchange (i.e., current and prospective listings) and not classified as "Eligible Securities" under the Consolidated Tape Plan.[2]

Since the inception of the OTCBB, the NASD has monitored trading activity in individual securities traded exclusively over-the-counter ("OTC") by analyzing aggregate volume and price range data submitted by member firms pursuant to Section 2 of Schedule H to the NASD By-Laws. In 1991, the Schedule H reporting requirements were expanded to cover OTC transactions in exchange-listed equities that were not eligible for transaction reporting via the Consolidated Tape.[3] Under the current proposal, this same group of equity securities would become eligible for quotation in the OTCBB by NASD member firms that function as market makers in this electronic medium. To the extent that member firms elect to quote these securities in the Service, the NASD's surveillance capabilities will be enhanced by the electronic capture of quotation data, which can be accessed in tandem with the Schedule H data already captured.

The NASD recognizes that some securities covered by this rule change might eventually qualify for dissemination of transaction reports over the Consolidated Tape by listing on one of the primary stock exchanges. If this occurs, the subject security will no longer be qualified for quotation in the OTCBB. NASD member firms desiring to continue as market makers must then register as Consolidated Quotation Service ("CQS") market makers in accord with Part VII of Schedule D to the NASD By-Laws.

Assuming SEC approval of the instant rule change, the NASD would implement the revised inclusion standards within 90 days of the date of the SEC's approval order.

The NASD believes that the proposed rule change is consistent with sections 15A(b)(6) and 15A(b)(11) of the Act. Section 15A(b)(6) requires, *inter alia*, that the NASD's rules be designated to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and facilitate transactions in securities. As noted above, expansion of the OTCBB to include certain exchange-listed securities will enable more effective surveillance of members' OTC trading in these securities. Section 15A(b)(11) authorizes the NASD to adopt rules

[1] *See* Securities Exchange Act Release No. 27975–A (May 30, 1990), 55 FR 23161.

[2] Part VI (a) of the Consolidated Tape defines "Eligible Securities" to include any common stock, long-term warrant, or preferred stock registered or admitted to unlisted trading privileges on any national securities exchange (other than the New York Stock Exchange ("NYSE") or the American Stock Exchange ("AMEX"), respectively) which, at the time of such registration or the commencement of such trading, substantially meets the original listing requirements of the NYSE or of the AMEX.

[3] NASD members that effect OTC transactions in exchange-listed securities that are eligible for Consolidated Tape reporting must observe the transaction reporting requirements contained in Schedule G to the NASD By-Laws.

governing the form and content of quotations for securities traded over-the-counter. Such rules should produce fair and informative quotations, prevent misleading quotations, and promote orderly procedures for collecting and disseminating quotations. In this regard, the NASD submits that the admission of selected regional exchange listings to the OTCBB will enable broader dissemination of members' quotations in these securities through the networks of commercial vendors. This should facilitate greater price discovery and the execution of retail orders at the best available price, while enhancing the NASD's regulatory ability to verify compliance with best execution requirements.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by May 17, 1993.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–32167; File No. SR–PHLX–92–16]

Self-Regulatory Organizations; Order Approving Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to the Filing of FOCUS Reports by Registered Options Traders

April 19, 1993

On June 15, 1992, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposal to amend Exchange Rule 703, "Financial Responsibility and Reporting," to (i) authorize PHLX registered options traders ("ROTs") operating under letters of guarantee from their clearing agents to file Financial and Operational Combined Uniform Single ("FOCUS") reports on a semiannual basis rather than a quarterly basis; and (ii) authorize the Exchange to require a member organization to file financial reports more frequently than currently required under its rules. The proposed rule change was noticed for comment in Securities Exchange Act Release No. 30903 (July 9, 1992), 57 FR 31551. No comments were received on the proposal.

Currently, Exchange Rule 703(c)(iv) requires ROTs operating under letters of guarantee from their clearing agents to file FOCUS reports on a quarterly basis. The PHLX proposes to allow ROTs operating under letters of guarantee to provide FOCUS reports semiannually rather than quarterly. The Exchange, which is the Designated Options Examining Authority ("DOEA") for all of the ROTs who would be subject to the reduced FOCUS filing requirement, believes that more limited filing of FOCUS reports is appropriate because the Exchange currently relies heavily on daily reports rather than FOCUS reports to monitor on-going financial compliance. the PHLX notes that in some instances the current quarterly FOCUS reports filed by ROTs provide less information than the daily statements filed with the Exchange's Examination Department, which disclose, among other things, the equity in ROT's trading accounts.

In addition, the PHLX proposes to amend paragraph (d) of Exchange Rule 703 to authorize the Exchange to require a member organization or foreign currency option participant organization to file financial reports more frequently than currently required under its rules. The PHLX states that it might require a member firm to file reports more frequently than once each quarter if closer than normal surveillance is justified based, for example, on the firm's equity level or on excessive liabilities held outside of its clearing account.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with section 6(b)(5) in that the proposal is designed to remove impediments to and perfect the mechanism of a free and open market.[3] Specifically, the Commission believes that the reduced FOCUS reporting requirement for ROTs operating under letters of guarantee from their clearing agents will reduce the administrative burdens placed on the Exchange and ROTs, while not compromising the ability of the PHLX to continue to monitor the financial condition of ROTs. In this regard, the Commission notes that the PHLX is the DOEA for all of the ROTs subject to the reduced FOCUS reporting requirement, and that the PHLX relies heavily on daily statements filed by the ROTs with the Exchange's Examinations Department to monitor ongoing financial compliance. Among other things, the daily statements provide timely information on the equity in the ROTs' trading accounts and, specifically, on whether a ROT has sufficient equity to continue trading. In light of the information provided through the ROTs' daily statements, and the Exchange's reliance on that

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4 (1992).

[3] 15 U.S.C. 78f(b)(5) (1988).

VOL 58 ISS 78 AP 26 19 93 UMI

information, the Commission believes that the PHLX will have sufficient information available to monitor the ROTs' financial condition through the daily statements and the semiannual FOCUS reports. For this reason, the Commission believes that the proposal will not diminish the PHLX's ability to possess financial information sufficient to monitor the financial condition of ROTs. The Commission notes that the semiannual reporting requirement will apply only to ROTs that operate under a letter of guarantee from their clearing firms and maintain a minimum of $25,000 in net liquid assets. Accordingly, by the terms of PHLX Rule 703, the proposal will not apply to PHLX members who act as clearing members for other ROTs.

The Commission also finds that the proposal authorizing the PHLX to request more frequent financial reports from members and foreign currency option participant organizations will benefit investors and help to ensure the stability of the PHLX's markets by enhancing the Exchange's ability to monitor ongoing financial compliance and to track possible financial difficulties. Closer monitoring may provide the Exchange with an early warning of a member's financial difficulty and allow the Exchange to take appropriate action. The PHLX might suggest, for example, that the member unwind or hedge a position or follow a more neutral trading strategy. In addition, the Commission believes that the proposal should not impose an undue administrative burden on members because it is intended to allow the PHLX to request additional financial reports only in instances where heightened surveillance is warranted based, for example, on a firm's equity level or on excessive liabilities held outside of the firm's clearing account.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[4] that the proposed rule change (SR-PHLX-92-16) is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

Issuer Delisting; Application To Withdraw From Listing and Registration; (North Coast Energy, Inc., Common Stock, $0.01 Par Value) File No. 1-11029

April 20, 1993.

North Coast Energy, Inc. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and regulation include the following:

According to the Exchange, the Board of Directors of the Company (the "Board"), pursuant to a Written Consent Action, authorized the withdrawal of the Company's Common Stock from listing on the Amex Emerging Company Marketplace ("Amex/ECM") and listing the Common Stock on the National Association of Securities Dealers Automated Quotations Small Cap Market ("NASDAQ"). The decision of the Board was based upon the belief that listing of the Common Stock on NASDAQ will be more beneficial to its stockholders than the present listing on the Amex/ECM because:

(1) According to the Company, it is believed that the NASDAQ system of competing market-makers will result in increased visibility and sponsorship for the Common Stock than is presently the case with the single specialist assigned to the stock on the Amex/ECM;

(2) According to the Company, it is believed that the NASDAQ systems will offer the Company's stockholders more liquidity than that presently available on the Amex/ECM and less volatility in quoted prices per share when trading volume is slight. On NASDAQ the Company will have the opportunity to secure its own group of market-makers and, in doing so, expand the capital base available for trading in its Common Stock; and

(3) According to the Company, it is believed that firms making a market in the Company's Common Stock will be inclined to issue research reports concerning the Company, thereby increasing the number of firms providing institutional research and advisory reports.

Any interested person may, on or before May 11, 1993 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 35-25799]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

April 19, 1993.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by May 13, 1993 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Central Power and Light Company (70-8169)

Central Power and Light Company ("CP&L"), 539 North Carancahua Street, Corpus Christi, Texas 78401, a wholly owned public-utility subsidiary

company of Central and South West Corporation, a registered holding company, has filed an application-declaration under sections 6(a), 7, 9(a), 10 and 12(c) of the Act and Rules 42 and 50(a)(5) thereunder.

CP&L proposes to incur obligations, through December 31, 1994, in connection with the proposed issuance of up to $221 million aggregate principal amount of Pollution Control Revenue Refunding Bonds ("Refunding Bonds").

The Refunding Bonds will be issued by Matagorda County Navigation District Number One ("County") to reacquire all or a portion of the County's: (1) $139.2 million of outstanding 10⅛% Pollution Control Revenue Bonds Series 1984; and (2) $81.7 million of outstanding 9¾% Collateralized Pollution Control Revenue Bonds Series 1985A (collectively, "Old Bonds").

The Old Bonds were issued pursuant to the Indenture of Trust between the County and NationsBank of Texas, N.A., as Trustee ("Trustee"), and CP&L and the County entered into an Installment Sale Agreement to provide for the issuance of the Old Bonds. In connection with the issuance of the Refunding Bonds, CP&L will amend the Sale Agreement or enter into an agreement with substantially the same terms as the Sale Agreement. The Old Bonds were originally issued to finance the cost of the acquisition of certain pollution control and solid waste disposal facilities at Units 1 and 2 and of the South Texas Project Electric Generating Station.

The Refunding Bonds will bear interest payable semi-annually and will mature in not less than ten nor more than thirty-five years. The interest rate, redemption provisions and other terms and conditions applicable to the Refunding Bonds will be determined by negotiations between the CP&L and one or more investment banking firms that will purchase or underwrite the Refunding Bonds ("Purchasers"). It is anticipated that the Refunding Bonds will be: (1) Redeemable at any time in whole at the option of the CP&L at the principal amount thereof plus accrued interest; (2) subject to optional redemption in whole or in part at times and with premiums to be determined by negotiations between CP&L and the Purchasers; and (3) subject to special mandatory redemption, in whole or in part, at the principal amount thereof plus accrued interest, in the event the interest becomes subject to federal income tax.

CP&L will not permit the issuance of the Refunding Bonds unless the estimated net present value savings is, on an afterward basis, greater than the present value of all costs to acquire the Old Bonds and issue the Refunding Bonds, assuming an appropriate discount rate.

As credit enhancement for the Refunding Bonds, CP&L may cause the issuance of an insurance policy to ensure payment of principal, interest and premium, if any, at maturity by an insurance company or another unaffiliated party. Alternatively CP&L proposes to issue first mortgage bonds ("Bonds"), subject to applicable indenture restrictions upon the issuance thereof, by executing a supplemental indenture to its Mortgage Indenture dated November 1, 1943 to the First National Bank of Chicago and A.H. Bohm. The Bonds will be issued to the Trustee solely for the benefit of the holders of the Refunding Bonds and will not be transferable except to a successor Trustee. The Bonds will be issued in the exact amount and have substantially the same terms as the Refunding Bonds and payments on the Refunding Bonds will be used to make the necessary payments of principal and interest on the Bonds.

CP&L seeks authority to deviate from the sinking fund and redemption limitation provisions contained in the Commission's Statement of Policy Regarding First Mortgage Bonds (HCAR No. 13105, February 16, 1956, as amended by HCAR No. 16369, May 8, 1969) ("SOP") with respect to the issuance of the Bonds. CP&L proposes that the Bonds be subject to a ten-year redemption limitation while the SOP requires a redemption at any time upon reasonable notice and with reasonable redemption premiums, if any. The SOP further requires that a company deposit annually with a trustee for first mortgage bonds an amount of cash equal to not less than one percent of the aggregate principal amount of all first mortgage bonds authenticated under the first mortgage bond indenture. CP&L requests authority to issue the Bonds without sinking fund provisions unless the Refunding Bonds have sinking fund provisions.

CP&L further proposes to acquire from time to time through December 31, 1994, in open market and negotiated transactions, Old Bonds in an aggregate principal amount of up to $50 million. The proceeds of the offering of the Refunding Bonds will be used to reacquire, either in the open market, through direct negotiation with institutional holders of Old Bonds, or pursuant to a tender offer, all or a portion of the Old Bonds. CP&L may be required to deposit the proceeds of the Refunding Bonds with the Trustee in connection with acquisition of the Old Bonds. The proceeds of the offering may also be used to reimburse CP&L's treasury for Old Bonds previously acquired.

CP&L requests authority to begin negotiations with Purchasers with respect to the interest rate, redemption provisions and other terms and conditions applicable to the Refunding Bonds. It may do so.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8025-01-M

[License No. 02/02-5519]

Filing for an Application for an Exemption Under the Conflict of Interest Regulation; Zenia Capital Corp.

Notice is hereby given that Zenia Capital Corporation (ZCC), 39-01 Main Street, suite 210, Flushing, New York 11354, a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act), has filed an application with the Small Business Administration (SBA) pursuant to § 107.903(b) of the Regulations governing small business investment companies (13 CFR 107.903(h) (1992)) for an exemption from the provisions of the cited Regulation.

Subject to SBA approval, ZCC proposes to provide funds to Transtate Insurance Co., Inc. (Transtate) for purchase of common stock in Transtate.

The proposed financing is brought within the purview of § 107.903(b) of the Regulations because Zenia Yuan, President of ZCC, is a director of Transtate and therefore Transtate is considered an Associate of ZCC as defined by § 107.3 of the Regulations.

Notice is hereby given that any interested person may, not later than fifteen (15) days from the date of publication of this Notice, submit written comments on the proposed transaction to the Associate Administrator for Investment, Small Business Administration, 409 3rd Street, SW., Washington, DC 20416.

A copy of this Notice will be published in a newspaper of general circulation in the New York, New York area.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Environmental Impact Statement; Dade County, FL

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared for a proposed highway project in Dade County, Florida.

FOR FURTHER INFORMATION CONTACT: R.V. Robertson, District Engineer, Federal Highway Administration, 227 N. Bronough Street, room 2015, Tallahassee, Florida 32302. Telephone: (904) 681-7236.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Florida Department of Transportation will prepare an EIS for a proposal to improve SR 25 in Dade County, Florida. The proposed project would involve safety and capacity improvements to SR 25/US 27/Okeechobee Road from SR 112/ Airport Expressway to SR 826/Palmetto Expressway, a distance of 4.9 miles. Improvements to the corridor are considered necessary to provide for the existing and projected traffic demand and to address safety issues.

Alternatives under consideration include (1) taking no action; (2) safety improvements including the following: a median to separate the existing four lanes, left turn storage lanes, an underpass at the FEC Railroad Crossing, and widening bridges; (3) widening to a six-lane divided facility which may include four through lanes and two frontage lanes.

Letters describing the proposed action and soliciting comments have been sent to appropriate Federal, State, and local agencies, and to private organizations and citizens who have expressed interest in this proposal. A series of public meetings are currently being held in the City of Hialeah, the City of Miami Springs, and the Town of Medley, Dade County. In addition, a public hearing will be held the first quarter of 1994. Public notice will be given of the time and place of the public hearing. The Draft EIS will be made available for public and agency review and comment. A formal scoping meeting is planned within the project vicinity during June 1993.

To ensure that the full range of issues related to the proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

R.V. Robertson,

District Engineer, Tallahassee, Florida.

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

[Docket No. 93-24; Notice 1]

Receipt of Petition for Determination That Nonconforming 1990 Mercedes-Benz 300TE Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for determination that nonconforming 1990 Mercedes-Benz 300TE passenger cars are eligible for importation.

SUMMARY: This notice announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a determination that a 1990 Mercedes-Benz 300TE that was not originally manufactured to comply with all applicable Federal motor vehicle safety standards is eligible for importation into the United States because (1) it is substantially similar to a vehicle that was originally manufactured for importation into and sale in the United States and that was certified by its manufacturer as complying with the safety standards, and (2) it is capable of being readily modified to conform to the standards.

DATES: The closing date for comments on the petition is May 26, 1993.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. (Docket hours are from 9:30 a.m. to 4 p.m.)

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (the Act), 15 U.S.C. 1397(c)(3)(A)(i), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under section 114 of the Act, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility determinations may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA determines, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this determination in the **Federal Register.**

Champagne Imports Inc. of Lansdale, Pennsylvania (Registered Importer No. R-90-009) has petitioned NHTSA to determine whether 1990 Mercedes-Benz 300TE (Model ID 124.090) passenger cars are eligible for importation into the United States. The vehicle which Champagne believes is substantially similar is the 1990 Mercedes-Benz 300TE that Daimler Benz A.G. manufactured for importation into and sale in the United States, and certified as conforming to all applicable Federal motor vehicle safety standards.

The petitioner states that it carefully compared the non-U.S.-certified 300TE to its U.S.-certified counterpart, and found the two vehicles to be substantially similar with respect to compliance with most applicable Federal motor vehicle safety standards.

Champagne submitted information with its petition intended to demonstrate that the non-U.S.-certified 300TE, as originally manufactured, conforms to many Federal motor vehicle safety standards in the same manner as its U.S.-certified counterpart, or is capable of being readily modified to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified 1990 model 300TE is identical to the U.S.-certified 1990 model 300TE with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence * * *,* 103 *Defrosting and Defogging Systems,* 104 *Windshield Wiping and Washing Systems,* 105 *Hydraulic Brake Systems,* 106 *Brake Hoses,* 107 *Reflecting Surfaces,* 109 *New Pneumatic Tires,* 113 *Hood Latch Systems,* 116 *Brake Fluid,* 124 *Accelerator Control Systems,* 201 *Occupant Protection in Interior Impact,* 202 *Head Restraints,* 203 *Impact Protection for the Driver From the Steering Control System,* 204 *Steering Control Rearward Displacement,* 205 *Glazing Materials,* 207 *Seating Systems,* 209 *Seat Belt Assemblies,* 210 *Seat Belt Assembly Anchorages,* 211 *Wheel Nuts, Wheel Discs and Hubcaps,* 212 *Windshield Retention,* 216 *Roof Crush Resistance,* 219 *Windshield Zone Intrusion,* and 302 *Flammability of Interior Materials.*

Additionally, the petitioner states that the bumpers on the non-U.S.-certified 1990 model 300TE comply with the Bumper Standard found in 49 CFR part 581.

Petitioner also contends that the non-U.S.-certified 1990 model 300TE is capable of being readily modified to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays:* (a) Substitution of a lens marked "Brake" for a lens with an ECE symbol on the brake failure indicator lamp; (b) installation of a seat belt warning lamp that displays the seat belt symbol; (c) recalibration of the speedometer/odometer from kilometers to miles per hour.

Standard No. 108 *Lamps, Reflective Devices and Associated Equipment:* (a) Installation of U.S.-model headlamp assemblies which incorporate sealed beam headlamps and front sidemarkers; (b) installation of U.S.-model taillamp assemblies which incorporate rear sidemarkers; (c) installation of a high mounted stop lamp.

Standard No. 110 *Tire Selection and Rims:* Installation of a tire information placard.

Standard No. 111 *Rearview Mirrors:* Replacement of the passenger's outside rearview mirror, which is convex but does not bear the required warning statement.

Standard No. 114 *Theft Protection:* Installation of a buzzer microswitch in the steering lock assembly, and a warning buzzer.

Standard No. 115 *Vehicle Identification Number:* Installation of a VIN plate that can be read from outside the left windshield pillar, and a VIN reference label on the edge of the door or latch post nearest the driver.

Standard No. 118 *Power-Operated Window Systems:* Rewiring of the power window system so that the window transport is inoperative when the ignition is turned off.

Standard No. 206 *Door Locks and Door Retention Components:* Replacement of the rear door locks and rear door locking buttons with U.S.-model parts.

Standard No. 208 *Occupant Crash Protection:* (a) Installation of either a U.S.-model seat belt in the driver's position or a belt webbing-actuated microswitch in the driver's seat belt retractor to activate the seat belt warning system; (b) installation of an ignition switch-actuated seat belt warning lamp and buzzer. The petitioner claims that the non-U.S.-certified 1990 model 300TE is equipped with a passive restraint system consisting of an airbag, control module, and knee bolster, which have identical part numbers to those found on the U.S.-certified 1990 model 300TE.

Standard No. 214 *Side Door Strength:* Installation of reinforcing beams.

Standard No. 301 *Fuel System Integrity:* Installation of a rollover valve in the fuel tank vent line between the fuel and the evaporative emissions collection canister.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(I) and (C)(ii); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: April 20, 1993.

[Docket No. 93-25; Notice 1]

Receipt of Petition for Determination That Nonconforming 1989 Toyota Camry Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for determination that nonconforming 1989 Toyota Camry passenger cars are eligible for importation.

SUMMARY: This notice announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a determination that a 1989 Toyota Camry that was not originally manufactured to comply with all applicable Federal motor vehicle safety standards is eligible for importation into the United States because (1) it is substantially similar to a vehicle that was originally manufactured for importation into and sale in the United States and that was certified by its manufacturer as complying with the safety standards, and (2) it is capable of being readily modified to conform to the standards.

DATES: The closing date for comments on the petition is May 26, 1993.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Section, room 5109, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. [Docket hours are from 9:30 a.m. to 4 p.m.]

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (the Act), 15 U.S.C. 1397(c)(3)(A)(i), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under section 114 of the Act, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility determinations may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA determines, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this determination in the **Federal Register**.

J.K. Motors, Inc. of Kingsville, Maryland ("J.K.") (Registered Importer No. R-90-006) has petitioned NHTSA to determine whether non-U.S.-certified 1989 Toyota Camry passenger cars are eligible for importation into the United States. The vehicle which J.K. believes is substantially similar is the 1989 Toyota Camry that Toyota Motor Corporation manufactured for importation into, and sale in the United States, and certified as conforming to all applicable Federal motor vehicle safety standards.

The petitioner stated that it carefully compared the non-U.S.-certified 1989 Toyota Camry to its U.S.-certified counterpart, and found the two vehicles to be substantially similar with respect to compliance with most applicable Federal motor vehicle safety standards.

J.K. submitted information with its petition intended to demonstrate that the non-U.S.-certified 1989 Toyota Camry, as originally manufactured, conforms to many Federal motor vehicle safety standards in the same manner as its U.S.-certified counterpart, or is capable of being readily modified to conform to those standards.

Specifically, the petitioner claims that the non-U.S.-certified 1989 Toyota Camry is identical to its U.S.-certified counterpart with respect to compliance with Standard Nos. 102 Transmission Shift Lever Sequence. . . ., 103 Defrosting and Defogging Systems, 104 Windshield Wiping and Washing Systems, 105 Hydraulic Brake Systems, 106 Brake Hoses, 107 Reflecting Surfaces, 109 New Pneumatic Tires, 113 Hood Latch Systems, 116 Brake Fluid, 124 Accelerator Control Systems, 201 Occupant Protection in Interior Impact, 202 Head Restraints, 203 Impact Protection for the Driver From the Steering Control System, 204 Steering Control Rearward Displacement, 205 Glazing Materials, 206 Door Locks and Door Retention Components, 207 Seating Systems, 209 Seat Belt Assemblies, 210 Seat Belt Assembly Anchorages, 211 Wheel Nuts, Wheel Discs and Hubcaps, 212 Windshield Retention, 216 Roof Crush Resistance, 219 Windshield Zone Intrusion, and 302 Flammability of Interior Materials.

Petitioner also contends that the vehicle is capable of being readily modified to meet the following standards, in the manner indicated:

Standard No. 101 Control and Displays: (a) substitution of a lens marked "Brake" for a lens with an ECE symbol on the brake failure indicator lamp; (b) recalibration of the speedometer/odometer from kilometers to miles per hour.

Standard No. 108 Lamps, Reflective Devices and Associated Equipment: (a) installation of U.S.-model headlamp assemblies which incorporate sealed beam headlamps and front sidemarkers; (b) installation of U.S.-model taillamp assemblies which incorporate rear sidemarkers; (c) installation of a high mounted stop lamp.

Standard No. 110 Tire Selection and Rims: installation of a tire information placard.

Standard No. 111 Rearview Mirrors: replacement of the passenger's outside rearview mirror, which is convex but does not bear the required warning statement.

Standard No. 114 Theft Protection: installation of a buzzer microswitch in the steering lock assembly, and a warning buzzer.

Standard No. 115 Vehicle Identification Number: installation of a VIN plate that can be read from outside the left windshield pillar, and a VIN reference label on the edge of the door or latch post nearest the driver.

Standard No. 118 Power-Operated Window Systems: Rewiring of the power window system so that the window transport is inoperative when the ignition is switched off.

Standard No. 208 Occupant Crash Protection: installation of a seat belt warning buzzer.

Standard No. 214 Side Door Strength: installation reinforcing beams.

Standard No. 301 Fuel System Integrity: Installation of a rollover valve in the fuel tank vent line between the fuel and the evaporative emissions collection canister.

Additionally, the petitioner states that the front and rear bumpers on the non-U.S.-certified 1989 Toyota Camry must be modified by adding energy absorbing shocks to comply with the Bumper Standard found in 49 CFR part 581.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(I) and (C)(ii); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on April 20, 1993.

[Docket No. 93-14; Notice 2]

Determination That Nonconforming 1980 BMW 628 CSI Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of determination by NHTSA that nonconforming 1980 BMW 628 CSi passenger cars are eligible for importation.

SUMMARY: This notice announces the determination by NHTSA that 1980 BMW 628 CSi passenger cars not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because they are substantially similar to a vehicle originally manufactured for importation into and sale in the United States and certified by its manufacturer as complying with the safety standards (the 1980 BMW 633 CSi), and they are capable of being readily modified to conform to the standards.

DATES: The determination is effective as of the date of its publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (the Act), 15 U.S.C. 1397(c)(3)(A)(i), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under section 114 of the Act, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility determinations may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA determines, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this determination in the **Federal Register**.

Champagne Imports Inc. of Lansdale, Pennsylvania (Registered Importer No. R-90-009) petitioned NHTSA to determine whether 1980 BMW 628CSi passenger cars are eligible for importation into the United States. NHTSA published notice of the petition on February 23, 1993 (58 FR 11085) under Docket No. 92-18 to afford an opportunity for public comment. The reader is referred to that notice for a thorough description of the petition. On March 8, 1993, NHTSA published notice that the docket number had been changed to 93-14 (58 FR 12981). No comments were received in response to the notice of petition. Based on its review of the information submitted by the petitioner, NHTSA has determined to grant the petition.

Vehicle Eligibility Number for Subject Vehicles

The importer of a vehicle admissible under any final determination must indicate on the form HS-7 accompanying entry the appropriate vehicle eligibility number indicating that the vehicle is eligible for entry. VSP #32 is the vehicle eligibility number assigned to vehicles admissible under this notice of final determination.

Final Determination

Accordingly, on the basis of the foregoing, NHTSA hereby determines that a 1980 BMW 628CSi is substantially similar to a 1980 BMW 633CSi originally manufactured for importation into and sale in the United States and certified under section 114 of the National Traffic and Motor Vehicle Safety Act, and that the 1980 BMW 628CSi is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(I) and (C)(ii); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: April 20, 1993.

William A. Boehly,

Associate Administrator for Enforcement.

Determination That Nonconforming 1991 Mercedes-Benz 500SL Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of determination by NHTSA that nonconforming 1991 Mercedes Benz 500SL passenger cars are eligible for importation.

SUMMARY: This notice announces the determination by NHTSA that 1991 Mercedes Benz 500SL passenger cars not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because they are substantially similar to a vehicle originally manufactured for importation into and sale in the United States and certified by its manufacturer as complying with the safety standards (the U.S.-certified version of the 1991 Mercedes Benz 500SL), and they are capable of being readily modified to conform to the standards.

DATES: The determination is effective as of the date of its publication in the Federal Register.

FOR FURTHER INFORMATION CONTACT: Ted Bayler, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under section 108(c)(3)(A)(i) of the National Traffic and Motor Vehicle Safety Act (the Act), 15 U.S.C. 1397(c)(3)(A)(i), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States on and after January 31, 1990, unless NHTSA has determined that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States,

VOL 58 ISS 78 AP 26 1993 UMI

certified under section 114 [of the Act], and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility determinations may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA determines, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this determination in the **Federal Register**.

G&K Automotive Conversion, Inc. of Santa Ana, California (Registered Importer No. R-90-007) petitioned NHTSA to determine whether 1991 Mercedes Benz 500SL passenger cars are eligible for importation into the United States. NHTSA published notice of the petition on February 23, 1993 (58 FR 11086) to afford an opportunity for public comment. The reader is referred to that notice for a thorough description of the petition. No comments were received in response to the notice. Based on its review of the information submitted by the petitioner, NHTSA has determined to grant the petition.

Vehicle Eligibility Number for Subject Vehicles

The importer of a vehicle admissible under any final determination must indicate on the form HS-7 accompanying entry the appropriate vehicle eligibility number indicating that the vehicle is eligible for entry. VSP #33 is the vehicle eligibility number assigned to vehicles admissible under this determination.

Final Determination

Accordingly, on the basis of the foregoing, NHTSA hereby determines that a 1991 Mercedes Benz 500SL (Model ID 129.066) not originally manufactured to comply with all applicable Federal motor vehicle safety standards is substantially similar to a 1991 Mercedes Benz 500SL originally manufactured for importation into and sale in the United States and certified under section 114 of the National Traffic and Motor Vehicle Safety Act, and is capable of being readily modified to conform to all applicable Federal motor vehicle safety standards.

Authority: 15 U.S.C. 1397(c)(3)(A)(i)(I) and (C)(III); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: April 20, 1993.

William A. Boehly,

Associate Administrator for Enforcement.

DEPARTMENT OF THE TREASURY

Fiscal Service

Senior Executive Service; Financial Management Service Performance Review Board (PRB)

AGENCY: Treasury Department; Fiscal Service; Financial Management Service.

ACTION: Notice to members to the FMS PRB.

SUMMARY: Pursuant to 5 U.S.C. 4314 (c)(4), this Notice announces the appointment of members to the Financial Management Service (FMS) Performance Review Board (PRB). This Board reviews the performance appraisals of career senior executives below the Assistant Commissioner level and makes recommendations regarding ratings, bonuses, and other personnel actions. Three voting members constitute a quorum. The names and titles of the FMS PRB members are as follows:

Primary Members

Michael R. Smokovich, Deputy Commissioner
Bland T. Brockenborough, Assistant Commissioner, Management
Diane E. Clark, Assistant Commissioner, Financial Information
Michael D. Serlin, Assistant Commissioner, Agency Services

Alternate Members

Larry D. Stout, Assistant Commissioner, Federal Finance Mitchell A. Levine, Assistant Commissioner, Regional Operations
Ronald A. Nervitt, Assistant Commissioner, Information Resources

DATES: Membership is effective on the date of this Notice.

FOR FURTHER INFORMATION CONTACT: Michael T. Smokovich, Deputy Commissioner, Financial Management Service, 401 14th Street, Washington, DC 20227; telephone (202) 874-7000

Russell D. Morris,

Commissioner.

Surety Companies Acceptable on Federal Bonds Termination of Authority: PACIFIC STATES CASUALTY COMPANY

Notice is hereby given that the Certificate of Authority issued by the Treasury to PACIFIC STATES CASUALTY COMPANY, Chino, California, a California corporation, under the United States Code, title 31, sections 9304–9308, to qualify as an acceptable surety on Federal bonds is terminated today.

PACIFIC STATES CASUALTY COMPANY was listed as an acceptable surety on Federal bonds at 57 FR 29386, July 1, 1992.

With respect to any bonds currently in force with PACIFIC STATES CASUALTY COMPANY, bond-approving officers should secure new bonds with acceptable sureties in those instances where a significant amount of liability remains outstanding. In addition, bonds that are continuous in nature should not be renewed.

Questions concerning this notice may be directed to the Department of the Treasury, Financial Management Service, Funds Management Division, Surety Bond Branch, Washington, DC 20227, telephone (202) 874-6765.

Dated: March 10, 1993.

Diane E. Clark,

Assistant Commissioner, Financial Information, Financial Management Service.

Sunshine Act Meetings

Federal Register
Vol. 58, No. 78
Monday, April 26, 1993

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

DEPARTMENT OF ENERGY

FEDERAL ENERGY REGULATORY COMMISSION

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94-409), U.S.C. 552b:

DATE AND TIME: April 28, 1993, 10:00 a.m.

PLACE: 825 North Capitol Street, NE., Room 9306, Washington, DC 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Secretary, Telephone (202) 208-0400. For a recording listing items stricken from or added to the meeting, call (202) 208-1627.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Reference end Information Center.

Consent Agenda—Hydro, 978th Meeting—April 28, 1993, Regular Meeting (10:00 a.m.)

Corrections

Federal Register

Vol. 58, No. 78

Monday, April 26, 1993

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Parts 1, 30, 33, 180 and 190

Protection of Commodity Customers; Risk Disclosure by Futures Commission Merchants and Introducing Brokers to Customers; Bankruptcy Disclosure

Correction

In rule document 93-7727 beginning on page 17495 in the issue of Monday, April 5, 1993 make the following corrections:

(1) On page 17499, in the first column, in the first full paragraph, in the sixth line from the bottom "indicated" should read "indicates".

(2) On the same page, in the 3d column, in the 1st paragraph, 14 lines from the bottom "interest" should read "interests".

(3) On the same page, in footnote 18, in the 3d column, in the 2d line insert after "such funds" the words "to the customer is required pursuant to the requirement tht such funds".

(4) On page 17500, in the first column, under B. 1., in the fourth line "account" should read "accounts".

(5) On page 17501, in the second column, the heading "2. Notice of Commission" should read "2. Notice to Commission".

(6) On page 17502, in the 1st column, under 1., in the 14th line, "documents and addressing" should read "documents addressing".

BILLING CODE 1505-01-D

DEPARTMENT OF LABOR

Employment and Training Administration

Job Training Partnership Act: Announcement of Proposed Noncompetitive Grant Awards

Correction

In notice document 93-8586 beginning on page 19278 in the issue of Tuesday, April 13, 1993, make the following correction:

On page 19278, in the third column, under **DATES**, in the last line, "May 13, 1993." should read "April 28, 1993.".

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List April 21, 1993

VOL 58 ISS 78 AP 26 1993 UMI

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $775.00 domestic, $193.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to (202) 512-2233.

REGULATORY INFORMATION SERVICE CENTER

Unified Agenda of Federal Regulations

AGENCY: Regulatory Information Service Center.

ACTION: Introduction to the Unified Agenda of Federal Regulations.

SUMMARY: The Regulatory Flexibility Act (5 U.S.C. 602) requires that agencies publish semiannual regulatory agendas describing regulatory actions they are developing. Executive Order 12291 and OMB memoranda implementing section 5 of the Executive order establish minimum standards for executive agencies' agendas, including specific types of information for each entry and publication in a uniform format. In addition, the Office of Federal Procurement Policy Act Amendments of 1988 (41 U.S.C. 402) require the development and semiannual publication of a report on procurement regulations. The Unified Agenda helps fulfill the procurement requirement. All Federal regulatory agencies have chosen to publish their regulatory agendas as part of this **Unified Agenda of Federal Regulations.**

The following separate parts in this issue of the **Federal Register** are the agency agendas, which together comprise the April 1993 edition of the semiannual **Unified Agenda of Federal Regulations.**

ADDRESSES: Regulatory Information Service Center, 750 17th Street NW., Suite 500, Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: For further information about specific regulatory actions, please refer to the Agency Contact listed for each entry. To provide comment on or to obtain further information about the **Unified Agenda of Federal Regulations**, contact: Mark G. Schoenberg, Executive Director, (202) 634-6222, or Margaret M. Donohue, Project Director, (202) 634-6220.

INTRODUCTION TO THE UNIFIED AGENDA OF FEDERAL REGULATIONS

About the Unified Agenda

The Regulatory Information Service Center (the Center) compiles the **Unified Agenda of Federal Regulations** (Unified Agenda) for the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB). The Center provides information about Federal regulatory activity to the President and his Executive Office, the Congress, agency managers, and the public.

The Office of Information and Regulatory Affairs is responsible for overseeing the Federal Government's regulatory, paperwork, and information-management activities and for implementing Executive Orders 12291 "Federal Regulation" (46 FR 13193; 3 CFR 1981 Comp., p. 127) and 12498 "Regulatory Planning Process" (50 FR 1036; 3 CFR 1985 Comp., p. 323).

The Unified Agenda provides uniform reporting of data on regulatory activities under development throughout the Federal Government. This edition of the Unified Agenda includes 59 regulatory agendas from all Federal departments, agencies, and commissions that publish agendas. Agencies of the United States Congress are not included. The Federal Mediation and Conciliation Service, the Institute of Museum Services, the Merit Systems Protection Board, and the National Capital Planning Commission have published regulatory agendas in the past but have nothing to report for this edition.

The regulatory activities included in the agency agendas are those currently planned for the next 12 months. The agendas do not include regulations excluded from review under E.O. 12291, such as those concerning military or foreign affairs functions and regulations related to internal agency management.

The Regulatory Flexibility Act (5 U.S.C. 601) requires that agencies publish regulatory agendas identifying those rules that may have a significant economic impact on a substantial number of small entities. Agencies meet that requirement by including the information in their submissions for the **Unified Agenda of Federal Regulations.**

In addition, Executive Order 12612 of October 26, 1987, entitled "Federalism" (3 CFR 1987 Comp., p. 252) directs executive departments and agencies to identify proposed regulatory provisions that have significant federalism implications. As part of this effort, agencies include in their submissions for the Unified Agenda information on whether their regulatory actions may have an effect on various levels of government.

The Unified Agenda also helps fulfill the statutory requirement that the Office of Federal Procurement Policy (OFPP) publish a **Procurement Regulatory Activity Report** as required by the Office of Federal Procurement Policy Act Amendments of 1988 (102 Stat. 4055; 41 U.S.C. 402). In their agendas, agencies indicate which regulatory actions are procurement-related, as well as whether or not there is a statutory requirement or a paperwork burden associated with the procurement-related actions. Information that agencies publish in the Unified Agenda is used by OFPP to produce its report.

The Unified Agenda is produced through a computer system designed and maintained by the Center with the advice and assistance of the Government Printing Office. The system was designed to save agencies time and money by automating the preparation and printing of their agendas in a uniform format and to make the Unified Agenda easier to use. In order to further facilitate producing the Unified Agenda, many agencies currently use computer terminals at their offices to enter agenda information into the Center's computer system.

All agendas contain uniform data elements -- regulation title, significance, legal authority, CFR citation, legal deadline, abstract, timetable, small entities affected, government levels affected, procurement, agency contact, and a unique Regulation Identifier Number. Agencies also include any additional information they consider important. If any of the data elements are not included, the agency either did not report the information or may provide an explanation in its preamble, the text that introduces the agency's section of the Unified Agenda. For further information, please contact the individual agency.

Congress generally authorizes a single Federal agency to implement, through regulation, a specific policy objective. Sometimes, however, a statute may require that several agencies issue regulations to accomplish the objective. In such cases, the agencies, working with a central coordinator, jointly publish the documents issued in the course of the rulemaking proceeding. These proceedings are referred to as Governmentwide common rules.

In this edition of the Unified Agenda, three Governmentwide common rules are reported by the agencies participating in their development. They are:

- Debarment and Suspension
- New Restrictions on Lobbying
- Uniform Administrative Requirements for Grants and Cooperative Agreements With State and Local Governments

Agencies participating in the development of these common rules have reported them in their individual sections of the Unified Agenda.

The Unified Agenda of Federal Regulations is published in April and October of each year. We welcome comments on this edition and suggestions for improving future ones.

How To Use the Unified Agenda

Each agency agenda appears as a separate part in this edition of the **Federal Register.** The parts are organized alphabetically in four groups: Cabinet departments, other executive agencies, joint authorities, and independent agencies. Departments are divided into agencies, which may in turn be divided into subagencies.

Each agency introduces its section of the Unified Agenda with a preamble providing information specific to that section. Each agency lists its rules in four groups:

1. Prerule Stage -- actions agencies will undertake in the next 12 months to determine whether or how to initiate rulemaking. Such actions occur prior to a Notice of Proposed Rulemaking and may include Advance Notices of Proposed Rulemaking (ANPRMs) and reviews of existing regulations.

2. Proposed Rule Stage -- actions for which agencies plan to publish a Notice of Proposed Rulemaking (NPRM) as the next step in their rulemaking process or for which the closing date of the NPRM Comment Period is the next step.

3. Final Rule Stage -- actions for which agencies plan to publish a final rule or an interim final rule or to take other final action as the next step in their rulemaking process.

4. Completed Actions -- actions or reviews the agency completed or withdrew since publishing its last agenda. This section also includes items that were begun and completed between issues of the Unified Agenda.

An agency may use a subheading to identify regulations that it has grouped according to a particular topic. When these subheadings are used, they appear above the title of the first regulation in the group.

A bullet (•) preceding an entry indicates that the entry appears in the Unified Agenda for the first time.

All entries are numbered sequentially from the beginning to the end of the Unified Agenda. The Sequence Number (Seq. No.) preceding the title of each entry identifies the location of the entry in this edition of the Unified Agenda. The same number is used in the indexes to enable readers to find entries on specific subjects.

For each agency that requests it, the Center provides a computer-produced Table of Contents that appears after the agency preamble. The agency Tables of Contents help readers locate quickly those entries within an agency that may be of most interest to them. Sequence numbers also appear in agency Tables of Contents.

The Unified Agenda contains three indexes. The first two indexes list the regulatory actions that agencies believe may have effects on small entities or levels of government. In addition, the Unified Agenda contains a Subject Index based on the **Federal Register Thesaurus of Indexing Terms** to help readers locate entries from various agencies that may affect a particular area of interest. The index also contains cross references to assist the reader's search.

Entries describing regulations in the Unified Agenda should contain, at a minimum, the following information:

- Title of the Regulation.
- Significance -- an indication of the significance of the entry that appears when:

VOL
58
ISS
78
AP
26
19 93
UMI

a. The action is included in the **Regulatory Program of the United States Government**, or
b. the agency otherwise considers the action a priority.

The Significance heading appears only if the entry is a significant action.

- Legal Authority -- the section(s) of the United States Code (U.S.C.) or Public Law (P.L.) or the Executive order (E.O.) that authorize(s) the regulatory action. Agencies may provide popular name references to laws in addition to these citations.
- CFR Citation -- the section(s) of the Code of Federal Regulations that will be affected by the action.
- Legal Deadline -- an indication of whether the rule is subject to a statutory or judicial deadline, the date of that deadline, and whether the deadline pertains to an NPRM, a Final Action, or some "Other" action.
- Abstract -- a description of the problem the regulation will address; the need for a Federal solution; to the extent available, the alternatives that the agency is considering to address the problem; and the potential costs and benefits of the action.
- Timetable -- the dates and citations (if available) for all past steps and at least a projected date for the next step for the regulatory action. If a date appears in this section as 00/00/00, it means the date of the action is currently undetermined. Similarly, 10/00/93 means the agency can predict the month and year the action will take place but not the day it will occur.
- Small Entities Affected -- indicates whether the rule is expected to have a significant economic impact on a substantial number of "small entities" as defined by the Regulatory Flexibility Act (5 U.S.C. 601) and, if so, whether the small entities are businesses, governmental jurisdictions, or organizations.
- Government Levels Affected -- indicates whether the rule is expected to affect levels of government and, if so, whether the governments are local, State, or Federal.
- Agency Contact -- the name, title, address, and phone number of a person in the agency who is knowledgeable about the regulation
- Procurement -- a statement identifying procurement-related actions and indicating whether there is a statutory requirement for the action and whether there is a paperwork burden associated with the action. The Procurement heading appears only if the entry is a procurement-related action.

Some agencies have provided other optional information at their discretion.

Data Limitations

Agencies prepared entries for this edition of the Unified Agenda to give the public notice of their plans to review, propose, and issue regulations. They have tried to predict their activities over the next 12 months as accurately as possible, but dates and schedules are subject to change. Agencies may withdraw some of the regulations now under development, and they may issue or propose other regulations not included in their agendas. Agency actions in the rulemaking process may occur before or after the dates they have listed. The Unified Agenda does not create a legal obligation on agencies to adhere to schedules within it or to confine their regulatory activities to those regulations that appear in it. The information in this edition is accurate as of February 26, 1993, in the judgment of the submitting agencies, except as otherwise noted in individual agency preambles. Where applicable, individual actions will be subject to review for compliance with E.O. 12291, the Regulatory Flexibility Act, the Office of Federal Procurement Policy Act Amendments of 1988, and the Paperwork Reduction Act at appropriate points in the regulatory process.

List of Abbreviations

The following abbreviations appear throughout this edition of the Unified Agenda:

ANPRM -- An Advance Notice of Proposed Rulemaking is a preliminary notice that an agency is considering a regulatory action. The agency issues an ANPRM before it develops a detailed proposed rule. The ANPRM describes the general area that may be subject to regulation and usually asks for public comment on the issues and options being discussed. An ANPRM is issued only when an agency believes it needs to gather more information before proceeding to a notice of proposed rulemaking.

CFR -- The Code of Federal Regulations is an annual codification of the general and permanent regulations published in the **Federal Register** by the departments and agencies of the Federal Government. The Code is divided into 50 titles, and each title covers a broad area subject to Federal regulation. The CFR is keyed to and kept up-to-date by the daily issues of the **Federal Register**.

EO -- An Executive order is a directive from the President to an executive agency, issued under constitutional or statutory authority. Executive orders are published in the **Federal Register** and in title 3 of the Code of Federal Regulations.

FR -- The **Federal Register** is a daily Federal Government publication that provides a uniform system for publishing Presidential documents, all proposed and final regulations, notices of meetings, and other official documents issued by Federal departments and agencies.

FY -- The Federal fiscal year runs from October 1 to September 30.

NPRM -- A Notice of Proposed Rulemaking is the document an agency issues and publishes in the **Federal Register** that describes and solicits public comments on a proposed regulatory action. Under the Administrative Procedure Act (5 U.S.C. 553), an NPRM must include, at a minimum:

- A statement of the time, place, and nature of the public rulemaking proceeding;
- a reference to the legal authority under which the rule is proposed; and
- either the terms or substance of the proposed rule or a description of the subjects and issues involved.

PL -- A Public Law is a law passed by Congress and signed by the President or enacted over his veto. It has general applicability, as opposed to a private law that applies only to those persons or entities specifically designated. Public laws are numbered in sequence throughout the 2-year life of each Congress; for example, PL 102-5 is the fifth public law of the 102nd Congress.

RFA -- A Regulatory Flexibility Analysis describes the impact of a proposed rule on small entities as required by the Regulatory Flexibility Act (5 U.S.C. 601). An RFA describes why the agency is considering the action; the objectives of and legal basis for the proposed rule; an estimate of the number of small entities that could be affected and the compliance requirements they would have to fulfill; any other duplicative, overlapping, or conflicting Federal rules; and alternatives to the proposed action. When required, an initial RFA accompanies an NPRM, and a final RFA accompanies a final rule.

RIA -- A Regulatory Impact Analysis is required by E.O. 12291 for all major rules and other regulations designated by the Office of Management and Budget. An RIA is prepared to determine whether a proposed regulatory action meets the requirements of section 2 of E.O. 12291; namely, that it:

- Be based on adequate information concerning the need for and consequences of the action;
- not be undertaken unless the potential benefits outweigh the potential costs to society;
- maximize net benefits to society;
- entail the least net cost to society of the alternatives considered; and
- take into account the condition of particular affected industries, the national economy, and contemplated future regulatory actions.

RIN -- The Regulation Identifier Number is assigned by the Regulatory Information Service Center to identify each regulatory action listed in the Unified Agenda. Many agencies include RIN numbers in the headings of their Rule and Proposed Rule documents when publishing them in the **Federal Register**.

Seq. No. -- The Sequence Number identifies the location of an entry in this edition of the Unified Agenda.

USC -- The United States Code is a consolidation and codification of all general and permanent laws of the United States. The USC is divided into 50 titles, and each title covers a broad area of Federal law.

Information About Additional Copies

Additional copies of this edition of the **Federal Register** are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325, (202) 783-3238.

Copies of individual agency agendas may be available directly from the agency. Please contact the particular agency for further information.

Dated: April 1, 1993.

Semiannual Regulatory Agenda, April 1993

AGENCY: Office of the Secretary, USDA

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of major and nonmajor regulations being developed in agencies of the U.S. Department of Agriculture in conformance with Executive Order 12291 "Federal Regulation." The agenda also describes regulations affecting small entities as required by section 602 of the Regulatory Flexibility Act, Public Law 96-354.

This semiannual update of the agenda comes at a time when the regulatory policies and practices of the Department are under review by the Office of the Secretary and senior policy staff. Therefore, no new entries will appear in this edition. The entries that do appear are those carried forward from the October 1992 edition. Each of the dockets in this latter category will also undergo further policy review before publication for comment or initiating action. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action.

Requests for copies of the agenda should include a self-addressed, stamped envelope and be directed to: Regulatory Agenda, OBPA, Office of the Secretary, Room 147-E, Administration Building, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-1272.

Dated: March 1993.

Marvin J. Shapiro,

Chief, Legislative, Regulatory, and Automated Systems Division

1. ORGANIC CERTIFICATION OF ORGANIC FOOD PRODUCTION ACT OF 1990

Significance: Agency Priority

Legal Authority: PL 101-624, sec 2101 to 2123; 7 USC 6501 to 6522

CFR Citation: None

Legal Deadline: NPRM, Statutory, May 28, 1992. Final, Statutory, October 1, 1993. Other, Statutory, May 28, 1991. Act calls for the Secretary to appoint the National Organic Standards Board 180 days after enactment and convene it within 60 days thereafter.

Abstract: Public Law 101-624 calls for necessary regulations to implement the Organic Foods Production Act of 1990. The legislation calls for a national program to develop standards for certifying products as organic. Actions called for under this Act include: (a) notice for applicants to apply for membership on the National Organic

VOL 58 ISS 78 AP 26 1993 UMI

USDA—AMS — **Prerule Stage**

Standards Board; (b) notice of nominations to the Board and announcement of meetings; (c) notice inviting States and other individuals to apply to be Certifying agents; (d) notice, hearings and comments for development of regulations for standards for organic livestock products; (e) notice and comment on proposed and final National List of Approved and Prohibited Substances for Organic Production and Handling; (f) notice and comment on proposed amendments to the National List; (g) issue a proposed rule to implement the title for comment; and (h) issue a final rule to implement the program.

3. NATIONAL LABORATORY ACCREDITATION PROGRAM

Significance: Agency Priority

Legal Authority: PL 101-624, sec 1321 to 1330; 7 USC 138 to 138i

CFR Citation: Not applicable

Legal Deadline: None

Abstract: The 1990 Farm Bill authorized the creation of a National Laboratory Accreditation Program (NLAP) for laboratories that request accreditation and conduct residue testing of agricultural products or that make claims to the public or buyers of agricultural products concerning chemical residue levels on agricultural products. The program is designed to protect human health by ensuring that laboratories which make claims to the public concerning pesticide residue levels meet minimum quality and reliability standards. The standards for the NLAP will be provided by the Food and Drug Administration with the operation of the program under the Agricultural Marketing Service, USDA. The program costs will be offset by a fee schedule. The one-time appropriation was used to provide for a fully equipped pesticide laboratory to verify the findings of those laboratories applying for accreditation.

CFR Citation: None

Legal Deadline: Other, Statutory. A final order, if approved by fluid milk processors, shall become effective not later than 180 days following publication of the proposed order.

Abstract: The "Fluid Milk Promotion Act of 1990," authorized the establishment of a processor-funded milk promotion program which will provide an orderly procedure for developing, financing through assessments on fluid milk products produced in the United States, and carrying out a coordinated program of advertising designed to strengthen the position of the dairy industry in the market place.

USDA—AMS — **Proposed Rule Stage**

5. REVISION OF REGULATIONS GOVERNING THE INSPECTION AND GRADING SERVICES OF MANUFACTURED OR PROCESSED DAIRY PRODUCTS

Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946

CFR Citation: 7 CFR 58

Legal Deadline: None

Abstract: The regulations have not been updated since December 1, 1976. The revisions of regulations are needed to reflect more desirable ways of carrying out the dairy inspection and grading program. The changes are not expected to have any major impact on program participation, however, in that most participants are operating in a manner that is consistent with the proposed changes.

6. REGULATIONS UNDER THE FEDERAL SEED ACT

Legal Authority: 7 USC 1551 to 1611 Federal Seed Act

CFR Citation: 7 CFR 201 to 202

Legal Deadline: None

Abstract: Changes in the regulations of the Federal Seed Act (FSA) are to be proposed to eliminate differences between FSA and Association of Official Seed Analysts (AOSA) testing rules as well as differences between minimum seed certification standards of the FSA and those of the Association of Official Seed Certifying Agencies (AOSCA). The FSA regulates the interstate shipment of agricultural and vegetable seed, which is required to be labeled with certain information needed by the seed buyer. The Agricultural Marketing Service (AMS) has cooperative agreements with each of the 50 states who inspect and test seed being sold in their state. Interstate shipments of seed found to be mislabeled can be submitted to AMS for action under the FSA. States test seed according to AOSA rules. AMS must test according to FSA rules. Any alternative to the changes, could in some cases cause seed labeled according to a test conducted by AOSA rules to be mislabeled when tested according to FSA rules, or cause seed certified by an AOSCA member agency to be not in compliance with the FSA. On balance these changes will likely result in no cost or a net savings to the seed industry.

7. MANDATORY INSPECTION OF EGGS AND EGG PRODUCTS

Significance: Agency Priority

Legal Authority: 21 USC 1031 to 1056 Egg Products Inspection Act

CFR Citation: 7 CFR 59

Legal Deadline: None

Abstract: The proposal clarifies areas of responsibility and authority in regard to the time of inspection, operating schedules of official plants, facilities to be furnished for the inspectors, a new authority regarding an appeal grading or inspection, air flow in liquid holding rooms, hand washing and sanitizing, covering facial hair, and results of laboratory tests and analyses. Changes to make this regulation consistent with other Division regulations affect the definition of "Dirty Egg," a new definition for "Nest run eggs," and the rinse water temperature in egg cleaning operations.

8. POLICY STATEMENT AND REGULATIONS GOVERNING AVAILABILITY OF TOBACCO INSPECTION SERVICES TO BURLEY TOBACCO ON DESIGNATED MARKETS

Significance: Agency Priority

Legal Authority: 7 USC 511 et seq

CFR Citation: 7 CFR 29

Legal Deadline: None

Abstract: The proposed rule was withdrawn and is being rewritten. We plan to publish the proposed rule in April with a 60-day comment period. The Department established the burley tobacco advisory committee effective May 14, 1990 to assist in the regulation of sales at designated markets selling burley tobacco. The committee has met three times and adopted a statement of policies and procedures for the 1991-92 season.

10. VOLUNTARY INSPECTION OF EGG PRODUCTS AND GRADING

Significance: Agency Priority

Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946

CFR Citation: 7 CFR 55

Legal Deadline: None

Abstract: The proposal will broaden the definition of "Product" to include certain products that are now exempt and will change the terminology describing facilities to be furnished by official plants. These are the same changes being proposed for 7 CFR part 59 and would make both regulations consistent to avoid confusion among the inspectors who must enforce both regulations.

11. GRADING OF SHELL EGGS

Significance: Agency Priority

Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946

CFR Citation: 7 CFR 56

Legal Deadline: None

Abstract: The proposal clarifies and updates provisions of the regulations in response to changing industry practices, program direction, and policy interpretation. Changes to reflect current industry practices would affect grading room requirements, references to the tape used to seal cartons, and the reuse of oil from shell egg protecting operations. Changes to clarify and strengthen existing regulations would affect the definition of "quality assurance inspector," the facilities and equipment required for graders, the temperature of the spray rinse in shell egg cleaning operations, and the "nest run B quality shell" definition. Other changes will be to require a specific level of humidity in cooler rooms to help maintain egg quality and to eliminate wholesale grades and weight classes because they are no longer used.

12. VOLUNTARY GRADING OF POULTRY PRODUCTS AND RABBIT PRODUCTS

Significance: Agency Priority

Legal Authority: 7 USC 1621 to 1627 Agricultural Marketing Act of 1946

CFR Citation: 7 CFR 70

Legal Deadline: None

Abstract: The proposal updates the poultry grade standards to reflect changes in marketing practices. Changes to reflect current industry practices will reclassify discolorations, will expand the range allowable, will eliminate the two procurement grades, will change new carcass weight categories, and will establish new grading criteria for large poultry parts. Change to clarify and strengthen existing regulations related to the definition of "exposed flesh."

15. REVISION OF USER FEES FOR COTTON CLASSIFICATION, TESTING AND STANDARDS

Legal Authority: 7 USC 473(a); 7 USC 473(d); 7 USC 55

CFR Citation: 7 CFR 28; 7 CFR 27

Legal Deadline: Final, Statutory, June 1, 1993.

Abstract: This revision will adjust the 1992 user fees for grower's classification under the Cotton Statistics and Estimates Act of 1987 as amended by Public Law 102-237. The revisions would allow for the recovery of costs associated with these programs. The economic impact of the revisions in user fees are not yet precisely known. A slight increase would not have a major economic impact. All services are voluntary.

Legal Deadline: None

Abstract: The Agricultural Marketing Service (AMS) of the Department of Agriculture consolidated and transferred functions related to analytical laboratory testing services performed on tobacco, seeds, dairy products, eggs, fruits, vegetables, meat, poultry and related agricultural products to its Science Division. This proposed rule would revise the regulations by establishing a new Subchapter E, Commodity Laboratory Testing Programs, in Title 7 of the Code of Federal Regulations by amending and transferring AMS regulations concerning laboratory services, and the regulations under the Plant Variety Protection Act. The regulations would also be revised by adding provisions for statistical science support services and residue monitoring operations to the new subchapter parts 90-101 and part 110. In addition, fees charged for testing services under the various Science Division programs would be

VOL 58 ISS 78 APR 26 1993 UMI

19. RECORDKEEPING REQUIREMENTS FOR CERTIFIED APPLICATORS OF FEDERALLY RESTRICTED USE PESTICIDES

Significance: Agency Priority

Legal Authority: PL 101-624, sec 1491; 7 USC 136i-1

CFR Citation: 7 CFR 110

Legal Deadline: NPRM, Statutory, August 10, 1992. Final, Statutory, June 1, 1993.
Statutory, May 27, 1991 (180 Days after enactment).

Abstract: The USDA, in consultation with EPA, will establish requirements for recordkeeping by all certified applicators of federally restricted use pesticides. Annual reports to Congress on agricultural/nonagricultural uses of federally restricted pesticides are mandated. The identity of individual producers in these reports and surveys will be protected. Currently no recordkeeping requirements exist at the Federal level for certified private applicators. Most State commercial applicator certification programs require some form of recordkeeping. States that do not have any type of recordkeeping regulations will fall under a Federal program. To implement, USDA will delegate operational responsibilities to States through cooperative agreements. AMS will oversee the Federal program.

23. FRESH FRUITS, VEGETABLES, AND OTHER PRODUCTS (INSPECTION, CERTIFICATION, AND STANDARDS)

Significance: Agency Priority

Legal Authority: 7 USC 1622; 7 USC 1624

CFR Citation: 7 CFR 51

Legal Deadline: None

Abstract: The objective is to increase the fees for voluntary inspection services at destination markets to replenish the reserve balance of the trust fund. The industry has repeatedly emphasized the program's need to provide faster response to requests for service. To meet this requirement, we have hired more graders. The additional costs have caused the market inspection segment of the Fresh Products Trust Fund reserve to fall to 1.3 months of operating reserve, well below the four months needed to ensure the program's financial viability and to satisfy requirements of AMS policy.

30. 1993 WOOL AND MOHAIR PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1781 et. seq.; The National Wool Act of 1954, as amended

CFR Citation: 7 CFR 1468

Legal Deadline: None

Abstract: The objective of this action is to encourage the continued domestic production of wool at prices fair to both producers and consumers, in a manner that will assure a viable domestic wool industry in the future, by supporting the prices of wool and mohair by means of loans, purchases, payments, or other operations. The primary determinations are 1) support mohair at a level not more than 15 percent above or below the comparable percentage of parity at which shorn wool is supported (the price support level for shorn wool is determined by statutory formula), and 2) support pulled wool through payments based on the liveweight of unshorn lambs marketed for slaughter. The net cost is expected to be $150 million to $200 million.

CFR Citation: 7 CFR 1413

Legal Deadline: None

Abstract: The objective of this action is to implement the Wheat, Feed Grain, Cotton, and Rice Programs as required by legislation. Primary determinations are 1) crops to be allowed to be planted on flexible acreage, 2) implementation of Targeted Option Payments, 3) planting of designated crops and conserving crops on Acreage Conservation Reserve (ACR) acreage, and 4) planting of oats on wheat and feed grain ACR. The net cost to the Government is expected to be $100 million to $200 million.

32. 1991-95 CROPS SUGAR BEET AND SUGARCANE PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1446; The Agricultural Act of 1949, sec 201 and 206, as amended; 7 USC 1311; The Agricultural Adjustment Act of 1938, as amended

CFR Citation: None

Legal Deadline: None

Abstract: The objective of this action is to implement the Sugarcane and Sugar Beet Program as required by legislation. The primary determinations are 1) the 1991 price support level (set at the statutory minimum of 18.00 cents per pound), and 2) implementation of Domestic Marketing Allotments. No Government outlays are expected as a result of this action, but the program raises costs to consumers by about $2.0 billion per year.

33. AMENDMENTS TO THE PRODUCTION ADJUSTMENT REGULATIONS—RECONSTITUTION OF BASES, ALLOTMENTS AND QUOTAS

Legal Authority: 7 USC 1379; The Agricultural Adjustment Act of 1938, sec 379, as amended.

CFR Citation: 7 CFR 719

Legal Deadline: None

Abstract: This action is needed to amend the regulations regarding reconstitution of bases, allotments, and quotas in order to 1) clarify them, 2) make them more consistent with the payment limitation regulations, and 3) determine whether a spouse should be considered the "same owner" when determining whether land is under the same ownership. No Federal outlays are expected.

34. PILOT VOLUNTARY PRODUCTION LIMITATION PROGRAM

Legal Authority: 7 USC 1444f, 1445b-3a; The Agricultural Act of 1949, sec 105B(g), as amended.

CFR Citation: 7 CFR 1413

Legal Deadline: None

Abstract: This action is needed to implement the Pilot Voluntary Production Limitation Program (PVPLP) for wheat and feed grains, as required by P.L. 101-624. This action will implement regulations to provide for 1) Implementation of the PVPLP in at least 15 states, 2) Limiting the amount of wheat or feed grains that can be disposed of in excess of the production limitation quantity for the marketing year, 3) A production limitation quantity calculation, 4) Terms and conditions for producers who elect to participate, 5) Provisions for excess production, 6) Subsequent year marketing of excess production, and 7) Measures to prevent circumvention of the program, including refunds or forfeitures of commodities. Only minor administrative and program costs are expected.

37. EXCESSIVE MANUFACTURING (MAKE) ALLOWANCES IN STATE MARKETING ORDERS FOR MILK

Significance: Agency Priority

Legal Authority: 7 USC 1446e-1; The Food, Agriculture, Conservation, and Trade Act of 1990

CFR Citation: None

Legal Deadline: Final, Statutory, November 28, 1991.

Abstract: The Food, Agriculture, Conservation, and Trade Act of 1990 requires that, beginning 12 months after enactment, no State shall provide for (and no person shall collect, directly or indirectly) a greater allowance for the processing of milk ("make allowance") than is permitted under a Federal program to establish a Grade A price for manufacturing butter, nonfat dry milk, or cheese. The law provides for penalties and investigations by the Secretary if a producer provides evidence of such action. No Government outlays are expected.

38. ALLOCATION OF PROCUREMENT OF PROCESSED AGRICULTURAL COMMODITIES FOR DONATION ON A LOWEST LANDED COST BASIS

Significance: Agency Priority

Legal Authority: 46 USC 1241f(c); The Merchant Marine Act, 1936, as amended, sec 901b(c)

CFR Citation: 7 CFR 1496

Legal Deadline: None

Abstract: The objective of this action is to amend the regulations governing the procurement of commodities as required by the Food, Agriculture, Conservation, and Trade Act of 1990 (the 1990 Act). The 1990 Act requires that CCC shall, without detriment to any port range, allocate, on the principle of lowest landed cost (LLC) without regard to the country of documentation of the vessel, 50 percent of the bagged, processed, or fortified commodities for Title II (PL 480) donations. In addition, the 1990 Act provides that CCC limit the Great Lakes port range to a percentage share under this procedure that is no greater than in 1984, and that cargo allocated to Great Lakes ports may not be shipped from other port ranges except to meet U.S. flag cargo preference requirements. This action will result in no more than a $5 million increase in annual Government outlays.

39. NATIONAL AVERAGE LOAN RATES FOR 1993-CROP QUOTA AND ADDITIONAL PEANUTS AND MINIMUM COMMODITY CREDIT CORPORATION (CCC) EXPORT-EDIBLE SALES PRICE FOR ADDITIONAL PEANUTS

Significance: Agency Priority

Legal Authority: 7 USC 1445c-3; The Agricultural Act of 1949, sec 108B, as amended

CFR Citation: 7 CFR 1446; 7 CFR 1421

Legal Deadline: Final, Statutory, February 15, 1993.
This deadline applies to price support levels only.

Abstract: The objective of this action is to determine the price support levels for quota and additional peanuts, as required by legislation. The price support levels provide a domestic price floor for quota and additional peanuts. The primary determinations are 1) price support level for quota peanuts, 2) price support level for additional peanuts, and 3) minimum CCC export-edible sales price for additional peanuts. The net cost is expected to be $3 million.

40. FARMER-OWNED RESERVE (FOR) PROGRAM FOR THE 1992 CROP OF FEED GRAINS

Significance: Regulatory Program

USDA—ASCS

Final Rule Stage

Legal Authority: 7 USC 1445e; The Agricultural Act of 1949, Sec. 110, as amended

CFR Citation: 7 CFR 1421

Legal Deadline: Final, Statutory, March 15, 1993.

Abstract: The objective of this action is to formulate and administer a FOR program as required by legislation. The FOR program provides extended loans (at no less than the current loan rate) and storage payments to producers to enable them to store their crops when supplies are abundant, extend the time period for orderly marketing, and provide adequate carryover stocks to ensure a reliable supply. The primary determinations are 1) terms and conditions, and 2) maximum quantity of feed grains to be stored in the FOR. Entry will likely reduce loan redemptions by about $400 million in FY 1992. Loan redemptions and storage payments in FY's 1993 through 1995 would result in a net cost over the FY 1992-95 period of about $50 million to $100 million.

41. 1994 WHEAT LOAN RATE AND ACREAGE REDUCTION PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1445b-3a; The Agricultural Act of 1949, sec 107B, as amended

CFR Citation: 7 CFR 1413; 7 CFR 1421

Legal Deadline: NPRM, Statutory, April 1, 1993. Final, Statutory, June 1, 1993. Other, Statutory, July 31, 1993.
The April 1 and June 1, 1993, deadlines are for the ARP level. The July 31, 1993, deadline is for final program adjustments.

Abstract: The objective of this action is to assure sufficient supplies of wheat for domestic and export use, support farm income, combat inflation, hold down Government costs, conserve natural resources, and comply with statutory requirements. The primary determinations are 1) loan and purchase rate and 2) Acreage Reduction Program level. The net cost is expected to be $2 billion to $3 billion.

RIN: 0560–AC75

42. 1993-CROP MARKETING QUOTA AND PRICE SUPPORT LEVEL FOR BURLEY TOBACCO

Significance: Agency Priority

Legal Authority: 7 USC 1314; The Agricultural Adjustment Act of 1938, sec 314, as amended; 7 USC 1445; The Agricultural Act of 1949, sec 106, as amended

CFR Citation: 07 CFR 723; 07 CFR 1464

Legal Deadline: Final, Statutory, February 1, 1993.

Abstract: The burley tobacco marketing quota and price support programs are required by legislation. The purpose of the quota and price support is to balance supply with demand at levels assuring stable supplies for domestic and export use, at prices fair to producers. The national quota is based on manufacturers' intentions, 3-year average exports, an adjustment to maintain loan stocks, and a discretionary adjustment of plus or minus 3 percent. The price support level is based on a formula that weights average market prices (2/3) and a cost index (1/3), plus discretion to limit any increase to 65 percent of formula increase. Gross loan outlays of $80 million are expected in FY 1994. These outlays will be offset by loan redemptions and no-net-cost assessments in FY 1994 and subsequent years, for a net cost of $0.

RIN: 0560–AC80

43. 1993-CROP MARKETING QUOTAS FOR FIVE KINDS OF TOBACCO

Significance: Agency Priority

Legal Authority: 7 USC 1312; The Agricultural Adjustment Act of 1938, sec 312, as amended

CFR Citation: 07 CFR 723

Legal Deadline: None

Abstract: Marketing quotas and acreage allotments are required by legislation for Fire-cured (type 21), Fire-cured (types 22-23), Dark Air-cured (types 35-36), Virginia Sun-cured (type 37), and Cigar Filler and Binder (types 42-44 and 53-55). The purpose of quotas and allotments for these five kinds of tobacco is to balance supply with demand at levels that assure stable supplies for domestic and export use at prices that are fair to producers. Marketing quota and acreage allotment determinations are based on 10-year average marketings adjusted for trends to yield the "reserve supply level" as defined by legislation. Marketing quotas are implemented if approved by producers in referenda. Producers approved quotas for the 1993 crop of Fire-cured and Dark Air-cured tobaccos. Referenda for the other types are scheduled for 3/92 and 3/93. Producers of these types have historically voted in favor of quotas. Gross loan outlays under the price support and quota program of $2 million are expected in FY 1994. These outlays will be offset by loan redemptions and no-net-cost assessments in FY 1994 and subsequent years, for a net cost of $0.

44. 1993-CROP PRICE SUPPORT LEVELS FOR SIX KINDS OF TOBACCO

Significance: Agency Priority

Legal Authority: 7 USC 1445; The Agricultural Act of 1949, sec 106 as amended

CFR Citation: 07 CFR 1464

Legal Deadline: None

Abstract: Price support levels for Fire-cured (type 21), Fire-cured (types 22-23), Dark Air-cured (types 35-36), Virginia Sun-cured (types 37), Puerto Rican Cigar Filler (type 46), and Cigar Filler and Binder (types 42-44 and 53-55) are set by statutory formula whenever a marketing quota is in effect. No quota will be in effect for type 46 because supplies are well above the reserve supply level, therefore no price support will be available for this type. Gross loan outlays under the price support and quota program of $2 million are expected in FY 1992. These outlays will be offset by loan redemptions and no-net-cost assessments in FY 1994 and subsequent years, for a net cost of $0

45. AMENDMENT TO THE HIGHLY ERODIBLE LAND AND WETLAND CONSERVATION PROGRAM REGULATIONS—PERSON DETERMINATIONS

Legal Authority: 16 USC 3801; 16 USC 3811; 16 USC 3812; 16 USC 3821-23; The Food Security Act of 1985, sec 1201, as amended

CFR Citation: 7 CFR 12

Legal Deadline: None

Abstract: The objective of this action is to set a standard for a more consistent "person" determination by using an attribution method for determining benefits that shall be denied persons who are associated with the actual violators of the highly erodible land (HEL) and wetland conservation provisions. The current affiliated person rule for HEL and wetlands is difficult to administer because a strict interpretation of the rules could result in a chain of affiliated persons, all of whom would be ineligible for USDA benefits, when in fact many of the affiliated persons did not play a part in the violation. This action will provide a more equitable and understandable method for imposing sanctions on conservation compliance violations. No costs are expected as a result of this action.

46. AMENDMENTS TO THE SUGAR MARKETING ASSESSMENT REGULATIONS

Legal Authority: 7 USC 1446g; The Agricultural Act of 1949, sec 206, as amended

CFR Citation: 7 CFR 1435

Legal Deadline: None

Abstract: The objective of this action is to amend regulations governing the sugar market assessment as required by the Food, Agriculture, Conservation, and Trade Act Amendments of 1991. The regulations will be amended to 1) provide that assessments will be effective for FY's 1992-96, rather than FY's 1991-95, 2) provide that the assessments will be collected, on a monthly basis, for sugar that has been marketed during the fiscal year, 3) clarify the term "marketed" to mean shipments from the first processor that involves a title transfer, and 4) provide that sugar subject to the assessment includes that processed from domestically produced cane and beet molasses, as well as from domestically produced cane and beets. No costs are expected as a result of this action.

47. AMENDMENTS TO THE WETLANDS REGULATION REGARDING ABANDONED ACREAGE AND DRAINAGE BY DRAINAGE DISTRICT

Legal Authority: 16 USC 3801, 3821-23, sec 1201 and 1221-1224; The Food Sec. Act of 1985, as amended by sec 1421-24(PL101-624)

CFR Citation: 7 CFR 12

Legal Deadline: None

Abstract: This action is necessary to enhance the flexibility of wetland regulations for producers without imposing any significant cost to the Government or decreasing protection of wetlands. The determinations are 1) Allow any area used for production of any crop or for long term rotation to not be considered an "abandoned" wetland, and 2) Allow areas drained by a drainage district to be planted to forage crops and harvested by mechanical means. The "abandonment" determination will remove an incentive to keep land in intensive production. The drainage determination will allow production on a small number of acres that otherwise would not likely be farmed. The total acreage involved will likely be less than 50,000 acres, and no impacts on prices are expected. Producers' income could increase by up to $2.5 million per year by the end of ten years through increased efficiency. No cost to Government is expected.

50. 1993-CROP SUGAR BEET AND SUGARCANE PRICE-SUPPORT LOAN RATES

Significance: Regulatory Program

Legal Authority: 7 USC 1446g; The Agricultural Act of 1949, sec 206, as amended.

CFR Citation: 7 CFR 1435

Legal Deadline: None

Abstract: The objective of this action is to support the price of domestically produced sugarcane and sugar beets at a level that assures growers and processors of these commodities sufficient income, as required by legislation. The primary determinations are 1) the loan rate for raw cane sugar, 2) the loan rate for refined beet sugar, 3) the minimum support price paid by processors for sugarcane, and 4) the minimum support price paid by processors for sugar beets. The Sugar Program is carried out at no net cost to the government. However, based on latest U.S. consumption and price data, the annual cost to U.S. consumers of sugar and corn sweeteners is around $2 billion.

Abstract: These rules and regulations are needed to clarify and codify the policies and procedures the Agricultural Stabilization and Conservation Service (ASCS) will use to settle debts owed to ASCS. The primary determinations are 1) Define

VOL 58 ISS 78 AP 26 1993 UMI

terms applicable to the collection of debts by ASCS, 2) Provide procedures for making demand for payment of debts due ASCS, 3) Provide for collection of debts by installment payments if certain conditions are met, 4) Indicate when collection by administrative offset is appropriate, 5) List the priorities that are applicable to offsets and assignments, 6) State when withholding of a payment prior to the completion of an applicable offset procedure may be made from amounts payable to a debtor by ASCS, 7) State the circumstances when an administrative appeal is appropriate, 8) Specify when contact can be made with the debtor's employing agency, 9) State when a debt should be discharged, 10) Provide the procedures that will be followed by ASCS and the rights that will be afforded to debtors when ASCS reports delinquent debts to credit reporting agencies, 11) State the requirements for referring debts to (cont)

Abstract: Legislation provided for $1.037 billion to be made available for losses associated with the 1990, 1991, and 1992 crops under the provisions of the Food, Agriculture, Conservation, and Trade Act of 1990. In addition, the Commodity Credit Corporation may borrow additional funds to insure that each producer will receive not less than 50.4 percent of their approved disaster loss, the proportion that was paid for in the previous phase of the program.

74. EXOTIC NEWCASTLE DISEASE IN ALL BIRDS AND POULTRY; PSITTACOSIS AND ORNITHOSIS IN POULTRY

Significance: Regulatory Program

Legal Authority: 21 USC 111 to 113, 21 USC 115; 21 USC 117; 21 USC 120; 21 USC 123 to 126; 21 USC 134b; 21 USC 134f

CFR Citation: 9 CFR 82

Legal Deadline: None

Abstract: Exotic Newcastle Disease (also known as viscerotropic velogenic Newcastle disease and as VVND) and psittacosis or ornithosis (now generally referred to as chlamydiosis) are communicable diseases of birds and poultry. The spread of these diseases in the United States could have serious consequences for the United States poultry industry. A review of the Department's regulations to prevent the interstate spread of these diseases indicates the need for a complete revision to make the regulations more effective and to increase compliance with them.

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department currently regulates the importation of certain animals and animal products to prevent the introduction of communicable animal diseases into the United States. With certain exceptions, most animals imported into the United States must be quarantined upon arrival at facilities operated by the Federal Government; only sheep, birds, and horses may be quarantined in privately operated facilities. Some importers have expressed interest, however, in importing ruminants and swine, other than sheep, in greater numbers per shipment than can be handled at existing Federal facilities. The Department is considering amending the regulations to allow other species of domesticated ruminants and swine, from countries free of certain serious diseases, to be quarantined upon arrival in the United States at privately operated facilities.

76. REGULATION OF HORSES AND FARM ANIMALS UNDER THE ANIMAL WELFARE ACT

Significance: Agency Priority

Legal Authority: 7 USC 2131 to 2157

CFR Citation: 9 CFR 1; 9 CFR 2; 9 CFR 3

Legal Deadline: None

Abstract: The Department is authorized to regulate the treatment of certain horses and other farm animals under the Animal Welfare Act (the Act). Under the Act, the Department is authorized to regulate the treatment of horses used for research purposes, and is authorized to regulate the treatment of other farm animals, unless those animals are used or intended for use as food or fiber, for breeding management or production efficiency, or for improving the quality of food fiber. As a matter of policy, however, the Department has not been regulating such horses and other farm animals. However, because of the increasing use of these animals for research purposes, the Department has given notice of its intent to regulate such animals, and has requested comments on standards to be developed for the inclusion of these animals under the regulations. These actions will help ensure that the animals are treated humanely, in accord with the Act.

77. NATIONAL ENVIRONMENTAL POLICY ACT IMPLEMENTING PROCEDURES

Significance: Regulatory Program

Legal Authority: 40 USC 4321

CFR Citation: 7 CFR 372

Legal Deadline: None

Abstract: The National Environmental Policy Act (NEPA) (42 USC 4321, et seq.) requires that every Federal agency establish procedures to implement the provisions of the Act. The proposed APHIS NEPA Implementing Procedures have been developed to ensure compliance with NEPA. These Agency-specific procedures will enable APHIS decision makers to reach decisions in which environmental concerns are fully reviewed and will ensure timely public involvement in the NEPA process. The procedures will identify Agency actions, requirements, guidance, and references for completion of environmental assessments, and environmental reviews. The new APHIS NEPA Implementing Procedures will supersede the previous issues, APHIS Guidelines for Implementing NEPA Procedures (44 FR 50381-50384 and 44 FR 51272-51274), upon publication of the final rule.

78. CYCLICAL REVIEW OF 9 CFR PART 92, PHASE II

Significance: Regulatory Program

Legal Authority: 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 134a; 21 USC 134b; 21 USC 134c; 21 USC 134d; 21 USC 134f; 21 USC 135; 31 USC 9701

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department is reviewing the regulations in 9 CFR part 92, which, among other things, govern the importation into the United States of certain animals and poultry, and certain animal and poultry products. This is in compliance with Executive Order 12291 and Departmental Regulation 1512-1, which requires agencies to periodically review regulations.

The Department is conducting this Cyclical Review in phases. Phase I, effective August 2, 1990, reorganized the regulations. The Department is now starting Phase II. Subpart F (Dogs) of 9 CFR Part 92 has been reviewed and a notice of proposed rulemaking will be published. Reviews of the other subparts will follow. If the Department determines those regulations should be changed, notices of proposed rulemaking will be published.

79. IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS—PREVENTION OF POULTRY DISEASES

Significance: Agency Priority

Legal Authority: 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 134a to 134d; 21 USC 134f; 21 USC 135; 31 USC 9701

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department currently regulates the importation of poultry and poultry products, including eggs for hatching, to prevent the introduction of certain poultry diseases into the United States. We are considering revising these regulations to add restrictions to prevent the introduction of Salmonella enteritidis, serotype enteritidis, phage-type 4 (referred to below as S. enteritidis, phage-type 4), a virulent type of Salmonella that has not been detected in poultry flocks in the United States. Canada is the only country other than the United States in which poultry flocks are recognized as being free of S. enteritidis, phage-type 4. Safeguards under consideration include testing of individual poultry of the flock of origin in the country of origin, and testing and inspection during quarantine in the United States.

81. USER FEES

Significance: Regulatory Program

Legal Authority: 21 USC 136; 21 USC 136a

CFR Citation: 7 CFR 354; 9 CFR 130

Legal Deadline: None

Abstract: The Omnibus Budget Reconciliation Act of 1990 (P.L. 101-508) and the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorize the Secretary of Agriculture to prescribe and collect fees to cover the cost of providing agricultural quarantine and inspection services in connection with the arrival at a port in the customs territory of the United States, or the preclearance or preinspection at a site outside the customs territory of the United States, of international passengers, commercial vessels, commercial aircraft, and commercial trucks or railroad cars. APHIS is already collecting fees for certain services, including agricultural quarantine and inspection services, export services, and animal import services. APHIS plans to collect fees for veterinary diagnostics and reagents, additional animal import services, and preclearance or preinspection services at sites outside the customs territory of the United States.

82. IMPORTATION OF UNMANUFACTURED WOOD

Significance: Regulatory Program

Legal Authority: 7 USC 150dd; 7 USC 150ee; 7 USC 150ff; 7 USC 151 to 167

CFR Citation: 7 CFR 319

Legal Deadline: None

Abstract: USDA is developing regulations to restrict the importation of certain types of manufactured wood, such as logs, lumber, wood chips, bark, and pulp wood. There are a variety of plant pests and diseases associated with these articles, and there has recently been increased interest in importing large quantities of these articles into the U.S. At this time we are considering prohibiting the importation of logs and unmanufactured wood from certain tree genera and species, unless they meet importation criteria contained in the regulations and are imported under a permit issued by APHIS. The trees we are considering regulating in this manner are: all coniferous species; Carya; Fagus; Juglans; Liquidambar; Liriodendron; Nyssa; Populus; Quercus; Salix; and Thuja. The importation criteria would address the genus or species of the tree; the nature of the wood article; the country or area of origin; and methods by which the trees were harvested, stored, and treated.

83. CHICKEN DISEASE CAUSED BY SALMONELLA ENTERITIDIS

Significance: Regulatory Program

Legal Authority: 21 USC 111; 21 USC 134a; 21 USC 134f

CFR Citation: 9 CFR 82

Legal Deadline: None

Abstract: Disease caused by the bacterium known as Salmonella enteritidis serotype enteritidis (referred to below as SE) is a serious problem in egg-type chicken breeding flocks and egg production flocks, and is also a serious public health concern. The Animal and Plant Health Inspection Service (APHIS) has established regulations to control the spread of SE in egg-type chicken breeding flocks and egg production flocks, and continues to work to reduce the impact of SE on the poultry industry and consumer health. Under the current APHIS regulatory program, study flocks are identified through traceback of eggs implicated in human outbreaks of SE, these study flocks are subjected to testing for SE, and if the flocks test positive for SE, interstate movement of articles from the flocks is restricted. We are currently working with other agencies including the Agricultural Marketing Service, the Food and Drug Administration, and the Centers for Disease Control to evaluate the success of this approach and determine whether to propose changes to the regulatory procedures of the current program.

84. PSEUDORABIES

Significance: Agency Priority

Legal Authority: 21 USC 111 to 113; 21 USC 115; 21 USC 117; 21 USC 120; 21 USC 121; 21 USC 123 to 126; 21 USC 134b; 21 USC 134f

CFR Citation: 9 CFR 85

Legal Deadline: None

Abstract: Pseudorabies, also known as Aujeszky's disease, mad itch, and infectious bulbar paralysis, is caused by a herpes virus and is primarily a disease of swine. The spread of this disease in the United States could have serious consequences for the United States livestock industry. A review of the Department's regulations to prevent the interstate spread of this disease indicates the need for a complete revision to make the regulations more effective and to increase compliance with them.

CFR Citation: 9 CFR 94

Legal Deadline: None

Abstract: The Federal government has responsibility for preventing the introduction into the United States of various diseases of livestock, including foot-and-mouth disease, rinderpest, African swine fever, and swine vesicular disease. To fulfill this responsibility, it is necessary for the Federal government to revise and update its regulations concerning the importation of pork products, based upon the methods and procedures used to process pork products. APHIS is

VOL 58 ISS 78 AP 26 1993 UMI

CFR Citation: 9 CFR 77

Legal Deadline: None

Abstract: Bovine tuberculosis is a contagious, infectious, and communicable disease affecting cattle, bison, and other species, including humans. The spread of bovine tuberculosis in the United States could have serious consequences for the United States cattle and bison industries, as well as for human health. Currently, the regulations concerning control and eradication programs for bovine tuberculosis in livestock only regulate cattle, bison, and swine. Recent outbreaks in the United States of bovine tuberculosis in semi-domesticated herds of cervidae (such as deer and elk) have made apparent the need to also regulate these animals in order to prevent the spread of bovine tuberculosis.

89. ANIMAL WELFARE; RANDOM SOURCE DOGS AND CATS

Significance: Regulatory Program

Legal Authority: 7 USC 2131 to 2157

CFR Citation: 9 CFR 2

Legal Deadline: Other, Statutory, May 25, 1991.

Abstract: Section 2503 of the Farm Bill, entitled "Protection of Pets," instructs APHIS to amend the Animal Welfare regulations to require that dogs and cats be held for at least 5 days at pounds and shelters and at licensed research facilities. Additionally, the Farm Bill instructs APHIS to require that dealers provide a valid certification to anyone acquiring random source dogs and cats from those dealers. The certification would have to identify the dealer, the animal, and the source of the animal, and would have to accompany the shipment of the animal. The intent of these provisions is to prevent stolen animals from being entered into research channels and to provide owners with the opportunity to locate their animals.

105. MANAGEMENT OF HAZARDOUS SUBSTANCES

Significance: Regulatory Program

Legal Authority: PL 96-510; PL 94-580; PL 94-469; PL 92-500

CFR Citation: 40 CFR 300; 40 CFR 260; 40 CFR 700; 40 CFR 400

Legal Deadline: None

Abstract: There are a number of federal environmental statutes which govern the management of hazardous substances, materials and wastes. At the present time, FmHA does not have implementing regulations for these federal statutes.

The development of implementation procedures for managing hazardous substances is necessary to insure consistency in compliance with Federal, as well as State environmental statutes, and to develop appropriate "due diligence" policies to limit the Agency's liability with regard to environmental cleanups of hazardous waste in loan making/servicing and property management activities.

FmHA has approximately 10,000 inventory properties. FmHA cannot be certain how many of these inventory properties will require hazardous waste cleanup prior to sale.

DEPARTMENT OF AGRICULTURE (USDA) — Final Rule Stage

Farmers Home Administration (FmHA)

110. LIQUIDATION, MANAGEMENT AND DISPOSITION OF REAL PROPERTY WHICH SECURED SINGLE FAMILY HOUSING (SFH) LOANS

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301; 7 CFR 2.23; 7 CFR 2.70

CFR Citation: 7 CFR 1955

Legal Deadline: None

Abstract: Create a new subpart D to cover liquidation of Single Family Housing (SFH) loans, and management and sale of SFH inventory property; and revise existing subparts A, B, and C to have them apply to all programs other than SFH. Costs to create new subpart and revise and/or amend existing ones is minimal and would enhance all programs' ability to revise and/or amend the regulations with reduced clearances and provide personnel with clearer and simpler regulations to follow and implement. Will avoid "tie-up" of the regulations for one program subject to changes mandated by legislation or court order for another program, such as SFH changes being held up subject to Farmer Program changes being completed, as has frequently been the case.

Timetable:

Action	Date	FR Cite
Final Action	08/00/93	
Final Action Effective	09/00/93	

Small Entities Affected: None

Government Levels Affected: Undetermined

Additional Information: Action on this project was effectively paralyzed during calendar year 1988 by extensive changes by Farmer Programs pursuant to the Agriculture Act of 1987.

Agency Contact: Chris Goettelmann, Chief, Regulations Analysis and Control Branch, Department of Agriculture, Farmers Home Administration, Room 6348 South Building, Washington, DC 20250, 202 720-9744

RIN: 0575–AA03

111. HOUSING PRESERVATION GRANTS

Legal Authority: 42 USC 1490 (m)

CFR Citation: 7 CFR 1944, subpart N

Legal Deadline: None

Abstract: Expansion of HPG program to include residential rental properties (single and multi-unit) and cooperative housing. Maintain availability of adequate and decent, safe, and sanitary rental housing for very low and low income individuals and families in the rural areas. Compliance with the Housing and Urban Recovery Act of 1983 and Community Development Act of 1987.

112. RECAPTURE OF SECTION 502 RURAL HOUSING SUBSIDY

Significance: Agency Priority

Legal Authority: 42 USC 1480; 5 USC 301; 7 CFR 2.23; 7 CFR 2.70

CFR Citation: 7 CFR 1951, subpart I

Legal Deadline: None

Abstract: The Farmers Home Administration (FmHA) proposes to

VOL
58
ISS
78
AP
26
19 93
UMI

revise the regulation for the recapture of subsidy granted on Section 502 Rural Housing Loans. This action is necessary because of an accounting system change resulting from the September 1987 congressionally mandated rural housing asset sale. The intended effect of this action is to adjust the formula to coincide with the revised method of applying monthly subsidy to interest credit accounts. In addition, this action will also shorten and simplify the recapture process

115. PREPAYMENT AND DISPLACEMENT PREVENTION OF MULTIPLE FAMILY HOUSING LOANS

Significance: Agency Priority

Legal Authority: 42 USC 1480

CFR Citation: 7 CFR 1965, subpart E; 7 CFR 1930, subpart C; 7 CFR 1944, subpart D; 7 CFR 1944, subpart E; 7 CFR 1944, subpart L; 7 CFR 1951, subpart E; 7 CFR 1951, subpart N; 7 CFR 1955, subpart A; 7 CFR 1955, subpart C; 7 CFR 1965, subpart B; 7 CFR 1924, subpart A; 7 CFR 1940, subpart L

Legal Deadline: Final, Statutory, April 22, 1989.

Abstract: This action seeks to implement amendments to the Housing Act of 1949, affording tenants some protection against being displaced from multi-housing projects. An interim rule with request for comments was published on April 22, 1988. An emergency change to correct a legal concern was published on February 13, 1990. As a result of comments received, a proposed rule was published on July 20, 1990. In addition, an interim final rule was published on July 20, 1990, implementing added changes required by law. The final rulemaking action plans to incorporate all of these earlier rulemaking actions, directly to a final rulemaking action.

118. ADVERSE DECISIONS AND ADMINISTRATIVE APPEALS FMHA INSTRUCTION 1900-B

Significance: Agency Priority

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301; 7 CFR 270

CFR Citation: 7 CFR 1900 subpart B

Legal Deadline: Final, Statutory, July 1, 1987.

Abstract: The Agency published an interim rule amending FmHA Instruction 1900-B to provide for multi-party appeals involving the sale of suitable farmland to eligible applicants and denials of leaseback/buyback and homestead protection rights. These changes were a result of Section 611 of the Agricultural Credit Act of 1987. Subsequently passage of the 1990 Farm Bill P.L. 101-624 required further changes to appeals involving the sale of inventory property classified as suitable farmland. These changes superseded those made in the interim rule. Those changes were published in the Federal Register as an interim rule on April 30, 1992, Vol 57 No. 84 page 18612 (see RIN 0575-AA91).

119. FARMER PROGRAMS GUARANTEED INTEREST ASSISTANCE PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980(a); 7 CFR 1980(b); 7 CFR 1980(d); 7 CFR 1980(e); 7 CFR 1980(g); 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: This regulation will provide for a government subsidy to lenders for interest rates for guaranteed Farmer Programs loans so the borrower will be paying interest rates for guaranteed loans that are similar to insured loans. This should provide an incentive for using the guaranteed loan program. The potential cost to the Government will be reduced as the Government will only pay a lender up to 90 percent of the losses on loans and only part of the interest rate rather than loaning a borrower the full amount of the loan and paying an investor the full cost of the Government borrowing the money for an insured loan. The benefit is that the borrower will be paying an interest rate for guaranteed loans that is comparable to that for insured loans, the lender will receive the subsidy for the lower interest rate, and the Government will reduce the amount of money needed for the program. The alternative is to continue with the program.

CFR Citation: 7 CFR 15; 12 CFR 202; 28 CFR 42; 45 CFR 90; 41 CFR 60 to 64; 24 CFR 14

Legal Deadline: None

Abstract: Will effectuate a comprehensive civil rights regulation implementing the following laws: The Equal Credit Opportunity Act (ECOA); Title VIII of the Civil Rights Act of 1968, as amended by the Fair Housing Amendments Act of 1988 (The Fair

VOL 58 ISS 78 AP 26 1993 UMI

Housing Act); section 504 Federally conducted programs, Title IX of the Education Amendments of 1972; the Age Discrimination Act of 1975, and programs and activities; Amendments of 1972; the Age Discrimination Act of 1975; and Executive Order 11246. The revised regulations will provide detailed guidelines for field offices for improved enforcement and compliance with these laws which heavily impact FmHA's programs. Mechanisms for monitoring compliance by field offices and recipients of FmHA's financial assistance at all levels will decrease the Agency's vulnerability due to noncompliance with recently enacted Civil Rights legislation. Also includes section 504 of the Rehabilitation Act of 1973.

124. AGRICULTURAL RESOURCE CONSERVATION DEMONSTRATION PROGRAM

Significance: Regulatory Program

Legal Authority: 7 USC 1989; 7 USC 4201; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980, subpart J; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: The FACT Act as amended authorized a demonstration program to preserve our national farmland

resources for future generations. The program provides for Federal guarantees of timely payments of principal and interest due for 10 years and substantial interest assistance on loans made to States and instrumentalities of States. A number of States currently have programs in which the State purchases development rights from farmers so the farmland is not developed. The program was fashioned, to some extent, after several of these programs. States are required to share in this effort by contributing an amount equal to at least half the amount of the loan guaranteed by FmHA. Each eligible State may receive up to $10 million in guarantees per fiscal year. Loan funds may be invested by the borrower to increase the capital available for farmland preservation.

125. RURAL RENTAL AND RURAL COOPERATIVE HOUSING LOAN POLICIES, PROCEDURES, AND AUTHORIZATIONS

Significance: Agency Priority

Legal Authority: 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1924; 7 CFR 1944

Legal Deadline: None

Abstract: Existing regulations will be revised to provide additional guidance to reduce program vulnerability. Revisions will address program vulnerability issues identified by FmHA and OIG/GAO audits regarding construction activities. The regulation will rectify identity of interest concerns, provide more guidance on cost containment and cost certification. It also incorporates several provisions of the Housing and Community Development Act of 1992 such as the uniform construction costs regulations, and sharing cost data with state agencies administering tax credits.

126. DEBT SETTLEMENT

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301; 31 USC 3711

CFR Citation: 7 CFR 1956

Legal Deadline: None

Abstract: The objective of revising the debt settlement regulation is to eliminate the administrative costs of maintaining accounts which have been charged off and authorize the Administrator to debt settle third party converters, nonprogram, economic emergency, and economic opportunity loans. Action is being recommended to remove chargeoffs because the funds collected from charged off accounts do not justify the administrative costs of maintaining and servicing these accounts. Action is being recommended to authorize the Administrator to debt settle accounts which were formerly settled under the Federal Claims Collection Act to conform with the revisions made in Section 331 (d) of the CONACT under the 1990 FACT Act. The State Director is also being given the authority to approve debt settlements less than $1,000,000.

CFR Citation: 7 CFR 1944, subpart A

Legal Deadline: None

Abstract: The definition of income is being revised pursuant to the Omnibus Budget Reconciliation Act of 1990. The regulations are being revised to clarify that the interest of individual Indians in trust on restricted land shall not be considered a resource in determining eligibility. Changes are being made to exclude from the Agent Orange settlement fund or any other fund established pursuant to the settlement in Agent Orange liability litigation. Based on a Supreme Court decision FmHA is deleting the public posting that require county supervisors to post on the bulletin board after each selection period a list of those applications selected and notified of the processing of their applications. The county supervisors are also required to review the SFH applicants audited or most recent Federal tax return. The interest credit regulation is being revised to remove previous discrepancies.

132. FIVE-YEAR APPLICANT LOAN ELIGIBILITY CERTIFICATION BY COUNTY COMMITTEE

Legal Authority: PL 101-554, sec 12

CFR Citation: 7 CFR 1910-A, 7 CFR 1941-A, 7 CFR 1943-A; 7 CFR 1943-B, 7 CFR 1980-B

Legal Deadline: NPRM, Statutory, April 30, 1993

Abstract: The objective of this action is to extend County Committee eligibility for Farmer Programs loan applications (except emergency loan applications) up to five years. The current policy requires a County Committee determination for each loan application. The proposed action will decrease the paperwork required for loan applications, and reduce the amount of time needed by the County Committee to review loan applications.

The proposed action is required by Public Laws 101-554 and 101-624. No additional costs to the Government or to the public will be incurred as a result of this action. Government costs will be reduced because County Committee members will spend less time reviewing applications.

Timetable:

Action	Date	FR Cite
Interim Final Rule	00/00/00	
Final Action	00/00/00	

Small Entities Affected: Businesses

Government Levels Affected: Federal

Additional Information: This action does not constitute a major federal action significantly affecting the quality of the human environments - an environmental impact statement is not required. The intended effect is to reduce the amount of time needed to process Farmer Programs Loans and reduce the amount of burden on the County offices personnel, lenders, and the County Committee.

Agency Contact: Chris Goettelmann, Chief, Regulations Analysis and Control Branch, Department of Agriculture, Farmers Home Administration, 14th & Independence Ave., S.W. - Room 6248-S, Washington, DC 20250, 202 720-9744

RIN: 0575–AB32

133. IMPLEMENTATION OF CERTIFIED LENDER PROGRAM

Significance: Agency Priority

Legal Authority: 7 USC 1987; 42 USC 1480; 5 USC 301; PL 101-624, sec 18

CFR Citation: 7 CFR 1980 subpart A; 7 CFR 1980 subpart B, 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: Lenders participating in the Guaranteed Loan Program have cited the excessive amount of paperwork and time required to apply for and receive approval on guaranteed loans as a deterrent to participation in the program. The Agency assembled a Guaranteed Overview Task Force to identify specific forms and regulations that could be eliminated or revised without increasing the risk to the Government. We intend to immediately implement those recommendations which will meet these criteria and can be implemented by the next lending season. Fewer forms and a streamlined process will reduce operating costs for both FmHA and lenders. With the new Certified Lender Program, those lenders that FmHA has determined can properly process and service guaranteed loans will be given greater flexibility. The CLP program will encourage increased participation in the program, thereby reducing the demand for direct loan funds, which are more costly than guaranteed loans.

Action	Date	FR Cite
Interim Final Rule	00/00/00	
Final Action	00/00/00	

Small Entities Affected: Businesses

Government Levels Affected: Federal

Additional Information: This rule implements section 18 of the Agricultural Credit Improvement Act of 1992 which establishes a Certified Lender Program (CLP). Farm operating loans and farm ownership loans are excluded with the exception of non-farm enterprise activity from the scope of Executive Order 12372, which requires intergovernmental consultation with State and local offices.

Agency Contact: Chris Goettelmann, Chief, Regulations Analysis and Control Branch, Department of Agriculture, Farmers Home Administration, 14th & Independence Ave., S.W. - Room 6348-S, Washington, DC 20250, 202 720-9744

RIN: 0575–AB33

134. • SECTION 502 RURAL HOUSING LOAN POLICIES, PROCEDURES AND AUTHORIZATIONS (APPRAISAL FEE)

Significance: Agency Priority

Legal Authority: 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1944-A; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: The regulation is being amended to clarify that an appraisal fee is an authorized loan purpose and permit the loan amount to exceed the market value of the property by the amount of the fee. The Agency instituted an appraisal system that uses contract appraisers for appraisal services. However, the funds available for this service have been reduced and are not adequate to procure appraisals. By including the fee in the loan, funds would be provided to obtain appraisals with minimal impact on borrowers.

Final Action	12/30/92 (57 FR 62172)
Final Action Effective	01/15/93

Small Entities Affected: None

Government Levels Affected: None

Public Compliance Cost: Initial Cost $121,500; Yearly Recurring Cost: $151,600; Base Year for Dollar Estimates: 1991

Additional Information: This is an emergency funding situation that will be addressed in the short term by issuing a final rule effective until 9/30/93 that includes an appraisal fee for rural housing in the loan. At the same time a proposed rule will be published proposing the same procedure for a long term solution to the lack of funding for the purchase of appraisals.

150. FEES FOR OFFICIAL INSPECTION AND WEIGHING SERVICES

Legal Authority: 7 USC 71 et seq

CFR Citation: 7 CFR 800.71

Legal Deadline: None

Abstract: The Federal Grain Inspection Service (FGIS) proposes to increase its fees on average by 3.7 percent for Official Inspection and Weighing Services performed in the United States under the United States Grain Standards Act (USGSA), as amended. The USGSA provides for establishment of fees which are to cover the costs for performance of these official services. FGIS's current fee does not generate sufficient revenue to cover any of the approved FY 1992 3.7 percent federal employee raise.

161. SYSTEMATIC ALIEN VERIFICATION FOR ENTITLEMENTS

Significance: Regulatory Program

Legal Authority: PL 99-603 Immigration Reform and Control Act of 1986, sec 121

CFR Citation: 7 CFR 271; 7 CFR 272; 7 CFR 273; 7 CFR 275; 7 CFR 277

Legal Deadline: Other, Statutory, October 1, 1988. Deadline for interim final rule

Abstract: This rule establishes procedures for State agencies to use to participate in the Systematic Alien Verification for Entitlements (SAVE) system. As required by IRCA, the Immigration and Naturalization Service (INS) implemented this system. IRCA requires the Food Stamp Program (FSP) and certain other entitlement programs to use SAVE to verify the immigration status of aliens applying for benefits. The rule also provides guidelines for Federal reimbursement of administrative costs. In addition the rule implements nondiscretionary provisions of IRCA requiring all household members to attest to their citizenship or alien status and certain requirements relating to documentation of alien status. DEPARTMENT OF AGRICULTURE (USDA)
Food and Nutrition Service (FNS) — **Proposed Rule Stage**

162. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): FOOD DELIVERY SYSTEMS

Significance: Regulatory Program

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: A proposed rule addressing WIC Food Delivery Systems was published on December 28, 1990. The Department provided a 120-day comment period for the proposed rule, which closed on April 29, 1991. Nearly 1100 comments were received from a wide variety of sources. Despite the degree of preliminary input to the December 28, 1990 proposed rule, many of the commenters responding during the formal comment period suggested that the Department's food delivery regulations needed to be proposed again, rather than proceeding directly to a final rule. In addition, several members of Congress requested that the rule be re-proposed in light of its impact on State agency food delivery systems. Therefore, the Department intends to issue a second proposed rule addressing WIC food delivery systems and requirements. This second rule will address all of the provisions contained in the previous rulemaking, but will contain significant modifications to some of the proposed provisions, as well as clarifications to several provisions, which may not have been clearly understood in the earlier rule.

164. FOOD STAMP PROGRAM: STUDENT ELIGIBILITY AND TREATMENT OF EDUCATIONAL ASSISTANCE

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2032; PL 101-624; PL 100-50; PL 101-392; PL 102-237

CFR Citation: 7 CFR 272; 7 CFR 273

Legal Deadline: Other, Statutory, October 1, 1991. Effective the first day of the month 120 days after publication. Must be promulgated by 10/01/91.

Abstract: This action proposes to implement the provisions of Public Law 101-624 governing student eligibility for the Food Stamp Program and the treatment of educational assistance as excluded income or resources.

This action also proposes to regulate provisions of Public Law 100-50 and Public Law 101-392 and Public Law 102-325 governing the treatment of certain Federal educational assistance as excluded income and/or resources for food stamp purposes.

165. FOOD STAMP PROGRAM: QUALITY CONTROL REVIEW OF NEGATIVE ACTIONS

Legal Authority: 7 USC 2025

CFR Citation: 7 CFR 272.1(g); 7 CFR 275.11(e); 7 CFR 272.13; 7 CFR 272.14; 7 CFR 275.21

Legal Deadline: None

Abstract: This regulatory action will improve the efficiency of Food Stamp Program Quality Control (QC) negative reviews, which measure the accuracy of State agencies' denials and terminations of participation in the Food Stamp Program. This rule will address which negative actions are subject to review, when they will be sampled and how they will be reviewed. It is expected that the revised system will provide broader, more useful information at no higher cost.

166. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): PART 246.10, FOOD PACKAGE III CHILDREN/ WOMEN WITH SPECIAL DIETARY NEEDS

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: Food Package III will be revised to increase the maximum quantity of special formula authorized per month; clarify what formula is; add additional authorized WIC foods to the package; and address tailoring.

Need for Action:

This special dietary package currently provides special formula, juice, and cereal. It was designed specifically to assist low-income women and children who require special formulas due to medical conditions. Without WIC these individuals would have difficulty in obtaining special formulas, which tend to be quite expensive. Program administrators, participants and the National Advisory Council on Maternal, Infant and Fetal Nutrition recognize that current monthly maximum quantity of formula allowed is sometimes not sufficient and recommend that it be increased. They also recognized that there is a nutritional need for additional WIC foods to be made available to participants receiving this package. This is a very infrequently used package and the proposed rule will in no way affect the other WIC food packages.

167. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): MISCELLANEOUS PROVISIONS

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: This proposed rule responds to a variety of program concerns, most of which have been expressed by WIC State agencies. The proposal strengthens the provision of services to participants in the areas of eligibility determination and nutrition education and increases State agency flexibility regarding the age of medical data and the sharing of participant information with other programs. Several minor clarifications and technical corrections are also made. Principal provisions include: (1) mandatory minimum content requirements for nutrition education participant contacts; (2) State agency discretion to accept medical data over 60 days old under certain circumstances; (3) additional flexibility for State agencies to share participant information with related programs; and (4) mandatory eligibility determination within 20 days of request of program benefits, whether by phone, letter, or personal appearance.

168. NUTRITION EDUCATION AND TRAINING (NET) PROGRAM CHANGED ADMINISTRATIVE REQUIREMENTS

Legal Authority: PL 101-147

CFR Citation: 7 CFR 227

Legal Deadline: None

Abstract: This rulemaking proposes to amend the Nutrition Education and Training (NET) Program regulations to incorporate changes to the Program brought about by the enactment of P.L. 101-147 on November 10, 1989. These changes include the required utilization by State and local NET programs of materials and services developed by the National Food Service Management Institute which was established under the National School Lunch Act, the inclusion of Summer Food Service Program participants as NET beneficiaries, the replacement of an annual State Plan requirement with an annual Plan update, changes in the formula for allocating Program funds to States, and several technical amendments intended to bring Program regulations into conformance with non-Program changes which resulted from P.L 101-147.

177. COMMODITY SUPPLEMENTAL FOOD PROGRAM: ELDERLY-ONLY SITES, ADMINISTRATIVE FUNDING, REFERRALS TO HEALTH AND SOCIAL SERVICES, CASELOAD ALLOCATION PROCESS, PRIORITY SYSTEM AND MISCELLANEOUS

Significance: Agency Priority

Legal Authority: 7 USC 512(c)

CFR Citation: 7 CFR 247

Legal Deadline: Final, Statutory, October 1, 1991. Other, Statutory, October 1, 1990.
Statutory deadline in P.L. 101-624 for funding provisions only was 10/01/90; all other provisions to be implemented by regulation by 10/01/91.

Abstract: This rule is being proposed in response to changes brought about by P.L. 101-624 and to strengthen other program areas. This proposed rule will implement those provisions of P.L. 101-624 which affect the Commodity Supplemental Food Program (CSFP) and which do not require Departmental discretion. The following list includes those provisions addressed in this rulemaking: (1) authorizes State agencies to operate elderly-only sites; (2) provides administrative funding to agencies not to exceed 20 percent of the annual appropriation; and (3) mandates that State agencies serving women, infants and children: (a) distribute written information on Food Stamps, AFDC, and Child Support Enforcement Programs; (b) provide each local agency with materials showing the income limits according to family size, applicable to pregnant women, infants, and children in the Medicaid Program; and (c) distribute written information on and referrals to the Medicaid Program, when appropriate. State agencies serving elderly persons shall ensure that written information is provided on Food Stamps, Supplemental Security Income benefits, and Medicaid. (cont)

Government Levels Affected: Local, State

Additional Information: ABSTRACT CONT: This rulemaking is also responsive to a variety of program concerns. The proposal strengthens the provision of services to participants in the area of nutrition education. In addition the rule: revises and simplifies the caseload allocation and priority system processes; increases State agency flexibility in determining the share of administrative funding to be retained at the State level; revises the State Plan requirements; and incorporates an administrative appeals procedure. Several minor clarifications and technical corrections are also made, such as updating the Financial Management requirements. The Department also proposes a reorganization of Program regulations for ease of use.

178. FOOD STAMP PROGRAM: QUALITY CONTROL TECHNICAL AMENDMENTS

Legal Authority: 7 USC 2013; 7 USC 2025

CFR Citation: 7 CFR 275

Legal Deadline: None

Abstract: The Food and Nutrition Service is proposing six technical changes to the Food Stamp Program's Quality Control System. These changes would reduce the workload on State agencies and improve the efficiency of the quality control system. The six proposed changes would: (1) permit State agencies to reduce their sample sizes; (2) clarify sampling procedures; (3) change the way Federal subsample sizes are calculated; (4) change the way FNS avoids double-billing for non-compliance; (5) change the way State agencies request arbitration; and (6) change the way Federal findings are treated once FNS sends them to the State agencies.

179. FOOD STAMP PROGRAM: MISCELLANEOUS PROVISIONS OF THE FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1991 AND EARNED INCOME TAX CREDIT

Legal Authority: 7 USC 2011 to 2032; PL 102-237; PL 101-508

CFR Citation: 7 CFR 273.8; 7 CFR 273.21

Legal Deadline: None

Abstract: This rule addresses two provisions of the Food, Agriculture, Conservation, and Trade Act of 1991. Pursuant to Section 910 of that Act, in cases subject to Monthly Reporting and Retrospective Budgeting (MRRB), the rule prohibits proration during the certification period when a new member is added to the household except for the initial month. Pursuant to Section 908 postpones until April 1993, a provision contained in final rules published on 12/04/91 (56 FR 63597) which mandates exclusion of households residing on Indian reservations from monthly reporting effective 02/02/91. This rule addresses a provision of Public Law 101-508 which provides that Earned Income Tax Credits are excluded from consideration as a countable resource. This provision was implemented on 01/01/91 by Agency directive. This rulemaking formally incorporates the provision into the Code of Federal Regulations.

180. FOOD STAMP PROGRAM: RESOURCE PROVISION FROM THE MICKEY LELAND MEMORIAL DOMESTIC HUNGER RELIEF ACT OF 1990 AND THE FOOD, AGRICULTURE, CONSERVATION, AND TRADE ACT OF 1991

Legal Authority: 7 USC 2011 to 2032; PL 101-624; PL 102-237

CFR Citation: 7 CFR 273.8

Legal Deadline: None

Abstract: The NPRM was published on August 13, 1991. After full consideration of comments, the Department has decided that a new proposed rulemaking is warranted to take into consideration comments received and recent legislative changes to the provision as a result of PL 102-237.

The new proposed rule will exempt from consideration as a resource, resources which meet three tests. The tests are: (1) the resource is jointly owned by the household and other parties; (2) the household could not have access to its share without agreement of the other owners, i.e., the resource is not readily divisible; and (3) the sale of the resource would not yield a significant return or would not yield a significant amount of funds for the support of the household. "Significant amount of funds" is defined as an amount greater than half the applicable resource limit for the household, in accordance with 7 CFR 273.8, after any expenses of the sale are deducted.

184. RULES OF PROCEDURE

Legal Authority: PL 100-435, Sec 603

CFR Citation: 7 CFR 275; 7 CFR 276; 7 CFR 283

Legal Deadline: NPRM, Statutory, October 1, 1985.
Retroactive for Fiscal Year 1985 quality control payment error rate liability claims.

Abstract: This regulatory action is required because the Hunger Prevention Act of 1988 (PL 100-435) revised the Food Stamp Act of 1977, as amended, specifying that Food Stamp Program quality control (QC) payment error rate (PER) liability appeals by State agencies be conducted by Administrative Law Judges. The use of Administrative Law Judges replaces the current appeal process which is conducted by the State Food Stamp Appeals Board. This regulation will delineate the procedures to be followed in these QC appeals. (88-011)

185. OUTCOME-BASED PERFORMANCE STANDARDS FOR FOOD STAMP EMPLOYMENT AND TRAINING PROGRAMS

Significance: Regulatory Program

Legal Authority: PL 100-435

CFR Citation: 7 CFR 271; 7 CFR 273

Legal Deadline: Final, Statutory.
The final performance standards shall be published not later than 12 months after the publication of final standards for the JOBS Program under part F, title IV of the Social Security Act.

Abstract: The Hunger Prevention Act of 1988 mandates that the U.S. Department of Agriculture change the basis of its performance standards for Food Stamp Employment and Training programs from process-based to outcome-based measures. Consequently, the Food Stamp regulations must be revised to reflect the new measurement criteria for performance and the methodology for computing the new standards.

186. FOOD STAMP PROGRAM: TREATMENT OF FOSTER CARE INDIVIDUALS AND FOSTER CARE PAYMENTS

Legal Authority: 7 USC 2011 to 2032

CFR Citation: 7 CFR 272; 7 CFR 273

Legal Deadline: None
Retroactive implementation date to date all State agencies directed to implement by FNS memorandum.

Abstract: Expands appeals court decisions on treatment of individuals receiving foster care payments when determining the eligibility and benefit level of households caring for such individuals from the districts covered by the appeals courts to all States so that policy is uniform for entire Food Stamp Program. All State agencies were directed to implement policy by court set date, if in district under jurisdiction of one of the appeals courts or by February 1, 1989. FNS implemented policy through memorandum to preclude further legal action.

187. FOOD STAMP PROGRAM: INCOME EXEMPTION FOR HOMELESS HOUSEHOLDS IN TRANSITIONAL HOUSING FROM THE MICKEY LELAND MEMORIAL DOMESTIC HUNGER RELIEF ACT

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2032; PL 101-624

CFR Citation: 7 CFR 272; 7 CFR 273

Legal Deadline: Final, Statutory, October 1, 1991.
Provision becomes effective and must be implemented first day of the month, 120 days after publication. Must be promulgated no later than 10/01/91.

Abstract: This rule proposed to implement a provision of the Leland Act which allows an income exclusion for households living in transitional housing that is equal to 50 percent of the maximum shelter allowance provided to families receiving Aid to Families with Dependent Children residing in permanent housing under a State agency's approved AFDC Plan.

189. MISCELLANEOUS FARM BILL PROVISIONS RELATING TO THE AUTHORIZATION OF RETAIL FIRMS AND WHOLESALE FOOD CONCERNS

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2031, PL 101-624

CFR Citation: 7 CFR 271; 7 CFR 272; 7 CFR 274; 7 CFR 278

Legal Deadline: Final, Statutory, October 1, 1991.
Effective 120 days from publication of implementing rules.

Abstract: This rule would implement three provisions of the 1990 Farm Bill (PL 101-624, 104 stat 3359) which revise the Food Stamp Act of 1977, as amended (7 USC 2011 et seq.). The first provision would amend the definition of "food" to include meals sold to the homeless program participants by restaurants approved by State agencies for this purpose. Such restaurants must contract with the State and must be authorized by the Food and Nutrition Service to provide meals at concessional prices to homeless participants. The second provision would allow a periodic reauthorization of retail food stores and wholesale food concerns to participate in the Food Stamp Program. The third provision prohibits a firm which is primarily in the business of selling food at wholesale from being authorized as a retail food store unless failure to authorize such a firm as a retail food store would cause hardship to food stamp households.

190. FOOD STAMP PROGRAM: RETAILER WHOLESALER CHANGES

Legal Authority: 7 USC 2011 to 2031

CFR Citation: 7 CFR 271; 7 CFR 276; 7 CFR 278; 7 CFR 279

Legal Deadline: None

Abstract: The proposed rule clarifies the Department of Agriculture's policy on authorizing and educating retail grocers who take part in the Food Stamp Program. In addition, the rule sets forth changes in assigning penalties to retailers who violate program rules. The regulations clarify and emphasize the full and ongoing responsibility of retailers for their actions and the actions of their employees. Under the proposed regulations, the severity of the penalty would not be affected by any warning received by the retailer prior to an investigation. The penalty would be based on the seriousness of the violations committed during the investigation and the level of responsibility for store operations of persons who committed the violations.

191. RECIPIENT CLAIMS AND AUTOMATED DATA PROCESSING (ADP) FUNDING REQUIREMENTS FROM THE MICKEY LELAND MEMORIAL DOMESTIC HUNGER RELIEF ACT

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2032; PL 101-624; PL 102-237

CFR Citation: 7 CFR 272; 7 CFR 273; 7 CFR 276; 7 CFR 277

Legal Deadline: Final, Statutory, October 1, 1991. Other, Statutory, October 1, 1990. See Abstract.

Abstract: This rule implements three provisions from PL 101-624 that affect Food Stamp recipient claims and ADP funding. For recipient claims, effective October 1, 1990, the timeframe for household election of a repayment method for intentional Program violation (IPV) claims was reduced from 30 to zero days. Also, effective October 1, 1990 for a five-year period, retention rates for collections of recipient claims for State agencies were reduced from 50 to 25 percent for IPV claims and from 25 to 10 percent for inadvertent household errors. Finally, effective October 1, 1991, the enhanced funding rate for costs of planning, designing, developing or installing ADP and information retrieval systems was reduced from 75 to 63 percent. These provisions will increase amounts of recipient claims collected and returned to the Federal Government and decrease Federal Government administrative costs. This rule will also implement a provision of PL 102-237 which concerns the timeframe for timely electing a repayment method for inadvertent household error (IHE) claims, effective December 13, 1991.

192. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): FOOD COST CONTAINMENT REQUIREMENTS

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: Final, Statutory, March 10, 1991.

Abstract: This regulation implements the mandates of P.L. 101-147, enacted November 10, 1989, relative to food cost containment in WIC. In order to achieve further savings in the cost of WIC Program foods, principally the cost of infant formula, this rule implements two major legislative provisions. First, it restates and extends into future years the provisions of P.L. 100-460, which mandated that in order to receive its grant allocation a State agency must examine the feasibility of cost containment systems by 8/30/89 and implement a cost containment system where feasible. Second, the rule requires all WIC State agencies using a retail food delivery system, except certain Indian State agencies, to employ one of two infant formula rebate procurement methods. These two methods are the competitive method (single- supplier contract) and the comparative method, where the State agency fairly compares the cost savings of any alternative form of infant formula cost containment it may wish to implement. The rebate system generating the greatest savings of those compared must then be implemented. This rule establishes specific factors to be considered in the analysis of the systems after (cont)

paperwork burden associated with this action.

Additional Information: ABSTRACT CONT: completing the cost comparison under comparative method. If the State agency can justify to FNS that the cost containment method resulting in the greatest total savings would cause demonstrable harm to the efficient and effective operation of the WIC Program, a waiver will be granted. Timelines are established in the rule for compliance based on the present rebate contract situation of experiencing unavoidable delays related to the procurement process that prevent the State agency from meeting the implementing timeframes established in the rule.

193. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): COORDINATION RULE MANDATES OF THE CHILD NUTRITION AND WIC REAUTHORIZATION ACT OF 1989

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: Final, Statutory, July 1, 1990.

Abstract: This rule amends regulations governing the WIC Program to comply with mandates of Sections 123 and 213 of the Child Nutrition and WIC Reauthorization Act of 1989 (P.L. 101-147) which are not related to the allocation and use of program funds. The following major areas of WIC Program Operation are addressed in this rulemaking: adjunct income eligibility, program access, dissemination of program information, and breastfeeding promotion activities. This rule also expands State agencies discretion to mail food instruments to participants and reduces the frequency in which all States must review their local agencies from annual to biennial. A number of minor mandates of P.L. 101-147 are also addressed in this rulemaking.

Finally, this rule incorporates into the WIC Program regulations by reference the following departmentwide rules: Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, 7 CFR 3016; and governmentwide Department and (cont)

Small Entities Affected: None

Government Levels Affected: Local, State

Additional Information: ABSTRACT CONT: Suspension (Non-Procurement) and governmentwide requirements for a drug-free workplace (Grants), 7 CFR part 3017. This rule also provides guidelines for the allocation of WIC program funds, including changes in the administrative funding structure, breastfeeding targets, and conversion of food funds to administrative funds. The revised funding structure eliminates the 20 percent limit on administrative and program services funds and bases such funding on a national administrative grant per person. State agencies must also spend their proportionate shares of at least $8 million for breastfeeding promotion in addition to the current 1/6 nutrition education requirement. Curtailment of vendor abuse activities that enable States to convert food funds to cover administrative expenses. Finally, any State using a cost containment measure may temporarily borrow 1st quarter funds to pay a previous year's 4th quarters expenses. Timelines for the allocation and reallocation of program funds are also established by this rule.

201. BENEFIT DELIVERY RULE

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2032; PL 101-624; PL 100-435; PL 102-237

CFR Citation: 7 CFR 272; 7 CFR 274; 7 CFR 273

Legal Deadline: Final, Statutory, February 1, 1992. Other, Statutory, April 1, 1993.
See Abstract.

Abstract: This rule makes final two provisions from PL 101-624 which must be implemented by February 1, 1992: aggregate (combined) allotment of benefits to households applying after the 15th of the month, and mail issuance in rural areas where households may experience transportation difficulties obtaining benefits. This rule also makes final staggered issuance on Indian reservations (PL 101-624) to be implemented by April 1, 1993, in accordance with PL 102-237. This rule also makes final the combined allotment provision from an interim rule published June 7, 1989, at 54 FR 24518, and makes technical changes to current regulatory provisions considered appropriate to clarify and improve issuance.

202. PERMANENT AGREEMENTS/ DIRECT CERTIFICATION IN NATIONAL SCHOOL LUNCH, SCHOOL BREAKFAST AND SPECIAL MILK PROGRAMS

Significance: Agency Priority

Legal Authority: PL 101-147

CFR Citation: 7 CFR 210; 7 CFR 215; 7 CFR 220; 7 CFR 245

Legal Deadline: None

Abstract: The Child Nutrition and WIC Reauthorization Act of 1989 made the agreement between the school and the State agency to operate the school nutrition programs a permanent document to be amended as necessary. This law also authorized schools to certify children as eligible for free meals using information obtained directly from food stamp/AFDC offices attesting that these children are receiving food stamps or AFDC benefits. This rule implements these statutory provisions.

203. FOOD STAMP PROGRAM: TECHNICAL AMENDMENTS CONCERNING DISABLED IN GROUP HOMES AND INCOME EXCLUSIONS FOR PLANS FOR ACHIEVING SELF-SUPPORT (PASS) - PUBLIC LAW 102-237

Legal Authority: 7 USC 2011 to 2032; PL 102-237

CFR Citation: 7 CFR 273.9

Legal Deadline: None

Abstract: This rulemaking addresses sections 901 and 903 of P.L. 102-237 Section 901 expands eligibility to receive food stamps and to use them to purchase meals prepared by certain group living arrangements to all individuals who meet the definition of disabled in the Food Stamp Act and reside in certain group homes. This rulemaking resolves an inequity under which persons receiving disability or blindness payments under certain sections of the Social Security Act were eligible to use food stamps to purchase meals prepared and served by these homes while other persons considered disabled under the Food Stamp Act but not receiving disability or blindness payments under the Social Security Act were not eligible to use food stamp to purchase such meals. Section 903 adds an additional income exclusion. Certain recipients of Supplemental Security Income can have a Plan for Achieving Self-Support (PASS). Amounts held in PASS accounts to fulfill this Plan are currently excluded as a resource. Under this rulemaking, PASS amounts will also be excluded from income for food stamp purposes.

308, Alexandria, VA 22302, 703 305-2760

RIN: 0584–AB41

204. PROVISIONS OF THE STEWART B. MCKINNEY HOMELESS ASSISTANCE ACT AND A PROVISION OF THE FOOD SECURITY ACT OF 1985

Legal Authority: PL 100-77, as amended by PL 101-220; PL 99-198

CFR Citation: 7 CFR 273

Legal Deadline: None

Abstract: This rulemaking places into final form an interim rule published on 9/29/87. The interim rule implemented all provisions of the Stewart B. McKinney Homeless Assistance Act and one provision of the Food Security Act of 1985. The majority of the provisions are intended to help homeless individuals obtain food stamp eligibility and benefits. The rule: 1) defines a homeless household; 2) allows for Federal funding of State outreach aimed at informing the homeless about the Program; 3) allows an income exclusion for certain housing assistance payments; 4) requires expedited service to households whose monthly rent/mortgage and utilities are more than its income and resources and to households in which all members are homeless; 5) allows certain parents with minor children to be considered a separate household from others they live with; 6) excludes from income public and general assistance vendor payments for medical and child care, energy assistance and special emergency assistance.

205. WIC FARMERS' MARKET NUTRITION PROGRAM

Significance: Agency Priority

Legal Authority: 42 USC 1786(m)

CFR Citation: 7 CFR 248

Legal Deadline: None

Abstract: This rulemaking would propose implementing regulations for the establishment of the WIC Farmers' Market Nutrition Program (FMNP) as mandated by P.L. 102-314. The FMNP is designed to provide fresh nutritious unprepared foods (such as fruits and vegetables) to WIC participants. The foods would be provided by farmers' markets and would also serve to expand the awareness and use of farmers' markets and to increase sales at such markets. The proposed rule would establish criteria for allocating grants to State agencies and for their operation of the FMNP.

206. NATIONAL SCHOOL LUNCH PROGRAM, SPECIAL MILK PROGRAM FOR CHILDREN, AND SCHOOL BREAKFAST PROGRAM: COORDINATED REVIEW EFFORT

Significance: Agency Priority

Legal Authority: PL 101-147

CFR Citation: 7 CFR 210; 7 CFR 215; 7 CFR 220

Legal Deadline: None

Abstract: This regulation will modify the existing Coordinated Review Effort (CRE) to give State Agencies larger measure of flexibility when they conduct reviews, take fiscal action, and withhold payments under CRE. The final CRE, published on July 17, 1991, was perceived by some to be unnecessarily rigid in its methodology. Its requirements for overclaims based on incorrectly determined applications and/or improper counting of meals were also seen to be potentially harmful to local programs, as was the requirement that, if a school does not take effective corrective action, all program payments must be withheld until the school does take corrective action. This new regulation would limit the scope of review in those situations where preliminary findings indicate no problems. Fiscal action would be limited to the review period in most instances. States would have the authority to withhold only a portion of program payments when it is considered to be in the best interests of the program to do so. Finally, this regulation initiates an appeal procedure for schools.

207. ADMINISTRATIVE IMPROVEMENT AND SIMPLIFICATION PROVISIONS FROM THE HUNGER PREVENTION ACT OF 1988

Significance: Agency Priority

Legal Authority: 7 USC 2011 to 2032; PL 100-435

CFR Citation: 7 CFR 271; 7 CFR 272; 7 CFR 273

USDA—FNS **Final Rule Stage**

Legal Deadline: Final, Statutory, July 1, 1989.

Abstract: The regulation will put in final form the provisions of an interim Food Stamp Program rule published on June 7, 1989. The interim rule amended food stamp regulations to implement several food stamp program provisions contained in the Hunger Prevention Act of 1988. The provisions of that act addressed in this rule are: (1) Verification; (2) Expanded definition of disabled; (3) Optional Training for volunteer and nonprofit organizations; (4) Program information for low-income households; (5) Expanding Hardship criteria for waiving in-office interviews; (6) Simplified applications; (7) Joint applications; (8) Federally authorized cash-out benefits in other assistance programs; (9) Simplified procedures for claiming the excess medical deductions; (10) Telephone access to certification offices in order to receive program information or to report changes; (11) Annualizing self-employment income and expenses from farming; (12) Resource exclusions for farm households in transition from farming.

214. AMENABILITY OF SPECIFIC POULTRY SPECIES UNDER THE POULTRY PRODUCTS INSPECTION ACT

Significance: Agency Priority

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 362; 9 CFR 381

Legal Deadline: None

Abstract: This advance notice of proposed rulemaking would solicit comments and recommendations regarding criteria to determine the amenability of various species of poultry to Federal inspection. Because of increasing use of formerly wild species for food purposes and genetic variations of traditional species, the Agency is increasingly in need of a framework for deciding when a specific food animal is subject to inspection laws.

215. SULFONAMIDE AND ANTIBIOTIC RESIDUES IN YOUNG VEAL CALVES; REVISED TESTING PROGRAM

Significance: Agency Priority

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 309; 9 CFR 310

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat inspection regulations by revising the current testing program for detecting violative levels of sulfonamide and antibiotic residues in bob veal calves (calves up to 3 weeks in age or 150 pounds in weight). FSIS has determined that residues in bob veal calves have reached stable occurrence. As a result, FSIS is proposing to adjust the current testing program, which involves testing levels based on an establishment's history of calf condemnations, to make it more compatible with programs for other slaughter classes which have comparable violation rates.

216. SODIUM/POTASSIUM LACTATE AS MEANS OF REDUCING CERTAIN PATHOGENIC MICROORGANISMS IN SPECIFIC MEAT AND POULTRY PRODUCTS

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 318; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to permit the use of sodium lactate and potassium lactate as means of reducing certain pathogenic microorganisms in cooked meat and poultry products, and would provide for additional protection against the growth and toxin development of Clostridia botulinum in these products. FSIS has received a petition from Oscar Mayer Foods Corporation, Madison, Wisconsin, to use these substances in various cooked meat and poultry products at levels not to exceed 4.8 percent of the formulation.

217. ANTE-MORTEM INSPECTION OF DISABLED ANIMALS ON TRANSPORT VEHICLES

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 309; 9 CFR 320

Legal Deadline: None

USDA—FSIS — **Proposed Rule Stage**

Abstract: This proposed rule would amend the Federal meat inspection regulations to permit an alternate method of ante-mortem inspection of disabled animals. This method would allow a transport vehicle to be an extension of an official establishment's premises for purposes of ante-mortem inspection of disabled animal(s) that are within the vehicle. FSIS received a request from the Western States Meat Association, Oakland, California, to allow ante-mortem inspection of disabled animals to be performed on a transport vehicle. This proposed rule would (1) specify establishment responsibilities for maintaining control over the transport vehicle, for providing proper ante-mortem inspection facilities, for complying with the veterinary disposition, and for providing assistance to the veterinary Medical Officer when performing the ante-mortem inspection; (2) prescribe the facility requirements needed for safe ante-mortem inspection of disabled animals; and (3) provide the requirements for the written request for this inspection.

220. EXPORT CERTIFICATION PROCEDURES

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq

CFR Citation: 9 CFR 322; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to provide electronic export certification of all meat and poultry products exported to foreign countries. Domestic inspectors would continue to certify that the product is USDA inspected and passed. Exporters would be required to certify that all foreign requirements have been met. In 1988, the Agency conducted a pilot test to determine the feasibility of streamlining export certification procedures by centralizing controls; utilizing contemporary communications technology; establishing plant review criteria; and modifying stamping requirements. FSIS is reviewing the current regulations to determine what, if any, changes should be made to accommodate electronic issuance of export certificates.

226. USER FEES FOR LABORATORY ACCREDITATION

Significance: Agency Priority

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq; PL 101-624

CFR Citation: 9 CFR 318; 9 CFR 381; 9 CFR 391

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to provide for user fees for FSIS laboratory accreditation. The Agency's accredited laboratory program was established in response to the demand by the meat and poultry industry for acceptable alternate facilities (other than FSIS-operated laboratories) for chemical analysis of official samples. Under technical amendments to the 1990 Farm Bill, FSIS is authorized to collect user fees to offset the cost of its Accredited Laboratory Program. Under FSIS's program, laboratories may be accredited for food chemistry analysis and/or specific chemical residue analysis, including chlorinated pesticide residues, of official samples collected for meat and poultry inspection purposes. It should be noted that FSIS's Accredited Laboratory Program is different from the Department's Accredited Laboratory Program. The Department's Program was established by the 1990 Farm Bill. The Department's Program would also be funded by user fees and would accredit laboratories to conduct residue testing of various agricultural products.

227. PRIOR LABEL APPROVAL PROCESS

Significance: Regulatory Program

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq

CFR Citation: 9 CFR 317; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations to streamline the labeling process by eliminating the need for manufacturers to submit final label applications, provided sketch applications of such labels have been approved by the Agency. This would result in significant savings for manufacturers, as well as FSIS, while continuing to provide consumers with useful and truthful information on product labels. FSIS is reassessing its current labeling policies and the prior label approval process, and plans to initiate rulemaking on label reform as may be appropriate.

RIN: 0583–AB51

229. LICENSE OR OTHER AUTHORIZATION FOR FEDERAL POULTRY INSPECTION

Legal Authority: 21 USC 451

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the poultry products inspection regulations to remove the requirement for the licensing or other authorization of State employees to perform inspection in official poultry establishments. Assurance that only qualified employees are assigned to such establishments will now be covered under terms to be prescribed in Talmadge-Aiken or other cooperative agreements. This action is possible because of expanded training and certification requirements for veterinarians and food inspectors employed by the States under agreements to be concluded between the States and FSIS.

230. USE OF CARBON DIOXIDE IN THE HUMANE SLAUGHTER OF SWINE

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 308

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat inspection regulations to permit the use of carbon dioxide to induce death in swine. Current regulations governing the humane slaughter of swine permit carbon dioxide to be used to render the animals unconscious, with death resulting from the bleeding operation. The proposed amendment is based on scientific research that shows the use of carbon dioxide to induce death in swine to be an effective and humane slaughtering method.

231. UNITED STATES-CANADA MEAT AND POULTRY REINSPECTION

Significance: Regulatory Program

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 327; 9 CFR 381

Legal Deadline: None

Abstract: FSIS plans to initiate discussions with its counterparts in Agriculture Canada which will focus on reducing or eliminating existing barriers that may now impede the import/export of meat and poultry products. FSIS has developed several discussion points concerning the trade of meat and poultry products. If agreement is reached in any or all of the discussion points, amendments to the regulations may be needed. Once the discussions are concluded, FSIS will examine the need for regulatory changes to accommodate any such agreements.

232. REQUIREMENTS FOR FOREIGN COUNTRY IMPORT CERTIFICATION AND LIVE ANIMAL IMPORTATION

Significance: Agency Priority

Legal Authority: PL 99-198

CFR Citation: 9 CFR 327; 9 CFR 381

Legal Deadline: None

Abstract: This rule will respond to amendments to the Federal Meat Inspection Act by the Food Security Act of 1985. The amendments require that FSIS periodically certify residue control programs submitted by foreign countries desiring to export meat and poultry products to the United States. The amendments also provide the Secretary with the authority to issue an order prohibiting the importation of livestock for immediate slaughter that have been administered a drug or antibiotic banned for use in the United States.

233. INCREASE IN USE LEVELS OF SODIUM CITRATE AS AN ANTICOAGULANT

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 318

Legal Deadline: None

Abstract: This rule will amend the Federal meat inspection regulations to increase the level of sodium citrate allowed to be used as an anticoagulant in blood from 0.2 percent to 0.5 percent. FSIS has been petitioned by American Meat Protein Corporation, Ames, Iowa, to approve an increased use level of this substance as an anticoagulant in blood to 0.5 percent to facilitate the cleaning of equipment and the separation of red blood cells from plasma, as well as to improve sanitation.

235. PROCESSING PROCEDURES AND COOKING INSTRUCTIONS FOR COOKED, UNCURED MEAT PATTIES

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 318; 9 CFR 381

Legal Deadline: None

Abstract: This rule will provide processors of fully and partially cooked, and char-marked, uncured meat patties with specific manufacturing, handling, and labeling requirements for these products to reduce the potential for incidents of food-borne, pathogen-caused illness from consumption of inadequately cooked, uncured meat patties. This rule will also establish (1) holding temperature and time requirements for raw meat used for cooked, uncured meat patties; (2) internal temperature and time combination processing requirements for fully and partially-cooked, uncured meat patties which are char-marked with heat but remain raw; (3) a requirement that a cooking instruction be placed on the label of partially-cooked and char-marked, uncured patties, instructing the final preparer to cook the patties to a well done state (a minimum internal meat temperature of 160 degrees Fahrenheit); and (4) requirements to assure that fully-cooked, uncured meat patties are not contaminated after cooking. This action will prevent instances of illness from the consumption of such patties.

236. PFF FOR TURKEY HAM

Legal Authority: 21 USC 451 et seq

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This rule will amend the poultry products inspection regulations to permit the use of added water in turkey ham. The new standard provides for several categories of products that are delineated according to the protein content on a fat-free basis. FSIS was petitioned by the National Turkey Federation, Reston, Virginia, to establish protein fat-free values for turkey ham to promote product standardization and permit producers of turkey ham to compete more equitably with pork producers. This rule will replace the current provision which limits the amount of added water and other substances contained in turkey ham products by requiring the weight of the finished product to be no more than the original weight of the turkey thigh meat used prior to curing.

237. IMPORTED CANADIAN PRODUCT; PROVISION FOR "STREAMLINED" INSPECTION PROCEDURES; EXEMPTION FROM OFFICIAL MARK OF INSPECTION

Significance: Agency Priority

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 327; 9 CFR 381

Legal Deadline: None

VOL 58 ISS 78 AP 26 1993 UMI

USDA—FSIS — **Final Rule Stage**

Abstract: This rule amended the Federal meat and poultry products inspection regulations to provide "streamlined" inspection procedures for the reinspection of Canadian meat and poultry products and to exempt Canadian meat and poultry products offered for importation from the requirement that such product and/or containers of product be marked with the official mark of inspection once they are passed for entry into the United States. These actions stemmed from the Canada-United States Free Trade Agreement Implementation Act of 1988, Pub. L. 100-449. These actions specifically responded to one goal of the Agreement whereby both countries are charged with liberalizing agriculture trade practices by seeking ways to eliminate technical or procedural requirements which now may serve to impede trade in agricultural products.

238. USE OF TRICALCIUM PHOSPHATE AS A SEQUESTRANT IN MECHANICALLY DEBONED CHICKEN

Legal Authority: 21 USC 451 et seq

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This rule will amend the poultry products inspection regulations to permit the use of tricalcium phosphate in mechanically deboned chicken during the dehydration process to preserve the color of such products. Use of tricalcium phosphate at a proposed level not to exceed 2 percent would sequester the iron present in the blood of mechanically deboned chicken during the dehydration process, thus preventing discoloration (browning) of the product. The regulation is in response to a petition submitted by Henningsen Foods, Inc., Omaha, NE.

239. POLICY FOR DIFFERENTIATING BETWEEN CALVES AND ADULT CATTLE

Significance: Agency Priority

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 309; 9 CFR 310

Legal Deadline: None

Abstract: This rule will amend the Federal meat inspection regulations to define the term "calf" for inspection purposes, as a young bovine animal whose weight does not exceed 750 pounds live, or whose dressed carcass weight does not exceed 450 pounds. In addition, the rule will provide that certain indicators of maturity, such as teeth and bone formation, be used in conjunction with weight to determine if the animal is a "calf."

Abstract: The regulations will provide the terms and conditions of obtaining a Commodity Credit Corporation Export Credit Guarantee for agricultural facility establishment or improvement in emerging democracies that will primarily promote the export of U.S. agricultural commodities.

256. REGULATIONS GOVERNING THE FINANCING OF COMMERCIAL SALES OF AGRICULTURAL COMMODITIES (P.L. 480 TITLE I PROGRAM)

Legal Authority: 7 USC 1701 to 1705; 7 USC 1736 (a); 7 USC 1736 (c); 7 USC 5676; EO 12220

CFR Citation: 7 CFR 17

Legal Deadline: None

Abstract: The proposed rule would clarify the interim rule published Feb. 1, 1991 in response to the 1990 Food, Agriculture, Conservation, and Trade Act; it would change the basis for demurrage/despatch computations and the distribution of despatch; and it would limit brokerage payments to country agents and expand U.S. Government access to records. These actions would reduce the possibility of conflicts of interest, expedite loading of commodities, increase competition for ocean transportation and reduce ocean freight expenditures under the PL 480 Title I program.

257. WHISKEYTOWN-SHASTA-TRINITY NATIONAL RECREATION AREA

Legal Authority: 16 USC 472; 16 USC 551

CFR Citation: 36 CFR 292, subpart B

Legal Deadline: None

Abstract: The rules at 36 CFR 292, subpart B govern joint administration of the Shasta and Clair Engle-Lewiston units of the National Recreation Area by the Forest Service and the Bureau of Reclamation. The rules also set forth standards for defining compatible private land uses within the National Recreation Area to govern decisions by local zoning authorities, or in the absence of such authorities, decisions on land uses by the Secretary of Agriculture. The review has focused on experience under the rules and whether they still serve the public interest in ensuring that development and management of the NRA meet congressional intent.

258. CHANGE EMPHASIS AWAY FROM RESIDUAL VALUE APPRAISAL TO TRANSACTION EVIDENCE APPRAISAL AS THE PRIME METHOD OF APPRAISING NATIONAL FOREST TIMBER

Legal Authority: 16 USC 1600

CFR Citation: 36 CFR 223.60

Legal Deadline: None

Abstract: The emphasis will be changed in 36 CFR 223.60 away from the Residual Value Appraisal method of appraising National Forest timber to the Transaction Evidence Appraisal method. The basic procedure will be the Transaction Evidence Appraisal system, except in Region 10 where Residual Value appraising will continue to be used in light of the two long-term contracts that are currently in place. Other uses of the Residual Value and other appraisal systems may be used subject to approval from the Chief of the Forest Service.

The present 36 CFR 223.60 leans heavily to the Residual Value Appraisal System. National direction has been given to convert to the Transaction Evidence Appraisal system by October 1, 1992; thus the emphasis in the CFR needs to be changed.

259. RETENTION OF DOWNPAYMENT ON TIMBER SALE CONTRACTS

Legal Authority: 16 USC 472(a); 16 USC 618

CFR Citation: 36 CFR 223.49

Legal Deadline: None

Abstract: The Federal Timber Sale Contract Payment Modification Act directs the Forest Service to require purchasers to make downpayments and periodic payment on timber sales. The objective of these requirements is to discourage speculative bidding on National Forest System timber sales. This rule will identify the requirements to hold downpayments until the timber sale contract is substantially completed and will establish criteria to determine speculative bidding.

260. GRAZING AND LIVESTOCK USE

Legal Authority: 7 USC 1011; 16 USC 472; 16 USC 551; 16 USC 572; 16 USC 580g; 16 USC 580h; 16 USC 580l; 16 USC 1600 et seq; 31 USC 9701; 43 USC 1901 to 1903; 43 USC 1751; 43 USC 1752

CFR Citation: 36 CFR 222, subpart A

Legal Deadline: None

Abstract: This rulemaking seeks to remove outdated provisions, to incorporate policies and procedures issued in the Forest Service directive system, and to revise the remaining regulations, making them clearer and easier for the public and Agency personnel to use. The proposed regulations (1) clarify the definitions of excess livestock and unauthorized use rate; (2) remove the rule for grazing advisory boards; (3) establish requirements or procedures for minimum permit size, eligibility related to compliance with permit terms, permits for livestock use in vegetation management, valuing range improvements when livestock grazing is eliminated, charging a fee for processing actions initiated or caused by a permittee or applicant, and association meeting frequency of at least 1 every 12 months; (4) incorporate currently used policies and procedures for escrow waivers, associated member grievances, permit cancellation or suspension for excess use, charges for excess use, running a child's livestock under a parent's permit, requests for information for evaluating grazing applications and action on apparent violations of permit terms. 261. PROHIBITION ON MECHANICAL TRANSPORT AND OTHER ACTIVITIES IN WILDERNESS

Legal Authority: 16 USC 113 to 136; 16 USC 528 to 531; 16 USC 577 to 577c; 16 USC 1133

CFR Citation: 36 CFR 293.6(a); 36 CFR 261

Legal Deadline: None

Abstract: Except where specifically provided for, the Wilderness Act (16 USC 1133) prohibits both motorized equipment and mechanical transport. Mechanical transport includes devices such as bicycles, hang gliders, wheeled carts, and other items designed to carry people or supplies and powered by either "nonliving" or "living" power sources. The objective of this action is to clarify the definition of mechanical transport in 36 CFR 293.6(a) and to make corollary revisions in the prohibitions applicable to wilderness use, including prohibiting competitive events and expanding the definition of aircraft to include hang gliders, parachutes and parasails. 262. APPLICATION PROCEDURES AND FEES FOR HYDROELECTRIC USES ON NATIONAL FOREST SYSTEM LANDS

Legal Authority: 16 USC 551; 43 USC 1761

CFR Citation: 36 CFR 251.54; 36 CFR 251.57

Legal Deadline: None

Abstract: A revision of Agency procedures is needed to reduce confusion regarding the role of the Forest Service in permitting hydroelectric uses on National Forest System lands. The goal of the directives will be to establish procedures, compatible with the procedures of the Federal Energy Regulatory Commission (FERC) for obtaining various approvals and involvement of the Forest Service in a timely manner.

In addition, the directives will establish a fee system for hydroelectric uses as required by Title V, Section 501 of the Federal Land Policy and Management Act of 1976. A Notice of Proposed Policy was published 6/8/84 and comments were received. The proposed policy will take those comments into account.

263. LOCATABLE MINERALS

Significance: Agency Priority

Legal Authority: 16 USC 478; 16 USC 551; 43 USC 1701 et seq

CFR Citation: 36 CFR 228, subpart A

Legal Deadline: None

Abstract: Since the regulations were promulgated in 1974, certain legal requirements have changed due to the provisions of the Wilderness Act and recent court decisions; some sections of the regulations no longer apply and revisions and updating are necessary. Major changes proposed will specifically address the requirements for wilderness operations and, secondly, will clarify the mechanism for administering locatable mineral activities not conducted on mining claims but which are nevertheless authorized by the 1872 mining law.

264. NATIONAL FOREST PROHIBITIONS; LAW ENFORCEMENT SUPPORT ACTIVITIES

Legal Authority: 16 USC 472; 16 USC 551; 16 USC 683; 7 USC 1011(f); 16 USC 1246(e); 16 USC 1133(c) to 1133(d)(1); 16 USC 559(a)

CFR Citation: 36 CFR 261; 36 CFR 262

Legal Deadline: None

Abstract: The rules at 36 CFR part 261 declare the range of unacceptable public behavior when visiting or using National Forest System lands. Among topics covered are prohibitions on setting campfires in certain areas, unlawful cutting of trees, and other unlawful uses of resources and property of the National Forest System. Violations of these prohibitions carry legal penalties. The rules at 36 CFR part 262 address impoundment of property and rewards for information leading to arrest.

Review has examined the adequacy of the rules for administration of the National Forest System and whether changes in conditions, laws, or other factors require revision. The Agency has completed its review and is now preparing a proposed rule to revise the prohibitions.

265. REVISE SMALL TRACTS ACT REGULATIONS

Significance: Agency Priority

Legal Authority: 16 USC 521(c) to 521(i)

CFR Citation: 36 CFR 254, subpart C

Legal Deadline: None

Abstract: Implementation of the Agency's Small Tracts regulations has revealed an inadvertent inconsistency between the regulations at 36 CFR 254.35(f) and 254.41(a) and the legislative history of the Small Tracts Act of January 12, 1983. The regulations imply that the disposal of mineral fractions by sale can only be made in response to an application from an abutting landowner, thus discouraging the conveyance by sale to the public. The Act clearly authorizes sale of mineral fractions to the public through public sale, as well as individual applications, provided that certain conditions are met. The revisions will clarify the application of the Act to ensure that both individual applications and public sale are permissible means of disposing of qualifying tracts.

266. REVISE RULES GOVERNING SPECIAL USES OF NATIONAL FOREST SYSTEM LANDS AND RESOURCES AT 36 CFR 251 TO REMOVE AMBIGUITIES REGARDING FIRST AMENDMENT RIGHTS

Significance: Agency Priority

Legal Authority: 16 USC 472; 16 USC 551; 16 USC 1134; 16 USC 3210; 30 USC 185; 43 USC 1740; 43 USC 1761 to 1771

CFR Citation: 36 CFR 251, subpart A; 36 CFR 251, subpart B; 36 CFR 251, subpart E (New); 36 CFR 251, subpart F (New)

Legal Deadline: None

Abstract: A Federal District Court has ruled that existing regulations discriminate against groups who wish to gather on National Forests to exercise their first amendment rights of assembly and free speech. The proposed rule will seek to remove ambiguities regarding these first amendment rights.

The Agency is reviewing the rules of other Federal land managing agencies for possible approaches and is considering establishing separate rules for authorizing short-term, noncommercial uses of National Forests.

There will be no additional costs as a result of the proposed rule change. The benefit will be that the Forest Service will be able to adequately regulate large group use on the National Forests in a manner that ensures protection of the public health and safety and National Forest resources.

267. HELLS CANYON NATIONAL RECREATION AREA—PRIVATE LANDS

Legal Authority: PL 94-199, Sec 10(a)

CFR Citation: 36 CFR 292, subpart E (New)

Legal Deadline: None

Abstract: The Forest Service proposes to issue regulations concerning use of private lands in the Hells Canyon National Recreation Area (HCNRA) on the Oregon-Idaho border, as required in Pub. L. 94-199. The intended effect of this action is to establish standards for use and development of privately owned lands within the HCNRA.

The standards are intended to achieve the following management objectives for the Recreation Area: (1) conservation and continuance of forest land for forest uses and farm land for farm uses; (2) maintenance and protection of the free flowing nature of rivers within the HCNRA; (3) conservation of scenic, wilderness, cultural, scientific, and other values contributing to the public benefit; (4) preservation, especially in the area generally known as Hells Canyon, of all features and peculiarities believed to be biologically unique; (5) protection and maintenance of fish and wildlife habitat; (6) protection of archaeological and paleontological sites; (7) preservation of historic sites associated with and typifying the economic and social history of the region (cont)

268. IRREVOCABLE LETTER OF CREDIT

Significance: Agency Priority

Legal Authority: 16 USC 472a; 16 USC 528 to 531; 16 USC 1600 et seq; 12 USC 1 et seq.

CFR Citation: None

Legal Deadline: None

Abstract: In a 1987 court decision, a letter of credit issued in lieu of surety bond was found to be unenforceable because the person who signed the letter of credit did not have authority to do so and because the bank had violated State law in regard to limits of liability. Others were invalid because they exceeded the expiration date. To remedy this problem, the Forest Service is proposing to issue a requirement that the bank president certify as to the authority of the person signing the letter of credit and the conformance with State and Federal statutes. An automatic extension of the expiration date would also be required.

270. PRE-AWARD INFORMATION REQUIREMENTS

Legal Authority: 16 USC 472(a); 16 USC 618

CFR Citation: 36 CFR 223.101

Legal Deadline: None

Abstract: Recently, as the number of timber sale defaults has increased, the number of debarred purchasers has increased, and the Government has initiated a policy of only doing business with responsible parties, it is becoming commonplace for bidders to form new affiliates in order to continue to be awarded Forest Service timber sale contracts. Unless the bidder voluntarily identifies affiliates, the Agency must make the determination through a time consuming process prior to award, prior to determining if double downpayment rules apply, and prior to taking debarment action. This rule would require bidders to disclose, prior to award of sales, all affiliates, and to certify that none are suspended or debarred. Filing a false certification would be cause for contract cancellation and debarment action.

271. EXPANDED USE OF PROSPECTING PERMITS AND PREFERENCE RIGHT SALES FOR MINERAL MATERIALS

Legal Authority: 30 USC 601 et seq

CFR Citation: 36 CFR 228, subpart C

Legal Deadline: None

Abstract: Currently rules pertaining to prospecting permits and preference right negotiated sales apply only to minerals on acquired National Forest lands. This limitation is felt to encourage parties to locate mining claims on other National Forest lands under the mining laws of 1872, when it would be more appropriate to apply for a sale of mineral materials. This proposed rule would expand the use of prospecting permits to other National Forest System lands and responds to a recent change in the definition of mineral materials and clarification of those minerals that are subject to mining claims and those that are subject to sale.

272. CLARIFICATION AND REVISION OF APPEALABLE DECISIONS UNDER 36 CFR PART 251, SUBPART C

Legal Authority: 16 USC 472; 16 USC 551

CFR Citation: 36 CFR 251, subpart C

Legal Deadline: None

Abstract: The current rules at 36 CFR part 251 subpart C provide appeal procedures for holders of or certain applicants for land use and occupancy authorizations. Experience under this rule indicates a need to revise the rule as to purpose and scope and appealable decision. Questions have arisen on whether terms and conditions of the permit and routine administration of the permit by the Forest Service are appealable. In addition, the rule is silent on administrative review of decisions regarding recomputation of timber volume shares for small timber purchasers and decisions related to determination for the need for structural changes in a market area under the Small Business Timber Set Aside program. This rulemaking will seek to address the problems.

274. GOVERNMENT CANCELLATION OF TIMBER SALE CONTRACTS

Significance: Agency Priority

Legal Authority: 16 USC 551

CFR Citation: 36 CFR 223.40; 36 CFR 223.116

Legal Deadline: None

Abstract: Current regulations governing cancellation of National Forest timber sale contracts do not adequately protect the Government's financial interests in the event the Forest Service is forced to cancel contracts due to events beyond its control arising from compliance with environmental statutes. This rulemaking would remove an unworkable compensation of damages formula, remove limits applicable to length of contract term, and establish a termination for environmental protection clause in timber sale contracts, a standard in most Federal procurement contracts.

275. SPECIES SURPLUS TO DOMESTIC MANUFACTURING NEEDS

Legal Authority: 16 USC 620 et seq

CFR Citation: 36 CFR 223.200

Legal Deadline: None

Abstract: This proposed rule would amend subpart F, part 223 of title 36 of the Code of Federal Regulations, section 223.200, to list species proposed to be surplus to domestic manufacturing needs.

This proposed rule would implement a portion of section 489(b) of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 USC 620 et seq). Section 489(a) of the Act provides that no person who acquires unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States may export such timber from the United States, or sell, trade, exchange or otherwise convey such timber from the United States, unless such timber has been determined under subsection (b) to be surplus to the needs of timber manufacturing facilities in the United States. Section 489(b) of the Act provides that the prohibition contained in subsection (a) shall not apply to specific quantities of grades and species of unprocessed timber originating in Federal lands which the Secretary concerned determines to be surplus to domestic manufacturing needs, issued in accordance with section 553 of title 5, USC.

276. NATIONAL FOREST SYSTEM NOTICE; COMMENT AND APPEALS PROCEDURES

Legal Authority: 16 USC 551; 16 USC 472

CFR Citation: 36 CFR 215

Legal Deadline: None

Abstract: This rule responds to Public Law 102-381, section 322, Forest Service Decisionmaking and Appeals Reform. This rule establishes procedures to require public notice and opportunity to comment on certain Forest Service actions for which environmental documentation is required. This rule establishes new appeal procedures in accord with those specified in Pub. L. 102-381, for certain actions which implement forest land and resource management plans. In addition, this rule recodifies the agency's administrative appeal process at 36 CFR part 217 for appeals of approvals or amendments of regional guides, and approval, significant amendment, and revision of forest land resource management plans to 36 CFR part 215, subpart C. The intended effect is to comply with the new law, expand opportunities for pre-decisional involvement of the public in Forest Service decisionmaking, and to minimize delay in providing a stable supply of resources to society.

277. PROPOSED POLICY NATIONAL FOREST SYSTEM LAND AND RESOURCE MANAGEMENT PLANNING FOREST SERVICE MANUAL (FSM 1920)

Significance: Agency Priority

Legal Authority: 16 USC 1600 et seq

CFR Citation: None

Legal Deadline: None

Abstract: The proposed manual policy would incorporate all direction for land and resource management planning into one Forest Service Manual chapter (FSM 1920). The proposed policy would clarify how the revised land and resource management planning regulations at 36 CFR 219 will be implemented. The proposal will focus on implementation of forest plans: monitoring, evaluation, amendment, and revision of forest plans; and clarifying the relationship between forest planning and project decisionmaking. The agency plans to make this policy available for review during the comment period on the proposed revised rule (see entry for 0596-AB20).

278. USE OF FIXED ANCHORS FOR ROCK CLIMBING IN WILDERNESS

Significance: Agency Priority

Legal Authority: 16 USC 1121; 16 USC 1131 to 1136

CFR Citation: 36 CFR 261.16; 36 CFR 293.9

Legal Deadline: None

Abstract: The sport of rock climbing is often accomplished by using fixed, rather than removable, metal bolts and anchors. These bolts are considered permanent improvements when installed. These improvements may detract from the wilderness experience and are not always compatible with management of the wilderness resource. The Forest Service proposes to reduce impacts on the wilderness resource by regulating use of fixed anchors for rock climbing in wilderness administered by the agency so that rock climbing occurs in a manner compatible with wilderness management. Alternatives to the proposed action are to prohibit all use of fixed anchors in wilderness, or permit unrestricted use of fixed anchors.

279. IMPROVING FINANCIAL SECURITY OF TIMBER SALE CONTRACTS

Significance: Regulatory Program; Agency Priority

Legal Authority: 16 USC 472a

CFR Citation: None

Legal Deadline: None

Abstract: The Forest Service proposes to strengthen the Government's contract financial position by: the elimination of the $500,000 performance bond ceiling; increasing the bid guarantee to 10 percent of the advertised value; assessing damages for contract repudiation based on resale value; and conditions. In addition, the Forest Service is proposing to increase the amount of contract security to deter speculative bidding, decrease the potential for contract defaulting, and provide additional guarantee for payment in the event of default damage claims. Following notice and comment, these changes will be issued in the form of instruction to agency contracting officers in the Forest Service Directive System.

Final Rule Stage

Abstract: Changes in existing regulations are needed to implement provisions of the Federal Land Exchange Facilitation Act of August 20, 1988, as well as to correct errors, delete obsolete portions, update to reflect current authorities, and clarify ambiguities. Upon consideration of public comment and further coordination with the Bureau of Land Management which is also developing rules to implement the Act, the Agency has decided to issue a new proposed rule.

281. INDIAN ALLOTMENTS ON NATIONAL FOREST SYSTEM LANDS

Significance: Agency Priority

Legal Authority: 16 USC 472; 16 USC 551; 16 USC 1603; 43 USC 1740; 25 USC 337

CFR Citation: 36 CFR 254, subpart D (New)

Legal Deadline: None

Abstract: Objectives are to set forth Forest Service procedures and role in the regulation of Indian allotments on National Forest System land. The Indian Allotment Act, as amended, authorizes the Secretary of the Interior to make allotments of National Forest System lands to Indians for homesteading and agricultural and grazing purposes. The Forest Service has relied upon USDI rules and procedures at 43 CFR 2533 to govern its involvement in Indian allotment cases. Litigation and a decision by the Interior Board of Land Appeals indicate the need for the Forest Service to set forth its own regulations when the Forest Service determines that lands are not chiefly valuable for agricultural and grazing purposes.

282. SURETY BOND FORM REVISION

Significance: Agency Priority

Legal Authority: 31 USC 9301 to 9309; 31 USC 223 to 225

CFR Citation: None

Legal Deadline: None

Abstract: Following a period of high-priced timber sales bid prior to 1982, the Forest Service experienced a number of contract defaults on these sales. Subsequently, the Forest Service has had difficulty collecting from some sureties on the bonds guaranteeing performance on these sales. As part of a financial security initiative affecting future sales, the Forest Service is proposing to revise the payment and performance bonds to clarify surety's obligation in regard to what is being guaranteed, when payment is due in case of default, what additional charges will be assessed if payment is not made when due and when collection action may be suspended. Other alternatives include eliminating surety bonds as a form of security, reducing surety guarantee to mid-point and periodic payment and retention of current bond forms. Upon adoption the final revised bond forms will be issued for use by Forest Service Contracting and Fiscal Officers for future timber sale contracts.

283. FEDERAL CAVE RESOURCES PROTECTION

Significance: Agency Priority

Legal Authority: PL 100-691

CFR Citation: 36 CFR 290, subpart A (New)

Legal Deadline: Final, Statutory, August 18, 1989.

Abstract: These regulations will implement the Federal Cave Resources Protection Act of 1988, which requires that the rules define what is a significant cave for purposes of this Act. The Act also requires that the rules address an inventory of cave resources, provide for confidentiality of information concerning the nature and location of caves on Federal land, and permits for collection and removal of cave resources. The regulations are being developed in concert with agencies of the U.S. Department of the Interior as required by the act.

284. RECREATION RESIDENCE AUTHORIZATION POLICY

Significance: Agency Priority

Legal Authority: 16 USC 497

CFR Citation: 36 CFR 251

Legal Deadline: None

Abstract: The policy for administering recreation residences on National Forest lands was adopted August 16, 1988 (53 FR 30924) and subsequently appealed under the administrative appeal process (36 CFR 211.18). In rendering his decision on the appeal the Assistant Secretary of Agriculture for Natural Resources and Environment suspended certain provisions related to tenure and the offering of in-lieu sites; designated the remaining features interim policy; and directed the Chief of the Forest Service to review and reconsider the entire policy (54 FR 23499; June 1, 1989). The policy is being reformulated and consideration given to public comments received. The purpose of the policy is to improve the administration of recreation residence permits and implement a revised fee schedule that obtains fair market value for the use. The policy affects about 15,800 permittees.

285. HELLS CANYON NATIONAL RECREATION AREA—USE OF NATIONAL FOREST LANDS

Significance: Agency Priority

Legal Authority: 16 USC 460(gg) Hells Canyon National Recreation Area

CFR Citation: 36 CFR 292, subpart F (New)

Legal Deadline: None

Abstract: In Oregon Natural Resource Council v Lyng, the 9th Circuit Court of Appeals ruled that the Secretary must promulgate regulations as required by the Hells Canyon National Recreation Act (HCNRA) governing federal and private land uses in the HCNRA. The Department had argued that such rules were discretionary and the Agency's comprehensive management plan for the NRA, which was prepared as required by the Act, was sufficient to guide management of the area. As a result of the court's ruling, the risk of litigation to halt ongoing activities, particularly timber sales, is high. Accordingly, there is an urgent need to promulgate an interim rule governing management of the federal lands in the HCNRA. While many existing regulations governing National Forest System lands remain applicable to the Hells Canyon NRA, pending projects and plans are vulnerable to continued litigation until final rules are effective. An interim rule is the most expeditious way to effect rules. Public comment will be invited on the interim rule and will be considered in development of the final rule. (cont)

Timetable:

Action	Date	FR Cite
Interim Final Rule	10/05/89	54 FR 41089
Interim Final Rule Comment Period End	12/04/89	
Final Action	05/00/93	
Final Action Effective	06/00/93	

Small Entities Affected: None

Government Levels Affected: None

Additional Information: ABSTRACT CONT: The only alternative to the court ruling to promulgate rules is to publish a proposed rule rather than interim rules. This is unacceptable because of the potential for disruption to management of the area and the regulatory void that would be created by the longer timeframes involved in going through a Notice of Proposed Rulemaking.

286. FEDERAL TIMBER EXPORT AND SUBSTITUTION RESTRICTIONS (COMPREHENSIVE REVISION)

Significance: Agency Priority

Legal Authority: 16 USC 620 to 620j

CFR Citation: 36 CFR 223, subpart B; 36 CFR 223, subpart C; 36 CFR 223, subpart D; 36 CFR 223, subpart F; 36 CFR 261, subpart A

Legal Deadline: Final, Statutory, May 20, 1991.

Abstract: These rules are necessary to carry out the restrictions placed on the export of unprocessed timber from Federal lands and the restrictions on the direct and indirect purchasing of Federal logs to be used in substitution for the export of unprocessed timber originating from private lands. The rules are mandated by the Forest Resources Conservation and Shortage Relief Act of August 20, 1990. The Act calls for various rules to be issued. The agency anticipates several rulemakings to achieve implementation of the act. See RIN 0596-AB25 for related rulemaking.

Final Rule Stage

287. BELOW-COST TIMBER SALE PROGRAM POLICY AND GUIDELINES

Significance: Agency Priority

Legal Authority: 43 USC 1764

CFR Citation: None

Legal Deadline: None

Abstract: The Forest Service is proposing a policy and implementing guidelines to address below-cost timber sale programs on individual National Forests. The policy would be issued to Forest Service field employees, would address the costs and revenues associated with the management of National Forest timber sale programs, and would require use of the Timber Sale Program Information Reporting System to assess each National Forest timber sale program.

288. STATE AND PRIVATE FORESTRY ASSISTANCE STEWARDSHIP INCENTIVE PROGRAM

Significance: Agency Priority

Legal Authority: 16 USC 2101 et seq

CFR Citation: 36 CFR 230

Legal Deadline: None

Abstract: This final rule would incorporate any changes resulting from public comments on the interim rule published December 4, 1991. The interim rule established the interim procedures for administration of the Stewardship Incentive Program. The Program is intended to encourage private landowners, through cost-share assistance, to manage their forest lands for economic, environmental, and social benefits. Only two alternatives were considered in detail: (1) to implement the Program in accordance with 16 USC 2101, et seq, and (2) not to implement the Program, in which case there would be no accelerated program for multiple resource management on nonindustrial private forest lands. The overall effects of the Program over time will be environmentally beneficial by enhancing wetlands, wildlife habitat, forest health, forest productivity, and recreation. The Program will help meet future demand for commodity and noncommodity forest resources. There are no potential negative impacts anticipated for the Program.

289. SPECIAL-USE APPLICATIONS AND ADMINISTRATION OF SPECIAL-USE AUTHORIZATIONS

Significance: Agency Priority

Legal Authority: 43 USC 1764; 31 USC 483(a); 30 USC 181 Mineral Leasing Act; 16 USC 551

CFR Citation: 36 CFR 251(b)

Legal Deadline: None

Abstract: The Forest Service proposes to amend the regulations governing the use and occupancy of National Forest System lands to minimize application expenses, streamline and make more efficient environmental analysis of special use proposals, provide the ability to use one-time payments for easements as presently used in the market place, limit certain liability requirements to amounts determined by a risk assessment, make certain definitions more explicit, and clarify direction on renewal of existing special use regulations. The intended effect is to reduce costs to proponents and the agency, expedite decisionmaking, and administer authorizations in a more "user friendly" manner by removing certain requirements deemed unnecessary and/or outdated.

316. STANDARDS AND SPECIFICATIONS FOR TIMBER PRODUCTS ACCEPTABLE FOR USE ON REA FINANCED ELECTRIC AND TELEPHONE SYSTEMS

Legal Authority: 7 USC 901 et seq; 7 USC 1921 et seq

CFR Citation: 7 CFR 1728; 7 CFR 1755

Legal Deadline: None

Abstract: The Rural Electrification Administration proposes to revise 7 CFR 1728 by rescinding Bulletins 50-17 and 50-24, and codifying the information of these bulletins at 1728.95 and 1728.96 respectively. Also, REA proposes to revise Bulletin 50-18, renumber it as 1728F-DT5C, and incorporate it by reference at 7 CFR 1728. Additionally, REA proposes to revise 7 CFR 1755 by incorporating by reference Bulletin 1728F-DT5C. These revisions are prompted by borrower requests to use copper naphthenate products, and by suppliers wanting to furnish these products to REA borrowers.

317. DEPRECIATION RATES AND PROCEDURES

Legal Authority: 7 USC 901 et seq

CFR Citation: 7 CFR 1767

Legal Deadline: None

Abstract: The Rural Electrification Administration proposes to add a new subpart to 7 CFR 1767 that codifies current policy on depreciation rates and procedures. Revisions are being proposed to the existing policy that will require continuing records to be maintained on a vintage year basis, and that set forth requirements for utilizing depreciation rates that vary from those that are prescribed in this subpart. Current REA policy is set forth in Bulletin 183-1, which will be rescinded upon publication of the final rule.

CFR Citation: 7 CFR 1755

Legal Deadline: None

Abstract: REA proposes to revise 7 CFR 1755 by rescinding Bulletin 345-165, General Specification for Digital, Stored, Program Controlled Office Equipment, and incorporate by reference new Bulletin 1753E-001 (522). The new Bulletin will permit greater latitude to provision power converters and ringing source functions, and limit a diminished effect on public telephone service integrity.

332. BORROWER INVESTMENTS—TELEPHONE LOAN PROGRAM

Legal Authority: 7 USC 901 et seq; 7 USC 1921 et seq

CFR Citation: 7 CFR 1744

Legal Deadline: None

Abstract: The Rural Electrification Administration proposes to add a new subpart E to 7 CFR 1744 describing the types of investments REA telephone borrowers may make without prior approval of the Administrator. REA also proposes to add the procedure for the treatment of investments in rural development projects when determining a borrowers allowable distribution of capital. This proposed rule should promote economic growth in communities served by REA telephone borrowers by making available additional sources of funding for rural economic development projects.

337. FARMLAND PROTECTION POLICY ACT

Significance: Agency Priority

Legal Authority: 7 USC 4201

CFR Citation: 7 CFR 658

Legal Deadline: None

Abstract: This proposed rule amends part 658 of title 7 of the Code of Federal Regulations, which implements the Farmland Protection Policy Act (FPPA), 7 USC 4201-4209. Congress amended the FPPA through section 1255 of the Food Security Act of 1985, Pub. L. 99-198. The proposed amendments contained in this proposed rule will: (1) Remove definitions from the existing rule that restated the act; (2) remove the applicability and exemption section that restated the Act; (3) remove the "Technical Assistance" section that restated the requirements of the Act; (4) require Federal agencies to return a copy of the "Farmland Impact Rating Form AD-1006," to USDA once the final decision is made on a proposed conversion, and inform USDA of progress in reviewing and revising their policy and procedures to protect farmland. This information will be used to make the annual report to Congress as required in the 1985 amendments to FPPA. Since the elimination of these sections of the existing rule was not included in the 1987 proposed rule, and the fact that almost 4 years have passed since the proposed rule, this proposed rule is being published for additional public comments.

Semiannual Agenda of Regulations

AGENCY: Office of the Secretary, Commerce.

ACTION: April 1993 regulatory agenda.

SUMMARY: In compliance with Executive Order (E.O.) 12291 entitled "Federal Regulation" and the Regulatory Flexibility Act (Pub. L. 96-354), the Department of Commerce, in April and October of each year, publishes in the **Federal Register** an agenda of the rulemaking actions covered by section 1 of E.O. 12291 that the Department plans to conduct or review over the next 12 months. Rulemaking actions are grouped according to prerulemaking, proposed rules, final rules, and rulemaking actions completed since the October 1992 agenda. The purpose of the agenda is to provide information to the public on regulations currently under review, being proposed, or issued by the Department. The agenda is intended to facilitate comments and views by interested members of the public.

The Department's April 1993 regulatory agenda includes regulatory activities that are expected to be conducted during the period April 1, 1993, through March 31, 1994.

FOR FURTHER INFORMATION CONTACT:

Specific: For additional information about specific regulatory actions listed in the agenda, contact the individual identified as the contact person.

General: Comments or inquiries of a general nature about the agenda should be directed to Michael A. Levitt, Assistant General Counsel for Legislation and Regulation, U.S. Department of Commerce, Washington, DC 20230; telephone: 202-482-0846.

SUPPLEMENTARY INFORMATION: E.O. 12291 requires all executive agencies to publish semiannually an agenda of those regulations that are under consideration pursuant to this order. By memorandum of December 9, 1992, the Office of Management and Budget (OMB) issued guidelines and procedures for the preparation and publication of the April 1993 Unified Agenda of Federal Regulations. E.O. 12291 and the OMB guidelines require that each agency's agenda report the following information on nonexempt regulatory activities being conducted or planned to be conducted by the agency during the 12-month period succeeding publication: The title of the regulation; the name, title, address, and phone number of an agency person who is knowledgeable about the regulation; whether the action is expected to have a significant economic impact on a substantial number of small entities and whether it will affect levels of government; the section(s) of the Code of Federal Regulations which will affect or be affected by the action; the section of the United States Code, Public Law, or Executive order that authorizes the action; an indication of whether or not the entry is a significant regulatory action included in the Administration's Regulatory Program and if the agency considers it a priority action; an abstract describing the problem the regulation addresses, alternatives to the regulation being considered, and potential costs and benefits of the action; legal deadline, if any; and a timetable of dates and, if available, **Federal Register** citations for past stages of the action. In addition, OMB requires that procurement-related regulatory actions include additional information on all actions that are covered by section 22 of the Office of Federal Procurement Policy Act Amendments of 1988. This information will be used by the Office of Federal Procurement Policy in preparing the "Procurement Regulatory Activity Report."

The Regulatory Flexibility Act requires agencies to prepare a regulatory flexibility analysis where there is a positive finding that a rule will have a significant economic impact on a substantial number of small entities. E.O. 12291 requires agencies to prepare a regulatory impact analysis for any regulation considered to be a "major rule" as defined in the order.

Explanation of Information Contained in the Agenda

Within the Department, the Office of the Secretary and various operating units may issue regulations. Operating units, such as the Economic Development Administration, the Bureau of Export Administration, the International Trade Administration, the National Institute of Standards and Technology (NIST), the National Oceanic and Atmospheric Administration (NOAA), and the Patent and Trademark Office, issue the greatest share of the Department's regulations.

A large number of regulatory actions reported in the agenda are proposed or final Federal Information Processing Standards (FIPS) issued by NIST under Public Law 100-235. FIPS consist of standards and guidelines to improve Federal Government use and management of computers and information technology. The standards, while often of great use to industry and the public, apply only to the Federal Government. In developing the standards and guidelines and in providing technical guidance and coordination to Federal agencies, NIST works closely with private industry standard-setting organizations.

Another large number of regulatory actions reported in the agenda deal with fishery management programs of NOAA's National Marine Fisheries Service (NMFS). To avoid repetition of programs and definitions, as well as to provide some understanding of the technical and institutional elements of the NMFS programs, a section on "Explanation of Information Contained in NMFS Regulatory Entries" is provided below.

Explanation of Information Contained in NMFS Regulatory Entries

The Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 *et seq.*) (Act) governs the management of fisheries within the Exclusive Economic Zone (EEZ). The EEZ refers to those waters from the outer edge of the State boundaries, generally 3 nautical miles, to a distance of 200 nautical miles. Fishery Management Plans (FMPs) are to be prepared for fisheries which require conservation and management measures. Regulations implementing these FMPs regulate domestic fishing and foreign fishing where permitted. Foreign fishing can be conducted in a fishery for which there is no FMP only if a preliminary fishery management plan has been issued to govern that foreign fishing. Under the Act, eight Regional Fishery Management Councils (Councils) prepare FMPs or amendments to FMPs for fisheries within their respective areas. In the development of such plans or amendments and their implementing regulations, the Councils are required by law to conduct public hearings on the draft plans and to consider the use of alternative means of regulating.

The Council process for developing FMPs and amendments makes it difficult for NMFS to determine the significance and timing of some regulatory actions under consideration by the Councils at the time the semiannual regulatory agenda is published.

The DOC April 1993 regulatory agenda follows.

Dated: February 23, 1993.

Carol C. Darr,

Acting General Counsel.

DEPARTMENT OF COMMERCE (DOC)
Office of the Secretary (OS)
Proposed Rule Stage

342. CONTRACT CLAUSES AND SOLICITATION PROVISIONS FOR THE COMMERCE AUTOMATED SOLICITATION SYSTEM

Legal Authority: 41 USC 251 et seq; PL 98-369; PL 98-577

CFR Citation: 48 CFR 1301 to 1353

Legal Deadline: None

Abstract: The Department of Commerce is currently reviewing standardized contract clauses and solicitation provisions for inclusion in a planned departmentwide automated solicitation system. A proposed amendment to the Commerce Acquisition Regulation (CAR) would illustrate and incorporate these standardized clauses and provisions. This should ultimately be less burdensome to Department contractors and potential contractors, since the clauses and provisions would be used uniformly throughout the Department.

Timetable: Next Action Undetermined

Small Entities Affected: Undetermined

Government Levels Affected: Undetermined

Procurement: This is a procurement-related action for which there is no statutory requirement. There is no paperwork burden associated with this action.

Agency Contact: Robert A. Welch, Director for Procurement, Office of Procurement, Department of Commerce, Office of the Secretary, 14th Street and Constitution Avenue NW., Washington, DC 20230, 202 482-2773

RIN: 0690–AA08

343. SOURCE EVALUATION PROCEDURES AND MISCELLANEOUS REVISIONS TO THE COMMERCE ACQUISITION REGULATION

Legal Authority: 41 USC 251 et seq

CFR Citation: 48 CFR 1301 to 1353

Legal Deadline: None

Abstract: The proposed amendment will revise the CAR to incorporate references to the Department's Acquisition Manual chapter on formal source selection procedures and will also add agency procedures in those areas of the CAR where the FAR specifies that agency procedures are required. In addition, the proposed amendment will update the CAR to conform with the latest policies and procedures of the FAR.

Timetable: Next Action Undetermined

Small Entities Affected: Undetermined

Government Levels Affected: Undetermined

Procurement: This is a procurement-related action for which there is no statutory requirement. There is no paperwork burden associated with this action.

Agency Contact: Robert A. Welch, Director for Procurement, Office of Procurement, Department of Commerce, Office of the Secretary, 14th Street and Constitution Avenue NW., Washington, DC 20230, 202 482-2773

RIN: 0690–AA13

344. MODIFY REQUIREMENT IN THE COMMERCE ACQUISITION REGULATION TO PUBLISH PRESOLICITATION NOTICES IN THE COMMERCE BUSINESS DAILY FOR DOC PROCUREMENTS WHICH WILL BE PERFORMED IN FOREIGN COUNTRIES

Legal Authority: 41 USC 251 et seq

CFR Citation: 48 CFR 1305

Legal Deadline: None

Abstract: Revise the Commerce Acquisition Regulation, part 5 to reflect class deviation that presolicitation Commerce Business Daily notices are not required for foreign procurements. The current procedures are burdensome and delay the procurements needlessly. Most of the potential sources are foreign firms and publishing the presolicitation notices does not achieve government goals of increasing competition among U.S. firms. The revised regulation will require notices to be provided if there are a significant number of U.S. firms doing business in the location and these firms are able to provide the required supplies or services.

Timetable: Next Action Undetermined

Small Entities Affected: None

Government Levels Affected: Undetermined

Procurement: This is a procurement-related action for which there is no statutory requirement. There is no paperwork burden associated with this action.

345. MODIFY THE COMMERCE ACQUISITION REGULATION TO USE A DEVIATION VERSION OF A FEDERAL ACQUISITION REGULATION CLAUSE ON THE BUY AMERICAN TRADE AGREEMENT ACTS

Legal Authority: 41 USC 251 et seq

CFR Citation: 48 CFR 1325; 48 CFR 1352

Legal Deadline: None

Abstract: Revise the Commerce Acquisition Regulation to authorize the use of a contract clause which deviates from the FAR Clause at 52.225-9 "Buy American Act-Trade Agreements Act-Balance of Payments Program" and the provision at 52.225-7 "Buy American Act-Trade Agreement Act-Balance of Payment Program Certificate." The revision will permit the case of a provision and clause which does not give U.S. firms a disadvantage against foreign firms. Recently the FAR provision and clause were found to be in violation of the Trade Agreement Act. The proposed CAR Regulation will remain in effect only until the FAR is revised to correct this problem. The rule is in accord with the governmentwide policies established by the Office of Federal Procurement Policy.

348. BENCHMARK SURVEY OF FOREIGN DIRECT INVESTMENT IN THE UNITED STATES—1992

Legal Authority: 22 USC 3101 to 3108 Int'l Investment & Trade in Svcs Survey Act

CFR Citation: 15 CFR 806

Legal Deadline: Other, Statutory, January 1993.

It is a statutory requirement that a benchmark survey covering 1992 be conducted. Efficient conduct of that survey requires final rules be effective in January 1993.

Abstract: This action will amend existing rule 15 CFR 806.17 to provide for the conduct of the BE-12, Benchmark Survey of Foreign Direct Investment in the United States -- 1992, as required in the International Investment and Trade in Services Survey Act, 22 USC 3101 to 3108 (see especially section 4(b) of the Act). The existing rule covers a similar survey for 1987 which has been completed and which the new survey will update. The proposed rule raises the exemption level for reporting on the long form to $50 million, from $20 million in the

VOL 58 ISS 78 APR 26 1993 UMI

350. REVISION OF FOREIGN TRADE STATISTICS REGULATIONS

Legal Authority: 13 USC 301 to 307

CFR Citation: 15 CFR 30.1 to 30.92

Legal Deadline: None

Abstract: Review of 15 CFR 30 for changes to conform to the harmonized system for imports and exports as mandated by The Omnibus Trade and Competitiveness Act of 1988. This review will combine elements of housekeeping changes, updating obsolete information, clarification, conforming to the harmonized system (including metric measurements) and bringing the system in line with current reporting practices. There should be no added burden or costs to the public because there are no additional information or reporting requirements.

The benefits of these changes will be to allow direct comparisons between U.S. imports and exports and to allow comparisons between trade balances of the United States and its major trading partners.

Additionally, section 30.54 will be revised to raise the exemption from Shipper's Export Declaration filing requirements for exports by mail from $500 to $2500. This will reduce the reporting burden on the public, particularly small shippers.

351. CHANGE IN THE DEFINITION OF "GENERAL USE" SOFTWARE FROM TECHNICAL DATA TO COMMODITY

Legal Authority: 13 USC 301 to 307

CFR Citation: 15 CFR 30.1

Legal Deadline: None

Abstract: The Census Bureau proposes to change the definition of "General Use" software from technical data to commodity. This will involve changes to the Foreign Trade Statistics Regulations. "General Use" Software as a commodity will be valued on the transaction value and will be included in the merchandise trade statistics.

This will complement data collected in surveys by the Bureau of Economic Analysis on software as a service transaction. There will be some increase in reporting burden on exporters.

352. REQUIREMENT THAT SHIPPER'S EXPORT DECLARATIONS (SEDS) FOR SHIPMENTS FROM THE UNITED STATES TO PUERTO RICO BE COLLECTED IN PUERTO RICO

Legal Authority: 13 USC 301 to 307

CFR Citation: 15 CFR 30.20 to 30.24

Legal Deadline: None

Abstract: The Census Bureau proposes to change the Foreign Trade Statistics Regulations to require the collection of SEDs for shipments from the United States to Puerto Rico in Puerto Rico. In addition, the U.S. Customs Service will revise their regulations in order to implement this change. In order to ensure compliance with the new regulations, the Puerto Rico Planning Board will fund positions in the Census Bureau Office and the U.S. Customs Service Office in Puerto Rico.

Data users will benefit through improved quality and completeness of the data for shipments from the United States to Puerto Rico. The Census Bureau does not anticipate any change in reporting burden from these revisions or any significant cost impact on the exporting community.

353. • FEE STRUCTURE FOR AGE SEARCH AND CITIZENSHIP INFORMATION

Legal Authority: 13 USC 8(a)

CFR Citation: 15 CFR 50.5

Legal Deadline: None

Abstract: The Bureau of the Census is hereby amending title 15, Code of Federal Regulations, chapter 1, part 50, section 50.5, fee structure for age search and citizenship information, to increase the fee for an age search from $25.00 to $40.00, to increase the additional fee for a full schedule transcript from $6.00 to $10.00, and to reduce the number of censuses searched per fee from two to one. This change is being made to recover the actual costs to process a request. We conducted an in-depth analysis of the costs associated with processing requests for searches of census records and have determined that the current fee structure does not allow us to recover our costs. Title 13, United States Code, requires recovery of the costs. This is not a major rule within the meaning of section 1 of Executive Order 12291. The rulemaking provisions of the Administrative Procedure Act (APA), 5 USC section 553 are inapplicable because this rule falls within the proprietary exception of subparagraph (a)(2) of section 553. This cost increase is minimal, reflecting the actual costs for searching and furnishing the information, and funds for this purpose are not (cont)

365. UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS TO STATE AND LOCAL GOVERNMENTS

Legal Authority: 5 USC 301

CFR Citation: 15 CFR 24

Legal Deadline: None

Abstract: On June 9, 1987, a notice of a proposed rule establishing governmentwide administrative requirements for grants and cooperative agreements to States and local governments was published in the Federal Register (52 FR 21820-21862). On March 11, 1988, a final rule was published in the Federal Register (53 FR 8033-8103) and was made effective October 1, 1988. Subsequently, a November 4, 1988 NPRM was published in the Federal Register (53 FR 44715-44819) that proposed to amend the common rule to incorporate requirements for grantees that are universities or nonprofit organizations. Based on comments received in response to the NPRM, however, OMB published a notice (55 FR 45289-45290) cancelling plans for such changes. Currently, an interagency task force is now in the process of updating and revising the requirements for States and local governments, and Commerce regulations published at 15 CFR 24 will be amended to accommodate these modifications.

369. COUNTERVAILING DUTIES

Significance: Regulatory Program

Legal Authority: 19 USC 1303; 19 USC 1671 et seq

CFR Citation: 19 CFR 355

Legal Deadline: None

Abstract: Current countervailing duty regulations will be revised to codify existing administrative practice with respect to the identification and measurement of subsidies. Revisions also will take into account statutory amendments made by the Omnibus Trade and Competitiveness Act of 1988. The revisions will improve administrative efficiency and will make the countervailing duty law more accessible to the public.

370. • LIMIT ON DUTY-FREE INSULAR WATCHES IN CALENDAR YEAR 1993

Legal Authority: 19 USC 1202, note

CFR Citation: 15 CFR 303

Legal Deadline: None

Abstract: This amendment to the watch duty regulations establishes the total quantity and respective shares of insular watches and watch movements which will be allowed to enter the United States free of duty during calendar year 1993. This amendment also removes two unnecessary provisions. Sections 303.10 and 303.14 are amended to remove the minimum average wage input per watch movement as a condition for duty-free treatment. Present minimum wage requirements and applicable minimum assembly requirements make this condition unnecessary. Also being removed is the provision in section 303.14 which required complete assembly in the territory of the setting mechanism and train assemblies for a watch to qualify for duty-free treatment. This provision is being removed so as not to discourage assembly operations which do, in fact, involve substantial labor input (e.g., chronographs).

DOC—ITA — **Final Rule Stage**

Abstract: Revisions to the current antidumping duty and countervailing duty regulations are needed in order to conform those regulations to certain statutory amendments made by the Omnibus Trade and Competitiveness Act of 1988. Those amendments deal with (1) downstream product monitoring; (2) consultations with the International Trade Commission on certain scope rulings; (3) procedures for administrative protective orders; (4) correction of ministerial errors; and (5) effective dates. The revisions will enable the Department to apply the new statutory provisions in an orderly and efficient basis.

374. REVISIONS TO SHORT SUPPLY REGULATIONS

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 771; 15 CFR 777; 15 CFR 799

Legal Deadline: None

Abstract: On July 12, 1985, the Export Administration Amendments Act of 1985 (PL 99-64) extended and amended the Export Administration Act of 1979 (50 USC app 2401, et seq.)(EAA). Certain changes were made to the Short Supply provisions of section 7 of the EAA. Accordingly, revision of the Short Supply provisions (15 CFR 777) and related licensing requirements (15 CFR 771 and 799) of the Export Administration Regulations (15 CFR 730-799) is necessary. An interim final rule was issued which included (1) elimination of the validated licensing requirement for exports of refined petroleum products so as to permit their export with certain restrictions under a general license; (2) a new definition of "crude oil" for purposes of the regulation; and (3) certain technical and housekeeping changes. There are no costs associated with this action which would promote the export of decontrolled products.

375. DEFENSE PRIORITIES AND ALLOCATIONS SYSTEM (DPAS)

Legal Authority: 50 USC app 2061 et seq; 50 USC app 468; EO 10480; EO 12148; EO 12742

CFR Citation: 15 CFR 700

Legal Deadline: None

Abstract: The Defense Priorities and Allocations System (DPAS) implements the priorities and allocations authority of title I of the Defense Production Act of 1950, as amended, and the priorities authority of section 18 of the Selective Service Act of 1948. The DPAS was published as a final rule on July 30, 1984. Based on the findings and recommendations of an interagency sponsored study concerning the controlled materials program, and comments from both defense agency and industry users, this proposed rule would amend the DPAS to remove the controlled materials provisions and make certain revisions to its procedural requirements. These amendments will have no costs associated with them, would reduce the regulatory and information reporting burden on industry and make the DPAS more effective and efficient, and would result in cost savings for defense contractors.

376. REVISION OF FOREIGN BOYCOTT PROVISIONS OF EXPORT ADMINISTRATION REGULATIONS

Legal Authority: 50 USC 1701 et seq; 50 USC app 2401 et seq; EO 12002; EO 12058; EO 12214; EO 12730; EO 12735

CFR Citation: 15 CFR 769

Legal Deadline: None

Abstract: The Department proposes to revise the foreign boycott provisions of the Export Administration Regulations. The revisions would clarify the application of: (1) the intent provision to the reporting requirement; (2) the jurisdictional requirements relating to the implementation of letters of credit; (3) the furnishing information prohibitions to information about the nationality of directors and about blacklisted persons; (4) the shipping requirement exception to refusals to use blacklisted vessels; and (5) the import and shipping document exception to information about the nationality of carriers and residence of manufacturers or suppliers. The revisions are intended to clarify areas of confusion. In addition, the proposal would remove many references and provisions dealing with effective dates and grace periods that are no longer applicable.

CFR Citation: 15 CFR 768 to 799

Legal Deadline: None

Abstract: The Bureau of Export Administration is amending the Export Administration Regulations to convert units of weight and measure to the metric system. This brings BXA into compliance with the 1988 Omnibus Trade and Competitiveness Act, which amends the Metric Conversion Act of 1975 to authorize the conversion of the weights and measures of "all U.S. trade and commerce" and all Federal agencies to the metric system. It also reflects the current situation of international trade, which is conducted almost exclusively in the metric system. Much of this was accomplished by the publications of the Core list in the fall of 1991.

378. TRANSFER OF DUAL USE ITEMS FROM U.S. MUNITIONS LIST TO COMMODITY CONTROL LIST

Significance: Regulatory Program

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 799.1

Legal Deadline: None

Abstract: The COCOM Industrial List (IL) controls so-called dual-use items, which have both civil and military uses. There is not a direct correspondence between the IL and BXA's Commodity Control List (CCL) because some IL items are controlled by the State Department in the U.S. munitions list.

In his November 15, 1990 memorandum of disapproval of H.R. 4653 the President determined that, "By June 1, 1991, the United States will remove from the U.S. munitions list all items contained on the COCOM dual-use list unless significant U.S. national security interests would be jeopardized." This rule will implement BXA controls through the CCL on those items removed from the U.S. munitions list as a result of the President's decision.

379. EXPANSION OF FOREIGN POLICY CONTROLS ON CHEMICAL WEAPON PRECURSORS

Significance: Agency Priority

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 776; 15 CFR 799

Legal Deadline: None

Abstract: In support of U.S. policies opposing the proliferation and use of chemical weapons the Department expanded foreign policy controls on the export of certain chemical precursors (i.e., chemicals that can be used in the manufacture of chemical weapons). On March 13, 1991 (56 FR 10756), the Department expanded the number of countries for which a validated license is required for 39 precursor chemicals. These chemicals require a validated license for export to all destinations, except countries participating in the Australia group. On December 18, 1992 (57 FR 60122), the Department imposed the same validated export license requirements on 4 additional precursor chemicals.

380. • SPECIAL LICENSE PROCEDURES; REVISIONS TO THE ELIGIBILITY REQUIREMENTS FOR COMPUTERS

Legal Authority: 18 USC 2510 et seq; 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 50 USC app 2401 et seq; EO 12002; EO 12214; EO 12058; EO 12730; EO 12735

CFR Citation: 15 CFR 773; 15 CFR 778

Legal Deadline: None

Abstract: The Distribution License (DL) is a special license issued to approximately 100 exporters, allowing exports of pre-approved goods to pre-approved consignees without regard for quantity or value. This procedure allows firms that are willing to adopt rigorous control regimes to supply their regular customers without the burden of repetitively applying for export licenses. The Distribution License places limits on the export of computers (one of the main products shipped under the Distribution License) which may vary with the destination. On May 1, 1992, the Bureau of Export Administration published a rule (57 FR 18815) that expanded substantially the ability of Distribution License holders to export computers, to the extent that supercomputers may now be exported to 12 countries. To further implement the President's directive to revise eligibility level thresholds under the Distribution License, this rule raises the computer levels that may be exported under the DL to most countries listed in Supplement No. 3 to part 773 of the Export Administration Regulations, with more modest increases for certain other destinations.

CFR Citation: 15 CFR 771; 15 CFR 785; 15 CFR 786; 15 CFR 799

Legal Deadline: None

Abstract: This final rule amends the Commerce Control List (CCL) by adding a number of Advisory Notes that provide administrative exceptions treatment or favorable consideration treatment for exports to Country Group W (Czechoslovakia and Poland). These Advisory Notes significantly increase the number of items eligible for such treatment to these countries. This rule also expands the administrative exceptions treatment for the People's Republic of China. This rule adds new administrative exceptions procedures for the export of certain Category 5 Telecommunications items to Country Groups QWY. In addition this rule makes various revisions, certifications, and corrections to the CCL. Finally, this rule revises the instructions for completing the Shipper's Export Declaration (SED) by requiring exporters to designate the Export Control Classification Number on the SED when shipping under General Licenses GFW, GCT, and GLR.

CFR Citation: 15 CFR 776

Legal Deadline: None

Abstract: In accordance with section 5(a)(A) of the EAA, as amended by the 1988 Trade Act, this rule revises section 776.12 of the EAR to reduce export and reexport controls on U.S.-origin parts and components incorporated in foreign-made products. Under section 776.12 prior authorization is not required when U.S.-origin content comprises 25 percent or less and the foreign-made product is exported to a country listed in Supplements 2 and 3 to Part 773, i.e., countries cooperating in nuclear non-proliferation policy. This interim rule revises section 776.12 to apply the 25 percent exemption to all destinations, except the embargoed countries. The 10 percent exemption, but not the dollar value limitation, is continued for these proscribed destinations. The rule also exempts from control foreign-made products incorporating U.S.-origin content consisting of low level technology specifically designated on the Commodity Control List.

387. SHIPPER'S EXPORT DECLARATION: COMBINING GENERAL LICENSE AND VALIDATED LICENSE ON THE SAME SED

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 786

Legal Deadline: None

Abstract: Section 786.3(h) of the Export Administration Regulations contains certain requirements for listing commodities on the Shipper's Export Declaration (SED). Previously, section 786.3(h)(1) contained a general prohibition against combining general license commodities with validated license commodities on the same SED. This interim rule will amend section 786.3(h) to permit general license commodities and validated license commodities to be listed on the SED. The rule also will revise section 786.3(h) to clarify that the commodities that may be listed on the same SED must be included in one shipment on board a single carrier and must be from the same exporter to the same consignee.

388. REVISION OF GENERAL LICENSE GIFT

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 771

Legal Deadline: None

Abstract: The Bureau of Export Administration is revising section 771.18 of the Export Administration Regulations (15 CFR parts 768-799), which contains provisions on the applicability of General License GIFT for exports from the United States. General License GIFT authorizes export of parcels from U.S. individuals or charitable organizations overseas. General License GIFT is modified to allow no more than one gift parcel from the same donor to the same donee in any one month. Currently, one parcel may be shipped each week. This change is intended to assure that the license is utilized in conformity with its intended purpose, namely the donative provision of gifts between individuals. Specific authorization to exceed this limit may be granted on a case-by-case basis to meet compelling humanitarian concerns (e.g., gifts of medicine to relatives). The Bureau of Export Administration will grant case-by-case exemptions through issuance of a validated license. For clarity, new text is added on appropriateness of items as gifts.

389. CHANGE IN REPORTING REQUIREMENTS FOR THE SPECIAL LICENSES

Legal Authority: 18 USC 2510 et seq; 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 50 USC app 2401 et seq; EO 12002; EO 12058; EO 12214; EO 12730; EO 12735; EO 12769

CFR Citation: 15 CFR 773

Legal Deadline: None

Abstract: This rule amends the EAR to remove requirements that exporters submit certain documents to BXA with their license applications or concerning their exports under bulk licenses. Instead, exporters will be required to retain the documents in their files for five years. The current retention period is two years. The changes facilitate the EAR provisions governing electronic submission of license applications.

391. IMPLEMENTATION OF COCOM CORE LIST

Significance: Regulatory Program

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 799.1, supp 1

Legal Deadline: None

Abstract: The Commodity Control List is based on the Multinational Industrial List, agreed to by the 17 member nations of the Coordinating Committee (COCOM). COCOM has agreed to replace the Industrial List with a totally new "Core List." The Core List will be arranged and numbered differently. Since the CCL is now based on the Industrial List Numbering System, the entire CCL will have to be reformatted to adapt to the new system. The new list incorporates format changes to make it easier to use. While exporters will have to make major changes in their systems to adjust to a totally new control list, they should also benefit from a tighter, more specific list and an improved format that will simplify the process of determining export controls on their products.

Legal Deadline: None

Abstract: The Department is amending the EAR in support of U.S. nonproliferation policies. This interim rule imposes foreign policy controls on certain exports by providing authority to deny most items already requiring a validated license where the export could be destined for the design, development, production, or use of missiles or chemical or biological weapons, or for a facility engaged in such activities. The rule also imposes foreign policy controls on exports to specified destinations, where the exporter knows the item may be related to such purposes or be destined to such sites. The rule also restricts related activities of U.S. persons or their activities at certain sites and groups regulations relating to weapons proliferation in newly designated part 778.

CFR Citation: 15 CFR 770; 15 CFR 776; 15 CFR 778; 15 CFR 799

Legal Deadline: None

Abstract: In support of U.S. policies opposing the proliferation and prohibited use of chemical and biological weapons, the Department imposed foreign policy controls on exports of certain dual-use equipment that can be used to produce: 1) chemicals or biological agents controlled by certain ECCNs; 2) chemical or biological agents controlled under the International Traffic in Arms Regulations. The Department also imposed foreign policy controls on technical data for the production of such equipment. A further interim rule revised the equipment controls and established a positive list of biological substances subject to control.

395. REVISIONS TO THE DISTRIBUTION LICENSE PROCEDURE

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7420; 10 USC 7430(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139a; 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466c; EO 11912; EO 12058; EO 12730; EO 12735; ...

CFR Citation: 15 CFR 773 supplement 1; 15 CFR 799 supplement 2

Legal Deadline: None

Abstract: The Distribution License is a Special License issued to about 150 exporters, allowing exports of pre-approved goods to pre-approved consignees without regard for quantity or value. This procedure allows firms that are willing to adopt rigorous control regimes to supply their regular customers without the burden of repetitively applying for export licenses. The Distribution License places limits on the levels of computers (one of the main products shipped under the Distribution License), which vary with the destination. With advances in computer technology, the levels allowed had begun to restrict use of the Distribution License and hamper the competitiveness of license holders. BXA consulted other concerned agencies to determine the appropriate levels of computer performance, consistent with advances in technology and concerns for national security and nonproliferation. On May 1, 1992, BXA published a rule that expanded substantially the ability of Distribution License holders to export computers, to the extent that supercomputers are now eligible for 12 countries.

404. • ADVANCED TECHNOLOGY PROGRAM

Legal Authority: PL 102-245

CFR Citation: 15 CFR 295

Legal Deadline: None

Abstract: The American Technology Preeminence Act of 1992 (Public Law 102-245), made changes in the legal authority for the Advanced Technology Program that must be incorporated into the ATP program procedures. Changes address: (1) participation by foreign companies in ATP; (2) the establishment of a patent policy different from the governmentwide policy set out by the Bayh-Dole Act; and (3) a new requirement that "joint research and development ventures" be industry-led. Further, requirements for royalty-sharing by ATP recipients with the Federal government for inventions funded under ATP have been repealed by the Act, and are thus to be removed from the regulations. Similarly, ATP authority to provide direct funding to independent research organizations has been repealed, and appropriate revisions to the regulations are needed. Also, changes not required by the Act will be proposed, including changes to simplify and clarify the selection criteria and to streamline the internal operations of ATP, including the selection process.

405. • NATIONAL VOLUNTARY CONFORMITY ASSESSMENT SYSTEMS EVALUATION

Legal Authority: 15 USC 271 et seq

CFR Citation: 15 CFR 286

Legal Deadline: None

Abstract: The National Institute of Standards and Technology (NIST) will propose to establish the National Voluntary Conformity Assessment System Evaluation (NVCASE) Program. The program will enable the Department of Commerce, acting through NIST, to evaluate and recognize competently conducted conformity assessment activities. The results of NIST evaluations will provide a basis for the U.S. Government to assure foreign governments that qualified conformity assessment bodies are competent to satisfy their regulatory requirements. The program is complementary to those of other Federal agencies and is intended, together with those programs, to provide the basis for U.S. Government negotiations with foreign governments to gain their recognition of U.S.-based conformity assessment bodies as providing results acceptable for regulatory purposes. The program is intended to cover organizations engaged in product sample testing, product certification, and quality system registration and, most especially, their accreditors. NIST will offer its evaluations, based on publicly developed requirements, on a fee-for-service basis and will provide those meeting the requirements (cont)

408. FASTENER QUALITY

Significance: Regulatory Program

Legal Authority: PL 101-592

CFR Citation: 15 CFR 280

Legal Deadline: NPRM, Statutory, May 15, 1991.

Abstract: This rule will implement the Fastener Quality Act. In 1990, Congress enacted the Fastener Quality Act (the Act) to protect public safety, deter introduction of nonconforming fasteners into commerce, improve traceability of fasteners used in critical applications, and provide customers with greater assurance that fasteners meet stated specifications. The Act requires that certain fasteners sold in commerce conform to the specifications to which they are represented to be manufactured; provides for accreditation of laboratories engaged in fastener testing; and requires the inspection, testing, and certification (in accordance with standardized methods) of fasteners used in critical applications.

409. REVISION OF FIPS 128, COMPUTER GRAPHICS METAFILE (CGM)

Legal Authority: PL 100-235

CFR Citation: None

Legal Deadline: None

Abstract: This revised FIPS will adopt the redesignated version of the CGM standard, known as ANSI/ISO 8632.1-4:1991, and add a requirement for the use of profiles. A profile defines the options, elements, and parameters of ANSI/ISO 8632 necessary to accomplish a particular function and to maximize the probability of interchange between systems implementing the profile. The revised FIPS will also adopt MIL-D-28003, Computer-Aided Acquisition and Logistics Support (CALS), as the first CGM Application Profile.

427. USE OF INFORMATION COLLECTED BY VOLUNTARY FISHERY DATA COLLECTORS IN ENFORCEMENT PROCEEDINGS

Legal Authority: 16 USC 1853(f)

CFR Citation: 15 CFR 904; 50 CFR 11; 50 CFR 12

Legal Deadline: None

Abstract: Problem: The National Marine Fisheries Service requires scientific data about the state of various fisheries in order to provide better management. In the past, much of this data has been collected by voluntary fishery data collectors placed aboard private vessels by NMFS. Owners and operators of these vessels have expressed concern that information collected by these voluntary fishery data collectors might be used against them in a subsequent enforcement proceeding, thereby affecting their willingness to take on these collectors. Solution: The newly enacted statute "restricts" the use of data obtained by voluntary fishery data collectors in subsequent enforcement proceedings brought pursuant to the Magnuson Fishery Conservation and Management Act, 16 USC 1801, the Marine Mammal Protection Act, 16 USC 1361, and the Endangered Species Act, 16 USC 1531.

434. REVISED REGULATIONS GOVERNING PERMITS FOR THE TAKING AND IMPORTING OF MARINE MAMMALS FOR SCIENTIFIC RESEARCH AND PUBLIC DISPLAY

Legal Authority: 16 USC 1361 et seq, Marine Mammal Protection Act; 16 USC 1531 et seq, Endangered Species Act; 16 USC 1151 et seq, Fur Seal Act

CFR Citation: 50 CFR 216; 50 CFR 215; 50 CFR 222

Legal Deadline: None

Abstract: The National Marine Fisheries Service has recently concluded the first comprehensive examination of its permit program for scientific research and public display since passage of the Marine Mammal Protection Act of 1972 and Endangered Species Act of 1973 and the issuance of permit regulations in 1974 (50 CFR 216 and 222). The review encompassed all aspects of permit program policy, procedures, and management concerning protected species (i.e., marine mammals and endangered or threatened species) under the authority of the Marine Mammal Protection Act, the Endangered Species Act, and the Fur Seal Act. The National Marine Fisheries Service will issue proposed revised regulations governing permits for the taking, import, export, or conduct of an otherwise prohibited activity involving protected species for purposes of scientific research, public display, or enhancement.

435. REGULATIONS GOVERNING THE TAKE OF DOLPHINS INCIDENTAL TO REMOVING OIL AND GAS PLATFORMS IN THE GULF OF MEXICO

Legal Authority: 16 USC 1371(a)(5); 16 USC 1361 et seq

CFR Citation: 50 CFR 228

Legal Deadline: None

Abstract: NMFS has received an amended request from the American Petroleum Institute for the take of bottlenose and spotted dolphins incidental to the removal of oil and gas platforms in the Gulf of Mexico. This activity would be allowed under Section 101(a)(5) of the Marine Mammal Protection Act if the Service makes certain findings and if regulations are issued that cover monitoring and reporting.

436. AMENDMENT 5 TO THE FISHERY MANAGEMENT PLAN FOR THE NORTHEAST MULTISPECIES FISHERY

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 651

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the New England Fishery Management Council.

Abstract: Amendment 5 to the Northeast Multispecies Fishery Management Plan will establish significantly tighter effort controls to allow rebuilding of groundfish stocks, especially cod, haddock, and yellowtail flounder. It will also address the percent maximum spawning potential targets established by the FMP as defining overfishing. The timeframe and rebuilding strategy to achieve targets will be established by Amendment 5. Emphasis will be on an overall reduction in fishing effort.

437. PROCEDURE FOR SETTING QUOTAS ON REMOVAL OF ATLANTIC BOTTLENOSE DOLPHINS FROM THE WATERS OF THE GULF OF MEXICO AND FLORIDA'S EAST COAST

Legal Authority: 16 USC 1361

CFR Citation: 50 CFR 216

Legal Deadline: None

Abstract: Regulations will establish a procedure for setting and revising quotas to govern the removal of Atlantic bottlenose dolphins (Tursiops truncatus) from the Gulf of Mexico and Florida's east coast. Regulations will be supported by an EIS that will provide a comprehensive review of the status of stocks of bottlenose dolphins in the southeast region and the validity of the 2 percent rule for determining the allowable take to the extent reliable data are available. These regulations and quotas will take into account other types of taking such as those that may occur incidentally to commercial fisheries.

438. REGULATORY AMENDMENT-STANDARD PRODUCT RECOVERY RATES FOR ALASKA GROUNDFISH AND LIMITATIONS ON PROPORTIONS OF RETAINED POLLOCK ROE

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 672; 50 CFR 675

Legal Deadline: None

Abstract: Product recovery rates are used to calculate weights of whole groundfish from weights of finished product. These product recovery rates will be published in the Federal Register for public comment. This action also proposes a reduction in the amount of pollock roe that may be retained on board a vessel.

440. FISHERY MANAGEMENT PLAN FOR THE SHRIMP FISHERY OF THE SOUTH ATLANTIC

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq, Magnuson Fishery Conservation & Mgmt. Act

CFR Citation: 50 CFR 658

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the fishery management council.

Abstract: This FMP will establish objectives and management measures to manage and conserve the white shrimp resource in the EEZ off the South Atlantic coast. The FMP would allow individual States to request concurrent shrimping closures in adjacent Federal waters, following severe winter mortality of white shrimp. Other measures being considered include a 25-nautical-mile buffer zone inside which no shrimp trawling, including for rock shrimp, would be allowed during a closure; a prohibition on possession of pink and brown shrimp in the closed portion of the EEZ during a white shrimp closure, and the allowance of possession of royal red shrimp and rock shrimp during a closure.

442. CERTIFICATE OF LEGAL ORIGIN FOR ANADROMOUS FISH PRODUCTS

Legal Authority: PL 101-627, Sec 801; Fishery Conservation Amendments of 1990

CFR Citation: 50 CFR 247

Legal Deadline: Final, Statutory, May 27, 1991.
Final regulations are required by PL 101-627, Section 801(d) within 180 days of November 28, 1990, provided an agreement is in place with another country under section 801(a) of PL 101-627.

Abstract: The regulation will provide for the issuance of Certificates of Legal Origin for anadromous fish and anadromous fish products legally harvested by vessels of the United States. The certificates will be issued pursuant to agreements between the United States and other countries negotiated under section 801(a) of PL 101-627.

443. AMENDMENT 11 TO THE FMP FOR COMMERCIAL AND RECREATIONAL SALMON FISHERIES OFF THE COAST OF WASHINGTON, OREGON, AND CALIFORNIA

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq, Magnuson Fishery Conservation & Mgmt. Act

CFR Citation: 50 CFR 661

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the fishery management council.

Abstract: Amendment 11 will do one or more of the following: (1) Establish a permanent recreational subarea and allocation between Cape Alava and Queets River, Washington; (2) provide flexibility in preseason recreational coho harvest distributions north of Cape Falcon, Oregon (primarily between the Westport and Columbia River subareas); and (3) establish independent management of the Columbia River subarea.

444. SECRETARIAL AMENDMENT TO THE FMP FOR ATLANTIC SWORDFISH

Significance: Regulatory Program

VOL 58 ISS 78 AP 26 1993 UMI

Legal Authority: 16 USC 1801 et seq. Magnuson Fishery Conservation & Mgmt. Act

CFR Citation: 50 CFR 630

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after beginning of review

Abstract: PL 101-627 (signed into law November 7, 1990) transferred full responsibility for the management of swordfish, including preparation of fishery management plans and amendments, from the regional fishery management councils to the Secretary of Commerce. The Secretary will prepare an amendment to the FMP for Atlantic swordfish that will reduce fishing mortality, prevent overfishing, rebuild an overexploited resource, and be consistent with conservation measures recommended by the International Commission for the Conservation of Atlantic Tunas. The existing FMP management measures remain in effect until superseded by Secretarial actions

446. AMENDMENT 2 TO THE FISHERY MANAGEMENT PLAN FOR THE SUMMER FLOUNDER FISHERY

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 625

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the fishery management council.

Abstract: This amendment would address overfishing by: (1) expanding permit and reporting requirements; (2) implementing quota management measures; (3) modifying size limits, bag limits, and mesh-size requirements; (4) initiating framework measures in the recreational fishery; (5) imposing a prohibition on the sale of summer flounder caught in the recreational fishery; and (6) authorizing application fee collection for vessel and dealer permits. This amendment also contains conservation measures designed to protect threatened and endangered sea turtles incidentally caught in the summer flounder trawl fishery. Two provisions in the amendment were disapproved and are being resubmitted as revised. Federal permits required under the FMP would be conditioned with restriction that the vessel may not land summer flounder in a State whose quota has been reached.

447. AMENDMENT 7 TO THE FISHERY MANAGEMENT PLAN FOR THE PELAGIC FISHERIES OF THE WESTERN PACIFIC REGION

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 685

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the fishery management council

Abstract: This amendment will replace an existing moratorium on new entry into the longline fishery based in Hawaii. The amendment may include a new limited entry program for the Hawaii-based longline fishery, a requirement that longline vessels carry automated vessel monitoring equipment, authority for the NMFS Regional Director to require longline vessels to carry observers to collect scientific data, and permit and reporting requirements for other tuna and billfish fishing vessels in the EEZ.

448. GENERAL PROVISIONS FOR DOMESTIC FISHERIES

Legal Authority: 16 USC 1801-81 Magnuson Act

CFR Citation: 50 CFR 620

Legal Deadline: None

Abstract: The amendments to the Magnuson Act of November 14, 1990, added several new prohibitions such as the ban on large-scale driftnet fishing and the prohibition on assaulting observers. The regulations at 50 CFR 620 contain the prohibitions that apply generally to domestic fishing regulated under the Magnuson Act. The regulations must be amended to reflect the recent amendments to the Magnuson Act and to update and improve current language generally. The alternative would be to leave the regulatory language as it is now. This would be unacceptable because it would leave the regulation out of date and inconsistent with the current statutory language. The benefits would be to improve the current regulations and to clarify the scope of the new statutory language. There are no potential costs identified.

454. SEA TURTLE CONSERVATION MEASURES FOR THE SUMMER FLOUNDER FISHERY

Significance: Agency Priority

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 217; 50 CFR 227

Legal Deadline: None

Abstract: NMFS proposes to protect sea turtles through the implementation of sea turtle conservation measures on the summer flounder fishery. Between November 26, 1990, and December 7, 1990, 54 sea turtles were stranded on North Carolina beaches. The North Carolina Division of Marine Fisheries closed State waters to summer flounder bottom trawling, which was implicated in the strandings from Cape Hatteras Light to Ocracoke Inlet on December 7, 1990. On December 26, 1990, waters were opened to trawlers pulling experimental turtle excluder devices (TEDs) until early January, at which time turtles were no longer encountered in North Carolina waters and fishing without TEDs was allowed. Because of new information collected during the 1990 stranding events, a section 7 consultation was reinitiated and resulted in a finding that the unrestricted operation of the fishery jeopardizes the continued existence of the endangered sea turtles. Currently, sea turtles are protected by an emergency regulatory action authorized by 50 CFR 227.72(e)(6) through the 1992-1993 fishing season.

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the fishery management council.

Abstract: The amendments establish a moratorium on the entry of new vessels into the groundfish, crab, and halibut fisheries. The objective of the moratorium is to control continued growth in fishing capacity while alternative management measures to address the overcapacity problem are developed.

459. SEAFOOD INSPECTION

Significance: Regulatory Program

Legal Authority: 7 USC 1621 to 1632; 16 USC 742a to 742j

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The Food and Drug Administration and NOAA are developing a voluntary, fee-for-service seafood inspection program to be operated by both agencies. The agencies are developing and operating the program in four phases (domestic finfish and shellfish processors, retail, foreign products and molluscan shellfish). Each of these phases is being developed in cooperation with the industry and includes pilot testing before formal implementation.

460. SEA TURTLE MONITORING AND CONSERVATION MEASURES FOR NONSHRIMP TRAWLERS

Significance: Agency Priority

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 217; 50 CFR 222; 50 CFR 227

Legal Deadline: None

Abstract: All sea turtles that occur in U.S. waters are listed as either endangered or threatened under the Endangered Species Act of 1973. The shrimp industry in the southeast region of the United States is by far the leading cause of human-induced mortality to sea turtles in the water. A recent study by the National Academy of Sciences concluded that nonshrimp fisheries constitute the second largest source of mortality of juvenile to adult sea turtles. NMFS is soliciting public comment and information on nonshrimp fisheries for which sea turtle conservation measures are needed and on appropriate monitoring and conservation measures that shall be imposed to protect sea turtles.

478. REGULATORY AMENDMENT TO THE FMP FOR GROUNDFISH OF THE BSAI TO DELAY THE POLLOCK NON-ROE SEASON

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 675

Legal Deadline: None

Abstract: This amendment would delay the opening date for the pollock non-roe ("B") season in the Bering Sea and Aleutian Islands Area. The delay would be from June 1 to August 15 due to shortened fishing seasons to allow fish to mature or recover from the spawning season. The intent is to delay the second pollock fishing season to allow harvest of pollock when the product recovery rate and associated value are at an optimum.

485. • PROPOSED RULE TO REQUIRE CERTAIN FISH FROM MEXICO TO RETAIN HEADS AND TAILS INTACT IN ORDER TO PROTECT THE ENDANGERED TOTOABA

Legal Authority: 16 USC 1531 et seq. Endangered Species Act

CFR Citation: 50 CFR 227

Legal Deadline: None

Abstract: In response to a petition, the National Marine Fisheries Service is proposing to regulate the importation of certain fish from Mexico by requiring those fish to be imported with heads and tails intact. This action is being proposed in order to prevent the illegal importation of totoaba, an endangered sciaenid fish, which when in fillet form is indistinguishable from the other species. Preliminarily, NMFS has determined that this rule, if promulgated, will have a minimal economic impact on importers, as major importers require fish imports to retain heads in order to determine freshness.

486. • REGULATORY AMENDMENT—NORTHEAST REGION GENERAL FISHERIES PERMIT AND REPORTING PROCEDURES

Legal Authority: 16 USC 971 et seq; 16 USC 1801 et seq

CFR Citation: 50 CFR 285; 50 CFR 622; 50 CFR 625; 50 CFR 628; 50 CFR 649 to 652; 50 CFR 655

Legal Deadline: None

Abstract: This action would consolidate provisions pertaining to permit-related activities for fisheries in the Northeast Region, NMFS. Fisheries impacted include Atlantic bluefin tuna, summer flounder, bluefish, American lobster, Atlantic sea scallops, Northeast multispecies groundfish, Atlantic surf clams and ocean quahogs, and Atlantic mackerel, squid, and butterfish. This rule would also authorize fees to be collected as a requirement for fishing permits. The intent is to ensure more consistency and eliminate redundancy between permit-related activities of the fisheries of the northeast region.

487. • PROPOSED RULE TO DESIGNATE CRITICAL HABITAT FOR STELLER SEA LIONS

Legal Authority: 16 USC 1531 et seq. Endangered Species Act

CFR Citation: 50 CFR 227

Legal Deadline: Final, Statutory, November 26, 1991.
Due 1 year after listing date; NMFS received an intent to sue notice on 11/3/92.

Abstract: The National Marine Fisheries Service is proposing to designate critical habitat for the Steller sea lion (northern) pursuant to the Endangered Species Act. The proposed critical habitat includes: (1) all rookeries and major haulouts sites within U.S. borders; (2) a 20-nautical-mile zone proximal to the Gulf of Alaska and Bering Sea - Aleutian Island rookeries and major haulouts west of 144 degrees W longitude; and (3) foraging habitat within the core of the sea lion's range.

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 640

Legal Deadline: None

Abstract: This amendment will conform the two-day sport fishing season to changes recently made by the State of Florida. The amendment would: (1) change the current season from the weekend to the last consecutive Wednesday and Thursday in July of each year; (2) limit the harvesting methods to diving and the use of bully nets; (3) set the daily bag limit of 12 lobsters per person for a two-day possession limit of 24 lobsters on shore for counties other than Monroe County, Florida; and (4) prohibit night diving off Monroe County, Florida. The amendment would also change the Federal sport season language to indicate that the Federal sport season and associated bag limits reflect State regulations.

506. • PACIFIC COAST GROUNDFISH FISHERY: RESTRICTION OF FISHING OPERATIONS IN THE PACIFIC WHITING FISHERY TO PROTECT SALMON OFF THE COASTS OF WASHINGTON, OREGON, AND CALIFORNIA

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: This rule will restrict fishing operations in the Pacific whiting fishery to minimize the impact of the Pacific whiting fishery on Pacific salmon stocks. The rule will be issued under authority of proposed Amendment 7 to the Pacific Coast Groundfish Fishery Management Plan. Restrictions on fishing operations to minimize the bycatch of Pacific salmon are necessary because many Pacific salmon stocks appear to be at record low levels, and some stocks may not meet escapement goals even in the absence of any commercial or recreational salmon harvest. This rule will also change the yearly start of the regular season in the Eureka subarea south of the Oregon border from April 15 to March 1 to allow small-scale harvest of whiting when the fish are in that area.

516. • NATIONAL MARINE SANCTUARY PROGRAM, SITE EVALUATION LIST

Legal Authority: 16 USC 1431 to 1434

CFR Citation: 15 CFR 922

Legal Deadline: None

Abstract: NOAA plans to amend the National Marine Sanctuary Program regulations which implement the Site Evaluation List development process. NOAA will integrate the procedures and criteria for identifying, evaluating, and selecting sites of special historical significance with the procedures and criteria for identifying, evaluating, selecting, and ranking sites of special natural resource significance. The purpose of integrating the two processes is to develop a single, comprehensive SEL which will include sites of both natural resource and historical, cultural, and human use value.

517. LICENSING OF PRIVATE REMOTE-SENSING SPACE SYSTEMS

Legal Authority: 15 USC 4244; PL 102-555

CFR Citation: 15 CFR 960

Legal Deadline: None

Abstract: Pub. L. 102-555 amends the Land Remote Sensing Commercialization Act of 1984 to transfer the LANDSAT program from the Department of Commerce to a joint NASA/DOD office. However, title II retains the basic provisions of title IV of the previous act authorizing the Secretary of Commerce to license private operators of land remote sensing space systems who are subject to U.S. jurisdiction. The Secretary is required to consult with the Secretaries of Defense and State, who are responsible for determining conditions to protect national security and foreign policy concerns, respectively. The recent Act removes a regulatory restriction which required operators to make the data available to all customers on the same terms and conditions.

518. NATURAL RESOURCE DAMAGE ASSESSMENT AND RESTORATION REGULATIONS

Significance: Regulatory Program

Legal Authority: 33 USC 2706

CFR Citation: Not yet determined

Legal Deadline: Final, Statutory, August 18, 1992. Other, Statutory. Congress required the regulations to be promulgated no later than two years following the enactment of the Oil Pollution Act.

Abstract: In section 1006(e) of the Oil Pollution Act, Congress specified that the Federal Government, through NOAA, take the lead in developing natural resource damage assessment regulations. A Federal approach will provide a consistent, uniform set of procedures specifically for use in oil spills. These procedures will be aveilable to State, Indian, and foreign natural resource trustees. A single Federal solution will be more cost effective than having the individual States develop separate methodologies. It is expected that trustees will use the procedures contained in the regulations because any determination or assessment of damages made in accordance with the regulations shall have the force and effect of a rebuttable presumption on behalf of the trustee in an administrative or judicial proceeding under the Oil Pollution Act.

519. MODERNIZATION OF THE NATIONAL WEATHER SERVICE

Legal Authority: PL 102-567

CFR Citation: 15 CFR 946

Legal Deadline: None

Abstract: Pub. L. 102-567, enacted on October 29, 1992, and not yet codified, establishes a process to guide the transition of the Weather Service from its current structure of approximately 250 field offices with varying responsibilities to 115 offices with uniform responsibilities using modern radars (NEXRAD), automated surface observing systems, and communications and processing equipment. The Act directs the NWS to contract with National Research Council to assess the criteria for commissioning new observation systems, decommissioning old radars, evaluating staffing levels, and certifying that automating, consolidating, relocating, or closing a field office will not result in a degradation of services. The Act establishes the broad requirements for these certifications as well as a number of consultation requirements with the FAA and with a Modernization Transition Committee, created by the Act to advise on the modernization.

521. PROCESSED FISHERY PRODUCTS, PROCESSED PRODUCTS THEREOF & CERTAIN OTHER PROCESSED FOOD PRODUCTS: U.S. STANDARDS FOR GRADES OF FROZEN FISH BLOCKS & PRODUCTS MADE THEREFROM, ETC

Legal Authority: 7 USC 1621 to 1630 Agricultural Marketing Act of 1946

CFR Citation: 50 CFR 264A

Legal Deadline: None

Abstract: The revised rule will expand the coverage of established voluntary standards for grades of fishery products to include new products made from fish blocks. The standards will take into account new technology and equipment. These standards will be used in a voluntary program of fishery products inspection and certification by the NMFS. Industry has shown a high level of interest and support for the revisions.

522. U.S. GENERAL STANDARDS FOR GRADES OF SHRIMP

Legal Authority: 7 USC 1621 to 1630 Agricultural Marketing Act of 1946

CFR Citation: 50 CFR 265A

Legal Deadline: None

Abstract: The final rule will establish general quality grading standards for all non-breaded forms of fresh or frozen shrimp. These grading standards will provide for the systematic differentiation of the quality of shrimp into categories -- U.S. Grades A, B, and Substandard. The proposed standards will be applied to all commercial species of fresh or frozen shrimp in raw or cooked states in all non-breaded market forms. The adoption of grading standards is expected to facilitate trade in shrimp of all commercial species, as consumers will be able to select shrimp on the basis of identified quality.

Industry has shown great interest in and support for the standards.

523. ENDANGERED FISH AND WILDLIFE; APPROACHING HUMPBACK WHALES IN HAWAIIAN WATERS

Legal Authority: 16 USC 1382(a); 16 USC 1540(f)

CFR Citation: 50 CFR 222.31

Legal Deadline: None

Abstract: This rule will establish as regulation a previously published Notice of Interpretation regarding minimum distances that should be maintained in the presence of humpback whales in Hawaii. Establishing a 100-yard perimeter around any of the whales while in the Hawaiian Exclusive Zone as a regulation is considered necessary given a large increase in vessel traffic and other water use activities in areas where this species historically occurs. In response to comments received in the public record, NOAA is defining two specific sites as cow/calf areas in which an approach closer than 300 yards is prohibited. This addition creates a new subsection to the rule.

524. INTERIM EXEMPTION GOVERNING THE INCIDENTAL TAKING OF MARINE MAMMALS DURING COMMERCIAL FISHING OPERATIONS

Significance: Regulatory Program

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216; 50 CFR 229

Legal Deadline: NPRM, Statutory, March 23, 1989. Final, Statutory, July 21, 1989. Other, Statutory, January 20, 1989.
Other deadline is for ANPRM.

Abstract: 1988 Amendments to the Marine Mammal Protection Act direct the Secretary of Commerce to establish within 240 days, a 5-year program for exempting commercial fishing operations within the U.S. Exclusive Economic Zone from the Act's prohibition on taking marine mammals. The exemption will require registration of vessels with the National Marine Fisheries Service, reports on interactions with marine mammals, and taking Government observers if required. The amendments also require NMFS to publish annually a proposed and final List of Fisheries identifying fisheries which have either frequent, occasional or no interactions with marine mammals.

526. DEPLETION OF THE COASTAL-MIGRATORY STOCK OF BOTTLENOSE DOLPHINS IN THE U.S. MID-ATLANTIC

Significance: Agency Priority

Legal Authority: 16 USC 1361 et seq, Marine Mammal Protection Act; 16 USC 1383b

CFR Citation: 50 CFR 216.15

Legal Deadline: None

Abstract: Based on a review of the best available information on the status of the coastal-migratory stock of bottlenose dolphins in the U.S. Mid-Atlantic, the National Marine Fisheries Service (NOAA Fisheries) is considering the publication of a proposed rule designating this population stock as depleted under the Marine Mammal Protection Act (MMPA). This action is required by the MMPA when a species or population stock falls below its optimum sustainable population (OSP). If this population stock is designated as depleted, the MMPA requires the application of certain additional restrictions on taking and importation, and the preparation and implementation of a conservation plan to restore the stock to OSP. NOAA Fisheries is also requesting any additional scientific information on this action that may be available from interested parties, as required by the MMPA Amendments of 1988.

528. PROHIBITION OF THE USE OF EXPLOSIVES IN THE YELLOWFIN TUNA-DOLPHIN FISHERY

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216.24(d)(2)(vii)(E)

Legal Deadline: Final, Statutory, April 1, 1990.

Abstract: In 1988, Congress amended the Marine Mammal Protection Act to prohibit the use of explosive devices in tuna purse seine operations that involve marine mammals. An exception from this prohibition was that Class C explosive pest control devices, approved by the Department of Transportation, could continue to be used when marine mammals are present. An interim final rule in this regard was published in the Federal Register (54 FR 411) and became effective January 1, 1989. Continued unrestricted use of the Class C explosive pest control devices was made contingent upon the outcome of a study mandated by Congress and undertaken by NMFS. The MMPA requires the Secretary to prescribe regulations to prohibit or restrict the use of Class C explosives by April 1, 1990, unless the Secretary, based upon the study, determines "...that the use of such devices does not result in physical impairment or increased mortality of marine mammals." Such a study was conducted by NMFS and the results were reviewed by experts in a workshop. The workshop participants determined that physical injuries to dolphins were caused by Class C explosives (cont)

529. SECRETARIAL FISHERY MANAGEMENT PLAN FOR SHARKS OF THE ATLANTIC OCEAN

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq

DOC—NOAA

Final Rule Stage

CFR Citation: 50 CFR 678

Legal Deadline: NPRM, Statutory. NPRM 15 days after the beginning of a 60-day period for fishery management council's consideration and comment on the Secretarial Plan.

Abstract: The Secretarial Fishery Management Plan establishes a new management program intended to: (1) prevent overfishing of Atlantic Ocean sharks; (2) encourage management of sharks throughout their range; (3) establish a data collection, research and fishery monitoring program; (4) prohibit the practice of "finning"; and (5) optimize benefits and minimize wastes of shark resources. Proposed measures include: (1) annual commercial quotas; (2) recreational bag limits; (3) prohibition on "finning"; (4) commercial fishing permits; (5) prohibition on sale of recreational catch; (6) reporting of catch and effort information by commercial vessels and by those operating recreational fishing tournaments; (7) an annual fishing year beginning July 1 of each year; (8) a requirement for all fishermen to cut the fishing line for all sharks not taken as part of the quota or bag limit; and (9) commercial fishery closures after attainment of annual quotas.

532. APPROACHING MARINE MAMMALS

Legal Authority: 16 USC 1540(f); 16 USC 1361

CFR Citation: 50 CFR 216; 50 CFR 218, 50 CFR 222

Legal Deadline: None

Abstract: This rule will establish a minimum distance for approaches to marine mammals by humans, vessels, aircraft, and thrillcraft. These regulations are considered necessary because of increasing activities around marine mammals. Guidelines have not been effective in protecting marine mammals from these activities and from people who wish to view these animals too closely. An interim regulation regarding approaching humpback whales in Hawaii is working far better than previously used guidelines.

534. U.S. STANDARDS FOR GRADES OF FROZEN FISH PORTIONS

Legal Authority: 7 USC 1621 to 1630, Agricultural Marketing Act of 1946

CFR Citation: 50 CFR 264; 50 CFR 269

Legal Deadline: None

Abstract: The revised rule will expand coverage of established voluntary standards for grades of frozen fish portions. The standards will take into account new technology and equipment. These standards will be used in a voluntary program of fishery products inspection and certification by NMFS. Industry has shown a high level of interest and support for the revisions.

535. REGULATORY AMENDMENT TO IMPLEMENT PERMIT, REPORTING, AND RECORDKEEPING AND OBSERVER REQUIREMENTS FOR PROCESSING VESSELS OVER 125 FEET AND THEIR CATCHER VESSELS; PACIFIC COAST GROUNDFISH

Legal Authority: 16 USC 1801 et seq, Magnuson Fishery Conservation & Mgmt. Act

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: Regulations would implement a comprehensive data collection and regulatory program for all processing vessels longer than 125 feet and for all harvesting vessels that deliver their catch to those vessels in the groundfish fishery off Washington, Oregon, and California. This program would consist of: (1) a requirement that processing vessels carry NMFS-certified observers; (2) a requirement for a mandatory Federal permit; (3) recordkeeping and reporting requirements; and (4) a definition for "fishing trip" for processing vessels over 125 feet in length for the purpose of applying trip landing and frequency limits.

536. NONTRAWL SABLEFISH SEASON REGULATORY AMENDMENT UNDER THE PACIFIC COAST GROUNDFISH FMP

Legal Authority: 16 USC 1801 et seq, Magnuson Fishery Conservation & Mgmt. Act

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: This regulatory amendment would establish a flexible opening date for the regular season for the nontrawl sablefish fishery off Washington, Oregon, and California to correspond to 3 days before the opening of the Alaska fishery, with 72-hour closures both before and after the regular season.

538. REGULATORY AMENDMENT PROHIBITING LANDING OF SURF CLAMS AND OCEAN QUAHOGS ON THE SAME TRIP AND REQUIRING TRIP NOTIFICATION

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 652

Legal Deadline: None

Abstract: This regulatory amendment would prohibit the landing of surf clams and ocean quahogs on the same trip under the Mid-Atlantic Surf Clam and Ocean Quahog FMP. For individuals holding individual transferable quotas (ITQs) for both surf clams and ocean quahogs, mixing of the harvest of these species on the same trip may lead to misreporting of the catch and overrun of individual quotas The Regional Director would be authorized to require vessel operators to specify whether they intended to fish for surf clams or ocean quahogs on a specified trip. This amendment would also mandate certain trip notifications.

540. AMENDMENT 6 TO THE FISHERY MANAGEMENT PLAN FOR THE SHRIMP FISHERY OF THE GULF OF MEXICO

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq, Magnuson Fishery Conservation & Mgmt. Act

CFR Citation: 50 CFR 658

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the Regional Fishery Management Council.

Abstract: Amendment 6 would seasonally modify the boundary of the Tortugas shrimp sanctuary to reduce the area closed to trawl fishing. This action would enable fishermen to harvest marketable-sized shrimp during specified periods from 3 small areas that would otherwise be closed.

542. U.S. STANDARDS FOR GRADES OF WHOLE OR DRESSED FISH

Legal Authority: 7 USC 1621 to 1630

CFR Citation: 50 CFR 261

Legal Deadline: None

Abstract: NMFS is testing an alternative set of U.S. standards for grades of whole or dressed fish for use in NMFS's National Seafood Inspection Program. The test standards recognize advances made by industry in process controls. The test standards allow for evaluation of flavor, odor, and texture in the pre-processing state, evaluation of physical defects in the thawed/fresh state, and evaluation for dehydration in the frozen state. Products graded using the test standards will be allowed to make reference to applicable grades on the label of the product.

545. PROCESS FOR THE MANAGEMENT OF ATLANTIC OCEAN HIGHLY MIGRATORY SPECIES

Legal Authority: PL 101-627; 16 USC 1811; 16 USC 1854(f)(3)

CFR Citation: None

Legal Deadline: None

Abstract: An agency process for implementing provisions of the Fishery Conservation Amendments of 1990 (Pub. L. 101-627) concerning the management of highly migratory species in the Atlantic Ocean, Gulf of Mexico, and Caribbean Sea. NOAA will follow this process in preparing, amending, and implementing fishery management plans for Atlantic highly migratory species, including swordfish, billfishes, tunas, and oceanic sharks. The process identifies opportunities for involvement by the public, Regional Fishery Management Councils, and U.S. commissioners (and their advisers) to the International Commission for the Conservation of Atlantic Tunas.

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216; 50 CFR 247

Legal Deadline: None

Abstract: This rule will finalize the interim final rule implementing the Dolphin Protection Consumer Information Act. The interim final rule: (1) identified fish and fish products subject to importation requirements mandated by the Marine Mammal Protection Act, as amended by the DPC14; (2) specified the use and contents of a new NOAA form required to import into the United States certain fish and fish products potentially harvested with methods injurious to marine mammals; (3) required importers of certain fish and fish products harvested by nations that engage in high seas large-scale driftnet fishing to provide certification by a responsible government official of the harvesting nation that the items to be imported were not harvested with large-scale driftnets in certain areas of the high seas; and (4) regulated the use of labels suggesting that tuna products are "dolphin safe." This rule also implements portions of the High Seas Driftnet Fisheries Enforcement Act.

570. AMENDMENT 6 TO THE PACIFIC COAST GROUNDFISH FISHERY MANAGEMENT PLAN

Significance: Regulatory Program

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 611; 50 CFR 663

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the Pacific Fishery Management Council.

Abstract: Amendment 6 institutes a license limitation program ("limited entry") for the Pacific Coast groundfish fishery. Only vessels with trawl gear for groundfish, longlines, or traps (or pots) will be required to have limited entry permits to use the gear. Permits will be endorsed for specific gear and some may be transferable. Control dates for participation were previously established as July 11, 1984, through August 1, 1988. The license limitation program will limit or reduce harvest capacity. Full implementation of the license limitation program is not expected until January 1, 1994.

571. TAKING AND IMPORTING OF MARINE MAMMALS; PURSE SEINE SETS ON MARINE MAMMALS IN THE EASTERN TROPICAL PACIFIC

Significance: Agency Priority

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216.24(e)(5)(i)

Legal Deadline: None

Abstract: In 1988, Congress amended the Marine Mammal Protection Act to require that a harvesting nation must meet a two-part test to determine whether its marine mammal program is comparable to that of the United States before its yellowfin tuna and yellowfin tuna products are allowed to enter this country. These regulations provide specific criteria for issuing initial and subsequent findings to a harvesting nation which implements a prohibition against intentional purse seine sets on marine mammals by its vessels.

574. SEA TURTLE CONSERVATION; SHRIMP TRAWLING REQUIREMENTS

Legal Authority: 16 USC 1531 et seq

CFR Citation: 50 CFR 217; 50 CFR 227

Legal Deadline: None

Abstract: The National Marine Fisheries Service (NMFS) has determined that there is a need to enhance enforcement and compliance of the 1987 Sea Turtle Conservation Regulations (50 CFR parts 217, 222, and 227) to provide adequate protection to endangered and threatened sea turtles. In addition, NMFS has determined that there is a need to strengthen the conservation measures of these regulations. This is necessary because a significant number of shrimp fishermen are failing to properly use and operate qualified turtle excluder devices (TEDs) as specified in the 1987 regulations. Some commercial shrimp fishermen are altering, or otherwise modifying, the turtle escape openings of TEDs making them nonfunctional for turtle release. In addition, while implementation of the regulations has resulted in a reduction in the number of turtles killed, significant mortality continues during the months of the year when the conservation requirements are not in effect. The intended effect of these revisions is to reduce the mortality of endangered and threatened sea turtles that may be killed incidental to shrimp trawling, and to enhance compliance with the regulations.

575. AMENDMENT 6 TO THE FISHERY MANAGEMENT PLAN FOR COASTAL MIGRATORY PELAGIC RESOURCES OF THE GULF OF MEXICO AND SOUTH ATLANTIC

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 642

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the fishery management council.

Abstract: Amendment 6: (1) allows the earned income requirement for a commercial vessel permit for king or Spanish mackerel to be met in one of the 3 years preceding the permit application; (2) changes the fishing year for the recreational bag limits to the calendar year; (3) removes the provision for changing the recreational bag limit to zero during a fishing year; (4) increases the minimum size for king mackerel to 20 inches; (5) implements commercial vessel trip limits for Atlantic migratory group Spanish mackerel; (6) specifies periods for rebuilding overfished stocks; (7) changes the required frequency of stock assessments from annually to biennially; (8) adds to the management measures that may be implemented or modified by the framework procedure; and (9) provides for the establishment of separate subgroups and allocations for Gulf-group king mackerel.

VOL 58 ISS 78 APR 26 1993 UMI

DOC—PTO

Final Rule Stage

Abstract: Most papers filed in the Patent and Trademark Office (PTO) requiring a signature have to be submitted with an original signature. The modified regulations would permit, in most cases, the filing of photocopies or facsimile transmitted papers. Furthermore, the certificate of mailing procedures currently in effect would be extended to papers sent by facsimile transmission. These changes would reduce the burden currently faced by those submitting papers to the PTO and would make it easier to meet PTO deadlines.

606. CHANGES IN REVIVAL OF PATENT APPLICATIONS AND REINSTATEMENT OF PATENTS

Legal Authority: 35 USC 6

CFR Citation: 37 CFR 1.137; 37 CFR 1.155; 37 CFR 1.316; 37 CFR 1.317; 37 CFR 1.378(c)(3)

Legal Deadline: None

Abstract: The proposed modification would require the filing of a terminal disclaimer in patent applications abandoned for a period in excess of six months in both unavoidably and unintentionally abandoned applications. The current policy of granting exceptions, in certain limited circumstances, to the one-year limit for reviving unintentionally abandoned applications is also incorporated into the proposed rules. These changes would incorporate current policy into the regulations and would reduce delays in filing petitions to revive patent applications.

607. • PATENT INTERFERENCE PRACTICE; BURDEN OF PROOF

Legal Authority: 35 USC 6

CFR Citation: 37 CFR 1

Legal Deadline: None

Abstract: The Patent and Trademark Office plans to amend its rules of practice in patent interference cases. As a result of issues arising in some recent cases, it is apparent that parties in interference cases would be helped if the interference rules explicitly stated which party has the burden of proof when a motion is filed. PTO also plans to more clearly specify the nature of expert witness and factual witness evidence which must accompany a preliminary motion. Finally, PTO plans to add a definition of an interlocutory order, as contrasted with a final decision.

Semiannual Regulatory Agenda

VOL 58 ISS 78 AP 26 1993 UMI

DEPARTMENT OF DEFENSE (DOD)

DEPARTMENT OF DEFENSE

32 CFR Chs. I, V, VI, and VII

33 CFR Ch. II

36 CFR Ch. III

Improving Government Regulations; Semiannual Agenda of Regulations

AGENCY: Department of Defense (DoD).

ACTION: Publication of the consolidated semiannual agenda of DoD regulatory documents.

SUMMARY: The Department of Defense is publishing this consolidated semiannual agenda of regulatory documents, including those that are procurement-related, for public information and comments under E.O. 12291 "Federal Regulation" and the Office of Federal Procurement Policy Act of 1988 (41 U.S.C. 402). This agenda incorporates the objective and criteria, when applicable, of the regulatory reform program under E.O. 12291, the Federal Procurement Policy Act, and other regulatory programs. It contains DoD issuances initiated by DoD components that may have economic and environmental impact on State, local, public, or private interests under the criteria of E.O. 12291. Although most DoD issuances listed in the agenda are of negligible public impact, their nature may be of public interest and, therefore, are published to provide notice of rulemaking and an opportunity for public participation in the internal DoD rulemaking process.

This agenda updates the report published on November 3, 1992, and includes regulations expected to be issued and under review over the next 12 months. The procurement-related agenda items included in this publication will also be used by the Office of Federal Procurement Policy to publish a "Procurement Regulatory Activity Report" as required by the Office of Federal Procurement Policy Act Amendments of 1988.

The next agenda is scheduled to be published in October 1993. In addition to this agenda, DoD components also publish rulemaking notices pertaining to their specific statutory administration requirements as required.

FOR FURTHER INFORMATION CONTACT: For information concerning the overall DoD regulatory improvement program and for general semiannual agenda information, contact Mr. William P. Pearce, telephone 703-746-0933, or write to Directorate for Information Operations and Reports, Washington Headquarters Services, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302.

For questions of a legal nature concerning the agenda and its statutory requirements or obligations, write to Office of the General Counsel, 1600 Defense Pentagon, Washington, DC 20301-1600, or call 703-697-2714.

For general information on Office of the Secretary of Defense regulations, contact Mrs. Patricia H. Means, Directives Division, Directorate for Correspondence and Directives, Washington Headquarters Services; telephone 703-697-4111. For general information on the procurement-related agenda items, contact Mr. Owen L. Green III, telephone 703-697-7266, or write to Defense Acquisition Regulations System, 3062 Defense Pentagon, Washington, DC 20301-3062.

For general information on Department of the Army regulations, contact Mr. Kenneth L. Denton, telephone 703-325-6277, or write to Commander, U.S. Army Publications and Printing Command, ATTN: ASQZ-PD-SS, Room 1050, Hoffman I, Alexandria, Virginia 22331-0302.

For general information on the U.S. Army Corps of Engineers, Civil Works, regulations, contact Mr. Michael L. Davis, telephone 703-695-1376, or write to Office of the Assistant Secretary of the Army (Civil Works), 108 Army Pentagon, Washington, DC 20310-0108.

For general information on Department of the Navy regulations, contact Ms. Alcinda P. Wenberg, telephone 703-602-2542, or write to Department of the Navy, Commander, Naval Information Systems Management Center, 2211 Jefferson Davis Highway, CP5, Room 334, Arlington, Virginia 22202-3744.

For general information on Department of the Air Force regulations, contact Ms. Patsy J. Conner, telephone 703-614-3527, or write to Department of the Air Force, SAF/AAIA, 1610 Air Force Pentagon, Washington, DC 20330-1610.

For specific agenda items, contact the appropriate individual indicated in each DoD component report.

SUPPLEMENTARY INFORMATION: This consolidated agenda is composed of the regulatory status reports, including procurement-related regulatory status reports from the Office of the Secretary of Defense and the Departments of the Army, Navy, and Air Force. Included also in this agenda is the regulatory report from the U.S. Army Corps of Engineers, whose civil works functions fall under the reporting requirements of E.O. 12291 and involve water resource projects and regulation of activities in waters of the United States. Their agenda will reflect these requirements with follow-on reporting actions taken as necessary.

DoD issuances range from DoD Directives (reflecting departmental policy) to implementing instructions and regulations (largely internal and used to implement Directives). The OSD agenda section contains the primary Directives under which DoD components promulgate their implementing regulations.

To ease identification and to clarify the differences among the variety of issuances reported, they are identified by their DoD internal numbering system, which denotes component level of authority and type of issuance, in addition to the required CFR number.

In addition, this agenda, although published under the reporting requirements of E.O. 12291, will continue to be the DoD single-source reporting vehicle, which will identify issuances that are currently applicable under the various regulatory reform programs in progress. Therefore, when applicable, DoD components will identify those rules which come under the criteria of the:

a. Regulatory Flexibility Act;

b. Paperwork Reduction Act;

c. GATT International Trade Agreement; and

d. Office of Federal Procurement Policy Act Amendments of 1988.

These DoD issuances, which are directly applicable under these statutes, will be identified in the agenda and their action status indicated. Generally, the reports in this agenda will contain four sections: (1) Prerule stage; (2) proposed rule stage; (3) final rule stage; and (4) completed actions.

Although not a regulatory agency, the Department of Defense will continue to

DOD

participate in regulatory initiatives designed to reduce economic costs and unnecessary environmental burdens upon the public. Comments and recommendations are invited on the rules reported and should be addressed to the DoD component representatives identified in each section.

Although sensitive to the needs of the public and regulatory reform, the Department of Defense reserves the right to exercise the exemptions and flexibility permitted in its rulemaking process in order to proceed with its overall defense-oriented mission.

Note: The publishing of this agenda does not waive the applicability of the military affairs exemption in section 553 of title 5 and section 1 of E.O. 12291.

Dated: February 25, 1993.

J. R. Sungenis,

Director, Information Operations and Reports.

617. CONTRACTOR ADVISORY ASSISTANCE SERVICES (DAR CASE 92-D016)

Legal Authority: 5 USC 301; 10 USC 2202

CFR Citation: 48 CFR 237

Legal Deadline: None

Abstract: Modify the Defense FAR Supplement to implement changes to DOD Directive 4205.2 on Contractor Advisory and Assistant Services.

Timetable:

Action	Date	FR Cite
Case opened	06/03/92	
Next Action Undetermined		

Small Entities Affected: Businesses

Government Levels Affected: Federal

Analysis: Regulatory Flexibility Analysis

Procurement: This is a procurement-related action for which there is no statutory requirement. There is no paperwork burden associated with this action.

Agency Contact: Owen Green, Procurement Analyst, Department of Defense, Office of the Secretary, Defense Acquisition Regulations System, Room 3D139, Pentagon, Washington, DC 20301-3000, 703 697-7266

RIN: 0790–AE01

618. • PERSONAL SERVICES COMPENSATION (DAR CASE 91-085D)

Legal Authority: 5 USC 301; 10 USC 2202

CFR Citation: 48 CFR 231

Legal Deadline: None

Abstract: Modify the Defense FAR Supplement to clarify reasonableness of compensation costs resulting from Labor-Management agreements and adequately provide for maintenance for contractor compensation systems that are consistently reasonable.

Timetable:

Action	Date	FR Cite
Case opened	07/08/92	
Next Action Undetermined

Legal Authority: PL 102-121; 31 USC 1352; 5 USC 301; 10 USC 113

CFR Citation: 32 CFR 282

Legal Deadline: None

Abstract: The Department of Defense (DoD) is adopting the following interim rule establishing new restrictions on lobbying and will proceed with internal agency coordination, the results of which will be reflected in the final common rule. It is the Department of Defense's objective to establish uniform practices within the Office of the Secretary of Defense, the military departments, and the defense agencies that would be consistent with those being established by other executive departments and agencies in adopting this governmentwide rule.

Legal Authority: 33 USC 401; 33 USC 403; 33 USC 1344; 33 USC 1413

CFR Citation: 33 CFR 325, app D

Legal Deadline: None

Abstract: Procedures for the protection of endangered species in the regulatory program of the Corps of Engineers. Because of the increased emphasis being placed on endangered species by the Federal and State resource agencies, the Corps identified a need to provide more definitive guidance on implementing the Endangered Species Act (ESA) in its regulatory program. The Corps is now developing counterpart regulations with the Department of Interior. The regulations would bring together various guidance used in the past by both the Corps and DOI. The regulations will include guidance on how the ESA Amendments impact applicants for Federal permits.

747. REGULATORY PROGRAMS OF THE CORPS OF ENGINEERS

Significance: Regulatory Program

Legal Authority: 33 USC 401; 33 USC 403; 33 USC 1344; 33 USC 1413

CFR Citation: 33 CFR 320 to 330

Legal Deadline: None

Abstract: The Corps of Engineers intends to make numerous clarifications to its existing regulations at 33 CFR 320-330, to consolidate all permit regulations into one document, and to reorganize 33 CFR 325 for clarity. Since the Corps Regulatory Program final regulations were published in the Federal Register on November 13, 1986 (51 CFR 41206), there has been need to clarify several of those provisions. Since 1986, the Corps has adopted 2 new appendices at 33 CFR 325, appendices B and C, and the Corps has also adopted revisions to the Nationwide Permit Program (33 CFR 330) and Class I Administrative Civil Penalties (33 CFR 326). The Corps has proposed several changes that include revisions to the definition of discharge of Dredged Material and Fill Material and prior converted croplands. For clarity, the Corps intends to consolidate all these changes into one document.

748. NATIONWIDE PERMIT PROGRAM (NEW NATIONWIDE PERMITS FOR ADDITIONAL ACTIVITIES)

Significance: Regulatory Program

Legal Authority: 33 USC 401; 33 USC 403; 33 USC 1344; 33 USC 1413

CFR Citation: 33 CFR 330

Legal Deadline: None

Abstract: The Corps will propose new nationwide permits based on a review of activities being authorized by individual permit. The authorization of activities by nationwide permits is the most efficient and effective way to regulate minor activities with minimal impacts and thus reduce the regulatory burden of the Corps regulatory program while maintaining environmental safeguards.

749. • FLOOD CONTROL AND AGRICULTURAL WATER SUPPLY COST SHARING REQUIREMENTS UNDER THE ABILITY-TO-PAY PROVISIONS

Significance: Agency Priority

Legal Authority: 33 USC 2201 et seq

CFR Citation: 33 CFR 241

Legal Deadline: None

Abstract: A final rule implementing ability-to-pay guidelines for flood control projects was published in the Federal Register (54 FR 40572, October 2, 1989). Section 305 of Public Law 101-640, as amended by section 201 of Public Law 102-580, directs amendment of these guidelines, as appropriate, and establishment of procedures for ability-to-pay determinations for agricultural water supply projects implemented by the Corps of Engineers. The amended guidelines will establish the eligibility of sponsors of flood control and agricultural water supply projects to receive reductions in the non-Federal cost share requirements.

751. REGULATORY PROGRAM OF THE CORPS OF ENGINEERS—EXCAVATION ACTIVITIES

Significance: Agency Priority

Legal Authority: 33 USC 1344

CFR Citation: 33 CFR 323; 33 CFR 328

Legal Deadline: None

Abstract: The Corps of Engineers would clarify: 1) when excavation activities result in a discharge of dredged material; 2) when the placement of pilings results in a discharge of material; and 3) that prior croplands are not waters of the United States. A permit is required under section 404 of the Clean Water Act for discharges of dredged or fill material into waters of the United States. In the last few years confusion over these issues has increased. The Environmental Protection Agency would include consistent changes to its Clean Water Act program regulations. The first two changes are being proposed in accordance with the settlement agreement in North Carolina Wildlife Federation v. Tulloch.

752. WATER CONTROL MANAGEMENT (ER 1110-2-240), U.S. ARMY CORPS OF ENGINEERS

Legal Authority: 33 USC 709; 16 USC 791(A)

CFR Citation: 33 CFR 222.7

Legal Deadline: Final, Statutory, January 1, 1992.

Abstract: Section 310(b) of the Water Resources Development Act of 1990 requires the Corps to issue regulations providing significant opportunities for public participation including public hearings (public meetings), in developing or revising reservoir water control manuals. The Secretary of the

VOL 58 ISS 78 AP 26 1993 UMI

DOD—COE — **Completed Actions**

Army is required to issue regulations implementing this part of the act. The Army Corps of Engineers owns and operates over 500 major water projects. The Water Control Management policies and procedures followed in carrying out water control management activities are included in Engineering Regulation (ER) 1110-2-240.

753. REGULATORY PROGRAM OF THE CORPS OF ENGINEERS—ADMINISTRATIVE PERMIT

Significance: Agency Priority

Legal Authority: 33 USC 403 et seq; 33 USC 1344

CFR Citation: 33 CFR 325

Legal Deadline: None

Abstract: The Corps of Engineers would add an administrative permit process to its regulatory program regulations to provide that, except when necessary to comply with laws and regulations, a permit would be automatically granted if the Corps failed to make a final decision on a complete application within 180 days.

754. ADJUSTMENTS TO PRICES UNDER SHIPBUILDING CONTRACTS

Legal Authority: 10 USC 2405

CFR Citation: 48 CFR 52

Legal Deadline: None

Abstract: The interim rule prescribes policies and procedures to restrict contract price adjustments under shipbuilding contracts, thus implementing by regulation the requirements of 10 USC 2405. The interim rule also defines the terminology of 10 USC 2405 and promulgates a solicitation provision and contract clause on price adjustments to shipbuilding contracts. This action is intended to clarify the meaning and ensure the consistent interpretation, implementation, and administration of the statute.

Legal Authority: 5 USC 301; 10 USC 2305(a)(3)

CFR Citation: 48 CFR 5317

Legal Deadline: None

Abstract: This rule will assist replenishment spare parts contracting personnel in determining which competitive offer represents the best value to the government. Vendor Rating System (VRS) will accomplish this by providing a 12-month historical record of each contractor's quality and delivery performance on completed AFMC replenishment spare parts contracts as a numerical rating. This data will then be used to make a best-value decision in source selection awards. Pending coordination with the DOD Past Performance Coordinating Council and approval by USD(A) / DDP, the policy will be reissued for public comment.

760. AIR FORCE MATERIEL COMMAND CONTRACTOR PERFORMANCE ASSESSMENT

Legal Authority: 10 USC 2305(a)(3)

CFR Citation: 32 CFR 838

Legal Deadline: None

Abstract: This rule will expand CPAR coverage to operation and maintenance contracts in AFMC. The CPAR system has been effective in improving the ability of AFMC source selection officials when making judgments concerning past performance of contractors on AFMC systems contracts. Performance on these contracts tends to be complex and is accomplished over several years. The CPAR system provides a consistent structure for collecting performance assessments by program officials over the life of these contracts.

Semiannual Regulatory Agenda

VOL 58 ISS 78 AP 26 1993 UMI

DEPARTMENT OF EDUCATION (ED)

DEPARTMENT OF EDUCATION

Office of the Secretary

34 CFR Subtitles A and B

Unified Agenda of Federal Regulations

AGENCY: Office of the Secretary, Education.

ACTION: Publication of the semiannual agenda of Federal regulations.

SUMMARY: The Secretary of Education publishes a semiannual agenda of Federal regulations issued under the authority of section 6(b) of Executive Order 12291 "Federal Regulation." The purpose of the agenda is to encourage more effective public participation in the regulatory process by providing the public with early information about pending regulatory activities.

FOR FURTHER INFORMATION CONTACT: Questions or comments related to specific regulations listed in this agenda should be directed to Kenneth C. Depew, Division of Regulations Management, Office of the General Counsel, Department of Education, Room 5125, FOB-6, 400 Maryland Avenue SW., Washington, DC 20202-2241; telephone: (202) 401-2884. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC, 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., eastern time.

SUPPLEMENTARY INFORMATION: Section 5 of Executive Order 12291, dated February 17, 1981, and the Regulatory Flexibility Act, 5 U.S.C. 602(a), require the Department of Education to publish, in October and April of each year, (1) an agenda of proposed regulations that the Agency has issued or expects to issue and currently effective rules that are under Agency review and (2) a brief description of the subject area of any rule that the Agency expects to propose or promulgate that is likely to have a significant impact on a substantial number of small entities. The agenda includes both notices of proposed rulemaking (NPRMs) currently being drafted and pending final regulations.

For each set of regulations listed, the agenda provides the title of the document, the type of document, a citation of any rulemaking or other action taken since publication of the most recent agenda, and planned dates of future rulemaking. In addition, the agenda provides the following information:

- An abstract, which includes a description of the problem to be addressed, any principal alternatives being considered, and potential costs and benefits of the action.
- An indication of whether the planned action is likely to have significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act (5 U.S.C. 601(b)).
- A reference to where a reader can find the current regulations in the Code of Federal Regulations.
- A citation of legal authority.
- The name, address, and telephone number of the contact person at the Department from whom a reader can obtain additional information regarding the planned action.
- An indication if the action is a priority and the criteria used in determining the priority status.

If the "Abstract" section of an entry refers readers to the preamble, it means that amendments to those particular regulations would be designed (1) to effect regulatory relief, including reducing paperwork and compliance burdens, improving cost effectiveness, and to the extent possible, vesting greater discretion in State and local agencies and (2), if necessary, to clarify and simplify requirements governing that program.

The Department also will review all regulations that will be published to ensure that, if appropriate, those regulations support the National Education Goals. These goals call for:

- All children starting school ready to learn;
- Increasing the high school graduation rate to at least 90 percent;
- U.S. students demonstrating competency in challenging subject matter, including English, mathematics, science, history, and geography;
- U.S. students becoming first in the world in science and mathematics achievement;
- Adult Americans becoming literate and possessing the knowledge and skills necessary to compete in a global economy and to exercise the rights and responsibilities of citizenship; and
- Freeing every school of drugs and violence so as to offer a disciplined environment conducive to learning.

This publication in the **Federal Register** does not impose any binding obligation on the Department with regard to any specific item on the agenda. Regulatory action in addition to the items listed is not precluded. Dates of future regulatory action are subject to revision in subsequent agendas.

The October agenda will reflect revised schedules for publication of regulations needed to implement the Higher Education Amendments of 1992 in accordance with section 431(g) of the General Education Provisions Act.

Dated: February 26, 1993.

Steven Y. Winnick,

Acting General Counsel.

DEPARTMENT OF EDUCATION (ED)
Departmental Management (EDMAN)

Proposed Rule Stage

774. UNIFORM ADMINISTRATIVE REQUIREMENTS FOR GRANTS AND COOPERATIVE AGREEMENTS

Legal Authority: 20 USC 1221e-3(a)(1)

CFR Citation: 34 CFR 074; 34 CFR 080

Legal Deadline: None

Abstract: These regulations remove Part 80 and revise Part 74 to establish certain governmentwide administrative requirements for grants and cooperative agreements to State and local governments, institutions of higher education, hospitals, and nonprofit and commercial organizations. These regulations were based on an OMB proposal to combine OMB Circulars A-102 (Grants and Cooperative Agreements with State and Local Governments) and A-110 (Grants and Cooperative Agreements with Institutions of Higher Education, Hospitals and Other Nonprofit Organizations) into a single, unified grants management circular. On October 29, 1990, the Office of Management and Budget (OMB) published a notice in the Federal Register (55 FR 45289) that cancelled plans to merge OMB Circulars A-102 and A-110. Therefore, the Department does not intend to combine administrative requirements for grants and cooperative agreements for all types of recipients into 34 CFR Part 74. The Department will revise the substance of the current Part 74 after OMB issues a final version of OMB Circular A-110, which is currently undergoing revision.

775. EDUCATION DEPARTMENT GENERAL ADMINISTRATIVE REGULATIONS—AMENDMENTS III

Legal Authority: 20 USC 1221e-3(a)(1)

CFR Citation: 34 CFR 075; 34 CFR 076

Legal Deadline: None

Abstract: These proposed regulations would revise Part 75 to clarify various issues related to indirect cost rates, including the appropriate application of restricted indirect cost rates. These regulations would also affect Part 76 because that part incorporates the Part 75 restricted indirect cost rate rules.

780. STATE-ADMINISTERED PROGRAMS UNDER THE REHABILITATION ACT OF 1973

Legal Authority: 20 USC 1221e-3(a)(1); 20 USC 3474

CFR Citation: 34 CFR 076; 34 CFR 080

Legal Deadline: None

Abstract: These regulations provide flexibility to States in administering Federal grants by extending the time period for liquidation of certain kinds of obligations under State-administered programs of the Department's Rehabilitation Act of 1973. During the last session, Congress passed an amendment to the Rehabilitation Act of 1973, which has the effect of making funds available under that program, also available for obligation an additional year. Therefore, there is no need for these regulations. The Department will publish a notice withdrawing this rulemaking action.

781. TECHNICAL AMENDMENTS TO PROGRAM REGULATIONS

Legal Authority: 20 USC 1221e-3(a)(1)

CFR Citation: 34 CFR 074; 34 CFR 080

Legal Deadline: None

Abstract: On November 4, 1988, the Department published an NPRM proposing to establish certain governmentwide administrative requirements for grants and cooperative agreements to State and local governments, institutions of higher education, hospitals, and nonprofit and commercial organizations. The regulations would appear in a revised 34 CFR part 74. On October 29, 1990, the Office of Management and Budget (OMB) published a notice in the Federal Register (55 FR 45289) that cancelled plans to merge OMB Circulars A-102 and A-110. Therefore, the Department does not intend to combine administrative requirements for grants and cooperative agreements for all types of recipients into 34 CFR part 74. However, the Department intends to revise program regulations to cite the applicable administrative requirements found in EDGAR. A notice amending certain program regulations will be published in the Federal Register after final action is taken in the effort to reorganize EDGAR.

RIN: 1840–AB97

829. • FEDERAL DIRECT STUDENT LOAN PROGRAM

Legal Authority: 20 USC 1071 to 1087a

CFR Citation: 34 CFR 685

Legal Deadline: NPRM, Statutory, April 1993. Final, Statutory, July 1993.

Abstract: These proposed regulations would implement certain provisions of Higher Education Amendments of 1992. The regulations would establish a new loan demonstration program. Under this demonstration program, student and parent loan capital would be provided directly by the Federal Government rather than through private lenders.

830. • FEDERAL PELL GRANT PROGRAM; PRESIDENTIAL ACCESS SCHOLARSHIP PROGRAM

Legal Authority: 20 USC 1070a

CFR Citation: 34 CFR 690; 34 CFR 691

Legal Deadline: None

Abstract: FEDERAL PELL GRANT PROGRAM: These proposed regulations would amend the Pell Grant Program regulations to incorporate statutory changes made by the 1992 Higher Education Amendments. These changes would alter how institutions administer the Federal Pell Grant program and incorporate new requirements that the Federal Pell Grants supplement and not supplant a State's postsecondary educational expenditures for incarcerated students within that State.

PRESIDENTIAL ACCESS SCHOLARSHIP PROGRAM: These proposed regulations implement the Presidential Access Scholarship Program and provide the requirements that States, institutions, and students must follow to participate in and administer the Presidential Access Scholarship Program.

832. • NATIONAL EARLY INTERVENTION SCHOLARSHIP AND PARTNERSHIP PROGRAM

Legal Authority: 20 USC 1070a-21 to 1070a-27

CFR Citation: 34 CFR 693

Legal Deadline: None

Abstract: These proposed regulations would implement the new National Early Intervention Scholarship and Partnership Program under Chapter 2, Subpart 2, Part A, Title IV, of the Higher Education Act of 1965, Higher Education Amendments of 1992, enacted July 23, 1992 (Pub. L. 102-325). These proposed regulations also specify the role of the Secretary, the responsibilities of the student applicant eligibility requirements, and the criteria by which the Secretary approves a State's application to participate in the program.

DEPARTMENT OF ENERGY (DOE)

DEPARTMENT OF ENERGY

10 CFR Chs. II, III, and X

48 CFR Ch. 9

Regulatory Agenda

AGENCY: Department of Energy.

ACTION: April 1993 regulatory agenda.

SUMMARY: In order to make Government more responsive to the citizens of the United States and to assist in reducing regulatory burdens, the Department of Energy (DOE) is publishing this regulatory agenda of: (i) Rulemakings currently in progress and rulemakings which currently are expected to begin during the coming year; (ii) any existing rules which are being reviewed within DOE to determine whether modifications should be proposed based upon experience; and (iii) rulemakings and rule reviews which have been completed since publication of the last regulatory agenda for October 1992 (57 FR 51252, November 3, 1992). This regulatory agenda also contains information on any rulemakings which are likely to have a significant economic impact on a substantial number of small entities, and it contains additional data on procurement-related actions.

FOR FURTHER INFORMATION CONTACT: For further information about any particular item on the regulatory agenda, please contact the individual listed under that item. For further information on the regulatory agenda in general, please contact: Theodore ("Ted") Wilson, DOE, Room 6B-256, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-9507.

SUPPLEMENTARY INFORMATION: Covered agencies publish regulatory agendas under Executive Order 12291 in April and October of each year. Under the Executive order, the Office of Management and Budget (OMB) sets standards and procedures for the preparation of these agendas. Regulatory agendas are important to efforts to reduce the burdens of existing and future regulations, increase agency accountability for regulatory actions, provide for oversight of the regulatory process, minimize duplication and conflict of regulations, and insure well-reasoned regulations. DOE has made considerable progress in attaining these objectives.

Executive Order 12291 provides that the regulatory agenda may be incorporated with the "regulatory flexibility agenda" required under the Regulatory Flexibility Act, 5 U.S.C. 602 *et seq.* The regulatory flexibility agenda must cover any rule which the agency expects to propose or promulgate which is "likely to have a significant economic impact on a substantial number of small entities." Its information requirements are similar to those of the Executive order. The regulatory flexibility agenda required under 5 U.S.C. 602(a) is incorporated in today's notice.

The Office of Federal Procurement Policy Act Amendments of 1988, 41 U.S.C. 402, require publication, twice a year, of a "Procurement Regulatory Activity Report." As determined by OMB, agency information is now in the regulatory agenda for use by the Office of Federal Procurement Policy in producing these reports.

A Note on the April 1993 Regulatory Agenda

This semiannual updating of the regulatory agenda comes at a time when the regulatory policies and practices of DOE are undergoing review by the Office of the Secretary and senior policy staff. Moreover, the Energy Policy Act of 1992, Public Law 102-486 (October 24, 1992), recently established an array of new DOE regulatory responsibilities. At this time, DOE is unable to provide sufficiently informative regulatory agenda entries for many of these new responsibilities, since planning for their implementation still is in progress. Accordingly, entries for most new Energy Policy Act regulatory actions first will appear in the next regulatory agenda in October 1993. In addition, all entries appearing in today's notice are subject to further policy review before publication for comment or initiating action.

Contents and Format of the Regulatory Agenda

Entries appended to this notice reflect the status of activities as of approximately February 15, 1993. They are divided into categories, first by subagencies and then according to their stage of rulemaking action: Prerule, proposed rulemaking, final rulemaking, or completed action.

Appended entries contain the following information: (1) The organizational unit responsible for the regulation; (2) the Regulation Indentifier Number (RIN) assigned by OMB; (3) title; (4) significance (that is, whether the regulation appears in the Regulatory Program prepared under Executive Order 12498 and, if it does not, whether it is nevertheless a DOE priority); (5) the name, title, address, and telephone number of a person who is knowledgeable about the regulation; (6) effects on small business (that is, whether the action is likely to have a significant economic impact on a substantial number of "small entities" as defined by the Regulatory Flexibility Act) and effects on Federal, State, and local governments; (7) CFR citation (that is, the affected portion of the Code of Federal Regulations); (8) legal authority (that is, a citation to the section of the United States Code (USC), Public Law (PL), or Executive order (EO) that authorizes the regulatory action); (9) abstract (that is, a description of the problem the regulation will address, the regulatory approach under consideration, the alternatives being considered for addressing the problem, and the potential costs and benefits of the action); (10) legal deadline (that is, the statutory or judicial deadline, if any); and (11) timetable (that is, the dates and citations, if applicable, for all past stages and the date for at least the next stage of the rulemaking). The timetable for completed actions (that is, regulations completed or withdrawn and reviews completed since the preceding regulatory agenda) gives the completion date and any related citation.

For each procurement-related regulatory action, additional information is provided on whether there is a statutory requirement for the action and whether there is a paperwork burden associated with the action.

A draft of this regulatory agenda has been transmitted to the Chief Counsel for Advocacy of the U.S. Small Business Administration for comment, if any, pursuant to 5 U.S.C. 602(b).

DOE's next regulatory agenda will be published in October 1993.

Issued in Washington, DC, on March 23, 1993.

Eric J. Fygi,

Acting General Counsel.

885. ENERGY EFFICIENCY STANDARDS FOR CENTRAL AIR CONDITIONERS, HEAT PUMPS, FURNACES, REFRIGERATORS, REFRIGERATOR-FREEZERS AND FREEZERS

Significance: Regulatory Program

Legal Authority: 42 USC 6295

CFR Citation: 10 CFR 430.32

Legal Deadline: Final, Statutory, January 1, 1994.
EPCA requires DOE determinations on need to amend Federal appliance standards in a period from 07/01/89 to 01/01/94. The statute requires completion of a second reanalysis of all (cont)

Abstract: The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy-efficiency standards levels for most types of major appliances and generally requires DOE to undergo two subsequent rulemakings, at specified times, to determine whether the extant standard for a covered product should be amended. These products are: refrigerators, refrigerator-freezers, and freezers; room air conditioners; central air conditioners and central air conditioning heat pumps; water heaters; pool heaters; direct heating equipment; furnaces; dishwashers; clothes washers; clothes dryers; kitchen ranges and ovens; and fluorescent lamp ballasts. Other appliances, including television sets, may be regulated by the Department. This rulemaking will review the statutory standards for central air conditioners and furnaces to determine whether those levels need to be amended. This is the second reanalysis of the standard levels for refrigerators, refrigerator-freezers and freezers.

LEGAL DEADLINE CONT: then-extant standards in a period from 7/1/94 to 12/31/2006. EPCA requires a Final Rule by May 14 1996, in the second reanalysis of clothes washer standards. Prior to the April 1992 Agenda, clothes washer standards were included in the multi-product review reported in RIN 1904-AA38. On February 26, 1992, DOE granted a petition to remove clothes washer until the moratorium expires.

887. EQUIVALENT PETROLEUM-BASED FUEL ECONOMY CALCULATION FOR ELECTRIC VEHICLES

Legal Authority: PL 96-185, Sec 18; PL 94-413, Sec 13(c); PL 94-163, Sec 503(a)(3)

CFR Citation: 10 CFR 474

DOE—CE

Proposed Rule Stage

Legal Deadline: None

Abstract: The final rule on the inclusion of electric vehicles in the Corporate Average Fuel Economy (CAFE) program was issued by DOE on April 15, 1981. It established a methodology for determining the equivalent petroleum-based fuel economy of electric vehicles so that they could be included in a manufacturer's overall CAFE program. This methodology was based on several factors including the energy efficiency of the vehicle, the efficiency of electricity generation and transmission, the fuels used to generate electricity, and the driving patterns of electric vehicles. This rulemaking would update the factors in this methodology that are necessary for calculating the CAFE credits for electric vehicles.

888. TEST PROCEDURES FOR FURNACES/BOILERS, VENTED HOME HEATING EQUIPMENT, AND POOL HEATERS—AMENDMENT

Legal Authority: 42 USC 6293

CFR Citation: 10 CFR 430

Legal Deadline: None

Abstract: These revisions to the test procedures for furnaces and boilers, vented home heating equipment and pool heaters in accordance with the Energy Policy and Conservation Act, as amended, would incorporate by reference ASHRAE Standard 103-1988 and would establish a new annual efficiency descriptor. This revision is prompted by the ASHRAE revision of Standard 103-1982 and the need to add annual efficiency as a new descriptor.

889. TEST PROCEDURES FOR CENTRAL AIR CONDITIONERS AND HEAT PUMPS—AMENDMENTS

Legal Authority: 42 USC 6293

CFR Citation: 10 CFR 430

Legal Deadline: None

Abstract: These revisions to the test procedures for central air conditioners and heat pumps in accordance with the Energy Policy and Conservation Act, as amended, will include appliances that perform water heating in addition to air conditioning or heating. This is prompted by the issuance of a Decision and Order granting a waiver to the Carrier Corporation for its Hydrotech 2000 integrated heat pump/water heater (Waiver CAC-005, 55 FR 13607, April 11, 1990).

890. • TEST PROCEDURES FOR WATER HEATERS, KITCHEN RANGES, OVENS AND MICROWAVES, AND CLOTHES WASHERS—AMENDMENT

Legal Authority: 42 USC 6293

CFR Citation: 10 CFR 430

Legal Deadline: None

Abstract: In accordance with the Energy Policy and Conservation Act as amended, the test procedures for water heaters, kitchen ranges, ovens, microwaves, and clothes washers are being revised. Rulemaking issues include: with respect to water heater test procedures, inclusion of electric instantaneous water heaters and storage water heaters with less than 20 gallons volume and revision of the first hour rating; with respect to test procedures for kitchen ranges, ovens and microwaves, revision of the constant for annual cooking energy and improvements in measurement of microwave efficiencies; and with respect to clothes washer test procedures, measurements for water usage and water retention.

891. • FEDERAL BUILDING ENERGY STANDARDS

Legal Authority: 42 USC 6834, Energy Policy Act of 1992, sec 101(a)(2)

CFR Citation: 10 CFR 435

Legal Deadline: Final, Statutory, October 24, 1994.

Abstract: Title III of the Energy Conservation and Production Act as amended by the Energy Policy Act of 1992 (PL 102-486, October 24, 1992) provides that DOE establish Federal building energy standards that require in new Federal buildings those energy efficiency measures that are technologically feasible and economically justified. The standards for Federal buildings are intended to parallel closely the voluntary building energy codes of the Energy Policy Act for private sector construction. Interim

892. ENERGY CONSERVATION PERFORMANCE STANDARDS FOR NEW BUILDINGS; SUBPART A - COMMERCIAL AND MULTI-FAMILY HIGH RISE RESIDENTIAL BUILDINGS

Significance: Regulatory Program

Legal Authority: 42 USC 6831 et seq

CFR Citation: 10 CFR 435

Legal Deadline: Final, Statutory, October 1983.

Abstract: Title III of the Energy Conservation and Production Act, as amended, required the development and promulgation of energy performance standards for new buildings. In order to comply with this requirement, DOE promulgated Subpart A interim standards for commercial buildings and multi-family high rise buildings. The standards are mandatory for the Federal sector and voluntary for all others. DOE conducted demonstrations of interim standards and reported its findings to Congress. The Energy Policy Act of 1992 deleted the requirement for these standards and established other requirements for Federal building energy standards. See RIN 1904-AA53.

893. ENERGY CONSERVATION PERFORMANCE STANDARDS FOR NEW BUILDINGS; SUBPART C - MANDATORY PERFORMANCE STANDARDS FOR NEW FEDERAL RESIDENTIAL BUILDINGS

Significance: Regulatory Program

Legal Authority: 42 USC 6831 et seq

CFR Citation: 10 CFR 435

Legal Deadline: Final, Statutory, October 1983.

Abstract: Title III of the Energy Conservation and Production Act, as amended, required the development and promulgation of energy performance standards for new buildings. In order to comply with this requirement, DOE promulgated Subpart C, interim mandatory standards for new Federal residential buildings. DOE conducted demonstrations of interim standards and reported its findings to Congress. The Energy Policy Act of 1992 deleted the requirement for these standards and established other requirements for Federal building energy standards. See RIN 1904-AA53.

894. ENERGY CONSERVATION PERFORMANCE STANDARDS FOR NEW BUILDINGS; SUBPART B - VOLUNTARY PERFORMANCE STANDARDS FOR NEW NON-FEDERAL RESIDENTIAL BUILDINGS

Significance: Regulatory Program

Legal Authority: 42 USC 6831 et seq

CFR Citation: 10 CFR 435

Legal Deadline: Final, Statutory, October 1983.

Abstract: Title III of the Energy Conservation and Production Act, as amended, required the development and promulgation of voluntary energy performance standards for new buildings. In order to comply with this requirement, DOE developed and proposed Subpart B, interim voluntary standards for new non-Federal residential buildings. The Energy Policy Act of 1992 deleted the requirement for these standards.

895. AMENDMENTS TO THE STATE ENERGY CONSERVATION PROGRAM

Legal Authority: 42 USC 6201; PL 101-440

CFR Citation: 10 CFR 420

Legal Deadline: None

Abstract: This rulemaking amends the regulations for the State Energy Conservation Program to incorporate changes mandated by the State Energy Efficiency Programs Improvement Act of 1990 (SEEPIA), (Public Law 101-440). Changes required by SEEPIA include: Updating State energy efficiency goals; providing for an energy emergency planning program; broadening the range of permissible elements of State energy conservation plans; repealing the supplemental State energy conservation plan; and establishing an energy technology commercialization services program.

896. AMENDMENTS TO THE LOW-INCOME WEATHERIZATION ASSISTANCE PROGRAM

Legal Authority: 42 USC 6861 et seq; PL 101-440

CFR Citation: 10 CFR 440.1 to 440.30

Legal Deadline: None

Abstract: The regulation incorporates changes to the Weatherization Program as set forth in the State Energy Efficiency Programs Improvement Act of 1990. These changes include: Adding cooling measures and renter protection requirements to the program, updating allocation formula data annually, allowing landlord contributions, increasing subgrantee administrative cost allowances, providing a waiver to the 40 percent materials requirement, indexing the average $1600 per-unit cost limitation, and revising production incentives. The regulation also makes administrative changes based on program experience over the last five years.

897. GRANT PROGRAMS FOR SCHOOLS AND HOSPITALS, LOCAL GOVERNMENT BUILDINGS AND PUBLIC CARE INSTITUTIONS—AMENDMENTS

Legal Authority: 42 USC 6371 et seq; PL 101-440, Sec 6

CFR Citation: 10 CFR 455

Legal Deadline: None

Abstract: This regulation is being revised to incorporate changes made by the State Energy Efficiency Programs Improvement Act of 1990, and to provide clearer and/or more flexible requirements for various aspects of program operation. Among the changes are several to add new types of State grants for additional State activities to support the program; more flexible requirements for energy audits and related activities; broadened eligibility for buildings and improvements; more specific requirements for describing and/or supporting recommendations for improvements; and an increased minimum State administrative grant amount.

Proposed Rule Stage

898. PERSONNEL ASSURANCE PROGRAM

Significance: Regulatory Program

Legal Authority: 42 USC 2012 et seq, Atomic Energy Act of 1954

CFR Citation: 10 CFR 711

Legal Deadline: None

Abstract: The Department of Energy (DOE) conducts a Personnel Assurance Program (PAP) under DOE 5610.11 'Program to Prevent Accidental or Unauthorized Nuclear Explosive Detonation." The PAP was created in order to assure the reliability and safety of individuals in certain critical positions and is a part of the DOE nuclear weapons and explosives safety program. To further minimize the potential risks to personnel, public health and safety, and national security, the Department now proposes this rule which describes the PAP and provides for testing for alcohol under certain circumstances and for possible use of illegal drugs by DOE Federal and contractor employees requiring PAP certification or recertification. The DOE employees under the PAP are part of the DOE Drug-Free Workplace Program (DOE 3792.3). The DOE contractors under the PAP are a part of the Workplace Substance Abuse Programs at DOE Facilities (proposed 10 CFR 707).

899. CRITERIA AND PROCEDURES FOR DETERMINING ELIGIBILITY FOR ACCESS TO CLASSIFIED MATTER OR SIGNIFICANT QUANTITIES OF SPECIAL NUCLEAR MATERIAL

Legal Authority: 42 USC 2161; 42 USC 2165; 42 USC 2201; EO 10450; EO 10865

CFR Citation: 10 CFR 710, subpart A

Legal Deadline: None

Abstract: The criteria and procedures will be revised to permit: Managers to render final determinations when an individual processed under part 710 declines the right to a hearing; termination of processing or administrative termination of security clearance when an individual refuses to submit or complete required security forms or be subject to a personnel security interview; and final determinations to be rendered by the Director, Office of Security Affairs, who has been delegated this authority by the Secretary of Energy. This action would also change the manner in which hearing officers and Personnel Security Review Examiners are appointed.
